TITLE 82

MINERALS, OIL, AND GAS

Ch.
1. General Provisions.
2. Mining Generally.
3. Coal Mining. Repealed.
4. Reclamation.
Chapters 5 through 9 reserved.
10. Oil and Gas — General Provisions.
11. Oil and Gas Conservation.
Chapters 12 through 14 reserved.
15. Regulation of Petroleum Products.

CHAPTER 1

GENERAL PROVISIONS

Part 1 — Geophysical Exploration

82-1-101. Persons required to comply.
82-1-102. Doing business within state — resident agent.
82-1-103. Notice of intention to explore.
82-1-104. Indemnification of property owners — restoration of surface.
82-1-105. Exploration permit.
82-1-106. County clerk to notify board of issuance of permit — compliance.
82-1-107. Permitholder to furnish information to surface owner.
82-1-108. Filing record of work performed.
82-1-109. Enforcement by county attorneys.
82-1-110. Penalty.
82-1-111. Definitions.

Part 2 — Cancellation and Forfeiture of Oil, Gas, or Mineral Leases

82-1-201. Release of record upon forfeiture, cancellation, or expiration of lease — penalty.
82-1-202. Action to compel release — procedure without court action.
82-1-203. Demand for release prior to action.
82-1-204. Joinder of plaintiffs in actions concerning oil and gas leases.

Part 3 — Trusts for Unlocatable Mineral Owners

82-1-301. Definition.
82-1-302. Creation of trust for unlocatable mineral, leasehold, or royalty interest owners.
82-1-303. No further liability for petitioner.
82-1-304. Administration of trust.
82-1-305. Trust for unlocatable mineral, leasehold, and royalty interest owners — penalty.
82-1-306. Filing of addresses.

Part 4 — Constitutional Challenges

82-1-401. Determination of constitutionality.

Part 5 — Exemption of Fossils

82-1-501. Fossils exempted.

Part 6 — Critical Infrastructure Facility — Trespass

82-1-601. Definitions.
82-1-602. Criminal penalties.
82-1-603. Civil penalties.
82-1-604. Exempt activities.

Chapter Cross-References

The Montana Resource Indemnity Trust and Ground Water Assessment Act, Title 15, ch. 38.

Part 1

Geophysical Exploration

Part Cross-References

Reckless or malicious use of explosives, 45-8-333.

Action in response to complaints related to use of explosives, 82-4-356.

Surface owner damage and disruption compensation, Title 82, ch. 10, part 5.

82-1-101. Persons required to comply. (1) A person, firm, or corporation operating individually or through agents within the state of Montana for the purpose of seismic exploration in which exploration entry is made upon the surface estate for the acquisition of geophysical data for any purpose whatsoever, and which person, firm, or corporation either through its own employees or by hiring the services of others operates seismograph crews, as the term is generally known, shall comply with the following provisions of this part; provided, however, that compliance with the provisions of this part by a seismograph crew or its employer shall constitute compliance herewith by that person, firm, or corporation who has engaged the services of such crew or its employer as an independent contractor insofar as the geophysical operations of such crew are concerned.

(2) The board of oil and gas conservation shall adopt rules:

(a) requiring adequate identification of seismic exploration crews operating in this state;

(b) designating areas where seismic exploration and activities may not be allowed; and

(c) regulating the plugging and abandonment of seismic shot holes.

History: En. Sec. 1, Ch. 235, L. 1955; R.C.M. 1947, 69-3301; amd. Sec. 1, Ch. 116, L. 1983; amd. Sec. 1, Ch. 339, L. 1985; amd. Sec. 1, Ch. 190, L. 1989.

Cross-References

Adoption and publication of rules, Title 2, ch. 4, part 3.

Administrative rules governing use of explosives — Department of Justice, 50-3-102.

Notice of intention to drill or conduct seismic operations to be filed with Board of Oil and Gas Conservation, 82-11-122.

82-1-102. Doing business within state — resident agent. A person, firm, or corporation shall be deemed to be doing business within the state of Montana when engaged in such geophysical exploration within the boundaries of this state and shall, if not already qualified to do business within this state with a designation of an agent within the state for service of process prior to such time, file with the secretary of state of the state of Montana an authorization, which authorization shall designate a resident agent for the service of process in any action which may be pending in a court in this state, which cause of action may have arisen out of such geophysical exploration.

History: En. Sec. 2, Ch. 235, L. 1955; R.C.M. 1947, 69-3302.

82-1-103. Notice of intention to explore. A person, firm, or corporation desiring to engage in geophysical exploration within the state of Montana shall file a notice of intention to engage in the exploration with the county clerk and recorder in each county in which exploration is to be carried on or engaged in. The notice shall be filed prior to the actual commencement of the exploration.

History: En. Sec. 3, Ch. 235, L. 1955; amd. Sec. 34, Ch. 39, L. 1977; R.C.M. 1947, 69-3303.

Cross-References

Fees for recording by County Clerk, 7-4-2631.

Notice of drilling operations, 82-10-503.

Notice of intention to drill or conduct seismic operations to be filed with Board of Oil and Gas Conservation, 82-11-122.

82-1-104. Indemnification of property owners — restoration of surface. (1) (a) Prior to performing seismic activity, a person, firm, or corporation shall file with the secretary of state a surety bond, cash, certificate of deposit, or other instrument acceptable to the secretary of state in the amount of $10,000 for a single seismic crew or a blanket surety bond, cash, certificate of deposit, or other instrument acceptable to the secretary of state in the amount of $25,000 for all seismic crews operating within the state for the person, firm, or corporation to indemnify the owners of property within this state for physical damages to their property resulting from any seismic exploration. Partial or complete forfeiture of the surety bond, cash, certificate of deposit, or other instrument acceptable to the secretary of state must be determined by the appropriate court of civil jurisdiction.

(b) The secretary of state may charge a fee for the filing of the surety bond, cash, certificate of deposit, or other instrument required under this section. The fee must be set by rule and deposited in accordance with 2-15-405.

(2) Unless the owner of the surface rights and the person, firm, or corporation conducting seismic activity agree otherwise, it is the obligation of the person, firm, or corporation upon completion of seismic exploration to plug all "shot holes" in the manner specified by the board

of oil and gas conservation to contain any water within its native strata by filling the holes with bentonite mud, cement, or other material approved by the board of oil and gas conservation to contain the water. In addition, the holes must be capped in a manner and with a material specified by the board of oil and gas conservation so that the top of the cap is a sufficient depth below the surface of the land to allow cultivation. The portion of the holes above the cap must be filled with native material.

(3) Upon completion of any seismic exploration, the person, firm, or corporation conducting the exploration shall remove all stakes, markers, cables, ropes, wires, and debris or other material used in the exploration and shall also restore the surface around any shot holes as near as practicable to its original condition.

(4) The surety bond, cash, certificate of deposit, or other instrument acceptable to the secretary of state must remain on file with the secretary of state so long as the exploration is conducted, plus an additional 5 years after the cessation of the exploration activities. The aggregate liability for the exploration activities may not exceed the amount of the surety bond, cash, certificate of deposit, or other instrument acceptable to the secretary of state. Upon the filing of the surety bond, cash, certificate of deposit, or other instrument acceptable to the secretary of state, the secretary of state shall issue to the person, firm, or corporation a certificate showing that the surety bond, cash, certificate of deposit, or other instrument acceptable to the secretary of state has been filed. The certificate must contain the name of the designated resident agent within the state for service of process for the person, firm, or corporation.

History: En. Sec. 4, Ch. 235, L. 1955; amd. Sec. 1, Ch. 175, L. 1961; amd. Sec. 1, Ch. 272, L. 1977; R.C.M. 1947, 69-3304; amd. Sec. 2, Ch. 116, L. 1983; amd. Sec. 2, Ch. 339, L. 1985; amd. Sec. 10, Ch. 33, L. 2007; amd. Sec. 2, Ch. 69, L. 2015.

Cross-References

Accrual of cause of action for waste, trespass, or injury committed during exploration, 27-2-303.
Suretyship, Title 28, ch. 11, part 4.
Enforcement by County Attorney, 82-1-109.
Inventory of abandoned shot holes, 82-10-402.
Waste of oil and gas prohibited, 82-11-121.
Restrictions on oil and gas operations by Board of Oil and Gas Conservation, 82-11-123.
Requirements relating to waste preservation, 82-11-124.

82-1-105. Exploration permit. (1) Upon compliance with the provisions of this section, namely the filing of a notice of intention to engage in the exploration and a certificate or a copy of the certificate from the secretary of state certifying the name and address of the resident agent for service of process for the person, firm, or corporation desiring to engage in the exploration and certifying that the required surety bond has been filed with the secretary of state, the county clerk and recorder shall issue to the person, firm, or corporation a geophysical exploration permit.

(2) The permit must show:

(a) the name of the person, firm, or corporation and the principal place of business;

(b) if a firm or corporation, the names and addresses of its officers;

(c) the name and address of the resident agent for service of process for the person, firm, or corporation;

(d) that a notice of intention to engage in geophysical exploration has been filed; and

(e) that a good and sufficient surety bond has been filed by the person, firm, or corporation, naming the surety company and giving its address.

(3) The permit must be signed by the county clerk and recorder or the clerk and recorder's deputy and bear the official county seal. The permit is valid and effective for all geophysical crews of the permittee during the calendar year in which it is issued.

(4) The cost of the permit is $5 per calendar year or any portion of the calendar year for which issued, and the revenue realized from the permit must go to the county issuing the permit. The funds must be applied toward payment of the cost of printing the permits, which must be printed at the county seat, and excesses must be deposited in the county's general fund.

(5) If printed forms are not available at the time any person, firm, or corporation desires the permit and qualifies for its issuance, a typewritten or other form of reproduction of the permit may be used, the fee of $5 must still be paid for its issuance, and this fee must be disposed of in the same manner.

(6) The permit or a copy of the permit must be carried by the person or by the agent of the firm or corporation at all times during the period of the geophysical exploration and must be exhibited upon demand of any county or state official.

History: **En. Sec. 5, Ch. 235, L. 1955; amd. Sec. 35, Ch. 39, L. 1977; R.C.M. 1947, 69-3305; amd. Sec. 2711, Ch. 56, L. 2009.**

Cross-References

Inventory of abandoned shot holes — approval of drilling permits, 82-10-402.

82-1-106. County clerk to notify board of issuance of permit — compliance. (1) The county clerk and recorder of the county in which a permit for geophysical activity is issued will immediately forward notice of the issuance of such permit to the board of oil and gas conservation.

(2) The board shall notify the county clerk and recorder of the county if the person, firm, or corporation which has obtained a permit is not in compliance with any applicable requirement for engaging in geophysical activity within the state.

(3) If the board of oil and gas conservation determines that a person, firm, or corporation has violated any provisions of this part, the board shall take necessary action to assure compliance.

History: **En. 69-3305.1 by Sec. 2, Ch. 272, L. 1977; R.C.M. 1947, 69-3305.1(1) thru (3).**

Cross-References

Board of Oil and Gas Conservation — composition — allocation — quasi-judicial, 2-15-3303.

Notice of intention to drill or conduct seismic operations to be filed with Board of Oil and Gas Conservation, 82-11-122.

82-1-107. Permitholder to furnish information to surface owner. (1) Before commencing seismic activity, the person, firm, or corporation conducting the seismic activity shall notify the surface owner, as defined in 82-10-502, as to the approximate time schedule of the planned activity and shall provide copies of Title 82, chapter 10, part 5, this part, and, if available, a current publication produced by the environmental quality council entitled "A Guide to Split Estates in Oil and Gas Development". Upon request, the following information must also be furnished:

(a) the name and permanent address of the seismic exploration firm, along with the name and address of the firm's designated agent for the state if different from that of the firm;

(b) evidence of a valid permit to engage in seismic exploration;

(c) the name and address of the company insuring the seismic firm or, if self-insured, evidence of the self-insurance;

(d) the number or other identifying information for the surety bond, cash, certificate of deposit, or other instrument acceptable to the secretary of state and required in 82-1-104;

(e) a description of the planned seismic activity and where it will take place; and

(f) the anticipated need, if any, to obtain water from the surface owner during planned seismic activity.

(2) The surface owner is responsible for providing the permitholder with the name and permanent address of a responsible person with whom communication may be maintained.

(3) The surface owner is responsible for providing the name and address of the permitholder to any lessees, tenants, or other parties responsible for surface operations on the property.

History: **En. 69-3305.1 by Sec. 2, Ch. 272, L. 1977; R.C.M. 1947, 69-3305.1(4); amd. Sec. 3, Ch. 339, L. 1985; amd. Sec. 11, Ch. 33, L. 2007; amd. Sec. 1, Ch. 57, L. 2007.**

82-1-108. Filing record of work performed. (1) Within 3 months from the day that any firing of shotpoints in seismic exploration is done by a person, firm, or corporation within this state, the person, firm, or corporation shall file with the county clerk and recorder of the county in which the work was done a record showing each township and range within the county in which the work was performed and the approximate date on which the work was performed.

(2) The person, firm, or corporation shall file with the county clerk and recorder a record showing the location of each shotpoint and date fired within a maximum area of any square, 4-section area of land, upon written request of the county clerk and recorder. The request must be based upon the complaint of a property owner that physical damage to the owner's property has resulted from the use of the seismograph and explosives in seismic operations at some location within the maximum 4-square mile area, and the request must designate the name and

address of the complaining person and the approximate date and nature of the alleged damages. The required record of operations in response to the request of the county clerk and recorder must be supplied within 30 days from the date on which the request is received.

History: **En. Sec. 6, Ch. 235, L. 1955; R.C.M. 1947, 69-3306; amd. Sec. 1, Ch. 201, L. 1979; amd. Sec. 4, Ch. 339, L. 1985; amd. Sec. 2712, Ch. 56, L. 2009.**

82-1-109. Enforcement by county attorneys. It shall be the duty of the several county attorneys to see that the provisions herein contained are complied with and that this law is enforced.

History: **En. Sec. 7, Ch. 235, L. 1955; R.C.M. 1947, 69-3307.**

82-1-110. Penalty. A failure to comply with the terms of this part shall be deemed a misdemeanor and shall be punishable as is elsewhere provided in this code, either by fine or imprisonment, or both. The geophysical permit of any person, firm, or corporation convicted of a violation of the plugging requirements of this part shall be revoked and may not be renewed for a period of 2 years after conviction.

History: **En. Sec. 8, Ch. 235, L. 1955; amd. Sec. 3, Ch. 272, L. 1977; R.C.M. 1947, 69-3308.**

Cross-References

Definition of misdemeanor, 45-2-101.
Criminal responsibility of corporations, 45-2-311.
Accountability for conduct of corporation, 45-2-312.
Misdemeanor penalty when no penalty specified, 46-18-212.

82-1-111. Definitions. As used in this title, unless the context requires otherwise, the following definitions apply:

(1) "Coal" means a combustible carbonaceous rock formed from the compaction and induration of variously altered plant remains. Coal does not include:

(a) methane gas or any other natural gas that may be found in any coal formation;
(b) oil shale; or
(c) gilsonite.

(2) "Gas" means all natural gases and all other fluid hydrocarbons, including methane gas or any other natural gas found in any coal formation, as produced at the wellhead and not defined as oil in subsection (3).

(3) "Oil" means crude petroleum oil and other hydrocarbons, regardless of gravity, that are produced at the wellhead in liquid form by ordinary production methods and that are not the result of condensation of gas before or after it leaves the reservoir.

History: **En. Sec. 1, Ch. 379, L. 1993.**

Part 2
Cancellation and Forfeiture of Oil, Gas, or Mineral Leases

Part Cross-References

Landlord and tenant, Title 70, ch. 26.

82-1-201. Release of record upon forfeiture, cancellation, or expiration of lease — penalty. (1) When an executed and recorded oil, gas, or other mineral lease is forfeited, canceled, or expires, it is the duty of the lessee, the lessee's successor, or assigns, within 60 days from the date of the forfeiture, cancellation, or expiration of the lease, to have the lease or abstract of the lease released from record in the county where the leased land is situated without cost to the lessor.

(2) A lessee may request the recordation of an assignment or release of more than one lease in a single instrument, and an instrument involving more than one lease made under this subsection must be treated for public recording purposes as a single request from the lessee.

(3) A lessee who fails to comply with subsection (1) within 30 days of written notice from the lessor is guilty of a misdemeanor punishable by a fine of up to $250.

History: **En. Sec. 1, Ch. 22, L. 1917; re-en. Sec. 6902, R.C.M. 1921; re-en. Sec. 6902, R.C.M. 1935; amd. Sec. 5, Ch. 218, L. 1971; R.C.M. 1947, 73-114; amd. Sec. 1, Ch. 365, L. 1985; amd. Sec. 1, Ch. 228, L. 1997.**

Cross-References

Misdemeanor defined, 45-2-101.
Criminal responsibility of corporations, 45-2-311.
Accountability for conduct of corporation, 45-2-312.

82-1-202. Action to compel release — procedure without court action. (1) If the lessee or assignee of a lease neglects or refuses to execute a release as provided by this part, the owner of the leased premises may sue in any court of competent jurisdiction to obtain the release, and in that action the owner may also recover from the lessee or the lessee's successor or assigns the sum of $100 as damages, all costs, together with reasonable attorney fees for preparing and prosecuting the suit, and any additional damages that the evidence in the case warrants. Writs of attachment may issue as in other cases. If in the action the plaintiff fails to establish the forfeiture of the lease, attorney fees must be allowed to the lessee or assignee of the lease. Issues in regard to attorney fees must be determined in the same manner as other issues in those actions.

(2) When, by its terms, an oil or gas lease has expired and is subject to forfeiture for nonperformance and more than 3 years have elapsed since the expiration, the owner of the leased premises, in addition to all other remedies, may serve a written notice on the lessee or on the assignee of the lease, and the notice must state:

(a) the names of the lessor, lessee, and assignee of the lease if assigned;

(b) the date of the lease and the date of the expiration of the lease;

(c) the description of the lands leased;

(d) the place, book, and page where the lease is recorded; and

(e) that if the lessee or assignee fails to execute a release of record of the lease or abstract of the lease, the lease must be terminated and is of no effect and must cease to be a lien upon the lands described in the lease, unless the lessee or the assignee of the lease, within 60 days from the date of service of the notice, files, in the county clerk's office in the county where the lease or abstract of the lease is recorded, an affidavit stating that the lease is in effect and delivers a copy of the lease to the owner of the leased lands.

(3) If the lessee or the assignee of the lease resides in the county where the lease or abstract of the lease is recorded, the notice must be personally served on that person. If the lessee or the assignee of the lease does not reside in that county but the lessee's or assignee's address appears on the records in that county clerk's office or is otherwise known, the notice must be mailed by certified mail to that person at that address, and in addition the notice must be published once a week for 2 consecutive weeks in a newspaper of general circulation in the county in which the lands are situated. If the address of the lessee or assignee is unknown, the notice must be published in the manner provided in this subsection. The date of service of the notice, if served personally, the date of mailing, if served by mail, and the first date of publication of the notice, if published, must be at least 60 days before the date of termination referred to in the notice.

(4) Upon the expiration of the time mentioned in the notice, if the affidavit of the lessee or assignee has not been filed as provided in this section, the owner of the leased lands shall file an affidavit of service of the notice in the county clerk's office of the county in which the lands are located, and the affidavit must be kept as a permanent file in the clerk's office. This proof of notice when filed is prima facie evidence of the sufficiency of the notice, and from the filing of the notice the lease is terminated and the lands are released from the lien of the lease.

History: En. Sec. 2, Ch. 22, L. 1917; re-en. Sec. 6903, R.C.M. 1921; amd. Sec. 1, Ch. 18, L. 1929; re-en. Sec. 6903, R.C.M. 1935; amd. Sec. 1, Ch. 146, L. 1947; amd. Sec. 6, Ch. 218, L. 1971; amd. Sec. 36, Ch. 39, L. 1977; R.C.M. 1947, 73-115; amd. Sec. 2713, Ch. 56, L. 2009.

Cross-References

Original jurisdiction of District Courts, 3-5-302.

Prejudgment writs of attachment, Title 27, ch. 18.

Quieting title to real property generally, Title 70, ch. 28, part 1.

82-1-203. Demand for release prior to action. At least 20 days before bringing the action provided for in this part, the owner of the leased land, either personally or by the owner's agent or attorney, shall demand of the holder of the lease, if the demand by ordinary diligence can be made in this state, that the lease or abstract of the lease be released of record. The demand must be written. When written, a copy, when shown to be a copy, may be used as evidence in any court with the same force and effect as the original.

History: En. Sec. 3, Ch. 22, L. 1917; re-en. Sec. 6904, R.C.M. 1921; re-en. Sec. 6904, R.C.M. 1935; amd. Sec. 7, Ch. 218, L. 1971; R.C.M. 1947, 73-116; amd. Sec. 189, Ch. 575, L. 1981; amd. Sec. 2714, Ch. 56, L. 2009.

82-1-204. Joinder of plaintiffs in actions concerning oil and gas leases. (1) In an action for the cancellation of an oil and/or gas lease or leases or quieting title against the claims thereunder, two or more plaintiffs may join in a single action against a common lessee and any one claiming by, through, or under such lessee as an assignee or otherwise. In the complaint in such action the cause or causes of action of each plaintiff shall be set forth separately and there shall be designated the lease or leases or claims or interests sought to be canceled or quieted. It shall be no defense to such an action that the lands of the plaintiffs are noncontiguous or that there is a lack of mutuality of interest between the plaintiffs in the subject of the action or in the relief sought, and the decree in such action shall specify the lease, leases, claims, or interests canceled or quieted.

(2) This procedure shall be in addition to and not in substitution of any existing remedies now allowed by law.

History: En. Secs. 1, 2, Ch. 135, L. 1939; R.C.M. 1947, 93-2813, 93-2814.

Cross-References

Quieting title to property generally, Title 70, ch. 28, part 1.

Part 3
Trusts for Unlocatable Mineral Owners

Part Cross-References

Trust Code, Title 72, ch. 38.

82-1-301. Definition. The word "person", as used in this part, shall mean any individual, corporation, partnership, joint venture, trust or other entity capable of owning real property in Montana.

History: En. Sec. 6, Ch. 513, L. 1979.

82-1-302. Creation of trust for unlocatable mineral, leasehold, or royalty interest owners. (1) Any person who owns an interest in minerals underlying a tract of land may petition the district court of the county in which the tract or a portion of the tract is located to declare a trust in favor of other persons also owning or claiming an interest in the minerals underlying the tract if their place of residence and present whereabouts is unknown and cannot reasonably be ascertained.

(2) In requesting the appointment of a trustee, the petitioner shall show that:

(a) a diligent but unsuccessful effort to locate the absent owner or claimant has been made; and

(b) appointment of a trustee will be in the best interest of all owners of an interest in the minerals.

(3) After determining that the conditions of subsection (2) have been met, the court shall appoint the clerk of court or, if the clerk of court declines to act as trustee, the department of revenue as trustee and shall authorize the clerk of court or the department to execute and deliver an oil, gas, or other mineral lease, a ratification, a division order, or any other related document or instrument on the terms and conditions as the court may approve.

(4) If at any time a clerk of court decides to not continue as trustee for a trust for unlocatable mineral, leasehold, or royalty interest owners, the district court shall appoint the department of revenue to act as trustee. Upon the department of revenue's appointment as trustee, the clerk of court shall remit all funds and interest held in the trust to the department of revenue.

History: En. Sec. 1, Ch. 513, L. 1979; amd. Sec. 1, Ch. 126, L. 1997.

Cross-References

Duties of trustees, Title 72, ch. 38, part 8.

82-1-303. No further liability for petitioner. If a trust in favor of unlocatable owners or claimants of an interest in minerals has been created and all bonuses, rental payments, royalties, and other income due to the unlocatable owners are being or have been paid to the trustee, the person petitioning for creation of the trust is not liable for further claims by unlocatable owners for bonuses, rental payments, royalties, and other income produced after the creation of the trust.

History: En. Sec. 2, Ch. 513, L. 1979; amd. Sec. 190, Ch. 575, L. 1981.

Cross-References

Liability of trustees to beneficiaries, Title 72, ch. 38, part 10.

82-1-304. Administration of trust. (1) The administration of the trust must comply with the appropriate provisions regulating trusts contained in Title 72.

(2) Trustee or attorney fees may not be paid from the trust proceeds.

(3) All bonuses, rental payments, royalties, and other income must be paid to the trustee until the trust is terminated and notice of its termination given to all interested parties. The trustee shall distribute all money held in the trust to the person or persons entitled to the money upon the order of the district court.

(4) A trust in favor of unlocatable owners must be kept in force until the unlocatable owners of the mineral interest in question have successfully claimed their share of the funds held in trust and have filed the notice, as provided in 82-1-306.

(5) The trustee shall invest funds in a prudent manner, as provided in 72-38-902. Fifty percent of the interest earned on each trust must be credited to the department of revenue or, if the clerk of the court is the trustee, to the general fund of the county in which the mineral interest is located to defray the costs of administration.

(6) Funds held in the trusts are subject to the provisions governing abandoned property contained in Title 70, chapter 9.

History: En. Sec. 3, Ch. 513, L. 1979; amd. Sec. 219, Ch. 685, L. 1989; amd. Sec. 2, Ch. 126, L. 1997; amd. Sec. 159, Ch. 264, L. 2013.

82-1-305. Trust for unlocatable mineral, leasehold, and royalty interest owners — penalty. (1) A person may not personally hold for longer than 6 months any bonuses, rental payments, royalties, or other income for unlocatable owners or claimants of an interest in minerals underlying a tract of land. Within the 6-month period, the person shall petition the district court for creation of a trust, as provided in 82-1-302.

(2) A person failing to comply with subsection (1) is liable for all attorney fees and court costs and interest on funds subject to subsection (1) at twice the current average passbook account rate paid by financial institutions in any district in which the property or part of the property is located.

History: En. Sec. 4, Ch. 513, L. 1979; amd. Sec. 3, Ch. 126, L. 1997.

82-1-306. Filing of addresses. (1) Upon the payment of a $5 fee, a person claiming an interest in minerals underlying a tract of land that is the subject of a trust proceeding under 82-1-302 may file with the clerk and recorder of each county in which the land is located a notice containing the person's address and a description of the person's interest in the minerals. Filing the notice creates a rebuttable presumption that the person owns the interest claimed.

(2) The clerk and recorder shall forward a copy of the notice to the trustee of the trust.

History: En. Sec. 5, Ch. 513, L. 1979; amd. Sec. 4, Ch. 126, L. 1997.

Part 4
Constitutional Challenges

82-1-401. Determination of constitutionality. In any action filed in district court invoking the court's original jurisdiction to challenge the constitutionality of a licensing or permitting decision made pursuant to Title 75 or Title 82 or activities taken pursuant to a license or permit issued under Title 75 or Title 82, the plaintiff shall first establish the unconstitutionality of the underlying statute.

History: En. Sec. 2, Ch. 361, L. 2003.

Part 5
Exemption of Fossils

82-1-501. Fossils exempted. Fossils, as defined in 1-4-112, are not minerals and are exempt from the provisions of this title.

History: En. Sec. 3, Ch. 136, L. 2019.

Part 6
Critical Infrastructure Facility — Trespass

82-1-601. Definitions. As used in 82-1-601 through 82-1-604, the following definitions apply:

(1) "Critical infrastructure" means systems and assets, whether physical or virtual, so vital to the United States that the incapacity or destruction of the systems and assets would have a debilitating impact on security, national economic security, national public health or safety, or any combination of those matters.

(2) "Critical infrastructure facility" means:

(a) one of the following:

(i) a petroleum or alumina refinery;

(ii) an electric generating facility, substation, switching station, electrical control center, or electric transmission and distribution lines and associated equipment infrastructure;

(iii) a chemical, polymer, or rubber manufacturing facility;

(iv) a water intake structure, water treatment facility, wastewater treatment plant, or pump station;

(v) a natural gas compressor station, including but not limited to pipeline interconnections, a city gate or town border station, a metering station, aboveground piping, and a regulation station and natural gas storage facility;

(vi) a liquid natural gas terminal or storage facility;

(vii) a telecommunications central switching office;

(viii) wireless telecommunications infrastructure;

(ix) a port, railroad switching yard, railroad tracks, trucking terminal, or other freight transportation facility;

(x) a gas processing plant, including a plant used in the processing, treatment, or fractionation of natural gas or natural gas liquids;

(xi) a transmission facility used by a federally licensed radio or television station;

(xii) a steelmaking facility that uses an electric arc furnace to make steel;

(xiii) a facility identified and regulated by the United States department of homeland security chemical facility anti-terrorism standards program;

(xiv) a dam that is regulated by the state, the federal government, or a tribal government;

(xv) a natural gas distribution utility facility, including but not limited to pipeline interconnections, a city gate or town border station, a metering station, aboveground piping, a regular station, and a natural gas storage facility;

(xvi) aboveground oil, gas, hazardous liquid, and chemical pipelines;

(xvii) aboveground portions of an oil or natural gas well and associated production facilities;

(xviii)aboveground portions of a mineral or metal mining facility;

(xix) correctional facilities;

(xx) cable television, broadband, and wired communications infrastructure, including headends, poles, cable television and broadband lines, coaxial and fiber optic lines, and other equipment attached to cable television lines, broadband, and wired communications infrastructure;

(xxi) military installations, including but not limited to training areas and armories; and

(xxii) a crude oil, inclusive of Y-grade or natural gas liquids, or a refined products storage and distribution facility, including but not limited to a value site, pipeline interconnection, pump station, metering station, below or aboveground pipeline or piping, and truck loading or offloading facility;

(b) a facility for the construction of a location listed in subsection (2)(a); or

(c) a below or aboveground portion of an oil, gas, hazardous liquid, or chemical transmission or distribution pipeline, tank, railroad facility, or other facility that is completely enclosed by a fence or other physical barrier that is obviously designed to exclude intruders, or if clearly marked with a sign or signs that are posted on the property that indicate that entry is forbidden without site authorization.

(3) "Organization" means a group of people, structured in a specific way to achieve a series of shared goals.

History: En. Sec. 1, Ch. 522, L. 2021; amd. Sec. 1, Ch. 116, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 116, L. 2025. Amendment effective October 1, 2025.

Cross-References

Prohibited transactions with foreign adversaries, 35-30-103.

82-1-602. Criminal penalties. (1) Except as provided in 82-1-604, a person who purposely or knowingly trespasses on property containing a critical infrastructure facility:

(a) that is completely enclosed by a fence or other physical barrier that is obviously designed to exclude intruders with intent to purposely or knowingly damage, destroy, vandalize, deface, tamper with equipment, or materially impede or inhibit operations of the facility shall, on conviction, be guilty of a felony punishable by a fine of not more than $4,500 or by imprisonment for not more than 18 months or both; and

(b) that is clearly marked with a sign or signs that are posted on the property that indicate that entry is forbidden without site authorization with intent to purposely or knowingly damage, destroy, vandalize, deface, tamper with equipment, or materially impede or inhibit operations of the facility shall, on conviction, be guilty of a felony punishable by a fine of not more than $4,500 or by imprisonment for not more than 18 months or both.

(2) A person who purposely or knowingly damages, destroys, vandalizes, defaces, or tampers with the equipment of a critical infrastructure facility:

(a) causing less than $1,500 in damages shall, on conviction, be guilty of a misdemeanor and may be incarcerated for any term not to exceed 6 months or be fined an amount not to exceed $500, or both, and must be ordered to make restitution in an amount and manner to be set by the court; and

(b) causing damages greater than $1,500 shall, on conviction, be guilty of a felony punishable by a fine of not more than $150,000 or by imprisonment for not more than 30 years, or both.

(3) An organization found to be in a conspiracy, as the term is used in 45-4-102, with persons who are found to have committed any of the crimes provided in subsection (1) or (2) may be punished by a fine up to 10 times the amount of the fine provided for the appropriate crime.

History: En. Sec. 2, Ch. 522, L. 2021; amd. Sec. 2, Ch. 116, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 2, Ch. 116, L. 2025. Amendment effective October 1, 2025.

Cross-References

Criminal trespass to property, 45-6-203.

82-1-603. Civil penalties. (1) A person who trespasses in a critical infrastructure facility that is completely enclosed by a fence or other physical barrier that is obviously designed to exclude intruders, or that is clearly marked with a sign or signs that are posted on the property that indicate that entry is forbidden without authorization, and enters with intent to willfully damage, destroy, vandalize, deface, tamper with equipment, or impede or inhibit operations of the facility may be held liable for damages to personal or real property while trespassing, including damages and expenses from network performance or outage issues proximately caused by the trespass.

(2) A person or entity that directs a person to trespass as described in subsection (1), compensates, provides consideration to, or remunerates a person for trespassing as described in subsection (1) may also be held vicariously liable for damages to personal or real property committed by the person compensated or remunerated for trespassing.

History: En. Sec. 3, Ch. 522, L. 2021.

Cross-References

Criminal trespass to property, 45-6-203.

82-1-604. Exempt activities. Nothing in 82-1-601 through 82-1-604 may be construed to limit legally permissible activity under 29 U.S.C. 151 through 169, as those sections existed on December 23, 2020.

History: En. Sec. 4, Ch. 522, L. 2021.

CHAPTER 2
MINING GENERALLY

Part 1 — Location and Record of Claims

82-2-101. Manner of locating claim.
82-2-102. Record of certificate of location.
82-2-103. Affidavit of performance of annual work.

82-2-104. Millsites.
82-2-105. Relocation of abandoned claim.
82-2-106. Rights of relocator.
82-2-107. Amended location.
82-2-108. Relocation by owner.
82-2-109. Amendment or relocation not waiver of acquired rights.
82-2-110. Rights of third persons not affected.
82-2-111. Validating locations already made.
82-2-112. Defective locations good against persons with notice.
82-2-113. Effect of patent.
82-2-114. Amended locations.
82-2-115. Filing of false mining claims.

Part 2 — Rights-of-Way and Eminent Domain

82-2-201. Right-of-way of owners of mines.
82-2-202. Road or ditch right-of-way.
82-2-203. Proceedings to obtain right-of-way.
82-2-204. Proceedings before the court.
82-2-205. Court order and appointment of commissioners.
82-2-206. Commissioners to assess damages.
82-2-207. Power to set aside commissioners' report.
82-2-208. Right-of-way to commence upon payment of assessed damages.
82-2-209. Appeal from assessment of damages.
82-2-210. Trial on appeal and costs.
82-2-211. Payment of costs.
82-2-212. Appeal to supreme court.
82-2-213 through 82-2-220 reserved.
82-2-221. Eminent domain for open-pit mining — purchase of property required.
82-2-222. Construction of alternate facilities.
82-2-223. Compensation for property.
82-2-224. Notice of condemnation — filing of plat.

Part 3 — Landowner Notification of Surface Operations

82-2-301. Short title.
82-2-302. Ascertaining ownership of land.
82-2-303. Written notice and approval required before commencement of operations.
82-2-304. Exemption — discovery pits on federal lands.
82-2-305. Exemption — operations pursuant to prospecting permits or other agreements.
82-2-306. Violation — immunity of landowner.

Part 4 — Assaying of Ore and Payment for Consignments

82-2-401. Sampling rooms required.
82-2-402. Samples of 50 pounds per ton to be retained until settlement.
82-2-403. Penalty for commingling foreign substances with ore.
82-2-404. Umpire assayers — appointment, qualifications, and duties.
82-2-405. Notice of selection.
82-2-406. Violation — penalty.
82-2-407 through 82-2-420 reserved.
82-2-421. Time for payment for ores.
82-2-422. Violation — penalty.
82-2-423. Statement by purchasers of ore from leased mines.
82-2-424. Copy of statement to lessee.
82-2-425. Shipper — penalty for violation.
82-2-426. Smelters — penalty for violation.

Parts 5 and 6 reserved

Part 7 — Sand and Gravel Deposit Program

82-2-701. Sand and gravel deposit program — investigation — purpose — prioritization.
82-2-702. Authority to accept gifts, grants, and reimbursements.

Marking land and mining claims in national forest, 81-4-218.

Part 1
Location and Record of Claims

82-2-101. Manner of locating claim. A person who discovers upon the public domain of the United States, within the state of Montana, a vein, lode, or ledge of rock in place bearing gold, silver, cinnabar, lead, tin, copper, or other valuable deposits or a placer deposit of gold or other deposit of minerals having a commercial value that is subject to entry and patent under the mining laws of the United States may, if qualified by the laws of the United States, locate a mining claim upon the vein, lode, ledge, or deposit in the following manner:

(1) The person shall post conspicuously at the point of discovery a written or printed notice of location containing the name of the claim, the name of the locator or locators, if there is more than one, the date of the location, which must be the date of posting the notice, and the approximate dimensions of the area of the claim intended to be appropriated.

(2) Within 30 days after posting the notice of location, the person shall distinctly mark the location on the ground so that its boundaries can be readily traced. It is prima facie evidence that the location is properly marked if the boundaries are defined by a monument at each corner or angle of the claim, consisting of any one of the following kinds:

(a) a tree at least 8 inches in diameter and blazed on four sides;

(b) a post at least 4 inches square by 4 feet 6 inches in length, set 1 foot in the ground, unless solid rock should occur at a less depth, in which case the post should be set upon the rock and surrounded in all cases by a mound of earth or stone at least 4 feet in diameter by 2 feet in height. A squared stump of the requisite size, surrounded by a mound, must be considered the equivalent of a post and mound.

(c) a stone at least 6 inches square by 18 inches in length, set two-thirds of its length in the ground, with a mound of earth or stone alongside at least 4 feet in diameter by 2 feet in height; or

(d) a boulder at least 3 feet above the natural surface of the ground on the upper side. When other monuments or monuments of lesser dimensions than those described in subsections (2)(a) through (2)(c) are used, it is a question for the jury or for the court where the action is tried without a jury as to whether the location has been marked upon the ground so that its boundaries can be readily traced. Whatever monument is used, it must be marked with the name of the claim and the designation of the corner, either by number or cardinal point.

(3) Within 60 days after posting notice, the locator shall comply with the United States mining laws.

History: En. Sec. 3610, Pol. C. 1895; en. Sec. 1, Ch. 16, L. 1907; Sec. 2283, Rev. C. 1907; re-en. Sec. 7365, R.C.M. 1921; Cal. Civ. C. Sec. 1426; re-en. Sec. 7365, R.C.M. 1935; amd. Sec. 1, Ch. 4, Ex. L. 1971; R.C.M. 1947, 50-701; amd. Sec. 2715, Ch. 56, L. 2009.

Cross-References

Marking land and mining claims in national forest, 81-4-218.
Defective locations good against persons with notice, 82-2-112.
Filing of false mining claims, 82-2-115.

82-2-102. Record of certificate of location. (1) Within 60 days after posting the notice of location, the locator shall record the location in the office of the county clerk of the county in which the mining claim is situated. The record must consist of a certificate of location for each claim containing:

(a) the name of the lode or claim and whether located as a lode or placer claim;

(b) the name of the locator or locators, if there is more than one, together with the post-office address of the locator or locators;

(c) the date of location and the description of the claim, with reference to some natural object or permanent monument, that will identify the claim and the section, township, and range in which the claim is situated by projected survey lines if located in unsurveyed country; and

(d) the directions and distances from the discovery point that describe the claim.

(2) The certificate of location must be verified before an officer authorized to administer oaths by the locator or one of the locators, if there is more than one, or by an authorized agent. In the case of a corporation, the verification may be made by an officer of the corporation or by an authorized agent. When the verification is made by an agent, the fact of the agency must be stated in the affidavit. A verified certificate of location or a certified copy of the certificate is prima facie evidence of all facts properly recited in the certificate. Failure of the locator or locators to record a certificate of location as required in this section creates a prima facie presumption of intent to abandon. However, recordation after the 60-day period but before the ground is located by another renews the location and saves the rights of the original locator. Nothing contained in 82-2-112 affects the prima facie presumption created by this section.

History: En. Sec. 3612, Pol. C. 1895; amd. Sec. 2, p. 141, L. 1901; amd. Sec. 2, Ch. 16, L. 1907; Sec. 2284, Rev. C. 1907; re-en. Sec. 7366, R.C.M. 1921; re-en. Sec. 7366, R.C.M. 1935; amd. Sec. 2, Ch. 4, Ex. L. 1971; amd. Sec. 1, Ch. 428, L. 1973; R.C.M. 1947, 50-702; amd. Sec. 1, Ch. 137, L. 1991; amd. Sec. 2716, Ch. 56, L. 2009.

Cross-References

Clerk's duty to record notice of location, 7-4-2613.
Filing of false mining claims, 82-2-115.

82-2-103. Affidavit of performance of annual work. (1) The owner of a lode or placer claim who performs or causes to be performed the annual work or makes the improvements required by the laws of the United States, as permitted and defined by laws of the United States, in order to prevent the forfeiture of the shall, within 90 days after the expiration of the federal annual assessment work period, file in the office of the county clerk of the county in which the claim or claims are situated the owner's affidavit or an affidavit of the person who performed the work or made the improvements, showing:

(a) the name of the mining claim or claims;

(b) the location of the claim or claims by section, township, and range, by projected survey lines if located in unsurveyed country;

(c) the book and page numbers in which the original or latest amended relocation for each claim is recorded;

(d) the number of days of work done and the character and value of the improvements placed on the claim or the verified report required by United States mining law if geological, geophysical, or geochemical work or labor is being relied upon;

(e) the dates between which the work or improvements were effected;

(f) at whose instance the work was done or the improvements were made; and

(g) the actual amount paid for work and improvements and by whom paid when the work and improvements were not done by the owner.

(2) Annual assessment work may be performed or caused to be performed at one or more points within a group of contiguous claims and may be utilized to satisfy annual assessment work requirements upon the group of contiguous claims. The point or points of work may be performed upon a patented claim. If annual assessment work is performed or caused to be performed at one or more points within a group of contiguous claims, the affidavit of performance of assessment work must be filed for the group of claims. The affidavit, in addition to requirements established

by this section for affidavits of performance of assessment work, must contain a description and location of the work done upon the group at a point or points within the group, the specific names of all the claims in the group for whose benefit the work was performed, and the total cost of the work performed.

(3) If group work is claimed for a group of claims crossing county lines, the affidavit required by this section must be filed for recording within the required time in each of the counties in which the claims are located.

(4) An affidavit of performance of annual assessment work must be verified before some officer authorized to administer oaths by the locator or one of the locators, if there is more than one, or by an authorized agent. In the case of a corporation, the verification may be made by an officer of the corporation or by an authorized agent. When the verification is made by an agent, the fact of the agency must be stated in the affidavit. The affidavit or a certified copy of the affidavit is prima facie evidence of the facts stated in the affidavit. The failure to file the affidavits within the period allowed is prima facie evidence that the labor has not been performed and that the owner of the claim or claims has abandoned and surrendered the claim or claims.

History: En. Sec. 1483, 5th Div. Comp. Stat. 1887; amd. Sec. 3614, Pol. C. 1895; re-en. Sec. 7368, R.C.M. 1921; Cal. Civ. C. Sec. 1426m; re-en. Sec. 7368, R.C.M. 1935; amd. Sec. 3, Ch. 4, Ex. L. 1971; amd. Sec. 1, Ch. 312, L. 1973; amd. Sec. 1, Ch. 112, L. 1974; R.C.M. 1947, 50-704; amd. Sec. 2717, Ch. 56, L. 2009.

Clerk's duty to maintain index of affidavits of performance, 7-4-2619.
Fee for recording and indexing affidavits of performance, 7-4-2631.

82-2-104. Millsites. Millsite claims may be located and recorded in the same manner as other claims, except that no discovery or discovery work is required. Where a millsite claim is appurtenant to a mining claim, the certificate of location of such millsite claim shall describe, by appropriate reference, the mining claim to which it is appurtenant.

History: En. Sec. 3, Ch. 16, L. 1907; Sec. 2285, Rev. C. 1907; re-en. Sec. 7369, R.C.M. 1921; re-en. Sec. 7369, R.C.M. 1935; R.C.M. 1947, 50-705.

82-2-105. Relocation of abandoned claim. The relocator of an abandoned or forfeited mining claim may adopt as the relocator's discovery any shaft or other working existing upon the claim at the date of the relocation in which the vein, lode, or deposit is disclosed, but in that shaft or other working, the relocator shall perform the same discovery work that is required in the case of an original location.

History: En. Sec. 4, Ch. 16, L. 1907; Sec. 2286, Rev. C. 1907; re-en. Sec. 7370, R.C.M. 1921; re-en. Sec. 7370, R.C.M. 1935; R.C.M. 1947, 50-706; amd. Sec. 2718, Ch. 56, L. 2009.

82-2-106. Rights of relocator. The rights of a relocator of any relocated abandoned or forfeited mining claim date from the posting of the relocator's notice of location on the claim, and while the relocator is performing the acts required by law to perfect the location, the relocator's rights may not be affected by any reentry or resumption of work by the former locator or claimant.

History: En. Sec. 5, Ch. 16, L. 1907; Sec. 2287, Rev. C. 1907; re-en. Sec. 7371, R.C.M. 1921; re-en. Sec. 7371, R.C.M. 1935; R.C.M. 1947, 50-707; amd. Sec. 2719, Ch. 56, L. 2009.

82-2-107. Amended location. A locator or claimant may at any time amend the location and make any change in the boundaries that does not involve a change in the point of discovery as shown by the discovery shaft by marking the location as amended upon the ground and filing an amended certificate of location conforming to the requirements of an original certificate of location. A defect in a recorded certificate of location may be cured by filing an amended certificate.

History: En. Sec. 6, Ch. 16, L. 1907; Sec. 2288, Rev. C. 1907; re-en. Sec. 7372, R.C.M. 1921; re-en. Sec. 7372, R.C.M. 1935; R.C.M. 1947, 50-708; amd. Sec. 2720, Ch. 56, L. 2009.

Cross-References

Amended locations, 82-2-114.

82-2-108. Relocation by owner. A locator or claimant may at any time relocate the locator's or claimant's own claim for any purpose, except to avoid the performance of annual labor on the claim, and, by the relocation, may change the boundaries of the claim, the point of discovery, or both. However, the relocation must comply in all respects with the requirements of this part as to an original location.

History: **En. Sec. 7, Ch. 16, L. 1907; Sec. 2289, Rev. C. 1907; re-en. Sec. 7373, R.C.M. 1921; re-en. Sec. 7373, R.C.M. 1935; R.C.M. 1947, 50-709; amd. Sec. 2721, Ch. 56, L. 2009.**

82-2-109. Amendment or relocation not waiver of acquired rights. When a locator or claimant amends or relocates the locator's or claimant's own claim, the amendment or relocation may not be construed as a waiver of any right or title acquired by the locator or claimant by virtue of the previous location or record of that location, except as to portions of the previous location that may be omitted from the boundaries of the claim as amended or relocated. As to the portion of ground included both in the original location and the location as amended or relocated, the locator or claimant may rely either upon the original location or the location as amended or relocated or upon both. However, this section may not be construed as permitting the locator or claimant to hold a tract that does not include a valid discovery.

History: **En. Sec. 8, Ch. 16, L. 1907; Sec. 2290, Rev. C. 1907; re-en. Sec. 7374, R.C.M. 1921; re-en. Sec. 7374, R.C.M. 1935; R.C.M. 1947, 50-710; amd. Sec. 2722, Ch. 56, L. 2009.**

82-2-110. Rights of third persons not affected. No amendment or relocation of a mining claim by the locator or claimant thereof shall interfere with any third person's right existing at the time of such amendment or relocation.

History: **En. Sec. 9, Ch. 16, L. 1907; Sec. 2291, Rev. C. 1907; re-en. Sec. 7375, R.C.M. 1921; re-en. Sec. 7375, R.C.M. 1935; R.C.M. 1947, 50-711.**

82-2-111. Validating locations already made. All mining locations made and recorded under the laws of this state heretofore in force that in any respect have failed to conform to the requirements of such laws shall, nevertheless, in the absence of the rights of third persons accruing prior to the passage of this part, be valid if the making and recording of such locations conform to the requirements of this part.

History: **En. Sec. 10, Ch. 16, L. 1907; Sec. 2292, Rev. C. 1907; re-en. Sec. 7376, R.C.M. 1921; re-en. Sec. 7376, R.C.M. 1935; R.C.M. 1947, 50-712.**

82-2-112. Defective locations good against persons with notice. The period of time prescribed by this part for the performance of any act may not be considered mandatory if the act is performed before the rights of third persons have intervened, and a defect in the posted notice or recorded certificate may not be considered material except as against one who has located the same ground or some portion of the same ground in good faith and without notice. Notice to an agent who makes a location on behalf of another must be considered notice to the agent's principal, and notice to one of several coclaimants must be considered notice to all.

History: **En. Sec. 11, Ch. 16, L. 1907; Sec. 2293, Rev. C. 1907; re-en. Sec. 7377, R.C.M. 1921; re-en. Sec. 7377, R.C.M. 1935; R.C.M. 1947, 50-713; amd. Sec. 2723, Ch. 56, L. 2009.**

Cross-References

Record of certificate of location, 82-2-102.

82-2-113. Effect of patent. The issuance of a United States patent for a mining claim is considered conclusive evidence that the requirements of the laws of this state relative to the location and record of such mining claim have been duly complied with. However, if questions of priority are involved, the date of the location shall be an issuable fact when it is claimed to have been prior to the date of the record of the location.

History: **En. Sec. 12, Ch. 16, L. 1907; Sec. 2294, Rev. C. 1907; re-en. Sec. 7378, R.C.M. 1921; re-en. Sec. 7378, R.C.M. 1935; amd. Sec. 10, Ch. 39, L. 1977; R.C.M. 1947, 50-714.**

Cross-References

List of conclusive presumptions, 26-1-601.

82-2-114. Amended locations. If, at any time, the locator of a mining claim or the locator's successors or assigns determine that the original declaratory statement was defective or erroneous, determine that the requirements of law were not complied with, or want to change the boundaries or take in any part of an overlapping claim that has been abandoned or if the original declaratory statement was filed prior to the passage of this law and the locator or the locator's successor's or assigns want the benefit of this part, the locator or the successors or assigns may file an additional or amended declaratory statement subject to the provisions of this part. However, the relocation or filing of the amended or additional declaratory statement may not interfere with the existing rights of others at the time of the relocation or filing of the amended or additional declaratory statement, and the relocation or amended or additional declaratory statement or other record may not preclude the claimant or claimants from proving any title that the claimant may have held under the previous location and notice.

History: **En. Sec. 1, p. 56, L. 1901; re-en. Sec. 2295, Rev. C. 1907; re-en. Sec. 7379, R.C.M. 1921; Cal. Civ. C. Sec. 1426h; re-en. Sec. 7379, R.C.M. 1935; R.C.M. 1947, 50-715; amd. Sec. 2724, Ch. 56, L. 2009.**

Cross-References

Amended location, 82-2-107.

82-2-115. Filing of false mining claims. A person who offers a location certificate for a placer mining claim or lode claim or affidavit of assessment work to be filed in an office of a county clerk of this state on the person's own behalf or for any other person or a person who procures others to do so, knowing that the claim, certificate, or affidavit was not preceded by a proper location of the claim physically upon the ground by the establishment of a proper notice of claim and the designation of the surface boundaries of the claim by substantial posts or monuments as required by the laws of the state, shall be punished by imprisonment in the state prison for not more than 5 years, by a fine of not more than $5,000, or by both.

History: **En. Sec. 1, Ch. 135, L. 1973; R.C.M. 1947, 50-702.1; amd. Sec. 2725, Ch. 56, L. 2009.**

82-2-203. Proceedings to obtain right-of-way. Whenever the owner desires to work a mine or mining claim and it is necessary that the owner have a right-of-way for any of the purposes mentioned in 82-2-201 and 82-2-202 in order to work the mine or mining claim successfully and conveniently and if the right-of-way has not been acquired by agreement between the owner of the mining claim and the owner of the land or claims over, under, across, and upon which the mining claim owner seeks to establish the right-of-way, it is lawful for the mining claim owner to present to the judge of the district court a complaint asking that the right-of-way be granted. The complaint must be verified and contain a particular description of the character and extent of the right sought, a description of the mine or mining claim of the owner, and the mining claim or claims and the land to be affected by the right-of-way, with the names of the occupants or owners of the affected land, and may also set forth any tender or offer.

History: En. Sec. 3, p. 597, Cod. Stat. 1871, on Jan. 12, 1872; re-en. Sec. 888, 5th Div. Rev. Stat. 1879; re-en. Sec. 1497, Comp. Stat. 1887; amd. and re-en. Sec. 3632, Pol. C. 1895; re-en. 82-2-204. Proceedings before the court. Upon the receipt of the complaint and filing thereof with the clerk of the court, the judge must direct a summons to issue to the defendants named in the complaint requiring them to appear before the judge on a day therein named, which must be not less than 10 days from the service thereof, and show cause why such right-of-way should not be allowed. The summons may be served on each of the parties in the manner prescribed by law for serving summons in other actions.

History: En. Sec. 4, p. 598, Cod. Stat. 1871, on Jan. 12, 1872; re-en. Sec. 889, 5th Div. Rev. Stat. 1879; re-en. Sec. 1498, Comp. Stat. 1887; amd. and re-en. Sec. 3633, Pol. C. 1895; re-en. Sec. 2300, Rev. C. 1907; re-en. Sec. 7385, R.C.M. 1921; re-en. Sec. 7385, R.C.M. 1935; R.C.M. 1947, 50-804.

82-2-205. Court order and appointment of commissioners. Upon the return of the summons or upon any day to which the hearing is adjourned, the defendants may answer, issue must be joined, and the judge shall hear the allegations and proofs of the respective parties. If, upon the hearing, the judge is satisfied that the claims of the plaintiff may be worked conveniently only by means of the privilege asked for, the judge shall make an order adjudging and awarding to the plaintiff the right-of-way and shall appoint three commissioners who are disinterested persons and residents of the county to assess the damages to the lands or claims affected by the order.

History: En. Sec. 5, p. 598, Cod. Stat. 1871, on Jan. 12, 1872; re-en. Sec. 890, 5th Div. Rev. Stat. 1879; re-en. Sec. 1499, Comp. Stat. 1887; amd. and re-en. Sec. 3634, Pol. C. 1895; re-en. Sec. 2301, Rev. C. 1907; re-en. Sec. 7386, R.C.M. 1921; re-en. Sec. 7386, R.C.M. 1935; amd. Sec. 11, Ch. 39, L. 1977; R.C.M. 1947, 50-805; amd. Sec. 2727, Ch. 56, L. 2009.

82-2-206. Commissioners to assess damages. The commissioners must be sworn to faithfully and impartially discharge their duties and must without delay examine the property, lands, and claims and assess the damages resulting from such right-of-way and report the amount to the judge, and if such right-of-way affects the property of more than one person, such report must contain an assessment of damages to each person.

History: En. Sec. 6, p. 598, Cod. Stat. 1871, on Jan. 12, 1872; re-en. Sec. 891, 5th Div. Rev. Stat. 1879; re-en. Sec. 1500, Comp. Stat. 1887; amd. and re-en. Sec. 3635, Pol. C. 1895; re-en. Sec. 2302, Rev. C. 1907; re-en. Sec. 7387, R.C.M. 1921; re-en. Sec. 7387, R.C.M. 1935; R.C.M. 1947, 50-806.

82-2-213 through 82-2-220 reserved.

82-2-221. Eminent domain for open-pit mining — purchase of property required. (1) (a) Subject to subsection (1)(b), when the right of eminent domain is exercised pursuant to Title 70, chapter 30, to acquire estates and rights in land for the purpose of open-pit mining of the ores, metals, or minerals owned by the condemnor, the decree must be granted on the condition that the condemnor protects the public in the immediate area by agreeing to purchase all property within 300 yards of the surface tract condemned, including vacant lots.

(b) In order to fall within the protection provided by subsection (1)(a), the owner of land within 300 yards of the surface tract condemned shall serve upon the condemnor and file with the court a written offer stating the amount asked for the property within 30 days from the entry of the court order appointing commissioners in the eminent domain proceeding.

(2) If the condemnor and an owner are unable to agree upon the compensation to be paid for the property, the court, upon petition of either party, may proceed to determine the compensation to be paid for property in the manner prescribed in Title 70, chapters 30 and 31, for ascertaining the value of property taken through the exercise of the right of eminent domain.

History: En. Sec. 1, Ch. 240, L. 1961; amd. Sec. 1, Ch. 304, L. 1973; R.C.M. 1947, 50-813; amd. Sec. 97, Ch. 125, L. 2001.

82-2-222. Construction of alternate facilities. If a mineral owner seeks to condemn streets, roads, alleys, or highways pursuant to Title 70, chapter 30, for the purposes stated in 82-2-221, there must also be attached to the complaint for condemnation a plat or plats showing the alternate facilities to be proposed and paid for by the condemnor. The court, in its final order of condemnation, may order the condemnor to construct reasonable and adequate alternate facilities that it considers appropriate under the circumstances.

History: En. Sec. 2, Ch. 240, L. 1961; R.C.M. 1947, 50-814; amd. Sec. 98, Ch. 125, L. 2001.

82-2-223. Compensation for property. (1) The measure of compensation for the property located within 300 yards of the surfaced tract condemned shall be the fair market value or the value of similar property in a similar area not affected by open-pit mining operations, whichever the owner of the surface property shall elect to receive.

(2) The measure of compensation for a building owned by the city, county, or state shall be the value of the cost of replacing the building in a similar area not affected by open-pit mining operations.

History: En. Sec. 3, Ch. 240, L. 1961; amd. Sec. 2, Ch. 304, L. 1973; R.C.M. 1947, 50-815.

82-2-224. Notice of condemnation — filing of plat. Any party seeking to condemn property for open-pit mining purposes pursuant to Title 70, chapter 30, shall serve written notice on all owners and purchasers under contracts for deed of property within 300 yards of the surface tract sought to be condemned or shall file a plat showing the boundaries of the property sought to be condemned in the office of the county clerk and recorder. The filing of the plat constitutes notice to the owner or owners not personally served with written notice.

History: En. Sec. 4, Ch. 240, L. 1961; amd. Sec. 3, Ch. 304, L. 1973; R.C.M. 1947, 50-816; amd. Sec. 24, Ch. 526, L. 1983; amd. Sec. 99, Ch. 125, L. 2001.

Part 3
Landowner Notification of Surface Operations

82-2-301. Short title. This part may be referred to as "The Landowner Notification Act".

History: En. Sec. 1, Ch. 335, L. 1971; R.C.M. 1947, 50-1301.

82-2-302. Ascertaining ownership of land. All prospectors for minerals, miners, or other persons contemplating surface disturbance by mechanical equipment other than hand tools on lands within the state of Montana are required to ascertain the ownership and possessory right of any land before performing any such operations causing surface disturbance such as road or trail building or any other work disturbing the surface on such land.

History: En. Sec. 2, Ch. 335, L. 1971; R.C.M. 1947, 50-1302.

82-2-303. Written notice and approval required before commencement of operations. (1) The land or surface of land not owned in fee by such person may not be disturbed in any manner until the owner or manager of the surface of said land and the owner of a possessory right to said land are given notice in writing, accompanied by a map showing the specific locations involved, of such person's intent or desire to enter upon such land, which will sufficiently disclose the plan of work and operations, including contemplated measures for the protection and restoration of the land and waters, to enable the owner or manager of the land and any person holding a possessory right to such land to evaluate the extent of disturbance contemplated and the effectiveness and sufficiency of the protection and restoration measures planned.

(2) Before commencement of any work or operations on any such lands, such person must first obtain from the surface owner of private land specific written approval of the proposed work or operations.

(3) In the case of city, county, state, or federally owned lands, such person must first obtain the authorization or permit, if any, required by the applicable law and the regulations of the governmental agency or board charged by law with the administration or management of the surface of such land.

History: En. Sec. 3, Ch. 335, L. 1971; R.C.M. 1947, 50-1303.

Coal leases authorized for state-owned lands, 77-3-301.
Oil and gas leases authorized for state-owned lands, 77-3-401.
Geothermal leases authorized for state-owned lands, 77-4-101.

82-2-304. Exemption — discovery pits on federal lands. Discovery pits which may be required to locate a mining claim on federal lands open to mineral entry, when excavated entirely by hand methods with hand tools, are exempt from the operation of this part.

History: En. Sec. 4, Ch. 335, L. 1971; R.C.M. 1947, 50-1304.

82-2-305. Exemption — operations pursuant to prospecting permits or other agreements. The provisions of this part shall not apply where operations upon land are performed in accordance with the terms of a prospecting permit or a lease covering any mineral interest in said land or other valid agreements authorizing such operations which are in full force and effect.

History: En. Sec. 5, Ch. 335, L. 1971; amd. Sec. 1, Ch. 194, L. 1973; R.C.M. 1947, 50-1305.

82-2-401. Sampling rooms required. A person, association, or corporation engaged in the business of buying or sampling or smelting for hire ores of gold, silver, copper, lead, zinc, iron, or other valuable metal shall maintain a sampling room or house to which the ore shippers or their agents or representatives must have access at all times during the sampling of ores or while the sampling is being carried on and in which must be maintained samples of all ores that the person, association, or corporation may buy or smelt.

History: En. Sec. 1, Ch. 54, L. 1909; re-en. Sec. 3436, R.C.M. 1921; re-en. Sec. 3436, R.C.M. 1935; R.C.M. 1947, 50-201; amd. Sec. 2728, Ch. 56, L. 2009.

82-2-402. Samples of 50 pounds per ton to be retained until settlement. A person, association, or corporation that buys ore upon an agreement to pay for it in an amount dependent upon the metallic contents or that smelts any ore shall retain from the pulp or crushed ore, as the ore is sampled, a quantity of not less than 50 pounds out of each ton of ore. The quantity must be selected regularly and at equal intervals from any lot of ore bought or to be smelted, and the person, association, or corporation shall keep this quantity separate from any other ore or pulp for a period of 30 days or until full settlement is made and accepted by the shipper. Until full settlement is made and accepted, the ore shipper or the shipper's agents or representatives may take any part from the quantity retained for the purpose of sampling or assaying that part.

However, the value of any part taken by the owner or shipper may be deducted from the total value of the ore delivered by the owner or shipper.

History: **En. Sec. 2, Ch. 54, L. 1909; re-en. Sec. 3437, R.C.M. 1921; re-en. Sec. 3437, R.C.M. 1935; amd. Sec. 1, Ch. 39, L. 1977; R.C.M. 1947, 50-202; amd. Sec. 2729, Ch. 56, L. 2009.**

Cross-References

82-2-403. Penalty for commingling foreign substances with ore. Any person or persons, corporation, association, or partnership which shall, with intent to defraud, in any manner whatever, introduce any foreign substance into any ore or commingle any foreign substance with any ore intended for sale in any smelter or which any person, association, or corporation shall have undertaken for hire to smelt or into any sample retained for tests or assays, as provided in 82-2-402, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not less than $100 or more than $1,000 or by imprisonment in the county jail for a period of not less than 60 days or more than 12 months or by both such fine and imprisonment.

History: **En. Sec. 3, Ch. 54, L. 1909; amd. Sec. 1, Ch. 44, L. 1921; re-en. Sec. 3438, R.C.M. 1921; re-en. Sec. 3438, R.C.M. 1935; R.C.M. 1947, 50-203.**

Cross-References

Deceptive business practices, 45-6-318.

82-2-404. Umpire assayers — appointment, qualifications, and duties. A person, association, or corporation engaged in the sampling of ores with intent to purchase or smelt them, whether for themselves or as the agent or agents for other purchasers, shall choose an assayer who has operated an assay office or chemical laboratory for at least 1 year. The person, association, or corporation shall submit to the selected assayer all samples of ore over which there is a dispute as to metallic contents or value between the buyer or sampler and the seller of the ore. The chosen assayer shall be known as the umpire for the person, association, or corporation.

History: **En. Sec. 1, Ch. 115, L. 1909; re-en. Sec. 3439, R.C.M. 1921; re-en. Sec. 3439, R.C.M. 1935; amd. Sec. 2, Ch. 39, L. 1977; R.C.M. 1947, 50-204; amd. Sec. 1, Ch. 27, L. 1979.**

82-2-405. Notice of selection. Upon the selection of the umpire, who must be actively engaged in the assaying business in this state, the person, association, or corporation selecting the umpire shall, within 10 days after the selection is made, post a notice of the selection in a conspicuous place within and outside the room or house where the sampling of ore is carried on by the person, association, or corporation.

History: **En. Sec. 2, Ch. 115, L. 1909; re-en. Sec. 3440, R.C.M. 1921; re-en. Sec. 3440, R.C.M. 1935; amd. Sec. 3, Ch. 39, L. 1977; R.C.M. 1947, 50-205; amd. Sec. 2730, Ch. 56, L. 2009.**

82-2-406. Violation — penalty. Every person, association, or corporation engaged in the sampling of ores belonging to others which fails to comply with the provisions of 82-2-404 or 82-2-405 shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than $1,000 or less than $500.

History: **En. Sec. 3, Ch. 115, L. 1909; re-en. Sec. 3441, R.C.M. 1921; re-en. Sec. 3441, R.C.M. 1935; R.C.M. 1947, 50-206.**

Cross-References

82-2-407 through 82-2-420 reserved.

82-2-421. Time for payment for ores. (1) A person, association, company, or corporation engaged within this state in purchasing ore, minerals, or metals from or in smelting, milling, or otherwise reducing or preparing the same for market for any other person or persons, association, company, or corporation shall, within 20 days after any ore, minerals, or metals have arrived at the person's or entity's smelter, mill, reduction works, yards, or other place for receiving ore, minerals, or metals, make full settlement with and payment of the amount due to the consignor or consignors unless restrained or prevented from making the settlement and payment by an order, writ, or process of a court of competent jurisdiction.

(2) The provisions of this section are not applicable to any ore, minerals, or metals received pursuant to an existing written contract at the time of shipment between the consignor or consignors and the person, association, company, or corporation receiving the same when the time for settlement and payment is provided for in the contract.

History: En. Sec. 1, Ch. 37, L. 1911; re-en. Sec. 3442, R.C.M. 1921; re-en. Sec. 3442, R.C.M. 1935; amd. Sec. 1, Ch. 5, L. 1953; R.C.M. 1947, 50-301(part); amd. Sec. 2731, Ch. 56, L. 2009.

82-2-422. Violation — penalty. Any person, association, company, or corporation violating any of the provisions of 82-2-421 shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than $1,000 or less than $500.

History: En. Sec. 2, Ch. 37, L. 1911; re-en. Sec. 3443, R.C.M. 1921; re-en. Sec. 3443, R.C.M. 1935; R.C.M. 1947, 50-302.

Cross-References

Criminal responsibility of corporations, 45-2-311.

Accountability for conduct of corporation, 45-2-312.

82-2-423. Statement by purchasers of ore from leased mines. A person or corporation buying or treating ores from leased mines or mining claims shall furnish the lessor and the lessee of the mines or mining claims a true and correct copy of the statement of returns of ores from the sale or shipment. The statement shall show both the gross and net proceeds derived from the sale or shipment of ores. Upon shipment of the ores from leased premises, either for sale or treatment, the shipper shall furnish to any sampling works or smelter buying or treating them the names and post-office addresses of the lessor and the lessee interested in that shipment of ores, and within 7 days after receipt of the statement from the sampling works or smelter, the shipper shall make settlement with the lessor and the lessee for the shipment or sale of ores, based upon the statement received by the parties from the sampling works or smelter.

History: En. Sec. 1, Ch. 79, L. 1921; re-en. Sec. 3444, R.C.M. 1921; re-en. Sec. 3444, R.C.M. 1935; amd. Sec. 4, Ch. 39, L. 1977; R.C.M. 1947, 50-303.

82-2-424. Copy of statement to lessee. Sampling works and smelters within this state shall mail a duplicate copy of any statement showing the gross and net proceeds of all ores bought from or treated for lessors of mines to the lessee of the mine or mining claim from which the ores were extracted at the same time the statement is furnished to the lessor of the mine or mining claim or shipper of the ore.

History: En. 3444.1, R.C.M. 1935 by Sec. 1, Ch. 17, L. 1937; amd. Sec. 5, Ch. 39, L. 1977; R.C.M. 1947, 50-304.

82-2-425. Shipper — penalty for violation. A person or corporation who, as the shipper, violates 82-2-423, as amended, is liable to the lessor and the lessee for 10% of the net returns from the shipment or sale of ores referred to in that section, in addition to the value of the interest of the lessor and the lessee in the shipment. This amount may be recovered in an action in any court of competent jurisdiction.

History: En. Sec. 2, Ch. 79, L. 1921; re-en. Sec. 3445, R.C.M. 1921; re-en. Sec. 3445, R.C.M. 1935; amd. Sec. 6, Ch. 39, L. 1977; R.C.M. 1947, 50-305.

82-2-426. Smelters — penalty for violation. Any person or corporation operating any sampling works or smelter within this state who shall violate any of the provisions of 82-2-423 and 82-2-424 shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a fine not less than $50 or more than $100.

History: En. Sec. 3, Ch. 79, L. 1921; re-en. Sec. 3446, R.C.M. 1921; re-en. Sec. 3446, R.C.M. 1935; amd. Sec. 2, Ch. 17, L. 1937; R.C.M. 1947, 50-306.

Part 7
Sand and Gravel Deposit Program

82-2-701. Sand and gravel deposit program — investigation — purpose — prioritization. (1) The Montana bureau of mines and geology shall establish a sand and gravel deposit program for the purpose of investigating sand and gravel deposits in areas of the state where conflicts between development and sand and gravel operations are high.

(2) In prioritizing areas for investigation, the bureau of mines and geology shall consider the largest counties, according to the most recent census data, and counties with the most opencut mining permits and subdivision applications, according to the department of environmental quality.

(3) The bureau of mines and geology may start an investigation when it has sufficient funds to conduct an investigation.

(4) Within 1 year of starting an investigation, the bureau of mines and geology shall present the results of the investigation in the form of maps and text and in accordance with 5-11-210 to:

(a) the counties included in the investigation;
(b) the local government interim committee; and
(c) the environmental quality council.

History: En. Sec. 1, Ch. 276, L. 2009; amd. Sec. 112, Ch. 261, L. 2021.

82-2-702. Authority to accept gifts, grants, and reimbursements. The Montana bureau of mines and geology may accept gifts, grants, and reimbursements to be used for the purposes of 82-2-701.

History: En. Sec. 2, Ch. 276, L. 2009.

CHAPTER 4
RECLAMATION

Part 1 — Strip and Underground Mine Siting

82-4-101. Short title.
82-4-102. Intent — findings — policy and purpose.
82-4-103. Definitions.
82-4-104. Application.
82-4-105 through 82-4-110 reserved.
82-4-111. Repealed.
82-4-112. Administration.
82-4-113. Receipts paid into general fund.
82-4-114 through 82-4-120 reserved.
82-4-121. Permit required.
82-4-122. Application and approval of permit.
82-4-123. Permit fee and surety bond.
82-4-124. Permit — authority under and renewal.
82-4-125. Refusal of permit.
82-4-126. When information may be used to meet strip-mining or underground-mining permit requirements.
82-4-127. Effect of siting permit on subsequent mining permits.
82-4-128. Termination of permit.
82-4-129. Noncompliance — suspension of permits.
82-4-130. Procedure for hearings.
82-4-131 through 82-4-140 reserved.
82-4-141. Violation — penalty.
82-4-142. Mandamus to compel enforcement.

Part 2 — Coal and Uranium Mine Reclamation

82-4-201. Short title.
82-4-202. Intent — policy — findings.
82-4-203. Definitions.
82-4-204. Repealed.
82-4-205. Administration by department and board.
82-4-206. Procedure for contested case hearings.
82-4-207. Rulemaking — in situ coal gasification.
82-4-208 through 82-4-220 reserved.
82-4-221. Mining permit required.
82-4-222. Permit application — application revisions.
82-4-223. Surety bond.
82-4-224. Repealed.

82-4-225. Application for permit amendment.
82-4-226. Prospecting permit.
82-4-227. Refusal of permit — applicant violator system.
82-4-228. Designation of land unsuitable for coal mining.
82-4-229. Minor revisions — application — exemptions.
82-4-230 reserved.
82-4-231. Submission of and action on reclamation plan.
82-4-232. Area mining required — bond — alternative plan.
82-4-233. Planting of vegetation following grading of disturbed area.
82-4-234. Commencement of reclamation.
82-4-235. Determination of successful revegetation — final bond release.
82-4-236. Vegetation as property of landowner.
82-4-237. Operator to file annual reports.
82-4-238. Successor operator.
82-4-239. Reclamation.
82-4-240. Reclamation of lands after bond forfeited.
82-4-241. Receipts paid into general fund — disposition of bond forfeiture money.
82-4-242. Funds received by department.
82-4-243. Subsidence.
82-4-244. Coal and uranium mine permitting and reclamation program account.
82-4-245 through 82-4-249 reserved.
82-4-250. Operating permit revocation — permit transfer.
82-4-251. Noncompliance — suspension of permits.
82-4-252. Mandamus.
82-4-253. Suit for damage to water supply.
82-4-254. Violation — penalty — waiver.
82-4-255. Equal application of court costs.

Part 3 — Metal Mine Reclamation

82-4-301. Legislative intent and findings.
82-4-302. Purpose.
82-4-303. Definitions.
82-4-304. Exemption — works performed prior to promulgation of rules.
82-4-305. Exemption — small miners — written agreement.
82-4-306. Confidentiality of application information.
82-4-307. Review of existing files.
82-4-308. Release by waiver.
82-4-309. Exemption — operations on federal lands.
82-4-310. Exemption — scale and type of activity.
82-4-311. Disposition of fees, fines, penalties, and other uncleared money.
82-4-312. Hard-rock mining reclamation debt service fund.
82-4-313. Hard-rock mining reclamation bonds.
82-4-314. Authorization for sale of hard-rock mining reclamation bonds.
82-4-315. Hard-rock mining reclamation special revenue account.
82-4-316. Hard-rock mining permitting program account.
82-4-317 through 82-4-320 reserved.
82-4-321. Administration.
82-4-322. Investigations, research, and experiments.
82-4-323. Interagency cooperation — receipt and expenditure of funds.
82-4-324 through 82-4-330 reserved.
82-4-331. Exploration license required — employees included — limitation.
82-4-332. Exploration license.
82-4-333. Repealed.
82-4-334. Exception — geological phenomena.
82-4-335. Operating permit — limitation — fees.
82-4-336. Reclamation plan and specific reclamation requirements.
82-4-337. Inspection — issuance of operating permit — modification, amendment, or revision.
82-4-338. Performance bond.
82-4-339. Annual report of activities by permittee — fee — notice of large-scale mineral developer status.
82-4-340. Successor operator.
82-4-341. Compliance — reclamation by department.
82-4-342. Amendment to operating permits and exploration licenses — rulemaking — fees.
82-4-343. Operating permit — rock products — fees.
82-4-344 through 82-4-348 reserved.
82-4-349. Limitations of actions — venue.
82-4-350. Award of costs and attorney fees.
82-4-351. Reasons for denial of permit.
82-4-352. Reapplication with new reclamation plan.
82-4-353. Administrative remedies — notice — appeals — parties.
82-4-354. Mandamus to compel enforcement.

82-4-355. Action for damages to water supply — replacement.
82-4-356. Action in response to complaints related to use of explosives.
82-4-357. Abatement of environmental emergencies.
82-4-358 and 82-4-359 reserved.
82-4-360. When activity prohibited — exception.
82-4-361. Violation — penalties — waiver.
82-4-362. Suspension of permits — hearing.
82-4-363 through 82-4-366 reserved.
82-4-367. Long-term or perpetual water treatment permanent trust fund.
82-4-368 through 82-4-370 reserved.
82-4-371. Reclamation of abandoned mine sites.
82-4-372. Filing of lien for abandoned mine reclamation project.
82-4-373 and 82-4-374 reserved.
82-4-375. Engineer of record — duties.
82-4-376. Tailings storage facility — design document — fee.
82-4-377. Independent review panel — selection — duties.
82-4-378. Quality assurance during construction.
82-4-379. Tailings operation, maintenance, and surveillance manual.
82-4-380. Periodic review required.
82-4-381. Annual inspections.
82-4-382 through 82-4-389 reserved.
82-4-390. Cyanide heap and vat leach open-pit gold and silver mining prohibited.

Part 4 — Opencut Mining Reclamation

82-4-401. Short title.
82-4-402. Intent, findings, and policy.
82-4-403. Definitions.
82-4-404. Exemption — operations covered by metal mine reclamation.
82-4-405. Inapplicability to government.
82-4-406. Exemption — opencut operations on federal and state lands.
82-4-407 through 82-4-420 reserved.
82-4-421. Repealed.
82-4-422. Powers, duties, and functions.
82-4-423. Repealed.
82-4-424. Receipt and expenditure of funds — disposition of penalties and other money.
82-4-425. Inspection of opencut operations.
82-4-426. Reclamation of land on which bond forfeited.
82-4-427. Hearing — appeal — venue.
82-4-428 through 82-4-430 reserved.
82-4-431. Permit for mining, processing, and reclamation required.
82-4-432. Application for permit — contents — issuance — amendment.
82-4-433. Bond.
82-4-434. Plan of operation — requirements.
82-4-435. Repealed.
82-4-436. Plan amendments by department.
82-4-437. Annual report — fees.
82-4-438. Opencut fund — use of fund.
82-4-439. Extended review — criteria — timeframes.
82-4-440. Repealed.
82-4-441. Administrative and judicial penalties — enforcement.
82-4-442. Suspension and revocation orders.
82-4-443 and 82-4-444 reserved.
82-4-445. Reclamation of abandoned mine sites.
82-4-446. Filing of lien for abandoned mine reclamation project.

Part 5 reserved

Part 6 — Interstate Mining Compact

82-4-601. Interstate Mining Compact.
82-4-602. Text of Interstate Mining Compact.
82-4-603. Membership and applicability.
82-4-604. Expenses.

Parts 7 through 9 reserved

Part 10 — Penalties, Fees, and Interest

82-4-1001. Penalty factors.
82-4-1002. Collection of penalties, fees, late fees, and interest.
82-4-1003 through 82-4-1005 reserved.
82-4-1006. Abandoned mine reclamation account.

Part 1
Strip and Underground Mine Siting

82-4-101. Short title. This part shall be known and may be cited as "The Strip and Underground Mine Siting Act".

History: En. 50-1601 by Sec. 1, Ch. 280, L. 1974; amd. Sec. 1, Ch. 441, L. 1975; R.C.M. 1947, 50-1601.

82-4-102. Intent — findings — policy and purpose. (1) The legislature, mindful of its constitutional obligations under Article II, section 3, and Article IX of the Montana constitution, has enacted The Strip and Underground Mine Siting Act. It is the legislature's intent that the requirements of this part provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(2) It is the policy of this state to provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(3) It is the purpose of this part:

(a) to vest in the department the authority to adopt rules and to review new strip-mine and new underground-mine site locations and reclamation plans and either approve or disapprove those locations and plans and to exercise general administration and enforcement of this part;

(b) to satisfy the requirement of Article IX, section 2, of the constitution of this state that all lands disturbed by the taking of natural resources be reclaimed; and

(c) to ensure that adequate information is available on areas proposed for strip mining or underground mining so that mining and reclamation plans may be properly formulated to accommodate areas that are suitable for strip mining or underground mining.

(4) This part is an exercise of the general police power to provide for the health and welfare of the people."

History: En. 50-1602 by Sec. 2, Ch. 280, L. 1974; amd. Sec. 2, Ch. 441, L. 1975; R.C.M. 1947, 50-1602; amd. Sec. 360, Ch. 418, L. 1995; amd. Sec. 27, Ch. 361, L. 2003; amd. Sec. 82, Ch. 324, L. 2021.

Cross-References

Legislature to provide for protection and improvement of environment, Art. IX, sec. 1, Mont. Const.

82-4-103. Definitions. When used in this part, unless a different meaning clearly appears from the context, the following definitions apply:

(1) "Board" means the board of environmental review provided for in 2-15-3502.

(2) "Department" means the department of environmental quality provided for in 2-15-3501.

(3) "Mineral" means mineral as defined in 82-4-203.

(4) "New mine" means a strip- or underground-mining operation proposed for an area of land that the department determines, because of distance from an existing strip-mine or underground-mine operation or their respective facilities or because of important differences in topography, soils, wildlife, geologic structure, aquifers, or vegetation from an existing strip-mine or underground-mine operation, does not constitute an expansion of an existing operation.

(5) "Operation" means all of the premises, facilities, railroad loops, roads, power lines, and equipment used in the process of producing and removing mineral from a designated strip-mine or underground-mine area.

(6) "Operator" means a person who intends to operate a new strip mine or new underground mine involving the removal of more than 10,000 cubic yards of mineral or overburden.

(7) "Person" means a person, partnership, corporation, association, or other legal entity or any political subdivision or agency of the state.

(8) "Preparatory work" means all onsite disturbances, excluding prospecting, associated with the initiation of a new strip mine or underground mine, including but not limited to the construction of railroad spurs or loops, buildings to house mining operations, roads, storage and train load-out facilities, transmission lines, erection of draglines and loading shovels, and other associated facilities.

(9) "Strip mining" means any part of the process followed in the production of mineral by the opencut method, including mining by the auger method or any similar method that penetrates a mineral deposit and removes mineral directly through a series of openings made by a machine that enters the deposit from a surface excavation or any other method or process in which the strata or overburden is removed or displaced in order to recover the mineral.

(10) "Underground mining" means any part of the process that is followed in the production of a mineral and that uses vertical or horizontal shafts, slopes, drifts, or incline planes connected with excavations penetrating the mineral stratum or strata.

History: En. 50-1603 by Sec. 3, Ch. 280, L. 1974; amd. Sec. 3, Ch. 441, L. 1975; R.C.M. 1947, 50-1603; amd. Sec. 191, Ch. 575, L. 1981; amd. Sec. 361, Ch. 418, L. 1995.

82-4-104. Application. The provisions of this part shall not apply where any preparatory work was conducted prior to January 1, 1974, or for which contracts for preparatory work or the sale of Montana coal from a new strip mine by an operator holding a valid permit under 82-4-221 were in existence and proven specific notice thereof given to the department prior to January 1, 1974.

History: En. 50-1617 by Sec. 17, Ch. 280, L. 1974; R.C.M. 1947, 50-1617.

82-4-105 through 82-4-110 reserved.

82-4-111. Repealed. Sec. 111, Ch. 324, L. 2021.

History: En. 50-1604 by Sec. 4, Ch. 280, L. 1974; amd. Sec. 4, Ch. 441, L. 1975; R.C.M. 1947, 50-1604; amd. Sec. 362, Ch. 418, L. 1995.

82-4-112. Administration. (1) The department shall:

(a) adopt, after an opportunity for a hearing, general rules pertaining to new strip mines and to new underground mines and preparatory work to accomplish the purposes of this part, rules regarding filing of reports, issuance of permits, and other matters of procedure and administration;

(b) exercise general supervision, administration, and enforcement of this part and all rules and orders adopted under this part;

(c) issue orders requiring operators to adopt remedial measures necessary to comply with this part and rules adopted under this part;

(d) order the suspension of any permit for failure to comply with this part, any rule adopted under this part, or a permit issued pursuant to this part;

(e) issue an order revoking a permit when the requirements set forth by a notice of violation, order of suspension, or order requiring remedial measures have not been complied with according to the terms in the notice or order;

(f) order the halting of any operation that is started without first having obtained a permit as required by this part;

(g) conduct investigations and inspections necessary to ensure compliance with this part; and

(h) encourage and conduct investigations, research, experiments, and demonstrations and collect and disseminate information relating to new strip mines, new underground mines, and reclamation of lands and waters affected by preparatory work.

(2) The board shall conduct hearings under this part.

History: En. 50-1605 by Sec. 5, Ch. 280, L. 1974; amd. Sec. 5, Ch. 441, L. 1975; R.C.M. 1947, 50-1605; amd. Sec. 363, Ch. 418, L. 1995; amd. Sec. 6, Ch. 79, L. 2001; amd. Sec. 83, Ch. 324, L. 2021.

82-4-113. Receipts paid into general fund. Except for bond forfeiture moneys, all fees, penalties, and other moneys available or paid to the department under the provisions of this part shall be placed in the state treasury and credited to the general fund.

History: En. 50-1610 by Sec. 10, Ch. 280, L. 1974; amd. Sec. 10, Ch. 441, L. 1975; R.C.M. 1947, 50-1610; amd. Sec. 1, Ch. 31, L. 1981.

Cross-References

Expenditure only upon legislative appropriation, Art. VIII, sec. 14, Mont. Const.; 17-8-101.

82-4-114 through 82-4-120 reserved.

82-4-121. Permit required. No person may commence preparatory work until the operator shall have first obtained from the department a mine-site location permit for a new strip mine or a new underground mine or a permit under part 2 of this chapter, if the application for such permit includes an appropriate long-range mining plan acceptable to the department.

History: En. 50-1606 by Sec. 6, Ch. 280, L. 1974; amd. Sec. 6, Ch. 441, L. 1975; R.C.M. 1947, 50-1606.

Cross-References

Landowner notification of surface operations, Title 82, ch. 2, part 3.

82-4-122. Application and approval of permit. (1) A person desiring a mine-site location permit shall file with the department an application that must contain a reclamation plan for any preparatory work and any other information the department considers necessary to determine if the proposed area to be affected by the operation is appropriate for the location of a new strip mine or a new underground mine. The department may require any information included in but not limited to an application for a strip-mining permit or underground-mining permit as required by part 2 of this chapter.

(2) Except as provided in 75-1-205(4) and 75-1-208(4)(b), the department shall notify the applicant within 365 days of receipt of a complete application if the proposed site is an acceptable location for development of a new strip mine or a new underground mine. If the site is approved, the department shall issue the applicant a mine-site location permit. If the location is not approved, the department shall notify the applicant in writing, setting forth reasons why the location is not acceptable. The department shall also notify the applicant within 365 days of receipt of a complete application whether the proposed reclamation plan is or is not acceptable. If the plan is not acceptable, the department shall set forth the reasons for nonacceptance of the plan. It may propose modifications, delete areas, or reject the entire plan.

History: En. 50-1607 by Sec. 7, Ch. 280, L. 1974; amd. Sec. 7, Ch. 441, L. 1975; R.C.M. 1947, 50-1607(1), (3); amd. Sec. 10, Ch. 299, L. 2001; amd. Sec. 13, Ch. 337, L. 2005.

Contents of application for strip-mine permit, 82-4-222.

82-4-123. Permit fee and surety bond. A fee of $50 shall be paid before the mine-site location permit required in this part may be issued. The operator shall also file with the department a bond payable to the state of Montana with surety satisfactory to the department in the penal sum to be determined by the department of not less than $200 or more than $10,000 for each acre or fraction thereof of the area of land to be disturbed by preparatory work, with a minimum bond of $5,000, conditioned upon the faithful performance of the requirements set forth in this part and of the rules of the department. In determining the amount of the bond within the above limits, the department shall take into consideration the character and nature of the surface and subsurface disturbances, the future suitable use of the land involved, and the cost of removing or burying facilities, subsidence stabilization, water controls, backfilling, grading, topsoiling, and reclamation to be required. Notwithstanding the above limits, the bond may not be less than the total estimated cost to the state of completing the work described in the reclamation plan.

History: **En. 50-1607 by Sec. 7, Ch. 280, L. 1974; amd. Sec. 7, Ch. 441, L. 1975; R.C.M. 1947, 50-1607(4); amd. Sec. 364, Ch. 418, L. 1995; amd. Sec. 84, Ch. 324, L. 2021.**

Cross-References

Suretyship, Title 28, ch. 11, part 4.

82-4-124. Permit — authority under and renewal. A mine-site location permit shall authorize the applicant to engage in preparatory work upon the area described in the application and designated in the permit for a period of 1 year from the date of issuance and is renewable until the applicant has applied for and received a strip-mining or underground-mining permit in accordance with part 2 of this chapter.

History: **En. 50-1607 by Sec. 7, Ch. 280, L. 1974; amd. Sec. 7, Ch. 441, L. 1975; R.C.M. 1947, 50-1607(2).**

82-4-125. Refusal of permit. (1) The department may not issue a permit under this part if it finds that a new strip mine or a new underground mine is not consistent with the purposes and policies of this part.

(2) The department shall not approve a new strip-mining site, a new underground-mining site, or preparatory worksite for any areas of land or water included in the application if the department determines that the area could not be approved under the criteria specified in 82-4-227.

(3) The department shall not issue a permit under this part if a proposed reclamation plan does not meet the requirements of part 2 of this chapter.

History: **En. 50-1608 by Sec. 8, Ch. 280, L. 1974; amd. Sec. 8, Ch. 441, L. 1975; R.C.M. 1947, 50-1608.**

Cross-References

Policy and purpose of part, 82-4-102.

82-4-126. When information may be used to meet strip-mining or underground-mining permit requirements. The department may choose to accept information submitted under this part to the extent it is applicable and relevant as satisfying the requirements of part 2 of this chapter.

History: **En. 50-1614 by Sec. 14, Ch. 280, L. 1974; amd. Sec. 11, Ch. 441, L. 1975; R.C.M. 1947, 50-1614.**

Cross-References

Contents of application for strip-mine permit, 82-4-222.

82-4-127. Effect of siting permit on subsequent mining permits. When the department has sufficient information to approve or disapprove a mine-site location permit application on either the entire area being considered for a mine-site location permit or a portion of the area on the grounds listed in 82-4-227(2) and (7), the department shall provide written notification to the operator that the department has enough information to approve or disapprove the application. The decision is binding on the department with regard to strip-mining or underground-mining permit applications as specified in part 2 of this chapter unless:

(1) new information is submitted or obtained in compliance with part 2 of this chapter that indicates a situation not existing or known at the time of the issuance of a permit under this part;

(2) an application under this part misrepresented information related to the criteria;

(3) a situation, which was not in existence at the time of the issuance of a permit under this part, develops because of strip mining or underground mining operations.

History: **En. 50-1616 by Sec. 16, Ch. 280, L. 1974; amd. Sec. 13, Ch. 441, L. 1975; R.C.M. 1947, 50-1616; amd. Sec. 68, Ch. 44, L. 2007.**

82-4-128. Termination of permit. A mine-site location permit granted by the department in accordance with the provisions of this part shall remain in full force and effect until the provisions of the permit are complied with and the bond is released, except that those areas of land covered by a mine-site location permit for which a strip-mining or an underground-mining permit is granted pursuant to the provisions of part 2 of this chapter shall be released from the terms and provisions of the mine-site location permit.

History: **En. 50-1615 by Sec. 15, Ch. 280, L. 1974; amd. Sec. 12, Ch. 441, L. 1975; R.C.M. 1947, 50-1615.**

82-4-129. Noncompliance — suspension of permits. (1) If any of the requirements of this part or rules or orders of the department have not been complied with within the time limits set by the department or by this part, the department shall serve a notice of noncompliance on the operator or, when necessary, the director of the department shall order the suspension of a permit. The notice or order must be handed to the operator in person or served by certified mail addressed to the permanent address shown on the application for a permit. The notice of noncompliance or order of suspension must specify in what respects the operator has failed to comply with this part or the rules or orders of the department and the board. If the operator has not complied with the requirement set forth in the notice of noncompliance or order of suspension within time limits set in the notice or order, the permit may be revoked by order of the board and the performance bond forfeited to the department.

(2) Any additional strip-mining or underground-mining or mine-site location permits held by an operator whose mine-site location permit has been revoked must be suspended, and the operator is not eligible to receive another permit or to have the suspended permits reinstated until the operator has complied with all the requirements of this part with respect to previous permits issued to the operator. An operator who has forfeited a bond is not eligible to receive another permit unless the land for which the bond was forfeited has been reclaimed without cost to the state or the operator has paid into the reclamation account a sum together with the value of the bond the department finds adequate to reclaim the lands. The department may not issue any additional permits to an operator who has repeatedly been in noncompliance or violation of this part.

History: En. 50-1609 by Sec. 9, Ch. 280, L. 1974; amd. Sec. 9, Ch. 441, L. 1975; R.C.M. 1947, 50-1609; amd. Sec. 365, Ch. 418, L. 1995; amd. Sec. 85, Ch. 324, L. 2021.

82-4-130. Procedure for hearings. (1) A person aggrieved by a final decision of the department under this part may request a hearing before the board by submitting a written request stating the reason for the request within 30 days after the department's decision.

(2) The contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6, apply to a hearing held under this part.

History: En. 50-1613 by Sec. 13, Ch. 280, L. 1974; R.C.M. 1947, 50-1613; amd. Sec. 7, Ch. 79, L. 2001.

Cross-References

Montana Administrative Procedure Act, Title 2, ch. 4.

82-4-131 through 82-4-140 reserved.

82-4-141. Violation — penalty. (1) A person or operator who violates any of the provisions of this part or rules or orders adopted under this part shall pay a civil penalty of not less than $100 or more than $1,000 for the violation and an additional civil penalty of not less than $100 or more than $1,000 for each day during which a violation continues and may be enjoined from continuing the violations as provided in this section. These penalties are recoverable in an action brought by the department in the district court of the first judicial district, Lewis and Clark County, or in the district court having jurisdiction of the defendant.

(2) The department may bring an action for a restraining order, temporary injunction, or permanent injunction against an operator or other person violating or threatening to violate an order adopted under this part.

(3) A person who purposely or knowingly violates any of the provisions of this part or any determination or order adopted under this part that has become final is guilty of a misdemeanor and shall be fined not less than $500 and not more than $5,000. Each day on which a violation occurs constitutes a separate offense.

(4) Penalties assessed under this section must be determined in accordance with the penalty factors in 82-4-1001.

History: En. 50-1611 by Sec. 11, Ch. 280, L. 1974; R.C.M. 1947, 50-1611; amd. Sec. 366, Ch. 418, L. 1995; amd. Sec. 24, Ch. 487, L. 2005.

82-4-142. Mandamus to compel enforcement. (1) A resident of this state who has knowledge that a requirement of this part or a rule adopted under this part is not being enforced by a public officer or employee whose duty it is to enforce the requirement or rule may bring the failure to enforce to the attention of the public officer or employee by a written statement under oath that must state the specific facts of the failure to enforce the requirement or rule. Knowingly making false statements or charges in the affidavit subjects the affiant to penalties prescribed in 45-7-202.

(2) If the public officer or employee neglects or refuses for an unreasonable time after receipt of the statement to enforce the requirement or rule, the resident may bring an action of mandamus in the district court of the county in which the land is located. If the court finds that a requirement of this part or a rule adopted under this part is not being enforced, it shall order the public officer or employee whose duty it is to enforce the requirement or rule to perform the duties. If the officer or employee fails to do so, the public officer or employee must be held in contempt of court and is subject to the penalties provided by law.

82-4-201. Short title. This part shall be known and may be cited as "The Montana Strip and Underground Mine Reclamation Act".

History: En. Sec. 1, Ch. 325, L. 1973; amd. Sec. 14, Ch. 441, L. 1975; R.C.M. 1947, 50-1034.

82-4-202. Intent — policy — findings. (1) The legislature, mindful of its constitutional obligations under Article II, section 3, and Article IX of the Montana constitution, has enacted The Montana Strip and Underground Mine Reclamation Act. It is the legislature's intent that the requirements of this part provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(2) It is the declared policy of this state and its people to:

(a) maintain and improve the state's clean and healthful environment for present and future generations;

(b) protect its environmental life-support system from degradation;

(c) prevent unreasonable degradation of its natural resources;

(d) restore, enhance, and preserve its scenic, historic, archaeologic, scientific, cultural, and recreational sites;

(e) demand effective reclamation of all lands disturbed by the taking of natural resources and maintain state administration of the reclamation program;

(f) require the legislature to provide for proper administration and enforcement, create adequate remedies, and set effective requirements and standards, especially as to reclamation of disturbed lands, in order to achieve the objectives enumerated in this subsection (2); and

(g) provide for the orderly development of coal resources through strip or underground mining to ensure the wise use of these resources and prevent the failure to conserve coal.

(3) The legislature finds and declares that:

(a) in order to achieve the policy objectives enumerated in subsection (2), promote the health and welfare of the people, control erosion and pollution, protect domestic stock and wildlife, preserve agricultural and recreational productivity, save cultural, historic, and aesthetic values, and ensure a long-range dependable tax base, it is reasonably necessary to require that:

(i) all strip-mining and underground-mining operations be limited to those for which 5-year permits are granted;

(ii) a permit not be issued until the operator presents a comprehensive plan for reclamation and restoration and a coal conservation plan, together with an adequate performance bond, and the plan is approved;

(iii) certain other things must be done, certain remedies must be available, and certain lands because of their unique or unusual characteristics may not be strip-mined or underground-mined under any circumstances; and

(iv) the department be given authority to administer and enforce a reclamation program that complies with Public Law 95-87, the Surface Mining Control and Reclamation Act of 1977, as amended;

(b) this part is an exercise of the authority granted in the Montana constitution and, in particular, a response to the mandate expressed in Article IX of the constitution and that this part is also an exercise of the general police power to provide for the health and welfare of the people;

(c) coal mining alters the character of soils and overburden materials and that duplication of premining topography, soils, and vegetation composition is not practicable; and

(d) standards for successful reclamation must be well-defined and consistent so that mine operators can reclaim lands disturbed by mining with confidence that the release of performance bonds can be achieved.

History: En. Sec. 2, Ch. 325, L. 1973; amd. Sec. 15, Ch. 441, L. 1975; R.C.M. 1947, 50-1035; amd. Sec. 1, Ch. 550, L. 1979; amd. Sec. 1, Ch. 204, L. 2003; amd. Sec. 28, Ch. 361, L. 2003.

Inalienable rights, Art. II, sec. 3, Mont. Const.

Environment — protection and improvement, Art. IX, sec. 1, Mont. Const.

82-4-203. Definitions. Unless the context requires otherwise, in this part the following definitions apply:

(1) "Abandoned" means an operation in which a mineral is not being produced and that the department determines will not continue or resume operation.

(2) "Adjacent area" means the area outside the permit area where a resource or resources, determined in the context in which the term is used, are or could reasonably be expected to be adversely affected by proposed mining operations, including probable impacts from underground workings.

(3) "Affected drainage basin" means an area of land where surface water and ground water quality and quantity are affected by mining activities and where they drain to a common point.

(4) (a) "Alluvial valley floor" means the unconsolidated stream-laid deposits holding streams where water availability is sufficient for subirrigation or flood irrigation agricultural activities.

(b) The term does not include upland areas that are generally overlain by a thin veneer of colluvial deposits composed chiefly of debris from sheet erosion and deposits by unconcentrated runoff or slope wash, together with talus, other mass movement accumulation, and windblown deposits.

(5) "Amendment" means a change in the mine or reclamation plan that increases the operation's permitted boundaries. The term includes major revisions but does not include incidental boundary revisions or minor revisions.

(6) "Approximate original contour" means that surface configuration achieved by backfilling and grading of the mined area so that the reclaimed area, including any terracing

or access roads, closely resembles the general surface configuration of the land prior to mining and blends into and complements the drainage pattern of the surrounding terrain, with all highwalls, spoil piles, and coal refuse piles eliminated, so that:

(a) the reclaimed terrain closely resembles the general surface configuration if it is comparable to the premine terrain. For example, if the area was basically level or gently rolling before mining, it should retain these features after mining, recognizing that rolls and dips need not be restored to their original locations and that level areas may be increased.

(b) the reclaimed area blends with and complements the drainage pattern of the surrounding area so that water intercepted within or from the surrounding terrain flows through and from the reclaimed area in an unobstructed and controlled manner;

(c) postmining drainage basins may differ in size, location, configuration, orientation, and density of ephemeral drainageways compared to the premining topography if they are hydrologically stable, soil erosion is controlled to the extent appropriate for the postmining land use, and the hydrologic balance is protected; and

(d) the reclaimed surface configuration is appropriate for the postmining land use.

(7) "Aquifer" means any geologic formation or natural zone beneath the earth's surface that contains or stores water and transmits it from one point to another in quantities that permit or have the potential to permit economic development as a water source.

(8) (a) "Area of land affected" means the area of land from which overburden is to be or has been removed and upon which the overburden is to be or has been deposited.

(b) The term includes:

(i) all land overlying any tunnels, shafts, or other excavations used to extract the mineral;

(ii) lands affected by the construction of new railroad loops and roads or the improvement or use of existing railroad loops and roads to gain access and to haul the mineral;

(iii) processing facilities at or near the mine site or other mine-associated facilities, waste deposition areas, treatment ponds, and any other surface or subsurface disturbance associated with strip mining or underground mining; and

(iv) all activities necessary and incident to the reclamation of the mining operations.

(9) "Bench" means the ledge, shelf, table, or terrace formed in the contour method of strip mining.

(10) "Board" means the board of environmental review provided for in 2-15-3502.

(11) "Coal conservation plan" means the planned course of conduct of a strip- or underground-mining operation and includes plans for the removal and use of minable and marketable coal located within the area planned to be mined.

(12) (a) "Coal preparation" means the chemical or physical processing of coal and its cleaning, concentrating, or other processing or preparation.

(b) The term does not mean the conversion of coal to another energy form or to a gaseous or liquid hydrocarbon, except for incidental amounts that do not leave the plant, nor does the term mean processing for other than commercial purposes.

(13) "Coal preparation plant" means a commercial facility where coal is subject to coal preparation. The term includes commercial facilities associated with coal preparation activities but is not limited to loading buildings, water treatment facilities, water storage facilities, settling basins and impoundments, and coal processing and other waste disposal areas.

(14) "Contour strip mining" means that strip-mining method commonly carried out in areas of rough and hilly topography in which the coal or mineral seam outcrops along the side of the slope and entrance are made to the seam by excavating a bench or table cut at and along the site of the seam outcropping, with the excavated overburden commonly being cast down the slope below the mineral seam and the operating bench.

(15) "Cropland" means land used for the production of adapted crops for harvest, alone or in rotation with grasses and legumes, that include row crops, small grain crops, hay crops, nursery crops, orchard crops, and other similar crops.

(16) "Degree" means a measurement from the horizontal. In each case, the measurement is subject to a tolerance of 5% error.

(17) "Department" means the department of environmental quality provided for in 2-15-3501.

(18) "Developed water resources" means land used for storing water for beneficial uses, such as stockponds, irrigation, fire protection, flood control, and water supply.

(19) "Ephemeral drainageway" means a drainageway that flows only in response to precipitation in the immediate watershed or in response to the melting of snow or ice and is always above the local water table.

(20) "Failure to conserve coal" means the nonremoval or nonuse of minable and marketable coal by an operation. However, the nonremoval or nonuse of minable and marketable coal that occurs because of compliance with reclamation standards established by the department is not considered failure to conserve coal.

(21) "Fill bench" means that portion of a bench or table that is formed by depositing overburden beyond or downslope from the cut section as formed in the contour method of strip mining.

(22) "Fish and wildlife habitat" means land dedicated wholly or partially to the production, protection, or management of species of fish or wildlife.

(23) "Forestry" means land used or managed for the long-term production of wood, wood fiber, or wood-derived products.

(24) "Grazing land" means land used for grasslands and forest lands where the indigenous vegetation is actively managed for livestock grazing or browsing or occasional hay production.

(25) "Higher or better uses" means postmining land uses that have a higher economic value or noneconomic benefit to the landowner or the community than the premining land uses.

(26) "Hydrologic balance" means the relationship between the quality and quantity of water inflow to, water outflow from, and water storage in a hydrologic unit, such as a drainage basin, aquifer, soil zone, lake, or reservoir, and encompasses the dynamic relationships among precipitation, runoff, evaporation, and changes in ground water and surface water storage.

(27) "Imminent danger to the health and safety of the public" means the existence of any condition or practice or any violation of a permit or other requirement of this part in a strip- or underground-coal-mining and reclamation operation that could reasonably be expected to cause substantial physical harm to persons outside the permit area before the condition, practice, or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same conditions or practices giving rise to the peril, would not willingly be exposed to the danger during the time necessary for abatement.

(28) "Incidental boundary revision" means a change in the permit boundary necessary for reasons unforeseen in the original permit application that is small in relation to the original or amended permit area with insignificant impacts relative to the entire operation.

(29) "Industrial or commercial" means land used for:

(a) extraction or transformation of materials for fabrication of products, wholesaling of products, or long-term storage of products. This includes all heavy and light manufacturing facilities.

(b) retail or trade of goods or services, including hotels, motels, stores, restaurants, and other commercial establishments.

(30) (a) "In situ coal gasification" means a method of in-place coal mining where limited quantities of overburden are disturbed to install a conduit or well and coal is mined by injecting or recovering a liquid, solid, sludge, or gas that causes the leaching, dissolution, gasification, liquefaction, or extraction of the coal.

(b) In situ coal gasification does not include the storage of carbon dioxide in a geologic storage reservoir, the primary or enhanced recovery of naturally occurring oil and gas, or any related process regulated by the board of oil and gas conservation pursuant to Title 82, chapter 11.

(31) "Intermittent stream" means a stream or reach of a stream that is below the water table for at least some part of the year and that obtains its flow from both ground water discharge and surface runoff.

(32) "Land use" means specific uses or management-related activities, rather than the vegetative cover of the land. Land uses may be identified in combination when joint or seasonal uses occur and may include land used for support facilities that are an integral part of the land use. Land use categories include cropland, developed water resources, fish and wildlife

habitat, forestry, grazing land, industrial or commercial, pastureland, land occasionally cut for hay, recreation, or residential.

(33) "Major revision" means a change in the mining or reclamation plan that:

(a) significantly changes the postmining drainage plan, the overall postmining land use, or the bonding level of the permitted area; or

(b) adversely affects the reclaimability of the area or the hydrologic balance on or off the permitted area.

(34) "Marketable coal" means a minable coal that is economically feasible to mine and is fit for sale in the usual course of trade.

(35) "Material damage" means:

(a) with respect to the hydrologic balance outside the permit area, a quantifiable adverse impact from surface coal mining and reclamation operations on the quality or quantity of surface water or ground water that precludes an existing or reasonably foreseeable use of surface water or ground water outside the permit area. A quantifiable adverse impact is an effect that can be quantified and measured to a significant degree of confidence. Existing or reasonably foreseeable uses of surface water or ground water are those beneficial uses recognized in the classification of state waters pursuant to Title 75, chapter 5, part 3.

(b) with respect to an alluvial valley floor, degradation or reduction by coal mining and reclamation operations of the water quality or quantity supplied to the alluvial valley floor that significantly decreases the capability of the alluvial valley floor to support agricultural activities; and

(c) with respect to subsidence caused by underground coal mining:

(i) a functional impairment of surface lands, features, structures, or facilities;

(ii) a physical change that has a significant adverse impact on the affected land's capability to support any current or reasonably foreseeable uses or causes significant loss in production or income; or

(iii) a significant change in the condition, appearance, or utility of a structure or facility from its presubsidence condition.

(36) "Method of operation" means the method or manner by which the cut, open pit, shaft, or excavation is made, the overburden is placed or handled, water is controlled, and other acts are performed by the operator in the process of uncovering and removing the minerals that affect the reclamation of the area of land affected.

(37) "Minable coal" means that coal that can be removed through strip- or underground-mining methods adaptable to the location that coal is being mined or is planned to be mined.

(38) "Mineral" means coal and uranium.

(39) "Minor revision" means a change to the mining or reclamation plan that increases the area of land affected by mining activities within a permitted area by a total of less than 320 acres from the amount initially approved and does not significantly increase the impact of the permitted disturbance. The term includes expansion into an adjacent permitted area provided the expansion does not significantly increase the impact from either permitted area.

(40) "Operation" means:

(a) all of the premises, facilities, railroad loops, roads, and equipment used in the process of producing and removing mineral from and reclaiming a designated strip-mine or underground-mine area, including coal preparation plants; and

(b) all activities, including excavation incident to operations, or prospecting for the purpose of determining the location, quality, or quantity of a natural mineral deposit.

(41) "Operator" means a person engaged in:

(a) strip mining or underground mining who removes or intends to remove more than 10,000 cubic yards of mineral or overburden;

(b) coal mining who removes or intends to remove more than 250 tons of coal from the earth by mining within 12 consecutive calendar months in any one location;

(c) operating a coal preparation plant; or

(d) uranium mining using in situ methods.

(42) "Overburden" means:

(a) all of the earth and other materials that lie above a natural mineral deposit; and

(b) the earth and other material after removal from their natural state in the process of mining.

(43) "Pastureland" means land used primarily for the long-term production of adapted, domesticated forage plants to be grazed by livestock or occasionally cut and cured for livestock feed.

(44) "Perennial stream" means a stream or part of a stream that flows continuously during all of the calendar year as a result of ground water discharge or surface runoff.

(45) "Person" means a person, partnership, corporation, association, or other legal entity or any political subdivision or agency of the state or federal government.

(46) "Prime farmland" means land that:

(a) meets the criteria for prime farmland prescribed by the United States secretary of agriculture in the Federal Register; and

(b) historically has been used for intensive agricultural purposes.

(47) "Prospecting" means:

(a) the gathering of surface or subsurface geologic, physical, or chemical data by mapping, trenching, or geophysical or other techniques necessary to determine:

(i) the quality and quantity of overburden in an area; or

(ii) the location, quantity, or quality of a mineral deposit; or

(b) the gathering of environmental data to establish the conditions of an area before beginning strip- or underground-coal-mining and reclamation operations under this part.

(48) "Reclamation" means backfilling, subsidence stabilization, water control, grading, highwall reduction, topsoiling, planting, revegetation, and other work conducted on lands affected by strip mining or underground mining under a plan approved by the department to make those lands capable of supporting the uses that those lands were capable of supporting prior to any mining or to higher or better uses.

(49) "Recovery fluid" means any material that flows or moves, whether in semisolid, liquid, sludge, gas, or some other form or state, used to dissolve, leach, gasify, or extract coal.

(50) "Recreation" means land used for public or private leisure-time activities, including developed recreation facilities, such as parks, camps, and amusement areas, as well as areas for less intensive uses, such as hiking, canoeing, and other undeveloped recreational uses.

(51) "Reference area" means a land unit maintained under appropriate management for the purpose of measuring vegetation ground cover, productivity, and plant species diversity that are produced naturally or by crop production methods approved by the department. Reference areas must be representative of geology, soil, slope, and vegetation in the permit area.

(52) "Remining" means conducting surface coal mining and reclamation operations that affect previously mined areas (for example, the recovery of additional mineral from existing gob or tailings piles).

(53) "Residential" means land used for single- and multiple-family housing, mobile home parks, or other residential lodgings.

(54) "Restore" or "restoration" means reestablishment after mining and reclamation of the land use that existed prior to mining or to higher or better uses.

(55) (a) "Strip mining" means any part of the process followed in the production of mineral by the opencut method, including mining by the auger method or any similar method that penetrates a mineral deposit and removes mineral directly through a series of openings made by a machine that enters the deposit from a surface excavation or any other mining method or process in which the strata or overburden is removed or displaced in order to recover the mineral.

(b) For the purposes of this part only, strip mining also includes remining and coal preparation.

(c) The terms "remining" and "coal preparation" are not included in the definition of "strip mining" for purposes of Title 15, chapter 35, part 1.

(56) "Subsidence" means a vertically downward movement of overburden materials resulting from the actual mining of an underlying mineral deposit or associated underground excavations.

(57) "Surface owner" means:

(a) a person who holds legal or equitable title to the land surface;

(b) a person who personally conducts farming or ranching operations upon a farm or ranch unit to be directly affected by strip-mining operations or who receives directly a significant portion of income from farming or ranching operations;

(c) the state of Montana when the state owns the surface; or

(d) the appropriate federal land management agency when the United States government owns the surface.

(58) "Topsoil" means the unconsolidated mineral matter that is naturally present on the surface of the earth, that has been subjected to and influenced by genetic and environmental factors of parent material, climate, macroorganisms and microorganisms, and topography, all acting over a period of time, and that is necessary for the growth and regeneration of vegetation on the surface of the earth.

(59) "Underground mining" means any part of the process that is followed in the production of a mineral and that uses vertical or horizontal shafts, slopes, drifts, or incline planes connected with excavations penetrating the mineral stratum or strata. The term includes mining by in situ methods.

(60) "Unwarranted failure to comply" means:

(a) the failure of a permittee to prevent the occurrence of any violation of a permit or any requirement of this part because of indifference, lack of diligence, or lack of reasonable care; or

(b) the failure to abate any violation of a permit or of this part because of indifference, lack of diligence, or lack of reasonable care.

(61) "Waiver" means a document that demonstrates the clear intention to release rights in the surface estate for the purpose of permitting the extraction of subsurface minerals by strip-mining methods.

(62) "Wildlife habitat enhancement feature" means a component of the reclaimed landscape, established in conjunction with land uses other than fish and wildlife habitat, for the benefit of wildlife species, including but not limited to tree and shrub plantings, food plots, wetland areas, water sources, rock outcrops, microtopography, or raptor perches.

(63) "Written consent" means a statement that is executed by the owner of the surface estate and that is written on a form approved by the department to demonstrate that the owner consents to entry of an operator for the purpose of conducting strip-mining operations and that the consent is given only to strip-mining and reclamation operations that fully comply with the terms and requirements of this part. *(2025 amendments to definition of material damage void on occurrence of contingency—sec. 4, Ch. 464, L. 2025—see compiler's comment; the definitions of amendment, incidental boundary revision, major revision, and minor revision terminate on occurrence of contingency—sec. 6, Ch. 524, L. 2023.)*

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 464, L. 2025. Amendment effective May 5, 2025, and void on occurrence of contingency.

Retroactive Applicability: Section 6, Ch. 464, L. 2025, provided: "[This act] applies retroactively, within the meaning of 1-2-109, to actions for judicial review or other causes of action challenging the issuance of a permit petition for review, amendment, license, arbitration, action, certificate, or inspection that are pending but not yet decided on or after [the effective date of this act]." Effective May 5, 2025.

Contingent Voidness: Sec. 4, Ch. 464, L. 2025, provided: "(1) If any provision of [this act] is disapproved by the United States secretary of the interior pursuant to 30 CFR 732, then that portion of [this act] is void.

(2) Within 15 days of the effective date of the disapproval under subsection (1), the department of environmental quality shall notify the code commissioner, certifying that the disapproval under subsection (1) has occurred."

Contingent Termination: Section 6, Ch. 524, L. 2023, provided: "[This act] terminates on the date that the department of environmental quality certifies to the code commissioner that the office of surface mining of the United States department of the interior disapproves the changes to Montana's program that are provided in [this act]. The department of environmental quality shall submit certification within 60 days of the occurrence of the contingency."

82-4-204. Repealed. Sec. 111, Ch. 324, L. 2021.

History: En. Sec. 4, Ch. 325, L. 1973; amd. Sec. 17, Ch. 441, L. 1975; R.C.M. 1947, 50-1037; amd. Sec. 3, Ch. 550, L. 1979; amd. Sec. 368, Ch. 418, L. 1995.

82-4-205. Administration by department and board. (1) The department shall adopt, after an opportunity for a hearing, general rules pertaining to strip mining and to underground mining to accomplish the purposes of this part. The department may adopt rules with respect to filing of reports, issuance of permits, monitoring, and other matters of procedure and administration.

(2) The department:

(a) shall exercise general supervision, administration, and enforcement of this part and all rules and orders adopted under this part;

(b) shall review for approval or disapproval all plans and specifications submitted by an operator for the method of operation, subsidence stabilization, water control, backfilling, grading, highwall reduction, and topsoiling and for the reclamation of the area of land affected by the operator's operation;

(c) shall issue orders requiring an operator to adopt the remedial measures necessary to comply with this part and rules adopted under this part;

(d) shall order the suspension of any permit for failure to comply with this part or a rule adopted under this part;

(e) shall issue an order revoking a permit when the requirements set forth by a notice of violation, order of suspension, or order requiring remedial measures have not been complied with according to the terms in the notice or order;

(f) shall order the halting of any operation that is started without first having obtained a permit as required by this part or order the cessation of operations not in compliance with this part in accordance with 82-4-251;

(g) shall conduct public hearings required under this part or rules adopted pursuant to this part;

(h) shall conduct investigations and inspections necessary to ensure compliance with this part; and

(i) may encourage and conduct investigations, research, experiments, and demonstrations and collect and disseminate information relating to strip mining and to underground mining and reclamation of lands and waters affected by strip mining and underground mining.

(3) The board shall conduct contested case hearings under this part.

History: **En. Sec. 5, Ch. 325, L. 1973; amd. Sec. 18, Ch. 441, L. 1975; R.C.M. 1947, 50-1038; amd. Sec. 4, Ch. 550, L. 1979; amd. Sec. 369, Ch. 418, L. 1995; amd. Sec. 3, Ch. 273, L. 1997; amd. Sec. 8, Ch. 79, L. 2001; amd. Sec. 86, Ch. 324, L. 2021.**

82-4-206. Procedure for contested case hearings. (1) An applicant, permittee, or person with an interest that is or may be adversely affected and who submitted comments or written objections during the relevant comment period for an application pursuant to subsections (1)(a) through (1)(e), may request a hearing before the board on any of the following decisions of the department by submitting a written request stating the reason for the request within 30 days after the department's decision:

(a) approval or denial of an application for a permit pursuant to 82-4-231;

(b) approval or denial of an application for a prospecting permit pursuant to 82-4-226;

(c) approval or denial of an application to increase or reduce a permit area pursuant to 82-4-225;

(d) approval or denial of an application to renew or revise a permit pursuant to 82-4-221; or

(e) approval or denial of an application to transfer a permit pursuant to 82-4-238 or 82-4-250.

(2) The contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6, apply to a hearing before the board under subsection (1). *(2025 amendments in subsection (1) void on occurrence of contingency—sec. 5, Ch. 703, L. 2025.)*

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 703, L. 2025. Amendment effective May 13, 2025, and void on occurrence of contingency.

Contingent Voidness: Section 5, Ch. 703, L. 2025, provided: "(1) If any provision of [this act] is disapproved by the United States secretary of the interior pursuant to 30 CFR 732, then that portion of [this act] is void.

(2) Within 15 days of the effective date of the disapproval under subsection (1), the department of environmental quality shall notify the code commissioner, certifying that the disapproval under subsection (1) has occurred."

82-4-207. Rulemaking — in situ coal gasification. (1) Within 1 year of October 1, 2011, and in accordance with subsection (3), the department shall adopt rules necessary to regulate underground mining using in situ coal gasification.

(2) Unless required by this part, the department may not adopt a rule to regulate in situ coal gasification that is more stringent than the comparable federal regulations or guidelines that address the same circumstances.

(3) The department shall solicit, document, consider, and address comments from the board of oil and gas conservation provided for in 2-15-3303 in developing rules pursuant to subsection (1).

History: En. Sec. 1, Ch. 398, L. 2011; amd. Sec. 87, Ch. 324, L. 2021.

82-4-208 through 82-4-220 reserved.

82-4-221. *(Temporary)* **Mining permit required.** (1) An operator may not engage in strip or underground mining without having first obtained from the department a permit designating the area of land affected by the operation. The designation must include all lands reasonably anticipated to be mined or otherwise affected during the applicable 5-year period. The permit must authorize the operator to engage in strip or underground mining upon the area of land described in the application and designated in the permit for a period of 5 years from the date of its issuance. The permit is renewable upon each 5-year anniversary after issuance upon application to the department at least 240 but not more than 300 days prior to the renewal date so long as the operator is in compliance with the requirements of this part, the rules adopted to implement this part, and the reclamation plan provided for in 82-4-231 and agrees to comply with all applicable laws and rules in effect at the time of renewal. The renewal is further subject to the denial provisions of 82-4-227, 82-4-234, and 82-4-251. On application for renewal, the burden is on the opponents of renewal to demonstrate that the permit should not be renewed. A permit must terminate if the permittee has not commenced strip- or underground-mining operations pursuant to the permit within 3 years of the issuance of the permit. However, the department may grant reasonable extensions of time upon a showing that the extensions are necessary by reason of litigation precluding the commencement or threatening substantial economic loss to the permittee or by reason of conditions beyond the control and without the fault or negligence of the permittee. With respect to coal to be mined for use in a synthetic fuel facility or specific major electric generating facility, the permittee is considered to have commenced strip- or underground-mining operations at the time the construction of the synthetic or generating facility is initiated.

(2) As a condition to the issuance of each permit issued under this part, an authorized representative of the department shall, without advance notice, have the right of entry to, upon, or through a strip- or underground-mining operation or any premises in which any records required to be maintained under this part are located and may, at reasonable times and without delay, have access to copy any records and inspect any monitoring equipment or method of operation required under this part. When an inspection results from information provided to the department by any person, the department shall notify that person when the inspection is proposed to be made and that person must be allowed to accompany the inspector during the inspection.

(3) Applications for major revisions are subject to all the permit application requirements and procedures. *(Terminates on occurrence of contingency—sec. 6, Ch. 524, L. 2023.)*

82-4-221. *(Effective on occurrence of contingency)* **Mining permit required.** (1) An operator may not engage in strip or underground mining without having first obtained from the department a permit designating the area of land affected by the operation. The designation must include all lands reasonably anticipated to be mined or otherwise affected during the applicable 5-year period. The permit must authorize the operator to engage in strip or underground mining upon the area of land described in the application and designated in the permit for a period of 5 years from the date of its issuance. The permit is renewable upon each 5-year anniversary after issuance upon application to the department at least 240 but not more than 300 days prior to the renewal date so long as the operator is in compliance with the requirements of this part, the rules adopted to implement this part, and the reclamation plan provided for in 82-4-231 and agrees to comply with all applicable laws and rules in effect at the time of renewal. The renewal is further subject to the denial provisions of 82-4-227, 82-4-234, and 82-4-251. On application for renewal, the burden is on the opponents of renewal to demonstrate that the permit should not be renewed. A permit must terminate if the permittee has not commenced strip- or underground-mining operations pursuant to the permit within 3 years of the issuance of the permit. However, the department may grant reasonable extensions of time upon a showing that the extensions are necessary by reason of litigation precluding the commencement or threatening substantial economic loss to the permittee or by reason of conditions beyond the control and without the fault or negligence of the permittee. With respect to coal to be mined for use in a synthetic fuel facility or specific major electric generating facility, the permittee is considered to have commenced strip- or underground-mining operations at the time the construction of the synthetic or generating facility is initiated.

(2) As a condition to the issuance of each permit issued under this part, an authorized representative of the department shall, without advance notice, have the right of entry to, upon, or through a strip- or underground-mining operation or any premises in which any records required to be maintained under this part are located and may, at reasonable times and without delay, have access to copy any records and inspect any monitoring equipment or method of operation required under this part. When an inspection results from information provided to the department by any person, the department shall notify that person when the inspection is proposed to be made and that person must be allowed to accompany the inspector during the inspection.

(3) During the term of the permit, the permittee may submit an application for a revision of the permit, together with a revised reclamation plan, to the department. The department may not approve the application unless it finds that reclamation in accordance with this part would be accomplished. Application for minor revision must be approved or disapproved within a reasonable time, depending on the scope and complexity, but within 60 days, which may be extended by an additional 30 days by mutual agreement of the department and the applicant. Applications for major revisions are subject to all the permit application requirements and procedures.

History: En. Sec. 6, Ch. 325, L. 1973; amd. Sec. 1, Ch. 221, L. 1975; amd. Sec. 19, Ch. 441, L. 1975; amd. Sec. 1, Ch. 352, L. 1977; R.C.M. 1947, 50-1039(1); amd. Sec. 5, Ch. 550, L. 1979; amd. Sec. 2, Ch. 437, L. 1981; amd. Sec. 2, Ch. 159, L. 1995; amd. Sec. 3, Ch. 204, L. 2003; amd. Sec. 3, Ch. 524, L. 2023.

Compiler's Comments

Contingent Termination: Section 6, Ch. 524, L. 2023, provided: "[This act] terminates on the date that the department of environmental quality certifies to the code commissioner that the office of surface mining of the United States department of the interior disapproves the changes to Montana's program that are provided in [this act]. The department of environmental quality shall submit certification within 60 days of the occurrence of the contingency."

Cross-References

Duration of lease of state lands described in strip-mine permit, 77-3-314.

Landowner notification of surface operations, Title 82, ch. 2, part 3.

82-4-222. Permit application — application revisions. (1) An operator desiring a permit shall file an application that must contain a complete and detailed plan for the mining, reclamation, revegetation, and rehabilitation of the land and water to be affected by the operation. The plan must reflect thorough advance investigation and study by the operator, include all known or readily discoverable past and present uses of the land and water to be affected and the approximate periods of use, and provide:

(a) the location and area of land to be affected by the operation, with a description of access to the area from the nearest public highways;

(b) the names and addresses of the owners of record and any purchasers under contracts for deed of the surface of the area of land to be affected by the permit and the owners of record and any purchasers under contracts for deed of all surface area within one-half mile of any part of the affected area;

(c) the names and addresses of the present owners of record and any purchasers under contracts for deed of all subsurface minerals in the land to be affected;

(d) the source of the applicant's legal right to mine the mineral on the land affected by the permit;

(e) the permanent and temporary post-office addresses of the applicant;

(f) whether the applicant or any person associated with the applicant holds or has held any other permits under this part and an identification of those permits;

(g) (i) whether the applicant is in compliance with 82-4-251 and, if known, whether each officer, partner, director, or any individual, owning of record or beneficially, alone or with associates, 10% or more of any class of stock of the applicant, is subject to any of the provisions of 82-4-251. If so, the applicant shall certify the fact. The information required in this subsection (1)(g) must be updated and approved by the department in the event of a change in the parties specified in this subsection (1)(g)(i) as a result of bankruptcy or reorganization.

(ii) whether any of the parties or persons specified in subsection (1)(g)(i) have ever had a strip-mining or underground-mining license or permit issued by any other state or federal agency revoked or have ever forfeited a strip-mining or underground-mining bond or a security deposited in lieu of a bond. If so, a detailed explanation of the facts involved in each case must be attached.

(iii) evidence, determined by department rule and in accordance with 82-4-231, that the parties or persons specified in subsection (1)(g)(i) will provide bonding or other financial assurance necessary to meet their financial [obligations for employee pensions and] obligations to reclaim property in accordance with the requirements of 82-4-231 through 82-4-234. [An operator may not pass the costs associated with the financial obligations for employee pensions established in this subsection (1)(g)(iii) on to purchasers served by the strip or underground mine if the purchasers are dependent on the mine to generate electricity that is consumed by electric customers.]

(h) whether the applicant has a record of outstanding reclamation fees with the federal coal regulatory authority;

(i) the names and addresses of any persons who are engaged in strip-mining or underground-mining activities on behalf of the applicant;

(j) the annual rainfall and the direction and average velocity of the prevailing winds in the area where the applicant has requested a permit;

(k) the results of any test borings or core samplings that the applicant or the applicant's agent has conducted on the land to be affected, including the nature and the depth of the various strata or overburden and topsoil, the quantities and location of subsurface water and its quality, the thickness of any mineral seam, an analysis of the chemical properties of the minerals, including the acidity, sulfur content, and trace mineral elements of any coal seam, as well as the British thermal unit (Btu) content of the seam, and an analysis of the overburden, including topsoil. If test borings or core samplings are submitted, each permit application must contain two sets of geologic cross sections accurately depicting the known geologic makeup beneath the surface of the affected land. Each set must depict subsurface conditions at intervals the department requires across the surface and must run at a 90-degree angle to the other set. The department may not require intervals of less than 500 feet. Each cross section must depict the thickness and geologic character of all known strata, beginning with the topsoil. In addition, each application for an underground-mining permit must be accompanied by cross sections and maps showing the proposed underground locations of all shafts, entries, and haulageways or other excavations to be excavated during the permit period. These cross sections must also include all existing shafts, entries, and haulageways.

(l) the name of a newspaper of general circulation in the locality of the proposed activity in which the applicant will prominently publish at least once a week for 4 successive weeks after submission of the application an announcement of the applicant's application for a strip-mining or underground-mining permit and a detailed description of the area of land to be affected if a permit is granted. If that newspaper is not published in Montana, the applicant shall also provide the name of a newspaper of general circulation in the county in which the proposed operation is located that is published in Montana in which the applicant will publish an announcement and description in accordance with this subsection.

(m) a determination of the probable hydrologic consequences of coal mining and reclamation operations, both on and off the mine site, with respect to the hydrologic regime and quantity and quality of water in surface water and ground water systems, including the dissolved and suspended solids under seasonal flow conditions and the collection of sufficient data for the mine site and surrounding areas, so that cumulative impacts of all anticipated mining in the area upon the hydrology of the area and particularly upon water availability can be made. However, this determination is not required until hydrologic information on the general area prior to mining is made available from an appropriate federal or state agency if the information is available. If the information is not available, the department shall make a determination using hydrologic and geologic information collected by the applicant for the purposes of completing the permit application. The permit may not be approved until the information is available and is incorporated into the application. The determination of probable hydrologic consequences must include findings on:

(i) whether adverse impacts may occur to the hydrologic balance;

(ii) whether acid-forming or toxic-forming materials are present that could result in the contamination of ground water or surface water supplies;

(iii) whether the proposed operation may proximately result in contamination, diminution, or interruption of an underground or surface source of water within the proposed permit or adjacent areas that is used for domestic, agricultural, industrial, or other beneficial use; and

(iv) what impact the operation will have on:

(A) sediment yields from the disturbed area;

(B) acidity, total suspended and dissolved solids, and other important water quality parameters of local impact;

(C) flooding or streamflow alteration;

(D) ground water and surface water availability; and

(E) other characteristics required by the department that potentially affect beneficial uses of water in and adjacent to the permit area.

(n) a plan for monitoring ground water and surface water, based upon the determination of probable hydrologic consequences required under subsection (1)(m). The plan must provide for the monitoring of parameters that relate to the availability and suitability of ground water and surface water for current and approved postmining land uses and the objectives for protection of the hydrologic balance.

(o) a map depicting the projected postmining topography, using cross sections, range diagrams, or other methods approved by the department, showing the manner of spoil placement, showing removal of coal volume and overburden swell, and including:

(i) locations and elevations of tie-in points with adjacent unmined drainageways;

(ii) approximate locations of primary or highest order drainageways and associated drainage divides in the reclaimed topography; and

(iii) projected elevations of primary drainageways and associated drainage divides and generalized slopes with the level of detail appropriate to project the approximate original contour;

(p) the condition of the land to be covered by the permit prior to any mining, including:

(i) the land uses existing at the time of the application and, if the land has a history of previous mining, the uses that preceded any mining;

(ii) the capability of the land prior to any mining to support a variety of uses, giving consideration to soil characteristics, topography, and vegetative cover; and

(iii) the productivity of the land prior to mining, including appropriate classification as prime farm land, as well as the average yield of food, fiber, forage, or wood products from land under high levels of management;

(q) a coal conservation plan;

(r) other or further information as the department may require.

(2) The application for a permit must be accompanied by maps meeting the requirements of subsections (2)(a) through (2)(n). The maps must:

(a) identify the area to correspond with the application;

(b) show any adjacent deep mining or surface mining, the boundaries of surface properties, and names of owners of record of the affected area and within 1,000 feet of any part of the affected area;

(c) show the names and locations of all streams, creeks, or other bodies of water, roads, buildings, cemeteries, oil and gas wells, and utility lines on the area of land affected and within 1,000 feet of the area;

(d) show by appropriate markings the boundaries of the area of land affected, any cropline of the seam or deposit of mineral to be mined, and the total number of acres involved in the area of land affected;

(e) show the date on which the map was prepared and the north point;

(f) show the final surface and underground water drainage plan on and away from the area of land affected. This plan must indicate the directional and volume flow of water, constructed drainways, natural waterways used for drainage, and the streams or tributaries receiving the discharge.

(g) show the proposed location of waste or refuse area;

(h) show the proposed location of temporary subsoil and topsoil storage area;

(i) show the proposed location of all facilities;

(j) show the location of test boring holes;

(k) show the surface location lines of any geologic cross sections that have been submitted;

(l) show a listing of plant species encountered in the area to be affected and their relative dominance in the area, together with an enumeration of tree species and the approximate number of each species occurring per acre on the area to be affected, and the locations generally of the various species of plants;

(m) be certified by a professional engineer or professional land surveyor licensed as provided by Title 37, chapter 67; and

(n) contain other or further information as the department may require.

(3) If the department finds that the probable total annual production at all locations of any strip-mining or underground-coal-mining operation applied for will not exceed 100,000 tons, any determination of probable hydrologic consequences that the department requires and the statement of result of test borings or core samplings must, upon written request of the operator, be performed by a qualified public or private laboratory designated by the department. The department shall assume the cost of the determination and statement to the extent that it has received funds for this purpose.

(4) In addition to the information and maps required by this section, each application for a permit must be accompanied by detailed plans or proposals showing the method of operation, the manner, time or distance, and estimated cost for backfilling, subsidence stabilization, water control, grading work, highwall reduction, topsoiling, planting, and revegetating, and a reclamation plan for the area affected by the operation, which proposals must meet the requirements of this part and rules adopted under this part. The reclamation plan must address the life of the operation and indicate the size, sequence, and the timing of the subareas for which it is anticipated that individual permits will be sought.

(5) Each applicant for a coal mining permit shall submit as part of the application a certificate issued by an insurance company authorized to do business in the state, certifying that the applicant has in force for the strip-mining or underground-mining and reclamation operations for which the permit is sought a public liability insurance policy or evidence that the applicant has satisfied other state or federal self-insurance requirements. This policy must provide for personal injury and property damage protection in an amount adequate to compensate any persons damaged as a result of strip-mining or underground-coal-mining and reclamation operations, including use of explosives, and entitled to compensation under applicable provisions of state law. The permittee shall maintain the policy in full force and effect during the term of the permit and any renewal until all reclamation operations have been completed.

(6) An applicant may revise an application for a permit, a permit amendment, or a permit revision that is pending on January 1, 2004, in order to incorporate the provisions of this part.

(7) A permittee may apply to revise and the department may approve an application to incorporate the provisions of this part into a reclamation plan approved before January 1, 2004. The reclamation plan may be revised whether or not reclamation has been completed pursuant to the reclamation plan.

(8) Each applicant for a strip-mining or underground-mining reclamation permit shall file a copy of the applicant's application for public inspection with the clerk and recorder at the courthouse of the county in which the major portion of mining is proposed to occur or at another accessible public office or facility approved by the department. *(2025 amendments in subsection (1)(m) void on occurrence of contingency—sec. 4, Ch. 464, L. 2025—see compiler's comment; bracketed language in subsection (1)(g)(iii) terminates on occurrence of contingency—sec. 4, Ch. 484, L. 2019.)*

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 2, Ch. 464, L. 2025. Amendment effective May 5, 2025, and void on occurrence of contingency.

Retroactive Applicability: Section 6, Ch. 464, L. 2025, provided: "[This act] applies retroactively, within the meaning of 1-2-109, to actions for judicial review or other causes of action challenging the issuance of a permit petition for review, amendment, license, arbitration, action, certificate, or inspection that are pending but not yet decided on or after [the effective date of this act]." Effective May 5, 2025.

Contingent Voidness: Sec. 4, Ch. 464, L. 2025, provided: "(1) If any provision of [this act] is disapproved by the United States secretary of the interior pursuant to 30 CFR 732, then that portion of [this act] is void.

(2) Within 15 days of the effective date of the disapproval under subsection (1), the department of environmental quality shall notify the code commissioner, certifying that the disapproval under subsection (1) has occurred."

Contingent Termination: Section 4, Ch. 484, L. 2019, provided: "If the bracketed language in subsection (1)(g)(iii) as included in [section 1] [82-4-222] is invalidated or found to be unconstitutional by a court of competent jurisdiction on its final disposition, then the bracketed language in subsection (1)(g)(iii) as included in [section 1] [82-4-222] terminates on the date of the invalidation or the finding of unconstitutionality." Amendment effective May 13, 2019.

Additional requirements of reclamation plan, 82-4-231(2).
Hearing on application for permit, 82-4-231(9).

82-4-223. Surety bond. (1) Before a permit may be issued, the operator shall file with the department a bond payable to the state of Montana with surety satisfactory to the department in an amount to be determined by the department of not less than $200 for each acre or fraction of an acre of the area of land affected, with a minimum bond of $10,000, conditioned upon the faithful performance of the requirements set forth in this part and of the rules of the department. The operator may elect to deposit cash, negotiable bonds, or negotiable certificates of deposit of any bank organized or transacting business in the United States. The cash deposit or market value of these securities must be equal to or greater than the amount of the bond required for the bonded area. The level of bonding must be relative to the degree of disturbance projected by the original permit and the annual report. A political subdivision or agency of the state need not file a bond unless required to do so by the department. The department shall adjust the amount of bond required if the cost of reclamation changes.

(2) In determining the amount of the bond, the department shall take into consideration the character and nature of the overburden, the future suitable use of the land involved, and the cost of backfilling, grading, highwall reduction, subsidence stabilization, water control, topsoiling, and reclamation to be required, but the bond may not be less than the total estimated cost to the state of completing the work described in the reclamation plan.

82-4-225. *(Temporary)* **Application for permit amendment.** (1) A permittee may apply to increase the permit boundary, but an increase may not extend the period for which an original permit was issued. The operator shall file an amendment application and map in the same form and with the same content as required for an original application under this part and shall file with the department a supplemental bond in the amount to be determined under 82-4-223 for each acre or fraction of an acre of the increase approved. All procedures of this part pertaining to original applications apply to applications for the increase of the permit area, except for incidental boundary revisions and minor revisions.

(2) If the department approves a reduction in the acreage covered by the original or supplemental permit, it shall release the bond for each acre reduced, but the bond may not be reduced below $10,000, except as provided in 82-4-223. *(Terminates on occurrence of contingency—sec. 6, Ch. 524, L. 2023.)*

82-4-225. *(Effective on occurrence of contingency)* **Application for increase or reduction in permit area.** The department may increase or reduce the area of land affected by an operation under a permit on application by an operator, but an increase may not extend the period for which an original permit was issued. An operator may, at any time, apply to the department for an amendment of the permit so as to increase or reduce the acreage affected by it. The operator shall file an application and map in the same form and with the same content as required for an original application under this part and shall file with the department a supplemental bond in the amount to be determined under 82-4-223 for each acre or fraction of an acre of the increase approved. All procedures of this part pertaining to original applications apply to applications for the increase of the area of land affected, except for incidental boundary revisions. If the department approves a reduction in the acreage covered by the original or supplemental permit, it shall release the bond for each acre reduced, but the bond may not be reduced below $10,000, except as provided in 82-4-223.

History: En. Sec. 7, Ch. 325, L. 1973; amd. Sec. 2, Ch. 352, L. 1977; R.C.M. 1947, 50-1040; amd. Sec. 8, Ch. 550, L. 1979; amd. Sec. 3, Ch. 127, L. 2005; amd. Sec. 4, Ch. 524, L. 2023.

Compiler's Comments

Contingent Termination: Section 6, Ch. 524, L. 2023, provided: "[This act] terminates on the date that the department of environmental quality certifies to the code commissioner that the office of surface mining of the United States department of the interior disapproves the changes to Montana's program that are provided in [this act]. The department of environmental quality shall submit certification within 60 days of the occurrence of the contingency."

82-4-226. Prospecting permit. (1) Except as provided in subsection (7), prospecting by any person on land not included in a valid strip-mining or underground-mining permit is unlawful without possessing a valid prospecting permit issued by the department as provided in this section. A prospecting permit may not be issued until the person submits an application, the application is examined, amended if necessary, and approved by the department, and an adequate reclamation performance bond is posted, all of which prerequisites must be done in conformity with the requirements of this part.

(2) An application for a prospecting permit filed pursuant to subsection (1) must be made in writing, notarized, and submitted to the department upon forms prepared and furnished by it. The application must include among other things a prospecting map and a prospecting reclamation plan of substantially the same character as required for a surface-mining or underground-mining map and reclamation plan under this part. The department shall determine by rules the precise nature of the required prospecting map and reclamation plan. Any applicant who intends to prospect by means of core drilling shall specify the location and number of holes to be drilled, methods to be used in sealing aquifers, and other information that may be required by the department. The applicant shall state what types of prospecting and excavating techniques will be employed on the affected land. The application must also include any other or further information that the department may require.

(3) Before the department gives final approval to the prospecting permit application, the applicant shall file with the department a reclamation and revegetation bond in a form and in an amount as determined in the same manner for strip-mining or underground-mining reclamation and revegetation bonds under this part.

(4) In the event that the holder of a prospecting permit desires to strip mine or underground mine the area covered by the prospecting permit and has fulfilled all the requirements for a strip-mining or underground-mining permit, the department may permit the postponement of the reclamation of the acreage prospected if that acreage is incorporated into the complete reclamation plan submitted with the application for a strip-mining or underground-mining permit. Any land actually affected by prospecting or excavating under a prospecting permit and

not covered by the strip-mining or underground-mining reclamation plan must be promptly reclaimed.

(5) The prospecting permit is valid for 1 year and is subject to renewal, suspension, and revocation in the same manner as strip-mining or underground-mining permits under this part.

(6) The holder of the prospecting permit shall file with the department the same progress reports, maps, and revegetation progress reports as are required of strip-mining or underground-mining operators under this part.

(7) (a) Prospecting that is not conducted in an area designated unsuitable for coal mining pursuant to 82-4-227 or 82-4-228, that is not conducted for the purpose of determining the location, quality, or quantity of a mineral deposit, and that does not remove more than 250 tons of coal is not subject to subsections (1) through (6). However, a person who conducts prospecting described in this subsection (7)(a) shall file with the department a notice of intent to prospect that contains the information required by the department before commencing prospecting operations. If this prospecting substantially disturbs the natural land surface, it must be conducted in accordance with the performance standards of the department's rules regulating the conduct and reclamation of prospecting operations that remove coal. The department may inspect these prospecting and reclamation operations at any reasonable time.

(b) (i) Prospecting conducted to determine the location, quality, or quantity of coal outside an area designated unsuitable that is not included in a valid strip-mining or underground-mining permit, that does not substantially disturb the land surface, and that does not remove more than 250 tons of coal is not subject to subsections (1) and (2) but may not be conducted without a valid prospecting permit issued pursuant to subsection (8).

(ii) For purposes of this subsection (7)(b), the drilling of coal prospecting holes, the installation and use of associated disposal pits, and the installation of ground water monitoring wells does not constitute substantial disturbance.

(8) (a) An application for a coal prospecting permit required by subsection (7)(b) must contain:

(i) the name, address, and telephone number of the person who seeks to prospect;

(ii) the name, address, and telephone number of the person's representative who will be present at and responsible for conducting the prospecting activities;

(iii) a narrative describing the proposed prospecting area or a map of the prospecting area at a scale of 1:24,000 or greater showing:

(A) the general location of drill holes and trenches;

(B) existing and proposed roads;

(C) occupied dwellings;

(D) topographic features;

(E) bodies of water; and

(F) pipelines;

(iv) a copy of the documents upon which the applicant bases its legal right to prospect, including documentation that the owners of the land affected have been notified and understand that the department will make investigations and inspections to ensure compliance;

(v) a statement of the period of intended prospecting; and

(vi) a description of the method of prospecting to be used and the practices that will be followed to protect the environment and reclaim disturbed areas, including plugging of prospecting holes, in accordance with rules adopted by the department.

(b) Within 10 working days of receipt of an application, the department shall notify the applicant in writing as to whether the application is complete and preliminarily acceptable. If the department determines that the application is not complete or not preliminarily acceptable, the department shall include a detailed identification of information necessary to cure the deficiency.

(c) Within 5 working days of receipt of the applicant's response to the identified deficiencies, the department shall review the response and notify the person as to whether the application is complete and preliminarily acceptable. If the department determines the application is not complete or preliminarily acceptable, the department shall notify the person in writing and include a detailed identification of information necessary to make the application complete and preliminarily acceptable.

(d) When the department determines that the application is complete and preliminarily acceptable, the department shall notify the applicant in writing. The notification must include the amount of bond that is required to be posted in order for the permit to be issued.

(e) Upon receipt of the department's determination of preliminary acceptability, the applicant shall place an advertisement in a newspaper of general circulation in the locality of the proposed prospecting. The notice must describe the application and a place in the locality where the public may examine the application and must notify the public that it may submit written comments by delivering or mailing them to the department within 10 days following publication of the notice.

(f) After close of the public comment period, the department shall notify the applicant as to whether the application is acceptable. The department shall issue the notification within 5 working days of the close of the comment period if no comments are received and within 10 working days if comments are received. In the notice of acceptability, the department shall notify the applicant of any adjustment in the amount of the bond.

(g) A permit issued pursuant to this subsection (8) is subject to subsections (3) through (6).

History: En. Sec. 8, Ch. 325, L. 1973; amd. Sec. 20, Ch. 441, L. 1975; R.C.M. 1947, 50-1041; amd. Sec. 2, Ch. 196, L. 1979; amd. Sec. 2, Ch. 225, L. 1993; amd. Sec. 3, Ch. 159, L. 1995; amd. Sec. 371, Ch. 418, L. 1995; amd. Sec. 3, Ch. 196, L. 1997; amd. Sec. 4, Ch. 127, L. 2005; amd. Sec. 1, Ch. 407, L. 2011; amd. Sec. 2, Ch. 98, L. 2013; amd. Sec. 89, Ch. 324, L. 2021.

Inspection of vegetation — release of bond, 82-4-235.
Annual report for mining permit, 82-4-237.

82-4-227. Refusal of permit — applicant violator system. (1) An application for a prospecting, strip-mining, or underground-mining permit or major revision may not be approved by the department unless, on the basis of the information set forth in the application, in an onsite inspection, and in an evaluation of the operation by the department, the applicant has affirmatively demonstrated that the requirements of this part and rules will be observed and that the proposed method of operation, backfilling, grading, subsidence stabilization, water control, highwall reduction, topsoiling, revegetation, or reclamation of the affected area can be carried out consistently with the purpose of this part. The applicant for a permit or major revision has the burden of establishing that the application is in compliance with this part and the rules adopted under it.

(2) The department may not approve the application for a prospecting, strip-mining, or underground-mining permit when the area of land described in the application includes land that has special, exceptional, critical, or unique characteristics or when mining or prospecting on that area would adversely affect the use, enjoyment, or fundamental character of neighboring land that has special, exceptional, critical, or unique characteristics. For the purposes of this part, land is defined as having these characteristics if it possesses special, exceptional, critical, or unique:

(a) biological productivity, the loss of which would jeopardize certain species of wildlife or domestic stock;

(b) ecological fragility, in the sense that the land, once adversely affected, could not return to its former ecological role in the reasonably foreseeable future;

(c) ecological importance, in the sense that the particular land has such a strong influence on the total ecosystem of which it is a part that even temporary effects felt by it could precipitate a systemwide reaction of unpredictable scope or dimensions; or

(d) scenic, historic, archaeologic, topographic, geologic, ethnologic, scientific, cultural, or recreational significance. In applying the provisions of this subsection (d), particular attention should be paid to the inadequate preservation previously accorded Plains Indian history and culture.

(3) The department may not approve an application for a strip- or underground-coal-mining permit or major revision unless the application affirmatively demonstrates that:

(a) the assessment of the probable cumulative impact of all anticipated mining in the area on the hydrologic balance has been made by the department and the proposed operation of the mining operation has been designed to prevent material damage to the hydrologic balance outside the permit area; and

(b) the proposed strip- or underground-coal-mining operation would not:

(i) interrupt, discontinue, or preclude farming on alluvial valley floors that are irrigated or naturally subirrigated, excluding undeveloped rangelands that are not significant to farming on alluvial valley floors and excluding land about which the department finds that if any farming will be interrupted, discontinued, or precluded, it is of such small acreage as to be of negligible impact on the farm's agricultural production; or

(ii) materially damage the quantity or quality of water in surface water or underground water systems that supply the valley floors described in subsection (3)(b)(i).

(4) Subsection (3)(b) does not affect those strip- or underground-coal-mining operations that in the year preceding the enactment of Public Law 95-87 produced coal in commercial quantities and were located within or adjacent to alluvial valley floors or had obtained specific permit approval by the department to conduct strip- or underground-coal-mining operations within alluvial valley floors. If coal deposits are precluded from being mined under this subsection, the director of the department shall certify to the secretary of interior that the mineral owner or lessee may be eligible for participation in coal exchange programs pursuant to section 510(5) of Public Law 95-87.

(5) (a) If the area proposed to be mined contains prime farmland, the department may not grant a permit to mine coal on the prime farmland unless it finds in writing that the applicant:

(i) has the technological capability to restore the mined area, within a reasonable time, to levels of yield equivalent to or higher than nonmined prime farmland in the surrounding area under equivalent levels of management; and

(ii) can meet the soil reconstruction standards of 82-4-232(3).

(b) Nothing in this subsection (5) applies to a permit issued prior to August 3, 1977, or to any revisions or renewals of the permit or to any existing strip- or underground-mining operations for which a permit was issued prior to August 3, 1977.

(6) If the department finds that the overburden on any part of the area of land described in the application for a prospecting, strip-mining, or underground-mining permit is such that experience in the state with a similar type of operation upon land with similar overburden shows that substantial deposition of sediment in streambeds, subsidence, landslides, or water pollution cannot feasibly be prevented, the department shall delete that part of the land described in the application upon which the overburden exists. The burden is on the applicant to demonstrate that any area should not be deleted under this subsection.

(7) If the department finds that the operation will constitute a hazard to a dwelling, public building, school, church, cemetery, commercial or institutional building, public road, stream, lake, or other public property, the department shall delete those areas from the prospecting, strip-mining, or underground-mining permit application before it can be approved. Strip- or underground-coal-mining may not be allowed:

(a) within 300 feet of an occupied dwelling, unless waived by the owner;

(b) within 300 feet of any public building, school, church, community, or institutional building, or public park;

(c) within 100 feet of a cemetery;

(d) within 100 feet of the outside right-of-way line of any public road, except where mine access roads or haulage roads join the right-of-way line. The department may permit the roads to be relocated or the area affected to lie within 100 feet of the road if, after public notice and opportunity for public hearing in the locality, a written finding is made that the interests of the public and the landowners affected will be protected.

(8) Strip-mining or underground-mining may not be conducted within 500 feet of active or abandoned underground mines in order to prevent breakthroughs and to protect health or safety of miners. However, the department shall permit an operator to mine near, through, or partially through an abandoned underground mine or closer to an active underground mine if:

(a) the nature, timing, and sequencing of specific strip-mine activities and specific underground-mine activities are jointly approved by the department and the regulatory authority concerned with the health and safety of underground miners; and

(b) the operations will result in improved resource recovery, abatement of water pollution, or elimination of hazards to the health and safety of the public.

(9) The department may not approve an application for a strip- or underground-coal-mining operation if the area proposed to be mined is included:

(a) within an area designated unsuitable for strip or underground coal mining; or

(b) within an area under review for this designation under an administrative proceeding, unless in an area as to which an administrative proceeding has commenced pursuant to this part, the operator making the permit application demonstrates that prior to January 1, 1977, the operator made substantial legal and financial commitments in relation to the operation for which the operator is applying for a permit.

(10) A permit or major permit revision for a strip- or underground-coal-mining operation may not be issued unless the applicant has affirmatively demonstrated by its coal conservation plan that failure to conserve coal will not occur. The department may require the applicant to submit any information it considers necessary for review of the coal conservation plan.

(11) Whenever information available to the department indicates that a strip- or underground-coal-mining operation that is owned or controlled by the applicant or by any person who owns or controls the applicant is currently in violation of Public Law 95-87, as amended, any state law required by Public Law 95-87, as amended, or any law, rule, or regulation of the United States or of any department or agency in the United States pertaining to air or water environmental protection, the department may not issue a strip- or underground-coal-mining permit or amendment, other than an incidental boundary revision, until the applicant submits proof that the violation has been corrected or is in the process of being corrected to the satisfaction of the administering agency.

(12) The department may not issue a strip- or underground-coal-mining permit or amendment, other than an incidental boundary revision, to any applicant that it finds, after an opportunity for hearing, owns or controls any strip- or underground-coal-mining operation that has demonstrated a pattern of willful violations of Public Law 95-87, as amended, or any state law required by Public Law 95-87, as amended, when the nature and duration of the violations and resulting irreparable damage to the environment indicate an intent not to comply with the provisions of this part.

(13) Subject to valid existing rights, no strip- or underground-coal-mining operations except those that existed as of August 3, 1977, may be conducted:

(a) on lands within the boundaries of units of the national park system, the national wildlife refuge system, the national wilderness preservation system, the national system of trails, the wild and scenic rivers system, including study rivers designated under section 5(a) of the Wild and Scenic Rivers Act or study rivers or study river corridors established in any guidelines issued under that act, or national recreation areas designated by an act of congress; or

(b) on any federal lands within national forests, subject to the exceptions and limitations of 30 CFR 761.11(b) and the procedures of 30 CFR 761.13.

(14) (a) A person who is listed by the department in the applicant violator system maintained by the office of surface mining reclamation and enforcement of the U.S. department of the interior pursuant to the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201, et seq., as owning or controlling a strip-mining or underground-mining operation may challenge the ownership or control listing by filing a written request with the department for review of the listing. In the request, the person must include a written explanation of the basis for the challenge and any evidence the person wishes the department to consider. The department shall provide a written response within 60 days of receipt of the request for review.

(b) Within 30 days of receipt of the response pursuant to subsection (14)(a), the person who is listed may request a hearing before the board by submitting to the board a written request for hearing that states the reason for the request. The contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6, apply to the hearing.

History: En. Sec. 9, Ch. 325, L. 1973; amd. Sec. 21, Ch. 441, L. 1975; R.C.M. 1947, 50-1042; amd. Sec. 9, Ch. 550, L. 1979; amd. Sec. 3, Ch. 225, L. 1993; amd. Sec. 372, Ch. 418, L. 1995; amd. Sec. 5, Ch. 127, L. 2005; amd. Sec. 3, Ch. 98, L. 2013.

Cross-References

Policy — findings, 82-4-202.
Action on application for permit — written findings required, 82-4-231.
Suspension or revocation of permit for repeated violations, 82-4-251.

82-4-228. Designation of land unsuitable for coal mining. (1) Any person having an interest that is or may be adversely affected may petition the department to have an area designated as unsuitable for strip- or underground-coal-mining operations or to have a designation terminated. The petition shall contain allegations of facts with supporting evidence which would tend to establish the allegations. Within 10 months after receipt of the petition, the department shall hold a public hearing in the locality of the affected area after giving appropriate notice and publication of the date, time, and location thereof. Before the hearing, any person may intervene by filing allegations of facts with supporting evidence which would tend to establish the allegations. Within 60 days after the hearing, the department shall issue and furnish to the petitioner and any other party to the hearing a written decision regarding the petition and the reasons therefor. The hearing need not be held if all petitioners reach agreement prior to the requested hearing and withdraw their request.

(2) If petitioned, the department shall review the area petitioned for pursuant to this section and:

(a) shall designate it as an area unsuitable for all or certain types of strip- or underground-coal-mining operations if it is determined that reclamation pursuant to the requirements of this part is not technologically and economically feasible; and

(b) may designate it as an area unsuitable for all or certain types of strip or underground coal mining if the proposed coal mining operations will:

(i) be incompatible with existing state or local land use plans or programs to the extent they affect mining in the area; or

(ii) affect fragile or historic lands in which these operations could result in significant damage to important historic, cultural, scientific, and esthetic values and natural systems; or

(iii) affect renewable resource lands in which these operations could result in a substantial loss or reduction of long-range productivity of water supply or of food or fiber products, these lands to include aquifers and aquifer recharge areas; or

(iv) affect natural hazard lands in which these operations could substantially endanger life and property, these lands to include areas subject to frequent flooding and areas of unstable geology.

(3) Prior to designating any land areas as unsuitable for strip- or underground-coal-mining operations, the department shall prepare a detailed statement on:

(a) the potential coal resources of the area;

(b) the demand for coal resources; and

(c) the impact of this designation on the environment, economy, and supply of coal.

(4) A designation does not prevent mineral exploration pursuant to this part of any area so designated.

(5) The requirements of this section do not apply to lands on which strip- or underground-coal-mining operations are being conducted pursuant to a permit issued under this part or where substantial legal and financial commitments in these operations were in existence prior to January 4, 1977.

History: En. Sec. 10, Ch. 550, L. 1979.

Cross-References

Coal exploration permit required, 82-4-121.
Coal prospecting permit required, 82-4-226.
Resource development and reclamation, Title 90, ch. 2.

82-4-229. *(Temporary)* **Minor revisions — application — exemptions.** (1) During the term of a permit, the permittee may apply to the department to revise the permit and reclamation plan. Major revisions are subject to the provisions of 82-4-225.

(2) An application for a minor revision must:

(a) summarize proposed changes in sufficient detail for the department to determine that reclamation required under state and federal law will be accomplished;

(b) contain evidence that the changes in disturbed acres are insignificant in impact relative to the entire operation;

(c) identify previous environmental analyses relevant to the revision and demonstrate that the minor revision does not significantly change the human environment;

(d) document the adequacy of existing bonding; and

(e) include evidence that the permittee provided notice of the application for permit revision to the affected surface owner.

(3) Minor revisions are not subject to 82-4-231 and are exempt from the provisions of Title 75, chapter 1, parts 1 and 2.

(4) The department shall:

(a) notify the permittee if the minor revision application is adequate within 30 days of receipt; and

(b) approve the application within 60 days of the date the applicant is notified the application is adequate, provided the department determines the minor revision meets the requirements of this section and ensures adequate reclamation. Upon agreement of the permittee and the department, the period may be extended 30 days. *(Terminates on occurrence of contingency—sec. 6, Ch. 524, L. 2023.)*

History: En. Sec. 1, Ch. 524, L. 2023.

Compiler's Comments

Contingent Termination: Section 6, Ch. 524, L. 2023, provided: "[This act] terminates on the date that the department of environmental quality certifies to the code commissioner that the office of surface mining of the United States department of the interior disapproves the changes to Montana's program that are provided in [this act]. The department of environmental quality shall submit certification within 60 days of the occurrence of the contingency."

82-4-230 reserved.

82-4-231. Submission of and action on reclamation plan. (1) As rapidly, completely, and effectively as the most modern technology and the most advanced state of the art will allow, each operator granted a permit under this part shall reclaim and revegetate the land affected by the operation, except that underground tunnels, shafts, or other subsurface excavations need not be revegetated. Under the provisions of this part and rules adopted by the department, an operator shall prepare and carry out a method of operation, a plan of grading, backfilling, highwall reduction, subsidence stabilization, water control, and topsoiling and a reclamation plan for the area of land affected by the operation. In developing a method of operation and plans of grading, backfilling, highwall reduction, subsidence stabilization, water control, topsoiling, and reclamation, all measures must be taken to eliminate damages to landowners and members of the public, their real and personal property, public roads, streams, and all other public property from soil erosion, subsidence, landslides, water pollution, and hazards dangerous to life and property.

(2) The reclamation plan must set forth in detail the manner in which the applicant intends to comply with 82-4-232 through 82-4-234 and this section and the steps to be taken to comply with applicable air and water quality laws and rules and any applicable health and safety standards.

(3) The application for a permit or major revision of a permit, which must contain the reclamation plan, must be submitted to the department.

(4) The department shall determine whether the application is administratively complete. An application is administratively complete if it contains information addressing each application requirement in 82-4-222 and the rules implementing that section and all information necessary to initiate processing and public review. The department shall notify the applicant in writing of its determination no later than 90 days after submittal of the application. If the department determines that the application is not administratively complete, it shall specify in the notice those items that the application must address. The application is presumed administratively complete as to those requirements not specified in the notice.

(5) If the department determines that an environmental impact statement on the application is required, it shall notify the applicant in writing at the same time it gives the applicant notice pursuant to subsection (4).

(6) After the applicant receives notice that the application is administratively complete, the applicant shall publish notice of filing of the application once a week for 4 consecutive weeks

in a newspaper of general circulation in the locality of the proposed operation. The department shall notify various local governmental bodies, planning agencies, sewage and water treatment authorities, and water companies in the locality in which the proposed mining will take place of the application and provide a reasonable time for them to submit written comments. Any person having an interest that is or may be adversely affected or the officer or head of any federal, state, or local governmental agency or authority may file written objections to the proposed initial or revised application for permit or major revision within 30 days of the applicant's published notice. If written objections are filed and an objector requests an informal conference, the department shall hold an informal conference in the locality of the proposed operation within 30 days of receipt of the request. The department shall notify the applicant and all parties to the informal conference of its decision and the reasons for its decision within 60 days of the informal conference. The department may arrange with the applicant upon request by any party to the administrative proceeding for access to the proposed mining area for the purpose of gathering information relevant to the proceeding.

(7) The filing of written objections or a request for an informal conference may not preclude the department from proceeding with its review of the application as specified in subsection (8).

(8) (a) The department shall review each administratively complete application and determine the acceptability of the application. During the review, the department may propose modifications to the application or delete areas from the application in accordance with the requirements of 82-4-227. A complete application is considered acceptable when the application is in compliance with all of the applicable requirements of this part and the regulatory program pursuant to this part.

(b) If the applicant significantly modifies the application after the application has been determined administratively complete in accordance with subsection (4), the department shall under this section either deny the application or conduct a new review, including an administrative completeness determination, public notice, and objection period.

(c) If an environmental impact statement is determined to be necessary prior to making a permit decision, the department shall complete and publish the final environmental impact statement at least 15 days prior to the date of issuance of the written findings pursuant to subsection (8)(f).

(d) Except as provided in 75-1-205(4) and 75-1-208(4)(b), within 120 days after it determines that an application is administratively complete, the department shall notify the applicant in writing whether the application is or is not acceptable. If the application is not acceptable, the department shall set forth the reasons why it is not acceptable, and it may propose modifications, delete areas, or reject the entire application. All items not specified as unacceptable in the department's notification are presumed to be acceptable. Except as provided in 75-1-208(4)(b), if the applicant revises the application in response to a notice of unacceptability, the department shall review the revised application and notify the applicant in writing within 120 days of the date of receipt whether the revised application is acceptable. If the revision constitutes a significant modification under subsection (8)(b), the department shall conduct a new review, beginning with an administrative completeness determination.

(e) When the application is determined to be acceptable, the department shall publish notice of its determination once a week for 2 consecutive weeks in a newspaper of general circulation in the locality of the proposed operation. If the department required a cumulative hydrologic impact assessment to meet the requirements of this part, the department shall publish a draft of that assessment and the department's determination. Any person having an interest that is or may be adversely affected by the determination or the cumulative hydrologic impact assessment may file a written objection to the determination within 10 days of the department's last published notice. If a written objection is filed and an objector requests an informal conference, the department shall hold an informal conference in the locality of the proposed operation within 20 days of receipt of the request. The department shall notify the applicant and all parties to the informal conference of its decision and the reasons for the decision within 10 days of the informal conference.

(f) Except as provided in 75-1-205(4) and 75-1-208(4)(b), the department shall prepare written findings granting or denying the permit or major revision application in whole or in part not later than 60 days from the date the application is determined acceptable. However, if lands subject to the federal lands program are included in the application for permit or major revision, the department shall prepare and submit written findings to the federal regulatory authority. If the department's decision is to grant the permit, the department shall issue the permit on the date of its written finding or, if any federal concurrence is necessary, on the date when the concurrence is obtained. If the application is denied, specific reasons for the denial must be set forth in the written notification to the applicant.

(g) If the department fails to act within the times specified in this subsection (8), it shall immediately notify the board in writing of its failure to comply and the reasons for the failure to comply.

(9) The applicant, the permittee, a landowner, or any person with an interest that is or may be adversely affected by the department's permit decision and who submitted a written objection pursuant to subsection (8) may within 30 days of the department's decision submit a written notice requesting a hearing. The notice must contain the grounds upon which the requester contends that the decision is in error and must be limited to the issues raised in written objections and issues in the department's decision not addressed by the department in its notice of determination published pursuant to subsection (8)(e). The hearing must be started within 30 days of the request. For purposes of a hearing, the board or its hearings officer may order site inspections of the area pertinent to the application. The board shall within 20 days of the hearing notify the person who requested the hearing, by certified mail, and all other persons, by regular mail, of the findings and decisions. A person who presided at the informal conference may not preside at the hearing or participate in the decision.

(10) In addition to the method of operation, grading, backfilling, highwall reduction, subsidence stabilization, water control, topsoiling, and reclamation requirements of this part and rules adopted under this part, the operator, consistent with the directives of subsection (1), shall:

(a) bury under adequate fill all toxic materials, shale, mineral, or any other material determined by the department to be acid-producing, toxic, undesirable, or creating a hazard;

(b) as directed by rules, seal off tunnels, shafts, or other openings or any breakthrough of water creating a hazard;

(c) impound, drain, or treat all runoff or underground mine waters so as to reduce soil erosion, damage to grazing and agricultural lands, and pollution of surface and subsurface waters;

(d) remove or bury all metal, lumber, and other refuse resulting from the operation;

(e) use explosives in connection with the operation only in accordance with department regulations designed to minimize noise, damage to adjacent lands, and water pollution and ensure public safety and for other purposes;

(f) adopt measures to prevent land subsidence unless the department approves a plan for inducing subsidence into an abandoned operation in a predictable and controlled manner, with measures for grading, topsoiling, and revegetating the subsided land surface. In order for a controlled subsidence plan to be approved, the applicant is required to show that subsidence will not cause a direct or indirect hazard to any public or private buildings, roads, facilities, or use areas, constitute a hazard to human life or health or to domestic livestock or a viable agricultural operation, or violate any other restrictions the department may consider necessary.

(g) stockpile and protect from erosion all mining and processing wastes until these wastes can be disposed of according to the provisions of this part;

(h) deposit as much stockpiled waste material as possible back into the mine voids upon abandonment in a manner that will prevent or minimize land subsidence. The remaining waste material must be disposed of as provided by this part and the rules of the department.

(i) seal all portals, entryways, drifts, shafts, or other openings between the surface and underground mine workings when no longer needed;

(j) to the extent possible using the best technology currently available, minimize disturbances and adverse impacts of the operation on fish, wildlife, and related environmental values and achieve enhancement of those resources when practicable;

(k) minimize the disturbances to the prevailing hydrologic balance at the mine site and in adjacent areas and to the quality and quantity of water in surface water and ground water systems both during and after strip- or underground-coal-mining operations and during reclamation by:

(i) avoiding acid or other toxic mine drainage by measures including but not limited to:

(A) preventing or removing water from contact with toxic-producing deposits;

(B) treating drainage to reduce toxic content that adversely affects downstream water upon being released to watercourses;

(C) casing, sealing, or otherwise managing boreholes, shafts, and wells and keeping acid or other toxic drainage from entering ground and surface waters;

(ii) (A) conducting strip- or underground-mining operations so as to prevent, to the extent possible using the best technology currently available, additional contributions of suspended solids to streamflow or runoff outside the permit area, but the contributions may not be in excess of requirements set by applicable state or federal law;

(B) constructing any siltation structures pursuant to subsection (10)(k)(ii)(A) prior to commencement of strip- or underground-mining operations, with the structures to be certified by a qualified registered engineer and to be constructed as designed and as approved in the reclamation plan. The siltation structures must each be constructed with the design capacity specified in administrative rule to detain the water inflow or runoff entering the pond from an anticipated precipitation event plus the average inflow from the underground mine, if applicable. Operation of a siltation structure with this design capacity requirement is compliant with this part even if the pond capacity is exceeded as a result of water inflow or runoff entering the pond from a multistorm event consisting of a series of small, consecutive storm events that cumulatively exceed the anticipated precipitation event and the operator actively undertakes measures to restore pond capacity as soon as weather and ground conditions permit.

(iii) cleaning out and removing temporary or large settling ponds or other siltation structures from drainways after disturbed areas are revegetated and stabilized and depositing the silt and debris at a site and in a manner approved by the department;

(iv) restoring recharge capacity of the mined area to approximate premining conditions;

(v) avoiding channel deepening or enlargement in operations that requires the discharge of water from mines;

(vi) preserving throughout the mining and reclamation process the essential hydrologic functions of alluvial valley floors in the arid and semiarid areas of the country;

(vii) designing and constructing reclaimed channels of intermittent streams and perennial streams to ensure long-term stability; and

(viii) any other actions that the department may prescribe;

(l) conduct strip- or underground-mine operations in accordance with the approved coal conservation plan;

(m) stabilize and protect all surface areas, including spoil piles, to effectively control air pollution;

(n) seal all auger holes with an impervious and noncombustible material in order to prevent drainage except when the department determines that the resulting impoundment of water in the auger holes may create a hazard to the environment or the public health and safety;

(o) develop contingency plans to prevent sustained combustion;

(p) refrain from construction of roads or other access ways up a streambed or drainage channel or in proximity to the channel so as to seriously alter the normal flow of water;

(q) meet other criteria that are necessary to achieve reclamation in accordance with the purposes of this part, taking into consideration the physical, climatological, and other characteristics of the site;

(r) with regard to underground mines, eliminate fire hazards and otherwise eliminate conditions that constitute a hazard to health and safety of the public;

(s) locate openings for all new drift mines working acid-producing or iron-producing coal seams in a manner that prevents a gravity discharge of water from the mine.

(11) An operator may not throw, dump, pile, or permit the throwing, dumping, or piling or otherwise placing of any overburden, stones, rocks, mineral, earth, soil, dirt, debris, trees, wood, logs, or any other materials or substances of any kind or nature beyond or outside of the area of land that is under permit and for which a bond has been posted under 82-4-223 or place

the materials described in this section in a way that normal erosion or slides brought about by natural physical causes will permit the materials to go beyond or outside of that area of land. An operator shall conduct the strip- or underground-mining operation in a manner that protects areas outside the permit area. *(Certain 2025 amendments void on occurrence of contingency—sec. 3, Ch. 203, L. 2025—see compiler's comment; certain 2025 amendments void on occurrence of contingency—sec. 5, Ch. 703, L. 2025—see compiler's comment.)*

82-4-232. Area mining required — bond — alternative plan. (1) (a) Area strip mining, a method of operation that does not produce a bench or fill bench, is required where strip mining is proposed. The area of land affected must be backfilled and graded to the approximate original contour of the land. However:

(i) consistent with the adjacent unmined landscape elements, the operator may propose and the department may approve regraded topography gentler than premining topography in order to enhance the postmining land use and develop a postmining landscape that will provide greater moisture retention, greater stability, and reduced soil losses from runoff and erosion;

(ii) postmining slopes may not exceed the angle of repose or lesser slope as is necessary to achieve a long-term static safety factor of 1.3 or greater and to prevent slides;

(iii) permanent impoundments may be approved if they are suitable for the postmining land use and otherwise meet the requirements of this part, as provided by department rules; and

(iv) reclaimed topography must be suitable for the approved postmining land use.

(b) Spoil from the first cut is not required to be transported to the last cut if highwalls are eliminated, box cut spoils are graded to blend in with the surrounding terrain, and the approximate original contour of the land is achieved.

(c) When directed by the department, the operator shall construct in the final grading diversion ditches, depressions, or terraces that will accumulate or control the water runoff.

(2) In addition to the backfilling and grading requirements, the operator's method of operation on steep slopes may be regulated and controlled according to rules adopted by the department. These rules may require any measure to accomplish the purpose of this part.

(3) For coal mining on prime farmlands, the department shall establish by rule specifications for soil removal, storage, replacement, and reconstruction, and the operator must as a minimum be required to:

(a) (i) segregate the A horizon of the natural soil, except when it can be shown that other available soil materials will create a final soil having a greater productive capacity; and

(ii) if not used immediately, stockpile this material separately from other spoil and provide needed protection from wind and water erosion or contamination by other acid or toxic material;

(b) (i) segregate the B horizon of the natural soil, or underlying C horizon or other strata, or a combination of the horizons or other strata that are shown to be both texturally and chemically suitable for plant growth and that can be shown to be equally or more favorable for plant growth than the B horizon in sufficient quantities to create in the regraded final soil a root zone of comparable depth and quality to that that existed in the natural soil; and

(ii) if not used immediately, stockpile this material separately from other spoil and provide needed protection from wind and water erosion or contamination by acid or toxic material;

(c) replace and regrade the root zone material described in subsection (3)(b) with proper compaction and uniform depth over the regraded spoil material; and

(d) redistribute and grade in a uniform manner the surface soil horizon described in subsection (3)(a).

(4) All available topsoil must be removed in a separate layer, guarded from erosion and pollution, and kept in a condition so that it can sustain vegetation of at least the quality and variety it sustained prior to removal. However, the operator shall accord substantially the same treatment to any subsurface deposit of material that is capable, as determined by the department, of supporting surface vegetation virtually as well as the present topsoil. After the operation has been backfilled and graded, the topsoil or the best available subsurface deposit of material that is best able to support vegetation must be returned as the top layer.

(5) As determined by rules of the department, time limits must be established requiring backfilling, grading, subsidence stabilization, water control, highwall reduction, topsoiling, planting, and revegetation to be kept current. All backfilling, subsidence stabilization, sealing, grading, and topsoiling must be completed before necessary equipment is moved from the operation.

(6) (a) (i) The permittee may file an application with the department for the release of all or part of a performance bond. The application must contain a proposed public notice of the precise location of the land affected, the number of acres for which bond release is sought, the permit and the date approved, the amount of the bond filed and the portion sought to be released, the type and appropriate dates of reclamation work performed, and a description of the results achieved as they relate to the permittee's approved reclamation plan. The description of the results may include other information or methods, including predictive modeling, which may be used in conjunction with monitoring data compiled for the performance bond release application to demonstrate compliance with the approved reclamation plan.

(ii) As part of any bond release application, the permittee shall submit copies of letters that the permittee has sent to adjoining property owners, local governmental bodies, planning agencies, and sewage and water treatment authorities or water companies in the locality of the operation, notifying them of the permittee's intention to seek release from the bond.

(b) The department shall determine whether the application is administratively complete. An application is administratively complete if it includes:

(i) the location and acreage of the land for which bond release is sought;

(ii) the amount of bond release sought;

(iii) a description of the completed reclamation, including the date of performance;

(iv) a discussion of how the results of the completed reclamation satisfy the requirements of the approved reclamation plan, which may include a description of other information or methods, including predictive modeling, which may be used in conjunction with monitoring data for the purposes of demonstrating compliance with the approved reclamation plan; and

(v) information required by rules implementing this part.

(c) The department shall notify the applicant in writing of its determination no later than 60 days after submittal of the application. If the department determines that the application is not administratively complete, it shall specify in the notice those items that the application must address. After an application for bond release has been determined to be administratively complete by the department, the permittee shall publish a public notice that has been approved as to form and content by the department at least once a week for 4 successive weeks in a newspaper of general circulation in the locality of the mining operation.

(d) Any person with a valid legal interest that might be adversely affected by the release of a bond or the responsible officer or head of any federal, state, or local governmental agency that has jurisdiction by law or special expertise with respect to any environmental, social, or economic impact involved in the operation or is authorized to develop and enforce environmental standards with respect to the operation may file written objections to the proposed release of bond to the department within 30 days after the last publication of the notice. If written objections are filed and a hearing is requested, the department shall hold a public hearing in the locality of the operation proposed for bond release or in Helena, at the option of the objector, within 30 days of the request for hearing. The department shall inform the interested parties of the time and place of the hearing. The date, time, and location of the public hearing must be advertised by the department in a newspaper of general circulation in the locality for 2 consecutive weeks. Within 30 days after the hearing, the department shall notify the permittee and the objector of its final decision.

(e) Without prejudice to the rights of the objector or the permittee or the responsibilities of the department pursuant to this section, the department may establish an informal conference to resolve written objections.

(f) For the purpose of the hearing under subsection (6)(d), the department may administer oaths, subpoena witnesses or written or printed materials, compel the attendance of witnesses or the production of materials, and take evidence, including but not limited to conducting inspections of the land affected and other operations carried on by the permittee in the general vicinity. A verbatim record of each public hearing required by this section must be made, and a transcript must be made available on the motion of any party or by order of the department.

(g) If the applicant significantly modifies the application after the application has been determined to be administratively complete, the department shall conduct a new review, including an administrative completeness determination. A significant modification includes but is not limited to:

(i) the notification of an additional property owner, local governmental body, planning agency, or sewage and water treatment authority of the permittee's intention to seek a bond release;

(ii) a material increase in the acreage for which a bond release is sought or in the amount of bond release sought; or

(iii) a material change in the reclamation for which a bond release is sought or the information used to evaluate the results of that reclamation.

(h) The department shall, within 30 days of determining that the application is administratively complete or as soon as weather permits, conduct an inspection and evaluation of the reclamation work involved. In the evaluation, the department shall consider, among other things, the degree of difficulty in completing any remaining reclamation, whether pollution of surface and subsurface water is occurring, the probability of continuance or future occurrence of the pollution, and the estimated cost of abating the pollution. Other information or methods acceptable to the department, including predictive modeling, may be used in conjunction with monitoring data for the purposes of the evaluation and to demonstrate compliance with the approved reclamation plan.

(i) The department shall review each administratively complete application to determine the acceptability of the application. A complete application is acceptable if the application is in compliance with all of the applicable requirements of this part, the rules adopted under this part, and the permit. Other information or methods acceptable to the department, including predictive modeling, may be used in conjunction with monitoring data for the purposes of determining the acceptability of the application and demonstrating compliance with the approved reclamation plan.

(j) (i) The department shall notify the applicant in writing regarding the acceptability of the application no later than 60 days from the date of the inspection.

(ii) If the department determines that the application is not acceptable, it shall specify in the notice those items that the application must address.

(iii) If the applicant revises the application in response to a notice of unacceptability, the department shall review the revised application and notify the applicant in writing within 60 days of the date of receipt as to whether the revised application is acceptable.

(iv) If the revision constitutes a significant modification, the department shall conduct a new review, beginning with an administrative completeness determination.

(v) A significant modification includes but is not limited to:

(A) the notification of an additional property owner, local governmental body, planning agency, or sewage and water treatment authority of the permittee's intention to seek a bond release;

(B) a material increase in the acreage for which a bond release is sought or the amount of bond release sought; or

(C) a material change in the reclamation for which a bond release is sought or the information used to evaluate the results of that reclamation.

(k) At the request of the permittee, and for a designated area within the permit boundary within or across affected drainage basins, the department shall release the bond in whole or in part if the reclamation covered by the bond or portion of the bond has been accomplished as required by this part according to the following schedule:

(i) When the permittee completes the plugging, backfilling, regrading, and drainage control of a bonded area in accordance with the approved reclamation plan, the department shall release 60% of the bond or collateral for the designated area within the permit boundary.

(ii) The department shall release a portion of the bond for the designated area that would be sufficient for a third party to cover the cost of replacing soil after revegetation and soil stability have been established in the designated area in accordance with the approved reclamation plan. Whenever a silt dam is to be retained as a permanent impoundment, that portion of the bond may also be released under this subsection (6)(k)(ii) if provisions for sound future maintenance by the operator or the landowner are made with the department. Other information or methods acceptable to the department, including predictive modeling, may be used in conjunction with monitoring data for the purposes of determining soil replacement costs or silt dam maintenance and demonstrating compliance with the approved reclamation plan.

(iii) Except as provided in subsection (6)(k)(iv), in accordance with the requirements of 82-4-235, upon expiration of the period specified for responsibility, and after the designated area has been successfully revegetated, the remaining total of the bond required for a third party to establish vegetation must be released for the designated area.

(iv) The department shall retain a portion of the bond sufficient for a third party to fully satisfy remaining permit conditions if:

(A) the disturbed areas eligible for release are contributing suspended solids to streamflow or runoff outside of the affected drainage basin or permit boundary in excess of the requirements of 82-4-231(10)(k), as demonstrated by either sediment sampling or predictive modeling as approved by the department;

(B) soil productivity for prime farmlands eligible for release is not returned to equivalent levels of yield as nonmined land of the same soil type in the surrounding area under equivalent management practices, as determined from the soil survey; or

(C) the permittee has not successfully completed all reclamation activities, including water replacement, in the designated area.

(v) On request by the permittee, the department shall release all final bonds when, in accordance with the requirements of this chapter, the permittee successfully completes all prospecting, mining, and reclamation activities within the designated area.

(l) If the department disapproves the application for release of the bond or a portion of the bond, it shall:

(i) provide to the permittee detailed written findings demonstrating that the reclamation covered by the bond or a portion of the bond has not been accomplished as required by this part; and

(ii) recommend corrective actions necessary to secure the release and allowing opportunity for a public hearing.

(m) When an application for total or partial bond release is filed with the department, it shall notify the municipality or county in which a prospecting or mining operation is located by certified mail at least 30 days prior to the release of all or a portion of the bond.

(7) All disturbed areas must be reclaimed in a timely manner to conditions that are capable of supporting the land uses that they were capable of supporting prior to any mining or to higher or better uses as approved pursuant to subsection (8).

(8) (a) An operator may propose a higher or better use as an alternative postmining land use. If the landowner is not the operator, the operator shall submit written documentation of the concurrence of the landowner or the land management agency with jurisdiction over the land. The department may approve the proposed alternative postmining land use only if it meets all of the following criteria:

(i) There is a reasonable likelihood for achievement of the alternative land use.

(ii) The alternative land use does not present any actual or probable hazard to the public health or safety or any threat of water diminution or pollution.

(iii) The alternative land use will not:

(A) be impractical or unreasonable;

(B) be inconsistent with applicable land use policies or plans;

(C) involve unreasonable delay in implementation; or

(D) cause or contribute to violation of federal, state, or local law.

(b) As used in this section, the term "landowner" includes a person who has sold the surface estate to the operator with an option to repurchase the surface estate after mining and reclamation are complete.

(9) The reclamation plan must incorporate appropriate wildlife habitat enhancement features that are integrated with cropland, grazing land, pastureland, land occasionally cut for hay, or other uses in order to enhance habitat diversity, with emphasis on big game animals, game birds, and threatened and endangered species that have been documented to live in the area of land affected, and to enhance wetlands and riparian areas along rivers and streams and bordering ponds and lakes. Incorporation of wildlife habitat enhancement features does not constitute a change in land use to fish and wildlife habitat and may not interfere with the designated land use.

(10) Facilities existing prior to mining, including but not limited to public roads, utility lines, railroads, or pipelines, may be replaced as part of the reclamation plan. *(Certain 2025 amendments void on occurrence of contingency—sec. 3, Ch. 326, L. 2025—see compiler's comment.)*

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 326, L. 2025. Amendment effective May 1, 2025, and void on occurrence of contingency.

Contingent Voidness: Section 3, Ch. 326, L. 2025, provided: "(1) If the provisions of [this act] are disapproved by the United States secretary of the interior pursuant to 30 CFR 732, then [this act] is void.

(2) Within 15 days of the effective date of a disapproval pursuant to subsection (1), the department of environmental quality shall notify the code commissioner, certifying that the disapproval has occurred."

Cross-References

Water quality control, Title 75, ch. 5.
Policy — findings, 82-4-202.
Bond required, 82-4-223.
Release of remaining bond, 82-4-235.

82-4-233. Planting of vegetation following grading of disturbed area. (1) The operator shall establish on regraded areas and on all other disturbed areas, except water areas, surface areas of roads, and other constructed features approved as part of the postmining land use, a vegetative cover that is in accordance with the approved permit and reclamation plan and that is:

(a) diverse, effective, and permanent;

(b) composed of species native to the area or of introduced species when desirable and necessary to achieve the postmining land use and when approved by the department;

(c) at least equal in extent of cover to the natural vegetation of the area; and

(d) capable of stabilizing the soil surface in order to control erosion to the extent appropriate for the approved postmining land use.

(2) The reestablished plant species must:

(a) be compatible with the approved postmining land use;

(b) have the same seasonal growth characteristics as the original vegetation;

(c) be capable of self-regeneration and plant succession;

(d) be compatible with the plant and animal species of the area; and

(e) meet the requirements of applicable seed, poisonous and noxious plant, and introduced species laws or regulations.

(3) Reestablished vegetation must be appropriate to the postmining land use so that when the postmining land use is:

(a) cropland, the requirements of subsections (1)(a), (1)(c), (2)(b), and (2)(c) are not applicable;

(b) pastureland or grazing land, reestablished vegetation must have use for grazing by domestic livestock at least comparable to premining conditions or enhanced when practicable;

(c) fish and wildlife habitat, forestry, or recreation, trees and shrubs must be planted to achieve appropriate stocking rates.

(4) All underground shafts, tunnels, or other excavations are excluded from the provisions of subsection (1).

History: En. Sec. 12, Ch. 325, L. 1973; amd. Sec. 24, Ch. 441, L. 1975; R.C.M. 1947, 50-1045; amd. Sec. 2, Ch. 172, L. 1979; amd. Sec. 4, Ch. 196, L. 1997; amd. Sec. 7, Ch. 204, L. 2003; amd. Sec. 8, Ch. 127, L. 2005.

82-4-234. Commencement of reclamation. The operator shall commence the reclamation of the area of land affected by the operator's operation as soon as possible after the beginning of strip mining or underground mining of that area in accordance with plans previously approved by the department. Those grading, backfilling, subsidence stabilization, topsoiling, and water management practices that are approved in the plans must be kept current with the operation as defined by rules of the department, and a permit or supplement to a permit may not be issued if, in the discretion of the department, these practices are not current.

History: En. Sec. 13, Ch. 325, L. 1973; amd. Sec. 25, Ch. 441, L. 1975; R.C.M. 1947, 50-1046; amd. Sec. 3, Ch. 196, L. 1979; amd. Sec. 8, Ch. 204, L. 2003; amd. Sec. 92, Ch. 324, L. 2021.

82-4-235. Determination of successful revegetation — final bond release. (1) Success of revegetation must be judged on the effectiveness of the vegetation for the approved postmining land use, the extent of cover compared to the cover occurring in the natural vegetation, and the requirements of 82-4-233. Standards for success are:

(a) for areas reclaimed for use as cropland, crop production must be at least equal to that achieved prior to mining based on comparison with historical data, comparable reference areas, or United States department of agriculture publications applicable to the area of the operation, as referenced in rules adopted by the department;

(b) for areas reclaimed for use as pastureland or grazing land, the ground cover and production of living plants on the revegetated area must be at least equal to that of a reference area or other standard approved by the department as appropriate for the postmining land use;

(c) for areas reclaimed for use as fish and wildlife habitat, forestry, or recreation, success of revegetation must be determined on the basis of approved tree density standards or shrub density standards, or both, and vegetative ground cover required to achieve the postmining land use;

(d) reestablished vegetation is considered effective if the postmining land use is achieved and erosion is controlled;

(e) reestablished vegetation is considered permanent if it is diverse and effective at the end of the 10-year responsibility period specified under subsection (2); and

(f) plant species composing the reestablished vegetation are considered to have the same seasonal characteristics of growth as the original vegetation, to be capable of regeneration and plant succession, and to be compatible with the plant and animal species of the area if those plant species are native to the area or are introduced species approved by the department as desirable and necessary to achieve the postmining land use.

(2) Inspection and evaluation of reclaimed vegetative cover must be made as soon as possible following an application for final bond release to determine if a satisfactory stand has been established. If the department determines that a satisfactory vegetative cover has been established, it shall release the remaining bond held on the area reclaimed after public notice

and an opportunity for hearing as provided in 82-4-232(6). Except as provided in subsection (3), the remaining bond may not be released prior to a period of 10 years after the last year of augmented seeding, fertilizing, irrigation, or other work required under this part for those operations or portions of operations that were seeded after May 2, 1978, or prior to a period of 5 years after initial planting for all exploration activities and all other operations.

(3) (a) Vegetative cover of water management facilities and other support facilities composing no more than 10% of the area for which bond release is sought is not subject to the 10-year responsibility period. Water management facilities and other support facilities include sedimentation ponds, diversions, other water management structures, soils stockpiles, and access roads.

(b) Vegetative cover of water management facilities and other support facilities composing no more than 10% of the area for which bond release is sought is eligible for bond release if the vegetative cover otherwise meets the reclamation standards in subsection (1).

(4) (a) Notwithstanding the provisions of subsections (2) and (3), on land from which coal was removed prior to May 3, 1978, and on land from which coal was not removed and that was not used, disturbed, or redisturbed in connection with this part after May 2, 1978, pursuant to a permit issued by the department under this part, the department may approve for release a bond on an area of reclaimed vegetation that meets the following criteria:

(i) it was seeded using a seed mixture that was approved by the department under the criteria established pursuant to 82-4-233 and that included introduced species; and

(ii) at least one of the following conditions exists:

(A) the standards of 82-4-233(1) are otherwise achieved;

(B) the operator has demonstrated substantial usefulness of the reclaimed vegetation for grazing of livestock;

(C) the operator demonstrates that the reclaimed vegetation has substantial value as a habitat component for wildlife present in the area; or

(D) the topography and soils are suitable for conversion to cropland or hayland consistent with the standards of 82-4-232 and the department approves and the operator completes that conversion.

(b) On lands that meet the criteria described in subsection (4)(a), interseeding or supplemental planting may be performed without reinitiating the liability period provided in subsection (2).

History: **En. Sec. 14, Ch. 325, L. 1973; R.C.M. 1947, 50-1047; amd. Sec. 4, Ch. 196, L. 1979; amd. Sec. 13, Ch. 550, L. 1979; amd. Sec. 1, Ch. 193, L. 1995; amd. Sec. 5, Ch. 196, L. 1997; amd. Sec. 9, Ch. 204, L. 2003; amd. Sec. 9, Ch. 127, L. 2005; amd. Sec. 1, Ch. 72, L. 2009; amd. Sec. 1, Ch. 84, L. 2011; amd. Sec. 93, Ch. 324, L. 2021.**

82-4-236. Vegetation as property of landowner. All vegetation that is planted or seeded on the area of land affected as required by this part or rules adopted under this part becomes the property of the landowner after complete release of the bond, unless the operator and the landowner agree otherwise.

History: **En. Sec. 15, Ch. 325, L. 1973; R.C.M. 1947, 50-1048; amd. Sec. 10, Ch. 204, L. 2003.**

Cross-References

Release of bond, 82-4-232(6), 82-4-235.

82-4-237. Operator to file annual reports. (1) An operator shall file an annual report with the department on a date determined by the department. An annual report must include:

(a) the name and address of the operator and permit number or numbers; and

(b) a report with detail required by the department, supplemented with maps, cross sections, or other material indicating the extent to which mining operations have been carried out, the progress of all reclamation work, including the type of planting or seeding, mixture and amount of seed, date of planting or seeding, and area of land planted, and the number of acres affected.

(2) Upon receipt of the annual report, the department may request additional information and shall allow a reasonable opportunity for the operator to respond to the request.

(3) When problems are revealed by review of new information or as a result of field inspections, the department may order necessary changes in the mining and reclamation plans to ensure compliance with this part.

History: En. Sec. 6, Ch. 325, L. 1973; amd. Sec. 1, Ch. 221, L. 1975; amd. Sec. 19, Ch. 441, L. 1975; amd. Sec. 1, Ch. 352, L. 1977; R.C.M. 1947, 50-1039(2) thru (4); amd. Sec. 5, Ch. 196, L. 1979; amd. Sec. 1, Ch. 68, L. 1983; amd. Sec. 4, Ch. 98, L. 2013.

Cross-References

Annual report filed for prospecting permit, 82-4-226(7).

82-4-238. Successor operator. When one operator succeeds another at an uncompleted operation, either by sale, assignment, lease, or otherwise, the department may release the first operator from all liability under this part as to that particular operation if both operators have been issued a permit and have otherwise complied with the requirements of this part, and the successor operator assumes, as part of the obligation under this part, all liability for the reclamation of the area of land affected by the former operator.

History: En. Sec. 18, Ch. 325, L. 1973; R.C.M. 1947, 50-1051; amd. Sec. 2733, Ch. 56, L. 2009.

82-4-239. Reclamation. (1) The department may have reclamation work done by its employees, by employees of other governmental agencies, by soil conservation districts, or through contracts with qualified persons. The department may construct, operate, and maintain plants for the control and treatment of water pollution resulting from mine drainage.

(2) Any funds or any public works programs available to the department must be used and expended to reclaim and rehabilitate lands that have been subjected to strip mining or underground mining and that have not been reclaimed and rehabilitated in accordance with the standards of this part. The department shall cooperate with federal, state, and private agencies to engage in cooperative projects under this section.

(3) Agents, employees, or contractors of the department may enter upon any land for the purpose of conducting studies or exploratory work to determine whether the land has been strip- or underground-mined and not reclaimed and rehabilitated in accordance with the requirements of this part and to determine the feasibility of restoration, reclamation, abatement, control, or prevention of any adverse effects of past coal-mining practices. Upon request of the director of the department, the attorney general shall bring an injunctive action to restrain any interference with the exercise of the right to enter and inspect granted in this subsection. The action must be brought in the county in which the mine is located.

(4) (a) The department shall take the actions described in subsection (4)(b) when it makes a finding of fact that:

(i) land or water resources have been adversely affected by past coal-mining practices;

(ii) the adverse effects are at a stage at which, in the public interest, action to restore, reclaim, abate, control, or prevent should be taken; and

(iii) the owners of the land or water resources where entry must be made to restore, reclaim, abate, control, or prevent the adverse effects of past coal-mining practices are not known or readily available or the owners will not give permission for the department or its agents, employees, or contractors to enter upon the property to restore, reclaim, abate, control, or prevent the adverse effects of past coal-mining practices.

(b) After giving notice by mail to the owner, if known, and any purchaser under contract for deed, if known, or, if neither is known, by posting notice on the premises and advertising in a newspaper of general circulation in the county in which the land lies, the agents, employees, or contractors of the department may enter on the property adversely affected by past coal-mining practices and on any other property necessary for access to the mineral property to do all things necessary or expedient to restore, reclaim, abate, control, or prevent the adverse effects of past coal-mining practices.

(c) Action taken under subsection (4)(b) is not an act of condemnation of property or of trespass, but rather is an exercise of the power granted by Article IX, sections 1 and 2, of the Montana constitution.

(5) (a) Within 6 months after the completion of projects to restore, reclaim, abate, control, or prevent adverse effects of past coal-mining practices on privately owned land, the department shall itemize the money expended and may file a statement of those expenses in the office of the clerk and recorder of the county in which the land lies, together with a notarized appraisal by an

independent appraiser of the value of the land before the restoration, reclamation, abatement, control, or prevention of adverse effects of past coal-mining practices if the money expended resulted in a significant increase in property value. The statement constitutes a lien upon the land. The lien may not exceed the amount determined by the appraisal to be the increase in the market value of the land as a result of the restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal-mining practices. A lien under this subsection (5)(a) may not be filed against the property of a person who owned the surface prior to May 2, 1977, and who did not consent to, participate in, or exercise control over the mining operation that necessitated the reclamation performed under this part.

(b) The landowner may petition within 60 days of the filing of the lien to determine the increase in the market value of the land as a result of the restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal-mining practices. The amount reported to be the increase in value of the premises constitutes the amount of the lien and must be recorded with the statement provided for in this section. Any party aggrieved by the decision may appeal as provided by law.

(c) The lien provided in this section must be recorded at the office of the county clerk and recorder. The statement constitutes a lien upon the land as of the date of the expenditure of the money and has priority as a lien second only to the lien of real estate taxes imposed upon the land.

(6) The department may acquire the necessary property by gift or purchase. A gift or purchase must be approved by the board of land commissioners. If the property cannot be acquired by gift or purchase at a reasonable cost, proceedings may be instituted in the manner provided in Title 70, chapter 30, against all nonaccepting landholders if:

(a) the property is necessary for successful reclamation;

(b) the acquired land after restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal-mining practices will serve recreation and historic purposes or conservation and reclamation purposes or provide open space benefits; and

(c) (i) permanent facilities, such as treatment plants or relocated stream channels, will be constructed on the land for the restoration, reclamation, abatement, control, or prevention of the adverse effects of past strip- or underground-coal-mining practices; or

(ii) acquisition of coal refuse disposal sites and all coal refuse on the land will serve the purposes of this part because public ownership is desirable to meet emergency situations and prevent recurrences of the adverse effects of past coal-mining practices.

History: **En. Sec. 20, Ch. 325, L. 1973; amd. Sec. 27, Ch. 441, L. 1975; R.C.M. 1947, 50-1053(part); amd. Sec. 14, Ch. 550, L. 1979; amd. Sec. 26, Ch. 526, L. 1983; amd. Sec. 375, Ch. 418, L. 1995; amd. Sec. 29, Ch. 361, L. 2003; amd. Sec. 1, Ch. 78, L. 2009; amd. Sec. 94, Ch. 324, L. 2021.**

82-4-240. Reclamation of lands after bond forfeited. In keeping with the provisions of this part, the department may reclaim any affected lands with respect to which a bond has been forfeited.

History: **En. Sec. 21, Ch. 325, L. 1973; amd. Sec. 28, Ch. 441, L. 1975; R.C.M. 1947, 50-1054; amd. Sec. 2, Ch. 31, L. 1981; amd. Sec. 376, Ch. 418, L. 1995.**

82-4-241. Receipts paid into general fund — disposition of bond forfeiture money. (1) Except for bond forfeiture money, all fees, penalties, and other money available or paid to the department under the provisions of this part must be placed in the state treasury and credited to the general fund.

(2) Bond forfeiture money must be used to pay for expenses that the department incurs pursuant to 82-4-240.

(3) Funds held by the department as bond or as a result of bond forfeiture that are no longer needed for reclamation and for which the department is not able to locate a surety or other person who owns the funds after diligent search must be deposited in the state special revenue fund and credited to the environmental rehabilitation and response account provided for in 75-1-110.

History: **En. Sec. 19, Ch. 325, L. 1973; amd. Sec. 26, Ch. 441, L. 1975; R.C.M. 1947, 50-1052; amd. Sec. 3, Ch. 31, L. 1981; amd. Sec. 3, Ch. 338, L. 2001.**

82-4-242. Funds received by department. The department may receive any federal funds, state funds, or any other funds for the reclamation of land affected by strip mining or underground mining.

History: **En. Sec. 20, Ch. 325, L. 1973; amd. Sec. 27, Ch. 441, L. 1975; R.C.M. 1947, 50-1053(part); amd. Sec. 377, Ch. 418, L. 1995.**

82-4-243. Subsidence. (1) The permittee of an underground coal mining operation shall:

(a) promptly repair or compensate for material damage to any occupied residential dwelling and related structures and to any noncommercial building resulting from subsidence caused by an underground coal mining operation. Repair of damage includes rehabilitation, restoration, or replacement. Compensation must be provided to the owner of the damaged property and must be in the full amount of the diminution in value resulting from the subsidence. Compensation may be accomplished by the purchase, prior to mining, of a noncancellable premium-prepaid insurance policy.

(b) promptly replace any drinking, domestic, or residential water supply from a well or spring that was in existence prior to the application for the permit pursuant to 82-4-222 and that has been affected by contamination, diminution, or interruption resulting from the underground coal mining operation.

(2) This section may not be construed to prohibit or interrupt an underground coal mining operation.

(3) This section does not abrogate, impair, or diminish any right or remedy granted under another provision of this part or any other law.

History: **En. Sec. 1, Ch. 196, L. 1997.**

82-4-244. Coal and uranium mine permitting and reclamation program account. (1) There is a coal and uranium mine permitting and reclamation program account within the special revenue fund established in 17-2-102.

(2) Each fiscal year, there must be deposited in the account the proceeds from the coal severance tax, as provided in 15-35-108, to be appropriated by the legislature to the department for the administration and enforcement of this part.

History: **En. Sec. 2, Ch. 280, L. 2007.**

82-4-245 through 82-4-249 reserved.

82-4-250. Operating permit revocation — permit transfer. (1) An operating permit that is revoked in accordance with this part does not terminate until 5 years after revocation or until substantial completion of seeding and planting on disturbed areas, whichever occurs earlier.

(2) A person may apply for the transfer of a revoked permit that has not terminated by submitting an application to the department that contains the information required for a permit applicant in 82-4-222(1)(b) through (1)(i). Upon receipt of an application from a person who is not precluded from holding a permit pursuant to this part, the department shall cease reclamation activities on the permit area.

(3) The department may not require the applicant to submit any additional information unless the department can show that significant changes in the environmental baseline data have occurred during the period of operation or since the revocation of the initial operating permit.

(4) The department may not prepare a review under 75-1-201 for a transfer unless the department can show that the operation has caused or may cause significant impacts that have not been analyzed previously in an environmental review document prepared pursuant to 75-1-201.

(5) The department shall process an application for transfer under the same timeframes as are provided in 82-4-231 for processing of permit applications.

(6) Except as provided in subsection (7), the department shall, after receipt of an application pursuant to subsections (2) through (5) and after public notice and opportunity for comment:

(a) transfer the operating permit to a new operator if the new operator provides proof of site ownership or control and adequate bonding as required by this part; and

(b) require as a condition of permit transfer that, prior to creating additional disturbance at the site, all preexisting permit deficiencies, including modifications necessary because of reclamation that has been conducted at the site, be corrected to the satisfaction of the department and that any preestablished environmental monitoring requirements continue.

(7) The department may not transfer any permit for which it can show that:

(a) the requirements of this part and the rules adopted under this part for operation, backfilling, grading, subsidence stabilization, water control, highwall reduction, topsoiling, revegetation, and reclamation of the affected area cannot be met;

(b) significant changes in the operating plan or reclamation plan are necessary; or

(c) the department would be precluded from issuing a permit to the applicant by 82-4-227(11) or (12).

(8) The department is not required to reimburse the former permittee or surety for funds expended for reclamation, monitoring, or site maintenance prior to permit transfer.

(9) This section does not apply to the revocation or transfer of an operating permit that authorizes mine operations on federal lands.

History: En. Sec. 1, Ch. 522, L. 2001.

82-4-251. Noncompliance — suspension of permits. (1) If it is determined on the basis of an inspection that the permittee is or that any condition or practice exists in violation of any requirement of this part or any permit condition required by this part that creates an imminent danger to the health or safety of the public or is causing or can reasonably be expected to cause significant and imminent environmental harm to land, air, or water resources, the director of the department or an authorized representative shall immediately order cessation of the operation or the portion of the operation relevant to the condition, practice, or violation. The cessation order remains in effect until the director or an authorized representative determines that the condition, practice, or violation has been abated or until modified, vacated, or terminated by the director or an authorized representative pursuant to subsection (6). If the director or an authorized representative finds that the ordered cessation of the operation or any portion of the operation will not completely abate the imminent danger to the health or safety of the public or the significant and imminent environmental harm to land, air, or water resources, the director or the authorized representative shall, in addition to the cessation order, impose affirmative obligations requiring any steps that the director or the authorized representative considers necessary to abate the imminent danger or the significant environmental harm.

(2) When, on the basis of an inspection, the department determines that any permittee is in violation of any requirement of this part or any permit condition required by this part that does not create an imminent danger to the health or safety of the public or cannot be reasonably expected to cause significant and imminent environmental harm to land, air, or water resources, the director or an authorized representative shall issue a notice to the permittee or the permittee's agent fixing a reasonable time, not exceeding 90 days, for the abatement of the violation and providing opportunity for public hearing. If, upon expiration of the period of time as originally fixed or subsequently extended, for good cause shown and upon the written finding of the director or an authorized representative, the director or an authorized representative finds that the violation has not been abated, the director or an authorized representative shall immediately order a cessation of the operation or the portion of the operation relevant to the violation. The cessation order remains in effect until the director or an authorized representative determines that the violation has been abated or until modified, vacated, or terminated by the director or an authorized representative pursuant to subsection (6). In the order of cessation issued under this subsection, the director shall determine the steps necessary to abate the violation in the most expeditious manner possible and shall include the necessary measures in the order.

(3) (a) When, on the basis of an inspection, the director or an authorized representative determines that there is a minor maintenance item to be corrected, the director or the authorized

representative shall issue a minor maintenance correction letter to alert the permittee of the necessary correction and provide the permittee with an opportunity to correct the item within 14 days. During the next regular inspection, the director or the authorized representative shall verify that the necessary correction has been completed.

(b) A minor maintenance item:

(i) is a permit violation that does not create an imminent danger to the health or safety of the public, and the director or a director's designee determines the violation is not reasonably expected to cause significant and imminent environmental harm to land, air, or water resources;

(ii) may be reasonably corrected by the permittee within 14 days to the satisfaction of the director or a designee;

(iii) does not, at the discretion of the director or a designee, necessitate a cessation order or public hearing, as required in subsection (2); and

(iv) is within the permit boundary.

(c) If a permittee fails to correct the minor maintenance item within 14 days or by the next regular inspection, whichever is later, the director or the director's designee shall issue a notice of noncompliance or an order of cessation pursuant to subsections (1) and (2).

(4) When, on the basis of an inspection, the director or an authorized representative determines that a pattern of violations of any requirements of this part or any permit conditions required by this part exists or has existed and if the director or an authorized representative also finds that the violations are caused by the unwarranted failure of the permittee to comply with any requirements of this part or any permit conditions or that the violations are willfully caused by the permittee, the director or an authorized representative shall issue an order to the permittee to show cause as to why the permit should not be suspended or revoked and shall provide opportunity for a public hearing. If a hearing is requested, the director shall inform all interested parties of the time and place of the hearing. Upon the permittee's failure to show cause as to why the permit should not be suspended or revoked, the director or an authorized representative shall suspend or revoke the permit. A permittee may request a contested case hearing on a permit suspension or revocation by filing a request for hearing, specifying the grounds for the request, within 30 days of receipt of the order of suspension or revocation. The order is effective upon expiration of the period for requesting a hearing or, if a hearing is requested, upon issuance of a final order by the board. The hearing must be conducted in accordance with the requirements of Title 2, chapter 4, part 6. When a permit has been revoked, the department may order the performance bond forfeited.

(5) Any additional permits held by an operator whose mining permit has been revoked must be suspended, and the operator is not eligible to receive another permit or to have the suspended permits reinstated until the operator has complied with all the requirements of this part with respect to former permits issued to the operator. An operator who has forfeited a bond is not eligible to receive another permit unless the land for which the bond was forfeited has been reclaimed without cost to the state or the operator has paid into the reclamation account a sum together with the value of the bond the department finds adequate to reclaim the lands.

(6) Notices and orders issued pursuant to this section must set forth with reasonable specificity the nature of the violation and the remedial action required, the period of time established for abatement, and a reasonable description of the portion of the operation to which the notice or order applies. Each notice or order issued under this section must be given promptly to the permittee or the permittee's agent by the department, by the director, or by the authorized representative who issued the notice or order. All notices and orders must be in writing and be signed by the authorized representatives. Any notice or order issued pursuant to this section may be modified, vacated, or terminated by the director or an authorized representative. However, any notice or order issued pursuant to this section that requires cessation of mining by the operator expires within 30 days of actual notice to the operator unless an informal public hearing, if requested by the person to whom the notice or order was issued, is held at the site or within such reasonable proximity to the site that any viewings of the site can be conducted during the course of the hearing. If the department receives a request for an informal public hearing 21 days after service of the notice or order, the period for holding the informal public hearing is extended by the number of days after the 21st day that the request was received.

(7) A person who has been issued a notice or an order of cessation pursuant to subsection (1) or (2) or a person who has an interest that is or may be adversely affected by an order issued pursuant to subsection (1) or (2) or by modification, vacation, or termination of that order may request a hearing before the board on that order within 30 days of its issuance or within 30 days of its modification, vacation, or termination. The filing of an application for review under this subsection may not operate as a stay of any order or notice. The board shall make findings of fact and issue a written decision incorporating an order vacating, affirming, modifying, or terminating the order.

(8) Subject to the provisions of 82-4-255, whenever an order is issued under this section or as the result of any administrative proceeding under this part, at the request of any person, a sum equal to the aggregate amount of all costs, expenses, and attorney fees as determined by the department to have been reasonably incurred by the person for or in connection with the person's participation in the proceedings, including any judicial review of agency actions, may be assessed against either party as the court, resulting from judicial review, or the department, resulting from administrative proceedings, considers proper.

(9) In order to protect the stability of the land, the director or an authorized representative shall order cessation of underground coal mining under urbanized areas, cities, towns, and communities and adjacent to industrial or commercial buildings, major impoundments, or permanent streams if the director or the authorized agent finds imminent danger to inhabitants of the urbanized areas, cities, towns, and communities. *(Certain 2025 amendments void on occurrence of contingency—sec. 4, Ch. 201, L. 2025—see compiler's comment.)*

History: En. Sec. 17, Ch. 325, L. 1973; R.C.M. 1947, 50-1050; amd. Sec. 15, Ch. 550, L. 1979; amd. Sec. 4, Ch. 437, L. 1981; amd. Sec. 1, Ch. 162, L. 1983; amd. Sec. 378, Ch. 418, L. 1995; amd. Sec. 10, Ch. 127, L. 2005; amd. Sec. 2, Ch. 472, L. 2023; amd. Sec. 1, Ch. 201, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 201, L. 2025. Amendment effective April 17, 2025, and void on occurrence of contingency.

Contingent Voidness: Section 4, Ch. 201, L. 2025, provided: "(1) If any provision of [this act] is disapproved by the United States secretary of the interior pursuant to 30 CFR 732, then that portion of [this act] is void.

(2) Within 15 days of the effective date of the disapproval under subsection (1), the department of environmental quality shall notify the code commissioner, certifying that the disapproval under subsection (1) has occurred."

Cross-References

Appeal of contested administrative cases, Title 2, ch. 4, part 7.

Suspension and revocation of permits by Department, 82-4-205.

82-4-252. Mandamus. (1) A resident of this state or any person having an interest that is or may be adversely affected, with knowledge that a requirement of this part or a rule adopted under this part is not being enforced or implemented by a public officer or employee whose duty it is to enforce or implement the requirement or rule, may bring the failure to enforce to the attention of the public officer or employee by a written statement under oath that must state the specific facts of the failure to enforce the requirement or rule. Knowingly making false statements or charges in the affidavit subjects the affiant to penalties prescribed in 45-7-202.

(2) If the public officer or employee neglects or refuses for an unreasonable time after receipt of the statement to enforce or implement the requirement or rule, the resident or person having an interest that is or may be adversely affected may bring an action of mandamus in the district court of the county in which the land is located. The court, if it finds that a requirement of this part or a rule adopted under this part is not being enforced, shall order the public officer or employee whose duty it is to enforce the requirement or rule to perform the officer's or employee's duties. If the officer or employee fails to obey the order, the public officer or employee must be held in contempt of court and is subject to the penalties provided by law.

(3) Any person having an interest that is or may be adversely affected may commence a civil action on the person's own behalf to compel compliance with this part against any person for the violation of this part or any rule, order, or permit issued under this part. However, the action may not commence:

(a) prior to 60 days after the plaintiff has given notice in writing to the department and to the alleged violator; or

(b) if the department has commenced and is diligently prosecuting a civil action to require compliance with the provisions of this part or any rule, order, or permit issued under this part.

Any person may intervene as a matter of right in the civil action. This section does not restrict any right that any person may have under any statute or common law to seek enforcement of this part or the rules adopted under this part or to seek any other relief.

(4) Any person who is injured in person or property through the violation by any operator of any rule, order, or permit issued pursuant to this part may bring an action for damages, including reasonable attorney and expert witness fees, only in the county in which the strip- or underground-coal-mining operation complained of is located. This subsection does not affect the rights established by or limits imposed under Title 39, chapter 71.

(5) The court, in issuing any final order in any action brought pursuant to subsection (3), may award costs of litigation, including attorney and expert witness fees, pursuant to 82-4-255. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Montana Rules of Civil Procedure.

Contempts, Title 3, ch. 1, part 5.
Injunctions, Title 27, ch. 19.
Mandamus, Title 27, ch. 26.

82-4-253. Suit for damage to water supply. (1) An owner of an interest in real property who obtains all or part of a supply of water for domestic, agricultural, industrial, or other legitimate use from an underground source other than a subterranean stream having a permanent, distinct, and known channel may sue an operator to recover damages for contamination, diminution, or interruption of the water supply, proximately resulting from strip mining or underground mining.

(2) Prima facie evidence of injury in a suit under this section is established by the removal of coal or disruption of overlying aquifer from designated ground water areas as prescribed in Title 85, chapter 2, part 5. If the area is not a designated ground water area, a showing that the coal or overlying strata is an aquifer in that geographical location and that the coal or the overlying strata has been removed or disrupted shifts the burden to the defendant (operator) to show that the plaintiff's (owner's) water supply was not injured thereby.

(3) An owner of water rights adversely affected may file a complaint detailing the loss of water in quality and quantity with the department. Upon receipt of this complaint the department shall:

(a) investigate the complaint using all available information including monitoring data gathered at the mine site;

(b) require the defendant (operator) to install monitoring wells or other practices that may be needed to determine the cause of water loss, if there is a loss, in terms of quantity or quality;

(c) issue within 90 days a written finding specifying the cause of the water loss, if there is a loss, in terms of quantity or quality;

(d) order the mining operator in compliance with chapter 2 of Title 85 to replace the water immediately on a temporary basis to provide the needed water and within a reasonable time, replace the water in like quality, quantity, and duration, if the loss is caused by the strip-mining or underground-coal-mining operation; and

(e) order the suspension of the operator's permit for failure to replace the water, until such time as the operator provides substitute water.

(4) A servient tract of land is not bound to receive surface water contaminated by strip mining or underground mining on a dominant tract of land, and the owner of the servient tract may sue an operator to recover the damages proximately resulting from the natural drainage from the dominant tract of surface waters contaminated by strip mining or underground mining on the dominant tract.

(5) This section and 82-4-252 do not create, modify, or affect any right, liability, or remedy other than as expressly provided.

82-4-254. Violation — penalty — waiver. (1) (a) Except as provided in subsection (2), a person or operator who violates any of the provisions of this part, rules adopted or orders issued under this part, or term or condition of a permit and any director, officer, or agent of a corporation who purposely or knowingly authorizes, orders, or carries out a violation shall pay an administrative penalty of not less than $100 or more than $5,000 for the violation and an additional administrative penalty of not less than $100 or more than $5,000 for each day during which a violation continues and may be enjoined from continuing the violations as provided in this section. A person or operator who fails to correct a violation within the period permitted by law, rule, or order of the department must be assessed a penalty of not less than $750 for each day, up to 30 days, during which the failure or violation continues.

(b) Penalties assessed under this section must be determined in accordance with the penalty factors in 82-4-1001.

(c) The period permitted for correction of a violation does not, in the case of any review proceeding under 82-4-251(7), end until entry of a final order suspending the abatement requirements or until entry of an order of court ordering suspension of the abatement requirements. If the failure to abate continues for more than 30 days, the department shall, within 30 days after the 30-day period, take appropriate action pursuant to 82-4-251(4) or request action under subsection (4) or (6) of this section.

(2) The department may waive the penalty for a minor violation of this part, a rule adopted or an order issued under this part, or a term or condition of a permit if the department determines that the violation is not of potential harm to public health, public safety, or the environment and does not impair the administration of this part. The department may not waive a penalty assessed under this section if the person or operator fails to abate the violation as directed under 82-4-251. The department shall adopt rules to implement and administer a procedure for waiver of a penalty under this subsection.

(3) (a) To assess an administrative penalty under this section, the department shall issue a notice of violation and penalty order to the person or operator, unless the penalty is waived pursuant to subsection (2). The notice and order must specify the provision of this part, rule adopted or order issued under this part, or term or condition of a permit that is violated and must contain findings of fact, conclusions of law, and a statement of the proposed administrative penalty. The notice and order must be served personally or by certified mail. Service by mail is complete 3 business days after the date of mailing. The notice and order become final unless, within 30 days after the order is served, the person or operator to whom the order was issued requests a hearing before the board. By submitting to the board a written request within 30 days of service of the notice of violation, stating the reason for the request, the person or operator is entitled to a hearing before the board under 82-4-206 on the issues of whether the alleged violation has occurred and whether the penalty proposed to be assessed is proper. On receipt of a request, the board shall schedule a hearing. After a hearing, the board shall make findings of fact and issue a written decision as to the occurrence of the violation and the amount of penalty warranted. If the board finds that the violation occurred and a penalty is warranted, it shall order the payment of the penalty. If the time for requesting a hearing expires without a hearing request, the person or operator shall remit the amount of the penalty within 30 days of the expiration of the period for requesting a hearing.

(b) If the person or operator to whom a final order is issued under subsection (3)(a) wishes to obtain judicial review of the order, the person or operator shall submit with any assessed penalty a statement that the penalty is being paid under protest and the department shall hold the payment in escrow until judicial review is complete. Any person or operator who fails to request and submit testimony at the hearing provided for in subsection (3)(a) or who fails to pay any assessed penalty under protest within 30 days of the order assessing the penalty forfeits the right to seek judicial review of the violation and penalty determinations.

(c) Penalties provided for in this section are recoverable in an action brought by the department. The action must be filed in the district court having jurisdiction over the defendant or in the first judicial district if no other district court has jurisdiction.

(4) The department may bring an action for a restraining order or temporary or permanent injunction against an operator or other person who:

(a) violates, threatens to violate, or fails or refuses to comply with any order or decision issued under this part;

(b) interferes with, hinders, or delays the department in carrying out the provisions of this part;

(c) refuses to admit an authorized representative of the department to the permit area;

(d) refuses to permit inspection of the permit area by an authorized representative of the department;

(e) refuses to furnish any information or report requested by the department in furtherance of the provisions of this part; or

(f) refuses to permit access to and copying of records that the department determines to be necessary in carrying out the provisions of this part.

(5) Any relief granted by a court under subsection (4)(a) continues in effect until the completion or final termination of all proceedings for review of relief granted under this part unless, prior to the final determination, the district court granting the relief sets it aside or modifies it.

(6) A person who violates any of the provisions of this part or any determination or order issued under this part or who purposely or knowingly violates any permit condition issued under this part is guilty of a misdemeanor and shall be fined an amount not less than $500 and not more than $10,000 or be imprisoned for not more than 1 year, or both. Each day on which the violation occurs constitutes a separate offense.

(7) A person who knowingly makes any false statement, representation, or certification or knowingly fails to make any statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained pursuant to this part shall upon conviction be punished by a fine of not more than $10,000 or by imprisonment for not more than 1 year, or both.

(8) A person who except as permitted by law purposely or knowingly resists, prevents, impedes, or interferes with the department or its agents in the performance of duties pursuant to this part shall be punished by a fine of not more than $5,000 or imprisonment for not more than 1 year, or both.

(9) An employee of the department performing any function or duty under this part may not have a direct or indirect financial interest in any strip- or underground-coal-mining operation. A person who knowingly violates the provisions of this subsection shall upon conviction be punished by a fine of not more than $2,500 or by imprisonment of not more than 1 year, or both.

(10) Within 30 days after receipt of full payment of an administrative penalty assessed under this section, the department shall issue a written release of civil liability for the violations for which the penalty was assessed. *(Certain 2025 amendments void on occurrence of contingency—sec. 4, Ch. 201, L. 2025—see compiler's comment.)*

82-4-255. Equal application of court costs. (1) Unless the context requires otherwise, a court or administrative agency that issues a final order in an action pursuant to Title 82, chapter 4, part 2, may award the prevailing party reasonable costs of litigation, including filing fees, attorney fees, and witness costs.

(2) In awarding costs pursuant to this section, the court or administrative agency may not consider the identity of any party, including but not limited to a permittee, permit applicant, agency, public interest litigant, or other party to an action. The party requesting costs bears the burden of proof and persuasion.

(3) This section supersedes prior rulings pursuant to the private attorney general doctrine.

(4) The provisions of this section apply equally to all parties in an action pursuant to this part.

History: **En. Sec. 1, Ch. 472, L. 2023.**

Part 3
Metal Mine Reclamation

Part Cross-References
Reclamation, Art. IX, sec. 2, Mont. Const.
Prospecting permits and mining leases on state lands, Title 77, ch. 3, part 1.
Landowner notification of surface operations, Title 82, ch. 2, part 3.

82-4-301. Legislative intent and findings. (1) The legislature, mindful of its constitutional obligations under Article II, section 3, and Article IX of the Montana constitution, has enacted this part.

(2) It is the legislature's intent that:

(a) the requirements of this part provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources;

(b) tailings storage facilities are designed, operated, monitored, and closed in a manner that:

(i) meets state-of-practice engineering design standards;

(ii) uses applicable, appropriate, and current technologies and techniques as are practicable given site-specific conditions and concerns; and

(iii) provides protection of human health and the environment; and

(c) the regulation of tailings storage facilities is not prescriptive in detail but allows for adaptive management using evolving best engineering practices based on the recommendations of qualified, experienced engineers.

(3) The extraction of mineral by mining is a basic and essential activity making an important contribution to the economy of the state and the nation. At the same time, proper reclamation of mined land and former exploration areas not brought to mining stage is necessary to prevent undesirable land and surface water conditions detrimental to the general welfare, health, safety, ecology, and property rights of the citizens of the state. Mining and exploration for minerals take place in diverse areas where geological, topographical, climatic, biological, and sociological conditions are significantly different, and the specifications for reclamation and tailings storage facilities must vary accordingly. It is not practical to extract minerals or explore for minerals required by our society without disturbing the surface or subsurface of the earth and without producing waste materials, and the very character of many types of mining operations precludes complete restoration of the land to its original condition. The legislature finds that land reclamation and tailings storage as provided in this part will allow exploration for and mining of valuable minerals while adequately providing for the subsequent beneficial use of the lands to be reclaimed.

(4) The legislature finds that the mining of rock products from or just below the ground surface not containing sulfides is subject to fewer permitting requirements than other minerals because:

(a) the mining of nonsulfide rock products from or just below the ground surface creates fewer and more limited environmental concerns than the mining of other minerals;

(b) nonsulfide rock products are typically used in their natural state and not subject to chemical processing; and

(c) water quality and quantity are not significantly affected by mining of nonsulfide rock products from or just below the ground surface.

History: En. Sec. 1, Ch. 252, L. 1971; R.C.M. 1947, 50-1201; amd. Sec. 31, Ch. 361, L. 2003; amd. Sec. 1, Ch. 399, L. 2015; amd. Sec. 1, Ch. 152, L. 2021.

82-4-302. Purpose. (1) The purposes of this part are to:

(a) fulfill the responsibilities and exercise the powers delegated by Article IX, section 1(3) and 2(1) of the Montana constitution;

(b) allow mining as an activity beneficial to the economy of Montana;

(c) allow the production of minerals to meet the needs of society and the economic demands of the marketplace;

(d) provide for reclamation that mitigates postreclamation visual contrasts between reclamation lands and adjacent lands;

(e) provide for reclamation that affords some utility to humans or the environment;

(f) prevent foreclosure of future access to mineral resources not fully developed by current mining operations;

(g) mitigate or prevent undesirable offsite environmental impacts; and

(h) provide authority for cooperation between private and governmental entities in carrying this part into effect.

(2) Although both the need for and the practicability of reclamation will control the type and degree of reclamation in any specific instance, the basic objective will be to establish, on a continuing basis, the vegetative cover, soil stability, water condition, and safety condition appropriate to any proposed subsequent use of the area.

History: En. Sec. 2, Ch. 252, L. 1971; R.C.M. 1947, 50-1202; amd. Sec. 1, Ch. 7, Sp. L. May 2000.

82-4-303. Definitions. As used in this part, unless the context indicates otherwise, the following definitions apply:

(1) "Abandonment of surface or underground mining" may be presumed when it is shown that continued operation will not resume.

(2) "Amendment" means a change to an approved operating or reclamation plan. A major amendment is an amendment that may significantly affect the human environment. A minor amendment is an amendment that will not significantly affect the human environment.

(3) "Board" means the board of environmental review provided for in 2-15-3502.

(4) "Certification" means, with regard to tailings storage facilities, a statement of opinion by a professional engineer that the work on a tailings storage facility has been conducted in accordance with the normal standard of care within dam engineering practice. Certification does not constitute a warranty or guarantee of facts or conditions certified.

(5) "Completeness" means that an application contains information addressing each applicable permit requirement as listed in this part or rules adopted pursuant to this part in sufficient detail for the department to make a decision as to adequacy of the application to meet the requirements of this part.

(6) "Constructor" means the company or companies constructing the built components of a tailings storage facility, including but not limited to embankment dams, surface water diversion structures, tailings distribution systems, reclaim water systems, and monitoring instrumentation.

(7) "Cyanide ore-processing reagent" means cyanide or a cyanide compound used as a reagent in leaching operations.

(8) "Department" means the department of environmental quality provided for in 2-15-3501.

(9) "Disturbed land" means the area of land or surface water that has been disturbed, beginning at the date of the issuance of the permit. The term includes the area from which the

overburden, tailings, waste materials, or minerals have been removed and tailings ponds, waste dumps, roads, conveyor systems, load-out facilities, leach dumps, and all similar excavations or coverings that result from the operation and that have not been previously reclaimed under the reclamation plan.

(10) "Engineer of record" means a qualified engineer who is the lead designer for a tailings storage facility.

(11) "Expansion" means, with regard to tailings storage facilities, a change in the size, height, or configuration of or a contiguous addition to an existing tailings storage facility that increases or may increase the storage capacity of the impoundment above the currently permitted capacity.

(12) "Exploration" means:

(a) all activities that are conducted on or beneath the surface of lands and that result in material disturbance of the surface for the purpose of determining the presence, location, extent, depth, grade, and economic viability of mineralization in those lands, if any, other than mining for production and economic exploitation; and

(b) all roads made for the purpose of facilitating exploration, except as noted in 82-4-310.

(13) "Independent review panel member" means:

(a) a licensed engineer who is a recognized expert in tailings storage facility design, construction, operation, and closure; or

(b) a person who has the education, experience, and qualifications sufficient to be considered a recognized subject matter expert in technical disciplines relevant to tailings storage facility design, construction, operation, and closure who is not a licensed engineer.

(14) "Material deviation" means a failure to follow a condition in a design document, corrective action plan, schedule, or tailings operation, maintenance, and surveillance manual that could reasonably be expected to substantively impair a tailings storage facility from performing as intended.

(15) "Maximum credible earthquake" means the most severe earthquake that can be expected at a site based on geologic and seismological evidence, including a review of all historic earthquake data of events sufficiently nearby to influence the site, all faults in the area, and attenuations from causative faults to the site.

(16) "Mineral" means any ore, rock, or substance, other than oil, gas, bentonite, clay, coal, sand, gravel, peat, soil materials, or uranium, that is taken from below the surface or from the surface of the earth for the purpose of milling, concentration, refinement, smelting, manufacturing, or other subsequent use or processing or for stockpiling for future use, refinement, or smelting.

(17) "Mining" commences when the operator first mines ores or minerals in commercial quantities for sale, beneficiation, refining, or other processing or disposition or first takes bulk samples for metallurgical testing in excess of the aggregate of 10,000 short tons.

(18) "Observational method" means a continuous, managed, and integrated process of design, construction control, monitoring, and review enabling appropriate, previously defined modifications to be incorporated during and after construction.

(19) "Operator" means a person who has an operating permit issued under 82-4-335.

(20) "Ore processing" means milling, heap leaching, flotation, vat leaching, or other standard hard-rock mineral concentration processes.

(21) "Panel" means the tailings storage facility independent review panel created for each new or expanded tailings storage facility.

(22) "Person" means any person, corporation, firm, association, partnership, or other legal entity engaged in exploration for or mining of minerals on or below the surface of the earth, reprocessing of tailings or waste materials, or operation of a hard-rock mill.

(23) "Placer deposit" means:

(a) naturally occurring, scattered, or unconsolidated valuable minerals in gravel, glacial, eolian, colluvial, or alluvial deposits lying above bedrock; or

(b) all forms of deposit except veins of quartz and other rock in place.

(24) "Placer or dredge mining" means the mining of minerals from a placer deposit by a person or persons.

(25) "Practicable" means available and capable of being implemented after taking into consideration cost, existing technology, and logistics in light of overall project purposes.

(26) "Professional engineer" means a registered professional engineer licensed to practice in Montana under Title 37, chapter 67, part 3.

(27) "Qualified engineer" means a professional engineer who has a minimum of 10 years of direct experience with the design and construction of tailings storage facilities and has the appropriate professional and educational credentials to effectively determine appropriate parameters for the safe design, construction, operation, and closure of a tailings storage facility.

(28) "Reclamation plan" means the operator's written proposal, as required and approved by the department, for reclamation of the land that will be disturbed. The proposal must include, to the extent practical at the time of application for an operating permit:

(a) a statement of the proposed subsequent use of the land after reclamation, which may include use of the land as an industrial site not necessarily related to mining;

(b) plans for surface gradient restoration to a surface suitable for the proposed subsequent use of the land after reclamation is completed and the proposed method of accomplishment;

(c) the manner and type of revegetation or other surface treatment of disturbed areas;

(d) procedures proposed to avoid foreseeable situations of public nuisance, endangerment of public safety, damage to human life or property, or unnecessary damage to flora and fauna in or adjacent to the area;

(e) the method of disposal of mining debris;

(f) the method of diverting surface waters around the disturbed areas when necessary to prevent pollution of those waters or unnecessary erosion;

(g) the method of reclamation of stream channels and stream banks to control erosion, siltation, and pollution;

(h) maps and other supporting documents that may be reasonably required by the department; and

(i) a time schedule for reclamation that meets the requirements of 82-4-336.

(29) (a) "Rock products" means decorative rock, building stone, riprap, mineral aggregates, and other minerals produced by typical quarrying activities or collected from or just below the ground surface that do not contain sulfides with the potential to produce acid, toxic, or otherwise pollutive solutions.

(b) The term does not include talc, gypsum, limestone, metalliferous ores, gemstones, or materials extracted by underground mining.

(30) (a) "Small miner" means a person, firm, or corporation that engages in mining activity that is not exempt from this part pursuant to 82-4-310, that engages in the business of reprocessing of tailings or waste materials, that, except as provided in 82-4-310, knowingly allows other persons to engage in mining activities on land owned or controlled by the person, firm, or corporation, that does not hold an operating permit under 82-4-343 or 82-4-335 except for a permit issued under 82-4-335(2) or an operating permit that meets the criteria of subsection (30)(c) of this section, and that conducts:

(i) an operation that results in not more than 5 acres of the earth's surface being disturbed and unreclaimed; or

(ii) two operations that disturb and leave unreclaimed less than 5 acres for each operation if the respective mining properties are:

(A) the only operations engaged in by the person, firm, or corporation; and

(B) at least 1 mile apart at their closest point.

(b) For the purpose of this definition only, the department shall, in computing the area covered by the operation:

(i) exclude access or haulage roads that are required by a local, state, or federal agency having jurisdiction over that road to be constructed to certain specifications if that public agency notifies the department in writing that it desires to have the road remain in use and will maintain it after mining ceases; and

(ii) exclude access roads for which the person, firm, or corporation submits a bond to the department in the amount of the estimated total cost of reclamation along with a description of the location of the road and the specifications to which it will be constructed.

(c) A small miner may hold an operating permit that allows disturbance of 100 acres or less. The permit may be amended to add new disturbance areas, but the total area permitted for disturbance may not exceed 100 acres at any time.

(31) "Soil materials" means earth material found in the upper soil layers that will support plant growth.

(32) (a) "Surface mining" means all or any part of the process involved in mining of minerals by removing the overburden and mining directly from the mineral deposits exposed, including but not limited to open-pit mining of minerals naturally exposed at the surface of the earth, mining by the auger method, and all similar methods by which earth or minerals exposed at the surface are removed in the course of mining.

(b) Surface mining does not include the extraction of oil, gas, bentonite, clay, coal, sand, gravel, peat, soil materials, or uranium or excavation or grading conducted for onsite farming, onsite road construction, or other onsite building construction.

(33) "Tailings" means the residual materials remaining after a milling process that separates the valuable fraction from the uneconomic fraction of an ore mined by an operator.

(34) (a) "Tailings storage facility" means a facility that temporarily or permanently stores tailings, including the impoundment, embankment, tailings distribution works, reclaim water works, monitoring devices, storm water diversions, and other ancillary structures.

(b) The term does not include:

(i) a facility that stores 50 acre-feet or less of the aggregate of tailings, water, and process solution;

(ii) a facility that is wholly contained below surrounding grade with no man-made structures retaining tailings, water, or process solution;

(iii) a facility that is partially below the surrounding grade and partially above the surrounding grade if the portion of the facility that is above the surrounding grade retains 50 acre-feet or less in the aggregate of tailing, water, and process solution; or

(iv) the portion of tailings used as underground backfill at an underground mine.

(35) "Underground mining" means all methods of mining other than surface mining.

(36) "Unit of surface-mined area" means that area of land and surface water included within an operating permit actually disturbed by surface mining during each 12-month period of time, beginning at the date of the issuance of the permit. The term includes the area from which overburden or minerals have been removed, the area covered by mining debris, and all additional areas used in surface mining or underground mining operations that by virtue of mining use are susceptible to erosion in excess of the surrounding undisturbed portions of land.

(37) "Vegetative cover" means the type of vegetation, grass, shrubs, trees, or any other form of natural cover considered suitable at time of reclamation.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 504, L. 2025. Amendment effective May 8, 2025.

82-4-304. Exemption — works performed prior to promulgation of rules. This part is not applicable to any exploration or mining work performed prior to the date of promulgation of the initial rules pursuant to 82-4-321 relating to exploration and mining. This part is not applicable to the reprocessing of tailings or waste rock that occurred prior to the date of promulgation of the initial rules regarding those activities. If, after the date of promulgation of initial rules applicable to mills not located at a mine site, work is performed at a mill that does not use cyanide ore-processing reagent and that was constructed and operated before promulgation of those rules, this part applies only to the areas initially disturbed after promulgation of those rules.

Cross-References

Adoption and publication of administrative rules, Title 2, ch. 4, part 3.

82-4-305. Exemption — small miners — written agreement. (1) Except as provided in subsections (3) through (12), the provisions of this part do not apply to a small miner if the small miner annually submits a $100 administrative fee and agrees in writing:

(a) that the small miner will not pollute or contaminate any stream;

(b) that the small miner will provide protection for human and animal life through the installation of bulkheads installed over safety collars and the installation of doors on tunnel portals;

(c) that the small miner will provide a map locating the miner's mining operations. The map must be of a size and scale determined by the department.

(d) if the small miner's operations are placer or dredge mining, that the small miner shall salvage and protect all soil materials for use in reclamation of that site and shall reclaim all land disturbed by the operations to comparable utility and stability as that of adjacent areas.

(2) For small-miner exemptions obtained after September 30, 1985, a small miner may not obtain or continue an exemption under subsection (1) unless the small miner annually certifies in writing:

(a) if the small miner is an individual, that:

(i) no business association or partnership of which the small miner is a member or partner has a small-miner exemption; and

(ii) no corporation of which the small miner is an officer, director, or owner of record of 25% or more of any class of voting stock has a small-miner exemption; or

(b) if the small miner is a partnership or business association, that:

(i) none of the associates or partners holds a small-miner exemption; and

(ii) none of the associates or partners is an officer, director, or owner of 25% or more of any class of voting stock of a corporation that has a small-miner exemption; or

(c) if the small miner is a corporation, that no officer, director, or owner of record of 25% or more of any class of voting stock of the corporation:

(i) holds a small-miner exemption;

(ii) is a member or partner in a business association or partnership that holds a small-miner exemption; or

(iii) is an officer, director, or owner of record of 25% or more of any class of voting stock of another corporation that holds a small-miner exemption.

(3) A small miner whose operations are placer or dredge mining shall post a performance bond equal to the state's documented cost estimate of reclaiming the disturbed land, although the bond may not exceed $10,000 for each operation. If the small miner has posted a bond for reclamation with another government agency, the small miner is exempt from the requirement of this subsection.

(4) If a small miner who conducts a placer or dredge mining operation fails to reclaim the operation, the small miner is liable to the department for all of its reasonable costs of reclamation, including a reasonable charge for services performed by state personnel and for state materials and equipment used. If the small miner posts a surety bond, the surety is liable to the state to the extent of the bond amount and the small miner is liable for the remainder of the reasonable costs to the state of reclaiming the operation.

(5) If a small miner who conducts a placer or dredge mining operation fails to commence reclamation of the operation within 6 months after cessation of mining or within an extended period allowed by the department for good cause shown or if the small miner fails to diligently complete reclamation, the department shall notify the small miner by certified mail that it intends to reclaim the operation unless the small miner commences reclamation within 30 days and diligently completes the reclamation. The notice must be mailed to the address stated on the small miner exclusion statement or, if the small miner has notified the department of a different address by letter or in the annual certification form, to the most recent address given to the department. If the small miner fails to commence reclamation within 30 days or to diligently complete reclamation, the department may revoke the small miner exclusion statement, forfeit any bond that has been posted with the department, and enter and reclaim the operation. If the small miner has not posted a bond with the department or if the reasonable costs of reclamation

exceed the amount of the bond, the department may also collect additional reclamation costs, as set forth in subsection (6), before or after it incurs those costs.

(6) To collect additional reclamation costs, the department shall notify the small miner by certified mail, at the address determined under subsection (5), of the additional reasonable reclamation costs and request payment within 30 days. If the small miner does not pay the additional reclamation costs within 30 days, the department may bring an action in district court for payment of the estimated future costs and, if the department has performed any reclamation, of its reasonable actual costs. The court shall order payment of costs that it determines to be reasonable and shall retain jurisdiction until reclamation of the operation is completed. Upon completion of reclamation, the court shall order payment of any additional costs that it considers reasonable or the refund of any portion of any payment for estimated costs that exceeds the actual reasonable costs incurred by the department.

(7) A small miner who intends to use a cyanide ore-processing reagent or other metal leaching solvents or reagents shall obtain an operating permit for that part of the small miner's operation in which the cyanide ore-processing reagent or other metal leaching solvents or reagents will be used or disposed of. The acreage disturbed by the operation using cyanide ore-processing reagents or other metal leaching solvents or reagents and covered by the operating permit is excluded from the 5-acre limit specified in 82-4-303(30)(a)(i) and (30)(a)(ii).

(8) (a) Except for a small miner proposing to conduct a placer or dredge mining operation, a small miner who intends to use an impoundment to store waste from ore processing shall obtain approval for the design, construction, operation, and reclamation of that impoundment and post a performance bond for that part of the small miner's operation before constructing an impoundment. The small miner shall post a performance bond equal to the state's documented cost estimate of reclaiming the disturbed land. If the small miner has posted a bond for reclamation of that site with a federal government agency, the small miner is exempt from the requirements of this subsection (8)(a).

(b) The department shall conduct a review of the adequacy of the bond posted by a small miner using an impoundment pursuant to this section at least once every 5 years and adjust the bond if necessary to ensure reclamation of the impoundment. The acreage disturbed by the portion of the operation that uses an impoundment to store waste from ore processing is included in the 5-acre limit specified in 82-4-303(30)(a)(i) and (30)(a)(ii) and is subject to the provisions of this subsection (8).

(c) If a small miner under this subsection (8) fails to reclaim the operation, the small miner is liable to the department for all of its reasonable costs of reclamation, including a reasonable charge for services performed by state personnel and for state materials and equipment used. If the small miner posts a surety bond, the surety is liable to the state to the extent of the bond amount and the small miner is liable for the remainder of the reasonable costs to the state of reclaiming the operation.

(d) If a small miner under this subsection (8) fails to commence reclamation of the operation within 6 months after cessation of mining or within an extended period allowed by the department for good cause shown or if the small miner fails to diligently complete reclamation, the department shall notify the small miner by certified mail that it intends to reclaim the operation unless the small miner commences reclamation within 30 days and diligently completes the reclamation. The notice must be mailed to the address stated on the small miner exclusion statement or, if the small miner has notified the department of a different address by letter or in the annual certification form, to the most recent address given to the department. If the small miner fails to commence reclamation within 30 days or to diligently complete reclamation, the department may revoke the small miner exclusion statement, forfeit any bond that has been posted with the department, and enter and reclaim the operation. If the small miner has not posted a bond with the department or if the reasonable costs of reclamation exceed the amount of the bond, the department may also collect additional reclamation costs, as set forth in subsection (8)(e), before or after it incurs those costs.

(e) To collect additional reclamation costs, the department shall notify the small miner by certified mail, at the address determined under subsection (8)(d), of the additional reasonable reclamation costs and request payment within 30 days. If the small miner does not pay the additional reclamation costs within 30 days, the department may bring an action in district court for payment of the estimated future costs and, if the department has performed any reclamation, of its reasonable actual costs. The court shall order payment of costs that it determines to be reasonable and shall retain jurisdiction until reclamation of the operation is completed. Upon completion of reclamation, the court shall order payment of any additional costs that it considers reasonable or the refund of any portion of any payment for estimated costs that exceeds the actual reasonable costs incurred by the department.

(f) Except for a small miner who conducts a placer or dredge mining operation, a small miner utilizing an impoundment to store waste from ore processing on or after April 28, 2005, shall obtain approval of the design, construction, operation, and reclamation of that impoundment and post a performance bond within 6 months of April 28, 2005. If the small miner has posted a bond for reclamation of that site with a federal government agency, the small miner is exempt from the requirements of this subsection (8)(f).

(9) The exemption provided in this section does not apply to a person:

(a) whose failure to comply with the provisions of this part, the rules adopted under this part, or a permit or license issued under this part has resulted in the forfeiture of a bond, unless that person meets the conditions described under 82-4-360;

(b) who has not paid a penalty for which the department has obtained a judgment pursuant to 82-4-361;

(c) who has failed to post a reclamation bond required by this section, unless the department has certified that the area for which the bond should have been posted has been reclaimed by that person or reclaimed by the department and the person has reimbursed the department for the cost of the reclamation; or

(d) who has failed to comply with an abatement order issued pursuant to 82-4-362, unless the department has completed the abatement and the person has reimbursed the department for the cost of abatement.

(10) The exemption provided in this section does not apply to an area:

(a) under permit pursuant to 82-4-335;

(b) that has been permitted pursuant to 82-4-335 and reclaimed by the permittee, the department, or any other state or federal agency; or

(c) that has been reclaimed by or has been subject to remediation of contamination or pollution by a public agency, under supervision of a public agency, or using public funds.

(11) A small miner may not use mercury except in a contained facility that prevents the escape of any mercury into the environment.

(12) If a small miner fails to meet the annual reporting requirement in this section on or before March 1 of each year, the small miner shall pay a late fee of $100 in addition to the $100 administrative fee.

82-4-306. Confidentiality of application information. (1) Except as provided in subsections (2) and (3), the information obtained by the department from applications for exploration licenses and the information obtained from small miners is confidential between the department and the applicant, except for the name of the applicant and the county of proposed operation. However, all activities conducted subsequent to exploration and other associated facilities are public information and must be conducted under an operating permit.

(2) Any information referenced in subsection (1) is properly admissible in any hearing conducted by the department or in any judicial proceeding to which the director and the applicant are parties and is not confidential when a violation of this part or rules adopted under this part has been determined by the department or by judicial order.

(3) The department may disclose information obtained by the department from exploration license applications and from small miners and that is related to the exploration or mining on state and federal lands when the information identifies the location of exploration and mining activities and describes the surface disturbance that is occurring or projected to occur. The department may not disclose a licensee's or small miner's proprietary geological information.

(4) Failure to comply with the secrecy provisions of this part is punishable by a fine of up to $1,000.

82-4-310. Exemption — scale and type of activity. (1) A person is exempt from this part when the person is engaging in a mining activity that does not:

(a) use motorized excavating equipment;
(b) use blasting agents;
(c) disturb more than 100 square feet or 50 cubic yards of material at any site;
(d) leave unreclaimed sites that are less than 1 mile apart;
(e) use mercury in any operations except in a contained facility that prevents the escape of any mercury into the environment; or
(f) use a cyanide ore-processing reagent or other metal leaching solvents or reagents in any operations.

(2) A person is exempt from this part when the person is engaging in a mining activity using a suction dredge if:
(a) the dredge in use has an intake of 4 inches in diameter or less;
(b) the person does not operate the dredge beyond the area of the streambed that is naturally under water at the time of operation; and
(c) the person has obtained for the activity:
(i) project approval pursuant to Title 75, chapter 7, part 1; and
(ii) a discharge permit issued pursuant to 75-5-402 and has paid the applicable fee provided in 75-5-516(12).

(3) This part does not apply to a person who, on land owned or controlled by that person, allows other persons to engage in mining activities if those activities cumulatively meet the requirements of subsection (1).

History: En. Sec. 24, Ch. 252, L. 1971; R.C.M. 1947, 50-1224; amd. Sec. 3, Ch. 272, L. 1997; amd. Sec. 3, Ch. 507, L. 1999; amd. Sec. 3, Ch. 468, L. 2003.

82-4-311. Disposition of fees, fines, penalties, and other uncleared money. (1) (a) Fines, penalties, and other uncleared money that has been or will be paid to the department under the provisions of this part must be placed in the environmental rehabilitation and response account in the state special revenue fund established in 75-1-110.

(b) Funds held by the department as bond or as a result of bond forfeiture that are no longer needed for reclamation and for which the department is not able to locate a surety or other person who owns the funds after diligent search must be deposited in the environmental rehabilitation and response account in the state special revenue fund established in 75-1-110.

(2) Fees paid to the department under this part must be placed in the hard-rock mining permitting program account established in 82-4-316.

History: En. 50-1227 by Sec. 1, Ch. 29, L. 1977; R.C.M. 1947, 50-1227; amd. Sec. 1, Ch. 277, L. 1983; amd. Sec. 383, Ch. 418, L. 1995; amd. Sec. 4, Ch. 338, L. 2001; amd. Sec. 3, Ch. 634, L. 2025.

Fiscal year defined, 17-2-110.
Reversion of unexpended appropriation, 17-7-304.

82-4-312. Hard-rock mining reclamation debt service fund. (1) There is a hard-rock mining reclamation debt service fund within the debt service fund type established in 17-2-102.

(2) The state pledges, allocates, and directs to be credited to the hard-rock mining reclamation debt service fund money from the metalliferous mines license tax, as provided in 15-37-117.

(3) Money in the hard-rock mining reclamation debt service fund that is in excess of the amount needed to satisfy the annual principal and interest payment requirements in 82-4-313 must be transferred to the hard-rock mining reclamation special revenue account created in 82-4-315.

History: En. Sec. 1, Ch. 460, L. 2001.

82-4-313. Hard-rock mining reclamation bonds. (1) When authorized by the legislature and within the limits of the authorization and the further limitations established in this section, the board of examiners may issue and sell hard-rock mining reclamation bonds of the state in the amount and manner that it considers necessary and proper to finance legally required reclamation, operation, and maintenance at hard-rock mines upon certification by the director of the department that the reclamation, operation, or maintenance would otherwise not occur because there is no likelihood of getting additional funds from the mine operator and the available surety bond is insufficient. The full faith and credit and taxing powers of the state are pledged for the prompt and full payment of all bonds issued and interest and redemption premiums payable on the bonds according to their terms.

(2) Each series of hard-rock mining reclamation bonds may be issued by the board of examiners upon request of the department, at public or private sale, in the denominations and forms, whether payable to the bearer with attached interest coupons or registered as to principal or as to both principal and interest, with provisions for conversion or exchange and for the issuance of notes in anticipation of the issuance of definitive bonds, bearing interest at a rate or rates, maturing at a rate or rates, maturing at the time or times not exceeding 30 years from the date of issue, subject to optional or mandatory redemption at earlier times and prices and upon notice, with provisions for payment and discharge by the deposit of funds or securities in escrow for that purpose, and payable at the office of the banking institution or institutions within or outside the state, as the board of examiners determines, subject to the limitations contained in 17-5-731 and this section.

(3) In the issuance of each series of hard-rock mining reclamation bonds, the interest rates, maturities, and any mandatory redemption provisions of the bonds must be established in a manner that the funds then specifically pledged and appropriated by law to the hard-rock mining reclamation debt service fund created in 82-4-312 will, in the judgment of the board of examiners, be received in an amount sufficient in each year to pay all principal, redemption premiums, and interest due and payable in that year with respect to that and all prior series of the bonds, except outstanding bonds as to which the obligation of the state has been discharged

by the deposit of funds or securities sufficient for their payment in accordance with the terms of the resolutions by which they are authorized to be issued.

(4) In all other respects, the board of examiners is authorized to prescribe the form and terms of the bonds and notes and shall do whatever is lawful and necessary for their issuance and payment. The bonds, notes, and any interest coupons appurtenant to the bonds and notes must be signed by the members of the board of examiners, and the bonds and notes must be issued under the great seal of the state of Montana. The bonds, notes, and coupons may be executed with facsimile signatures and seal in the manner and subject to the limitations prescribed by law. The state treasurer shall keep a record of all the bonds and notes issued and sold.

(5) All proceeds of bonds or notes issued under this section must be deposited in the hard-rock mining reclamation special revenue account created in 82-4-315.

(6) All actions taken by the board of examiners under this section must be authorized by a vote of a majority of the members.

History: En. Sec. 2, Ch. 460, L. 2001.

82-4-314. Authorization for sale of hard-rock mining reclamation bonds. The board of examiners is authorized to issue and sell hard-rock mining reclamation general obligation bonds in an amount not exceeding $8 million upon the request of the department, as provided for in 82-4-313. Proceeds of the bonds or notes are allocated to the hard-rock mining reclamation special revenue account provided for in 82-4-315 to fund:

(1) legally required reclamation, operation, and maintenance at hard-rock mines that would otherwise not occur when the director of the department determines that there is no likelihood of getting additional funds from the mine operator and the available surety bond is insufficient; and

(2) the costs of issuing the bonds or notes.

History: En. Sec. 3, Ch. 460, L. 2001.

82-4-315. Hard-rock mining reclamation special revenue account. (1) There is a hard-rock mining reclamation special revenue account within the state special revenue fund established in 17-2-102. There must be paid into the account:

(a) revenue from the sale of hard-rock mining reclamation bonds issued by the board of examiners pursuant to 82-4-313 and 82-4-314;

(b) interest income earned on the account; and

(c) excess money transferred from the hard-rock mining reclamation debt service fund as described in 82-4-312.

(2) Funds may be appropriated from the hard-rock mining reclamation special revenue account for the following purposes only:

(a) state costs of implementing legally required reclamation, operation, and maintenance at hard-rock mines that would otherwise not occur because there is no likelihood of getting additional funds from the mine operator and the available surety bond is insufficient;

(b) state costs of implementing legally required reclamation, operation, and maintenance neither eligible for nor reasonably expected to be reimbursed from other federal or private funds; and

(c) state costs related to the implementation of 82-4-312 through 82-4-315.

History: En. Sec. 4, Ch. 460, L. 2001.

82-4-316. Hard-rock mining permitting program account. (1) There is a hard-rock mining permitting program account in the state special revenue fund established in 17-2-102. Money transferred to the fund by the legislature, fees collected in accordance with this part, and interest and income earned on money in the account must be deposited in the account.

(2) The department shall use money in the account to administer and enforce this part.

History: En. Sec. 1, Ch. 634, L. 2025.

Compiler's Comments

Effective Date: Section 11, Ch. 634, L. 2025, provided: "[This act] is effective July 1, 2025."

82-4-317 through 82-4-320 reserved.

82-4-321. Administration. The department is charged with the responsibility of administering this part and adopting rules as necessary. The department shall employ experienced, qualified persons in the field of mined-land reclamation who, for the purpose of this part, are referred to as supervisors.

History: **En. Sec. 4, Ch. 252, L. 1971; amd. Sec. 2, Ch. 281, L. 1974; R.C.M. 1947, 50-1204; amd. Sec. 384, Ch. 418, L. 1995; amd. Sec. 98, Ch. 324, L. 2021.**

Cross-References

Adoption and publication of administrative rules, Title 2, ch. 4, part 3.

82-4-322. Investigations, research, and experiments. The department shall have the authority to conduct or authorize investigations, research, experiments, and demonstrations in reclamation and to collect and disseminate nonconfidential information relating to mining.

History: **En. Sec. 5, Ch. 252, L. 1971; R.C.M. 1947, 50-1205; amd. Sec. 385, Ch. 418, L. 1995.**

82-4-323. Interagency cooperation — receipt and expenditure of funds. The department shall cooperate with other governmental and private agencies in this state and other states and agencies of the federal government and may reasonably compensate them for any services the department requests that they provide. The department may receive federal funds, state funds, and any other funds and, within the limits imposed by the grant, expend them for reclamation of land affected by mining or exploration and for purposes enumerated in 82-4-336.

History: **En. Sec. 6, Ch. 252, L. 1971; R.C.M. 1947, 50-1206; amd. Sec. 386, Ch. 418, L. 1995.**

82-4-324 through 82-4-330 reserved.

82-4-331. Exploration license required — employees included — limitation. (1) (a) A person may not engage in exploration in the state without first obtaining an exploration license from the department. A license must be issued for a period of 1 year from the date of issue and is renewable from year to year on application. An application for renewal must be filed within 30 days preceding the expiration of the current license and be accompanied by payment of the fee specified in 82-4-342(2)(c), if applicable, and the following renewal fee:

(i) for an exploration license approved for activities beneath the surface of the land, $400; or

(ii) for an exploration license approved for activities only on the surface of the land, $100.

(b) A license may not be renewed if the applicant for renewal is in violation of any provision of this part. A license is subject to suspension and revocation as provided by this part.

(2) Employees of persons holding a valid license under this part are included in and covered by the license.

(3) A person may not be issued an exploration license if:

(a) that person's failure, or the failure of any firm or business association of which that person was a principal or controlling member, to comply with the provisions of this part, the rules adopted under this part, or a permit or license issued under this part has resulted in either the receipt of bond proceeds by the department or the completion of reclamation by the person's surety or by the department, unless that person meets the conditions described in 82-4-360;

(b) that person has not paid a penalty for which the department has obtained a judgment pursuant to 82-4-361;

(c) that person has failed to post a reclamation bond required by 82-4-305; or

(d) that person has failed to comply with an abatement order issued pursuant to 82-4-362, unless the department has completed the abatement and the person has reimbursed the department for the cost of the abatement.

Cross-References

Landowner notification of surface operations, Title 82, ch. 2, part 3.

82-4-332. Exploration license. (1) An exploration license must be issued to any applicant who:

(a) pays the following fee to the department:

(i) for a license approved for activities beneath the surface of the land, $2,000; or

(ii) for a license approved for activities only on the surface of the land, $1,000;

(b) agrees to reclaim any surface area damaged by the applicant during exploration operations, as may be reasonably required by the department; and

(c) is not in default of any other reclamation obligation under this law.

(2) An application for an exploration license must be made in writing, notarized, and submitted to the department in duplicate upon forms prepared and furnished by it. The application must include an exploration map or sketch in sufficient detail to locate the area to be explored and to determine whether significant environmental problems would be encountered. The department shall by rule determine the precise nature of the exploration map or sketch. The applicant shall state what type of prospecting and excavation techniques will be employed in disturbing the land.

(3) Prior to the issuance of an exploration license, the applicant shall file with the department a reclamation and revegetation bond in a form and amount as determined by the department in accordance with 82-4-338.

(4) In the event that the holder of an exploration license desires to mine the area covered by the exploration license and has fulfilled all of the requirements for an operating permit, the department shall allow the postponement of the reclamation of the acreage explored if that acreage is incorporated into the complete reclamation plan submitted with the application for an operating permit. Any land actually affected by exploration or excavation under an exploration license and not covered by the operating reclamation plan must be reclaimed within 2 years after the completion of exploration or abandonment of the site in a manner acceptable to the department.

History: En. Sec. 7, Ch. 252, L. 1971; amd. Sec. 3, Ch. 281, L. 1974; R.C.M. 1947, 50-1207(2); amd. Sec. 5, Ch. 201, L. 1979; amd. Sec. 4, Ch. 588, L. 1979; amd. Sec. 2, Ch. 137, L. 1991; amd. Sec. 388, Ch. 418, L. 1995; amd. Sec. 4, Ch. 488, L. 2001; amd. Sec. 99, Ch. 324, L. 2021; amd. Sec. 5, Ch. 634, L. 2025.

2025 Amendment: See 2025 Session Law for amendment made by sec. 5, Ch. 634, L. 2025. Amendment effective July 1, 2025.

Cross-References

Certificate of claim location to be filed, 82-2-102.

82-4-333. Repealed. Sec. 8, Ch. 588, L. 1979.

History: En. Sec. 7, Ch. 252, L. 1971; amd. Sec. 3, Ch. 281, L. 1974; R.C.M. 1947, 50-1207(3), (4).

82-4-334. Exception — geological phenomena. Upon proper application by the holder of an exploration license, the department may excuse such holder from reclamation obligations with reference to any specified openings or excavations exposing geological indications or phenomena of especial interest, even though the licensee does not apply or have any intention to apply for an operating permit for the land in which such openings or excavations have been made.

History: En. Sec. 7, Ch. 252, L. 1971; amd. Sec. 3, Ch. 281, L. 1974; R.C.M. 1947, 50-1207(6); amd. Sec. 5, Ch. 588, L. 1979; amd. Sec. 389, Ch. 418, L. 1995.

82-4-335. Operating permit — limitation — fees. (1) A person may not engage in mining, ore processing, or reprocessing of tailings or waste material, construct or operate a hard-rock mill, use cyanide ore-processing reagents or other metal leaching solvents or reagents, or disturb land in anticipation of those activities in the state without first obtaining a final operating permit from the department. Except as provided in 82-4-343, a separate final operating permit is required for each complex.

(2) A small miner who intends to use a cyanide ore-processing reagent or other metal leaching solvents or reagents shall obtain an operating permit for that part of the small miner's operation where the cyanide ore-processing reagent or other metal leaching solvents or reagents will be used or disposed of.

(3) (a) Prior to receiving an operating permit from the department, a person shall pay an application fee of $5,000, except that a person mining primarily rock products as defined in 82-4-303 shall pay an application fee of $500.

(b) The department may require a person who is applying for a permit pursuant to subsection (1) to pay an additional fee not to exceed the actual amount of contractor and employee expenses beyond the normal operating expenses of the department whenever those expenses are reasonably necessary to provide for timely and adequate review of the application, including any environmental review conducted under Title 75, chapter 1, parts 1 and 2. The department may further define these expenses by rule. Whenever the department determines that an additional fee is necessary and the additional fee will exceed $5,000, the department shall notify the applicant that a fee must be paid and submit to the applicant an itemized estimate of the proposed expenses. The department shall provide the applicant an opportunity to review the department's estimated expenses. The applicant may indicate which proposed expenses the applicant considers duplicative or excessive, if any.

(c) (i) Subject to subsection (3)(c)(ii), a contractor shall, at the request of the applicant, directly submit invoices of contractor expenses to the applicant.

(ii) A contractor's work is assigned, reviewed, accepted, or rejected by the department pursuant to this section.

(4) The person shall submit an application on a form provided by the department, which must contain the following information and any other pertinent data required by rule:

(a) the name and address of the operator, the engineer of record if applicable, and, if a corporation or other business entity, the name and address of its officers, directors, owners of 10% or more of any class of voting stock, partners, and the like and its resident agent for service of process, if required by law;

(b) the minerals expected to be mined;

(c) a proposed reclamation plan;

(d) the expected starting date of operations;

(e) a map showing the specific area to be mined and the boundaries of the land that will be disturbed, the topographic detail, the location and names of all streams, roads, railroads, and utility lines on or immediately adjacent to the area, and the location of proposed access roads to be built;

(f) the names and addresses of the owners of record and any purchasers under contracts for deed of the surface of the land within the permit area and the owners of record and any purchasers under contracts for deed of all surface area within one-half mile of any part of the permit area, provided that the department is not required to verify this information;

(g) the names and addresses of the present owners of record and any purchasers under contracts for deed of all minerals in the land within the permit area, provided that the department is not required to verify this information;

(h) the source of the applicant's legal right to mine the mineral on the land affected by the permit, provided that the department is not required to verify this information;

(i) the types of access roads to be built and manner of reclamation of road sites on abandonment;

(j) a plan that will provide, within limits of normal operating procedures of the industry, for completion of the operation;

(k) ground water and surface water hydrologic data gathered from a sufficient number of sources and length of time to characterize the hydrologic regime;

(l) a plan detailing the design, operation, and monitoring of impounding structures, including but not limited to tailings impoundments and water reservoirs, sufficient to ensure that the structures are safe and stable. For a tailings storage facility, this requirement is met by submission of a design document pursuant to 82-4-376, a written report pursuant to 82-4-377, and a tailings operation, maintenance, and surveillance manual pursuant to 82-4-379 prior to issuance of a draft permit.

(m) a plan identifying methods to be used to monitor for the accidental discharge of objectionable materials and remedial action plans to be used to control and mitigate discharges to surface or ground water;

(n) an evaluation of the expected life of any tailings impoundment or waste area and the potential for expansion of the tailings impoundment or waste site. For a tailings storage facility, this requirement is met by submission of a design document pursuant to 82-4-376, a written report pursuant to 82-4-377, and a tailings operation, maintenance, and surveillance manual pursuant to 82-4-379 prior to issuance of a draft permit.

(o) an assessment of the potential for the postmining use of mine-related facilities for other industrial purposes, including evidence of consultation with the county commission of the county or counties where the mine or mine-related facilities will be located.

(5) Except as provided in subsection (7), the permit provided for in subsection (1) for a large-scale mineral development, as defined in 90-6-302, must be conditioned to provide that activities under the permit may not commence until the impact plan is approved under 90-6-307 and until the permittee has provided a written guarantee to the department and to the hard-rock mining impact board of compliance within the time schedule with the commitment made in the approved impact plan, as provided in 90-6-307. If the permittee does not comply with that commitment within the time scheduled, the department, upon receipt of written notice from the hard-rock mining impact board, shall suspend the permit until it receives written notice from the hard-rock mining impact board that the permittee is in compliance.

(6) When the department determines that a permittee has become or will become a large-scale mineral developer pursuant to 82-4-339 and 90-6-302 and provides notice as required under 82-4-339, within 6 months of receiving the notice, the permittee shall provide the department with proof that the permittee has obtained a waiver of the impact plan requirement from the hard-rock mining impact board or that the permittee has filed an impact plan with the hard-rock mining impact board and the appropriate county or counties. If the permittee does not file the required proof or if the hard-rock mining impact board certifies to the department that the permittee has failed to comply with the hard-rock mining impact review and implementation requirements in Title 90, chapter 6, parts 3 and 4, the department shall suspend the permit until the permittee files the required proof or until the hard-rock mining impact board certifies that the permittee has complied with the hard-rock mining impact review and implementation requirements.

(7) Compliance with 90-6-307 is not required for exploration and bulk sampling for metallurgical testing when the aggregate samples are less than 10,000 tons.

(8) A person may not be issued an operating permit if:

(a) that person's failure, or the failure of any firm or business association of which that person was a principal or controlling member, to comply with the provisions of this part, the rules adopted under this part, or a permit or license issued under this part has resulted in either the receipt of bond proceeds by the department or the completion of reclamation by the person's surety or by the department, unless that person meets the conditions described in 82-4-360;

(b) that person has not paid a penalty for which the department has obtained a judgment pursuant to 82-4-361;

(c) that person has failed to post a reclamation bond required by 82-4-305; or

(d) that person has failed to comply with an abatement order issued pursuant to 82-4-362, unless the department has completed the abatement and the person has reimbursed the department for the cost of abatement.

(9) A person may not be issued a permit under this part unless, at the time of submission of a bond, the person provides the current information required in subsection (4)(a) and:

(a) (i) certifies that the person is not currently in violation in this state of any law, rule, or regulation of this state or of the United States pertaining to air quality, water quality, or mined land reclamation; or

(ii) presents a certification by the administering agency that the violation is in the process of being corrected to the agency's satisfaction or is the subject of a bona fide administrative or judicial appeal; and

(b) if the person is a partnership, corporation, or other business association, provides the certification required by subsection (9)(a)(i) or (9)(a)(ii), as applicable, for any partners, officers, directors, owners of 10% or more of any class of voting stock, and business association members.

Cross-References

Landowner notification of surface operations, Title 82, ch. 2, part 3.

82-4-336. Reclamation plan and specific reclamation requirements. (1) Taking into account the site-specific conditions and circumstances, including the postmining use of the mine site, disturbed lands must be reclaimed consistent with the requirements and standards set forth in this section.

(2) The reclamation plan must provide that reclamation activities, particularly those relating to control of erosion, to the extent feasible, must be conducted simultaneously with the operation and in any case must be initiated promptly after completion or abandonment of the operation on those portions of the complex that will not be subject to further disturbance.

(3) In the absence of an order by the department providing a longer period, the plan must provide that reclamation activities must be completed not more than 2 years after completion or abandonment of the operation on that portion of the complex.

(4) In the absence of emergency or suddenly threatened or existing catastrophe, an operator may not depart from an approved plan without previously obtaining from the department written approval for the proposed change.

(5) Provision must be made to avoid accumulation of stagnant water in the development area to the extent that it serves as a host or breeding ground for mosquitoes or other disease-bearing or noxious insect life.

(6) All final grading must be made with nonnoxious, nonflammable, noncombustible solids unless approval has been granted by the department for a supervised sanitary fill.

(7) When mining has left an open pit exceeding 2 acres of surface area and the composition of the floor or walls of the pit are likely to cause formation of acid, toxic, or otherwise pollutive solutions ("objectionable effluents") on exposure to moisture, the reclamation plan must include provisions that adequately provide for:

(a) insulation of all faces from moisture or water contact by covering the faces with material or fill not susceptible itself to generation of objectionable effluents in order to mitigate the generation of objectionable effluents;

(b) processing of any objectionable effluents in the pit before they are allowed to flow or be pumped out of the pit to reduce toxic or other objectionable ratios to a level considered safe to humans and the environment by the department;

(c) drainage of any objectionable effluents to settling or treatment basins when the objectionable effluents must be reduced to levels considered safe by the department before release from the settling basin; or

(d) absorption or evaporation of objectionable effluents in the open pit itself; and

(e) prevention of entrance into the open pit by persons or livestock lawfully upon adjacent lands by fencing, warning signs, and other devices that may reasonably be required by the department.

(8) Provisions for vegetative cover must be required in the reclamation plan if appropriate to the future use of the land as specified in the reclamation plan. The reestablished vegetative cover must meet county standards for noxious weed control.

(9) (a) With regard to disturbed land other than open pits and rock faces, the reclamation plan must provide for the reclamation of all disturbed land to comparable utility and stability as that of adjacent areas. This standard may not be applied to require the removal of mine-related facilities that are valuable for postmining use. If the reclamation plan provides that mine-related facilities will not be removed or that the disturbed land associated with the facilities will not be reclaimed by the permittee, the following apply:

(i) The postmining use of the mine-related facilities must be approved by the department.

(ii) In the absence of a legitimate postmining use of mine-related facilities upon completion of other approved mine reclamation activities, the permittee shall comply with the reclamation requirements of this part and the reclamation plan within the time limits established in subsection (3) for mine-related facilities that had previously been identified as valuable for postmining use.

(b) With regard to open pits and rock faces, the reclamation plan must provide sufficient measures for reclamation to a condition:

(i) of stability structurally competent to withstand geologic and climatic conditions without significant failure that would be a threat to public safety and the environment;

(ii) that affords some utility to humans or the environment;

(iii) that mitigates postreclamation visual contrasts between reclamation lands and adjacent lands; and

(iv) that mitigates or prevents undesirable offsite environmental impacts.

(c) The use of backfilling as a reclamation measure is neither required nor prohibited in all cases. A department decision to require any backfill measure must be based on whether and to what extent the backfilling is appropriate under the site-specific circumstances and conditions in order to achieve the standards described in subsection (9)(b).

(10) The reclamation plan must provide sufficient measures to ensure public safety and to prevent the pollution of air or water and the degradation of adjacent lands.

(11) A reclamation plan must be approved by the department if it adequately provides for the accomplishment of the requirements and standards set forth in this section.

(12) The reclamation plan must provide for permanent landscaping and contouring to minimize the amount of precipitation that infiltrates into disturbed areas that are to be graded, covered, or vegetated, including but not limited to tailings impoundments and waste rock dumps. The plan must also provide measures to prevent objectionable postmining ground water discharges.

(13) The reclamation plan must include, if applicable, the requirements for postclosure monitoring of a tailings storage facility agreed to by a panel pursuant to 82-4-377.

History: En. Sec. 9, Ch. 252, L. 1971; amd. Sec. 5, Ch. 281, L. 1974; amd. Sec. 14, Ch. 39, L. 1977; R.C.M. 1947, 50-1209; amd. Sec. 2, Ch. 345, L. 1985; amd. Sec. 4, Ch. 453, L. 1985; amd. Sec. 391, Ch. 418, L. 1995; amd. Sec. 1, Ch. 464, L. 1995; amd. Sec. 2, Ch. 7, Sp. L. May 2000; amd. Sec. 3, Ch. 365, L. 2003; amd. Sec. 1, Ch. 459, L. 2003; amd. Sec. 12, Ch. 399, L. 2015.

Cross-References

County weed control, Title 7, ch. 22, part 21.

Denial of operating permit for failure of reclamation plan to comply with air quality, water quality, or public water treatment criteria, 82-4-351.

82-4-337. Inspection — issuance of operating permit — modification, amendment, or revision. (1) (a) The department shall review all applications for operating permits for completeness and compliance with the requirements of this part and rules adopted pursuant to this part within:

(i) for rock products, 60 days of receipt of the initial application and within 20 days of receipt of responses to notices of deficiencies. If an applicant for a rock products operating permit responds to a notice of deficiency more than 1 year after its receipt, the department has 60 days to review the response to the notice of deficiency.

(ii) for all other applications not covered under subsection (1)(a)(i), 90 days of receipt of the initial application and within 30 days of receipt of responses to notices of deficiencies.

(b) The department's initial notice must note all deficiency issues, and the department may not in a later notice raise an issue pertaining to the initial application that was not raised in the initial notice. The department shall notify the applicant concerning completeness and compliance as soon as possible. An application is considered complete and compliant unless the applicant is notified of deficiencies within the appropriate review period.

(c) The review for completeness and compliance is limited to areas in regard to which the department has statutory authority.

(d) When providing notice of deficiencies, the department shall identify each section in this part or rules adopted pursuant to this part related to the deficiency.

(e) When an application is complete and compliant, the department shall:

(i) declare in writing that the application is complete and compliant;

(ii) detail in writing the substantive requirements of this part and how the application complies with those requirements;

(iii) when an application submitted after October 1, 2015, includes a tailings storage facility, verify the receipt of the certified design document pursuant to 82-4-376, the written report pursuant to 82-4-377, and the tailings operation, maintenance, and surveillance manual pursuant to 82-4-379; and

(iv) issue a draft permit. The department may, as a condition of issuing the draft permit, require that the applicant obtain other permits required by law but not provided for in this part. However, the department may not withhold issuance of the draft permit in the absence of those permits.

(f) Prior to issuance of a draft permit, the department shall inspect the site. If the site is not accessible because of extended adverse weather conditions, the department shall inspect the site at the first available opportunity and may extend the time period prescribed in subsection (1)(a) by a term agreed to by the applicant.

(g) Issuance of the draft permit as a final permit is the proposed state action subject to review required by Title 75, chapter 1.

(h) If the applicant is not notified that there are deficiencies or inadequacies in the application or that the application is compliant within the time period required by subsection (1)(a), the final operating permit must be issued upon receipt of the bond as required in 82-4-338 and pursuant to the requirements of subsection (1)(i) of this section. The department shall promptly notify the applicant of the form and amount of bond that will be required. After the department notifies the applicant of deficiencies in the application within the time period required by subsection (1)(a), no further action by the department is required until the applicant has responded to the deficiency notification.

(i) Except as provided in subsection (1)(h), a final permit may not be issued until:

(i) sufficient bond has been submitted pursuant to 82-4-338;

(ii) the information and certification have been submitted pursuant to 82-4-335(9);

(iii) the department has found that permit issuance is not prohibited by 82-4-335(8) or 82-4-341(7);

(iv) the review pursuant to Title 75, chapter 1, is completed or 1 year has elapsed after the date the draft permit was issued, whichever is less. The applicant may by written waiver extend this time period.

(v) the department has made a determination that the application and the final permit meet the substantive requirements of this part and the rules adopted pursuant to this part.

(j) If the department decides to hire a third-party contractor to prepare an environmental impact statement on the application, the department shall prepare a list of no fewer than four contractors acceptable to the department and shall provide the applicant with a copy of the list. The applicant shall provide the department with a list of at least 50% of the contractors from the department's list. The department shall select its contractor from the list provided by the applicant.

(2) (a) After issuance of a draft permit but prior to receiving a final permit, an applicant may propose modifications to the application. If the proposed modifications substantially change the proposed plan of operation or reclamation, the department may terminate the draft permit and review the application as modified pursuant to subsection (1) for completeness and compliance and issuance of a new draft permit.

(b) The department shall consult with the applicant before placing stipulations in a draft or final permit. Permit stipulations in a draft or final permit may, unless the applicant consents, address only compliance issues within the substantive requirements of this part or rules adopted pursuant to this part. For a stipulation imposed without the applicant's consent, the department shall provide to the applicant in writing the reason for the stipulation, a citation to the statute or rule that gives the department the authority to impose the stipulation, and, for a stipulation imposed in the final permit that was not contained in the draft permit, the reason that the stipulation was not contained in the draft permit.

(c) Within 40 days of the completion of the review required by Title 75, chapter 1, or 1 year from the date the draft permit is issued, whichever is less, the department shall issue its bond determination.

(d) When the department prepares an environmental review jointly with a federal agency acting under the National Environmental Policy Act, the applicant may by written waiver extend the 1-year deadline contained in subsection (1)(i)(iv).

(e) Upon submission of the bond and subject to subsection (1)(i), the department shall issue the final permit.

(3) The final operating permit must be granted for the period required to complete the operation and is valid until the operation authorized by the permit is completed or abandoned, unless the permit is suspended or revoked by the department as provided in this part.

(4) The final operating permit must provide that the reclamation plan may be modified by the department, upon proper application of the permittee or after timely notice and opportunity for hearing, at any time during the term of the permit and for any of the following reasons:

(a) to modify the requirements so that they will not conflict with existing laws;

(b) when the previously adopted reclamation plan is impossible or impracticable to implement and maintain;

(c) when significant environmental problem situations not permitted under the terms of regulatory permits held by the permittee are revealed by field inspection and the department has the authority to address them under the provisions of this part.

(5) (a) The modification of a final operating permit may be a major or minor permit amendment or a permit revision. A modification of the operating permit, including a modification necessary to comply with the requirements of existing law as interpreted by a court of competent jurisdiction must be processed in accordance with the procedures for an application for a permit amendment or revision that are established pursuant to 82-4-342 and this section.

(b) The modification of an operating permit may not be finalized and an existing bond amount may not be increased until the permit modification procedures and analysis described in subsection (5)(a) are completed.

82-4-338. Performance bond. (1) (a) An applicant for an exploration license or operating permit shall file with the department a bond payable to the state of Montana with surety satisfactory to the department in the sum to be determined by the department of not less than $200 for each acre or fraction of an acre of the disturbed land, conditioned upon the faithful performance of the requirements of this part, the rules of the department, and the permit. In lieu of a bond, the applicant may file with the department a cash deposit, an assignment of a certificate of deposit, an irrevocable letter of credit, or other surety acceptable to the department. The bond may not be less than the estimated cost to the state to ensure compliance with Title 75, chapters 2 and 5, this part, the rules, and the permit, including the potential cost of department management, operation, and maintenance of the site upon temporary or permanent operator insolvency or abandonment, during a suspension authorized pursuant to 82-4-341(8)(b)(ii) or until full bond liquidation can be effected.

(b) A public or governmental agency may not be required to post a bond under the provisions of this part.

(c) A blanket performance bond covering two or more operations may be accepted by the department. A blanket bond must adequately secure the estimated total number of acres of disturbed land.

(d) (i) For an exploration license or operating permit authorizing activities on federal land within the state, the department may accept a bond payable to the state of Montana and the federal agency administering the land. The bond must provide at least the same amount of financial guarantee as required by this part.

(ii) The bond must provide that the department may forfeit the bond without the concurrence of the federal land management agency. The bond may provide that the federal land management agency may forfeit the bond without the concurrence of the department. Upon forfeiture by either agency, the bond must be payable to the department and may also be payable to the federal land management agency. If the bond is payable to the department and the federal land management agency, the department, before accepting the bond, shall enter into an agreement or memorandum of understanding with the federal land management agency providing for administration of the bond funds in a manner that will allow the department to provide for compliance with the requirements of this part, the rules adopted under this part, and the permit.

(iii) The department may not enter into an agreement or memorandum of understanding with a federal land management agency that would require the department to impose requirements on an operator that are more stringent than state law and rules.

(2) (a) The department may calculate one or more reclamation plan components within its jurisdiction with the assistance of one or more third-party contractors selected jointly by the department and the applicant and compensated by the applicant when, based on relevant past experience, the department determines that additional expertise is necessary to calculate the bond amount for reclamation plan components. The department may contract for assistance pursuant to this subsection in determining bond amounts for the initial bond and for any subsequent bond review and adjustment. The mine owner is responsible for the first $5,000 in contractor services provided under this subsection. The mine owner and the department are each responsible for 50% of any amount over $5,000.

(b) To select a third-party contractor as authorized in subsection (2)(a), the department shall prepare a list of no fewer than four contractors acceptable to the department and shall provide the applicant with a copy of the list. The applicant shall provide the department with a list of at least 50% of the contractors from the department's list. The department shall select its contractor from the list provided by the applicant.

(3) (a) The department shall conduct an overview of the amount of each bond annually and shall conduct a comprehensive bond review at least every 5 years. The department may conduct additional comprehensive bond reviews if, after modification of a reclamation or operation plan, an annual overview, or an inspection of the permit area, the department determines that an increase of the bond level may be necessary. The department shall consult with the licensee or permittee if a review indicates that the bond level should be adjusted. When determined by the department that the set bonding level of a permit or license does not represent the present costs of compliance with this part, the rules, and the permit, the department shall modify the bonding requirements of that permit or license. The licensee or permittee must have 60 days to negotiate the preliminary bond determination with the department, at the end of which time period the department shall issue the proposed bond determination. The department shall give the licensee or permittee a copy of the bond calculations that form the basis for the proposed bond determination and, for operating permits, publish notice of the proposed bond determination in a newspaper of general circulation in the county in which the operation is located. The department shall issue a final bond determination in 30 days. Unless the licensee or permittee requests a hearing under subsection (3)(b), the licensee or permittee shall post bond with the department in the amount represented by the final bond determination no later than 30 days after issuance of the final bond determination. If the licensee or permittee demonstrates that, through the exercise of reasonable diligence, the licensee or permittee will not be able to post the bond within 30 days, the department shall grant a 30-day extension of the deadline.

(b) The permittee or any person with an interest that may be adversely affected may obtain a contested case hearing before the board under the provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6, on the final bond determination by filing with the department, within 30 days of the issuance of the final bond determination, a written request for hearing stating the reason for the request. The request for hearing must specify the amount of bond increase, if any, that the licensee or permittee considers appropriate and state the reasons that the licensee or permittee considers the department's final bond determination to be excessive. As a condition precedent to any right to request a hearing, the licensee or permittee shall post bond with the department in the amount of the bond increase that the licensee or permittee has stated is appropriate in the request for hearing or the amount that is one-half of the increase contained in the department's final bond determination, whichever amount is greater. If the board determines that additional bond is necessary, the licensee or permittee shall post bond in the amount determined by the board within 30 days of receipt of the decision. If the licensee or permittee demonstrates that, through the exercise of reasonable diligence, the licensee or permittee will not be able to post the bond within 30 days, the department shall grant a reasonable extension of the deadline.

(c) If a licensee or permittee fails to post bond in accordance with subsection (3)(a) or (3)(b) in the required amounts by the required deadlines, the license or permit is suspended by operation of law and the licensee or permittee shall immediately cease mining and exploration operations until the required bond is posted with and approved by the department.

(4) A bond filed in accordance with the provisions of this part may not be released by the department until the provisions of this part, the rules adopted pursuant to this part, and the permit have been fulfilled.

(5) A bond filed for an operating permit obtained under 82-4-335 or 82-4-343 may not be released or decreased until the public has been provided an opportunity for a hearing and a hearing has been held if requested. The department shall provide reasonable statewide and local notice of the opportunity for a hearing, including but not limited to publishing the notice in newspapers of general daily circulation.

(6) Except as provided in subsection (7), all bonds required in accordance with the provisions of this section must be based upon reasonably foreseeable activities that the applicant may conduct in order to comply with conditions of an operating permit or license. Bonds may be required only for anticipated activities as described in subsection (1). Only those activities that themselves or in conjunction with other activities have a reasonable possibility of occurring may be bonded. Bond calculations, including calculations for the initial bond or for subsequent bond reviews and adjustments, may not include amounts for any occurrence or contingency that is not a reasonably foreseeable result of any activity conducted by the applicant.

(7) (a) If the department determines, based on unanticipated circumstances that are discovered following the issuance of a mining permit, that a substantial and imminent danger to public health, public safety, or the environment exists or that there is a reasonable probability that a violation of water quality standards will occur, the department may require an operator to submit an amended reclamation plan to address the danger and to post a temporary bond to guarantee the performance of the amended portion of the reclamation plan. The temporary bond may only be required if the anticipated costs associated with the plan amendment would increase the total bond amount for the current plan by more than 10%, as determined in subsection (7)(b).

(b) (i) In determining the need for the temporary bond and the amount of the temporary bond under subsection (7)(a), the department shall select a third-party contractor in consultation with the operator pursuant to subsection (7)(b)(ii) to provide:

(A) a technical engineering analysis and report on the substantial and imminent danger to public health, public safety, or the environment identified in subsection (7)(a); and

(B) the estimated costs of addressing the potential danger in order to establish the amount of the temporary bond.

(ii) The department shall provide the operator with a list of at least four qualified third-party contractors. The operator shall select two qualified third-party contractors from that list. The department shall select its contractor from the list provided by the operator. The operator shall reimburse the department for the reasonable costs of the third-party contractor.

(c) An approved interim amended reclamation plan and interim bond must remain in effect until the earlier of:

(i) the date that a revised reclamation plan is approved pursuant to 82-4-337 and a permanent bond for the revised reclamation plan is submitted and accepted pursuant to this section; or

(ii) 2 years following the date of submission of a complete application pursuant to 82-4-337 to modify the reclamation plan provision or remedy the conditions that created the need to amend the reclamation plan unless the department approves or denies the complete application within 2 years of submission. The applicant may agree to an extension of this deadline.

(d) Except as provided in subsection (8), the process provided for in this subsection (7) is not subject to the provisions of Title 75, chapter 1.

(8) (a) In determining whether to require amendment of a reclamation plan under subsection (7)(a), the department shall prepare or require the permittee to prepare a written analysis of changes in the reclamation plan that may eliminate or mitigate to an acceptable level the environmental condition. The analysis must include an assessment of the effectiveness of the changes and any potential negative environmental impacts of the changes. The department shall prepare an environmental impact statement pursuant to Title 75, chapter 1, only if the department determines that the changes would not mitigate the condition to an acceptable level or may have potentially significant negative environmental impacts.

(b) If the department determines that preparation of an environmental impact statement is necessary, the permittee shall pay the department's costs pursuant to 75-1-205.

(9) At the applicant's discretion, bonding in addition to that required by this section may be posted. These unobligated bonds may, on the applicant's request, be applied to future bonds required by this section.

(10) (a) If the department determines that there exists at an area permitted or licensed under this part an imminent danger to public health, public safety, or the environment caused by a violation of this part, the rules adopted pursuant to this part, or the permit or license and if the permittee or licensee fails or refuses to expeditiously abate the danger, the department may immediately suspend the permit or license, enter the site, and abate the danger. The department may institute proceedings to revoke the license or permit, declare the permittee or licensee in default, and forfeit a portion of the bond, not to exceed $150,000 or 10% of the bond, whichever is less, to be used to abate the danger. The department shall notify the surety of the forfeiture and the forfeiture amount by certified mail, and the surety shall pay the forfeiture amount to the department within 30 days of receipt of the notice. The department shall, as a condition of any termination of the suspension and revocation proceedings, require that the permittee or licensee reimburse the surety, with interest, for any amount paid to and expended by the department pursuant to this subsection (10) and for the actual cost of the surety's expenses in responding to the department's forfeiture demand.

(b) If the department is unable to permanently abate the imminent danger using the amount forfeited under subsection (10)(a), the department may forfeit additional amounts under the procedure provided in subsection (10)(a).

(c) The department shall return to the surety any money received from the surety pursuant to this subsection (10) and not used by the department to abate the imminent danger. The amount not returned to the surety must be credited to the surety and reduces the penal amount of the bond on a dollar-for-dollar basis.

(d) Any interest accrued on bond proceeds that is not required to abate the imminent danger determined in subsection (10)(a) must be returned to the surety, unless otherwise agreed to in writing by the surety.

(11) If a bond is terminated as a result of the action or inaction of a licensee or permittee or is canceled or otherwise terminated by the surety issuing the bond and the licensee or permittee fails to post a new bond for the entire amount of the terminated bond within 30 days following the notice of termination provided to the department, then the license or permit must be immediately suspended without further action by the department.

82-4-339. Annual report of activities by permittee — fee — notice of large-scale mineral developer status. (1) Within 30 days after completion or abandonment of operations on an area under permit or within 30 days after each anniversary date of the permit, whichever is earlier, or at a later date that may be provided by rule and each year after that date until reclamation is completed and approved, the permittee shall pay the applicable annual fee provided for in subsections (3) or (4) and shall file a report of activities completed during the preceding year on a form prescribed by the department. The report must:

(a) identify the permittee and the permit number;

(b) locate the operation by subdivision, section, township, and range and with relation to the nearest town or other well-known geographic feature;

(c) estimate acreage to be newly disturbed by operation in the next 12-month period;

(d) include the number of persons on the payroll for the previous permit year and for the next permit year at intervals that the department considers sufficient to enable a determination of the permittee's status under 90-6-302(4);

(e) update the information required in 82-4-335(4)(a); and

(f) update any maps previously submitted or specifically requested by the department. The maps must show:

(i) the permit area;

(ii) the unit of disturbed land;

(iii) the area to be disturbed during the next 12-month period;

(iv) if completed, the date of completion of operations;

(v) if not completed, the additional area estimated to be further disturbed by the operation within the following permit year; and

(vi) the date of beginning, amount, and current status of reclamation performed during the previous 12 months.

(2) Whenever the department determines that the permittee has become or will, during the next permit year, become a large-scale mineral developer, it shall immediately serve written notice of that fact on the permittee, the hard-rock mining impact board, and the county or counties in which the operation is located.

(3) Except as provided in subsection (4):

(a) for a mine required to file a reclamation bond pursuant to 82-4-338(1)(a), a permittee shall pay the fee specified under 82-4-342(2)(c), if applicable, and an annual permit fee as follows:

(i) for a mine of 500 acres or more of a bonded disturbance, $5,000;

(ii) for a mine of 100 acres or more but less than 500 acres of a bonded disturbance, $3,000; or

(iii) for a mine of less than 100 acres of a bonded disturbance, $1,000; or

(b) for a mine not required to file a reclamation bond pursuant to 82-4-338(1)(a), a permittee shall pay the fee specified under 82-4-342(2)(c) or 82-4-343(3)(c), if applicable, and an annual permit fee of $100.

(4) Upon submission of an annual report of activities as required in subsection (1), a person permitted under this part to mine rock products as defined in 82-4-303 shall pay:

(a) the applicable fee specified under 82-4-342(2)(c) or 82-4-343(3)(c); and

(b) an annual permit fee as follows:

(i) when the report is submitted between July 1, 2025, and June 30, 2026, 25% of the applicable fee in subsection (3)(a);

(ii) when the report is submitted between July 1, 2026, and June 30, 2027, 50% of the applicable fee in subsection (3)(a);

(iii) when the report is submitted between July 1, 2027, and June 30, 2028, 75% of the applicable fee in subsection (3)(a); or

(iv) when the report is submitted on or after July 1, 2028, 100% of the applicable fee in subsection (3)(a).

82-4-340. Successor operator. (1) Subject to this part, when one operator succeeds to the interest of another in any uncompleted operation by transfer, including sale, assignment, lease, or otherwise, the department may release the first operator from the duties imposed on the operator by this part. Provided that both operators comply with the requirements of this part and the successor operator assumes the duty of the former operator to complete the reclamation of the land and the ability to operate pursuant to the permit or subsequent modifications approved by the department to the permit consistent with this part, the department shall transfer the permit to the successor operator on department approval of the successor operator's bond and the transfer of property interests, as required under this part.

(2) A transfer by the department to a successor operator pursuant to this section may not affect a lien, claim, encumbrance, or interest in the property subject to operations that the department determines are valid at the time of the transfer and rights and defenses associated with the lien, claim, encumbrance, or interest. This subsection does not apply to a lien, claim, encumbrance, or interest in a property of the original operator or an affiliate or person controlling the operator or affiliate.

(3) For an operation with a forfeited bond where the department holds a suspended permit pursuant to 82-4-341(8), the department may transfer the permit to a successor operator provided that the successor operator:

(a) complies with the requirements of this part;

(b) assumes the duty of the former operator to complete reclamation pursuant to this part;

(c) operates pursuant to the permit or a subsequent modification approved by the department to the permit; and

(d) submits to the department:

(i) any additional bond required under 82-4-338; and

(ii) a $2,000 fee.

(4) If the department believes there is a potential to transfer a suspended permit, then the department may initiate proceedings in district court for eminent domain of the surface, minerals, or other property interest not held by the United States within or appurtenant to the permit boundary, including ingress and egress to the permit boundary, if:

(a) the department makes written findings that it is in the public interest of Montana taxpayers, environmental protection, and reclamation. With the written findings, the right of eminent domain must be considered a public use as included with those listed in 70-30-102. Although not required, the department may consider the following when determining the public interest:

(i) the value of the property, fixtures, and potential for operations if the property is transferred, based on an inspection and evaluation by the department or at the department's request prior to initiating eminent domain proceedings pursuant to Title 70, chapter 30;

(ii) the existence of tax liens on the property;

(iii) the financial liability to the Montana taxpayers for the cost of reclamation or remediation by the department of the operation pursuant to 82-4-341;

(iv) whether the county or counties where the permitted operation is located agree that transferring the property interest is in the best interest of the county or counties; and

(v) whether there is an immediate environmental need;

(b) the property interest is within or appurtenant to the permit boundary of an operator that has been:

(i) prohibited from mining pursuant to 82-4-360 for at least 1 year from the date of notice to the operator of the prohibition and the operator does not have a timely, pending appeal pursuant to this part; and

(ii) issued a violation letter by the department pursuant to 82-4-361 on a transferred permit;

(c) the available bond is insufficient for the permitted operation and the amount of the bond forfeited pursuant to 82-4-341 is less than the bond amount calculated pursuant to 82-4-338; and

(d) there is a successor operator who can operate under a permit transferred pursuant to subsection (1). The department and the proposed successor operator may enter into an agreement for the transfer of the property when it is condemned and the department takes possession pursuant to subsection (5).

(5) If the department initiates eminent domain proceedings pursuant to Title 70, chapter 30, and requests immediate possession of the property pursuant to 70-30-311, then the court shall grant the department immediate possession of the property prior to determining compensation.

(6) An eligible successor operator may post the bond required by 70-30-311(3) in accordance with an agreement entered pursuant to 82-4-340(4)(d).

(7) After the department is in possession of the property, the court shall determine compensation pursuant to 70-30-302, except that when determining the value of the property interest the commissioners shall consider:

(a) the greater of the amount:

(i) equal to the difference between the bond amount forfeited pursuant to 82-4-341 and the bond amount calculated pursuant to 82-4-338; or

(ii) necessary to complete site reclamation;

(b) the amount of a tax lien against the property;

(c) the value of mineral interests, development potential, or future mining based solely on the value while in the possession of the original operator, who is prohibited from mining pursuant to 82-4-360; and

(d) other costs incurred by the state to suspend, terminate, or transfer the permit and recover the forfeited bond.

(8) Nothing in this section limits the department's ability to modify the transferred permit or reclamation plan pursuant to this part.

History: En. Sec. 10, Ch. 252, L. 1971; amd. Sec. 6, Ch. 281, L. 1974; amd. Sec. 1, Ch. 427, L. 1977; R.C.M. 1947, 50-1210(3); amd. Sec. 6, Ch. 453, L. 1985; amd. Sec. 395, Ch. 418, L. 1995; amd. Sec. 2, Ch. 458, L. 2019; amd. Sec. 1, Ch. 513, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 513, L. 2025. Amendment effective May 8, 2025.

82-4-341. Compliance — reclamation by department. (1) The department shall cause the permit area to be inspected at least annually to determine whether the permittee has complied with this part, the rules adopted under this part, or the permit.

(2) The permittee shall proceed with reclamation as scheduled in the approved reclamation plan or as required pursuant to subsection (9). Following written notice by the department noting deficiencies, the permittee shall commence action within 30 days to rectify these deficiencies and shall diligently proceed until the deficiencies are corrected. Deficiencies that also violate other laws that require earlier rectification must be corrected in accordance with the applicable time provisions of those laws. The department may extend performance periods referred to in 82-4-336 and in this section for delays clearly beyond the permittee's control, but only when the permittee is, in the opinion of the department, making every reasonable effort to comply.

(3) Within 30 days after notification by the permittee and when, in the judgment of the department, reclamation of a unit of disturbed land area is properly completed, the department shall provide the public notice and conduct any hearing requested pursuant to 82-4-338. As soon as practicable after notice and hearing, the permittee must be notified in writing and the bond on the area must be released or decreased proportionately to the acreage included within the bond coverage.

(4) The department shall cause the bond to be forfeited if:

(a) reclamation of disturbed land is not pursued in accordance with the reclamation plan and the permittee has not commenced action to rectify deficiencies within 30 days after notification by the department;

(b) reclamation is not properly completed in conformance with the reclamation plan within 2 years after completion or abandonment of operation on any fraction of the permit area or within a longer period that may have been authorized under this part; or

(c) after default by the permittee, the surety either refuses or fails to perform the work to the satisfaction of the department within the time required.

(5) The department shall notify the permittee and the surety by certified mail. If the bond is not paid within 30 days after receipt of the notice, the attorney general, upon request of the department, shall bring an action on behalf of the state in district court.

(6) The department may, with the staff, equipment, and material under its control or by contract with others, take any necessary actions for required reclamation of the disturbed lands according to the existing reclamation plan or a modified reclamation plan if the department makes a written finding that the modifications are necessary to prevent a violation of Title 75, chapter 2 or 5, or to prevent a substantial reclamation failure. Except in an environmental emergency, work provided for in this section must be let on the basis of competitive bidding. The department shall keep a record of all necessary expenses incurred in carrying out the work or activity authorized under this section, including a reasonable charge for the services performed by the state's personnel and the state's equipment and materials used. The surety is liable to the state to the extent of the bond. The permittee is liable for the remainder of the cost. Upon completion of the reclamation, the department shall return to the surety any amount not expended, including any unexpended interest accrued on bond proceeds, unless otherwise agreed to in writing by the surety.

(7) In addition to the other liabilities imposed by this part, failure to commence an action to remedy specific deficiencies in reclamation within 30 days after notification by the department or failure to satisfactorily complete reclamation work on any segment of the permit area within 2 years or within a longer period that the department may permit on the permittee's application or on the department's own motion, after completion or abandonment of operations on any segment of the permit area, constitutes sufficient grounds for cancellation of a permit or license and refusal to issue another permit or license to the applicant. A cancellation action may not be effected while an appeal is pending from any ruling requiring the cancellation of a permit or license.

(8) (a) Except as provided in subsection (8)(f), the department may hold a permit suspended pursuant to 82-4-338 for up to 5 years and place the proceeds from a cash bond forfeited under this section in an interest-bearing account if mining of the ore body identified in the permit or a permit amendment application is not complete. The 5-year period begins on the date the department takes possession of the bond proceeds.

(b) The department may spend bond proceeds from the account during the suspension period to:

(i) perform maintenance, monitoring, and other actions required by the permit;

(ii) abate imminent danger to public health, public safety, or the environment; or

(iii) abate conditions that violate the provisions of Title 75, chapters 2 and 5, or conditions that may cause violations of those provisions.

(c) The department may transfer a permit suspended under this section as provided by 82-4-340 and the associated property interest pursuant to 70-30-311 to grant the condemnor immediate possession and provide compensation to the property owner pursuant to 70-30-302. The balance of funds in the account must be retained as a cash bond on behalf of the successor operator.

(d) A transfer by the department to a successor operator pursuant to subsection (2) may not affect a lien, claim, encumbrance, or interest in the property subject to operations, which the department determines is valid at the time of the transfer and rights and defenses associated with the lien, claim, encumbrance, or interest. This subsection (8)(d) does not apply to a lien, claim, encumbrance, or interest in a property of the original operator or an affiliate or person controlling the operator or affiliate.

(e) The department may revoke a permit suspended under this section if a transfer is not completed within 5 years of the suspension. In the case of a revoked permit, reclamation may proceed pursuant to subsection (6).

(f) The department may extend a suspension up to 6 months if a potential successor operator is exercising reasonable diligence to complete the transfer. If litigation precludes the transfer, the suspension is stayed until the litigation is resolved.

(g) If the department forfeits a bond pursuant to subsection (8)(a), the operator is liable to the department for the insufficient bond amount, which is the difference between the bond amount forfeited pursuant to 82-4-341 and the bond amount calculated pursuant to 82-4-338.

This amount is not subject to a bona fide dispute. The department may initiate cases and proceedings to recover the insufficient bond amount.

(9) (a) If at the time of bond review pursuant to 82-4-338 no mineral extraction or ore processing has occurred on a mine permit area for the past 5 years, the department shall determine whether further suspension of the operation will create conditions that will cause violations of Title 75, chapter 2 or 5, or significantly impair reclamation of disturbed areas. If the department determines in writing that violations of Title 75, chapter 2 or 5, or significant impairment of reclamation will occur, the department shall notify the permittee that the permittee shall, within a reasonable time specified in the notice, abate the conditions or commence reclamation. The department may grant reasonable extensions of time for good cause shown. If the permittee does not abate the conditions or commence reclamation within the time specified in the notice and any extensions, the department shall order either that the condition be abated or that reclamation be commenced.

(b) The permittee may request a hearing on the order by submitting a written request for hearing within 30 days of receipt of the order. A request for hearing stays the order pending a final decision, unless the department determines in writing that the stay will create an imminent threat of significant environmental harm or will significantly impair reclamation.

History: En. Sec. 13, Ch. 252, L. 1971; amd. Sec. 8, Ch. 281, L. 1974; R.C.M. 1947, 50-1213; amd. Sec. 3, Ch. 204, L. 1995; amd. Sec. 396, Ch. 418, L. 1995; amd. Sec. 6, Ch. 507, L. 1999; amd. 2025 Amendment — Code Commissioner Correction: See 2025 Session Law for amendment made by sec. 2, Ch. 513, L. 2025. Amendment effective May 8, 2025.

In (8)(a) the Code Commissioner substituted "subsection (8)(f)" for "subsection (8)(e)" to correct an erroneous reference.

Cross-References

Public contracts generally, Title 18, ch. 1.

Extent of surety's liability, 28-11-411.

Mining and exploration activity prohibited if bond forfeited — exception, 82-4-360.

82-4-342. Amendment to operating permits and exploration licenses — rulemaking — fees. (1) During the term of an operating permit or exploration license issued under this part, an operator or licensee may apply for a revision as described in subsections (6)(g) through (6)(l) or an amendment to the permit or license. The operator may not apply for an amendment to delete disturbed acreage except following reclamation, as required under 82-4-336, and bond release for the disturbance, as required under 82-4-338.

(2) (a) The department may by rule establish criteria for the classification of amendments to a permit or exploration license as major or minor. The department shall adopt rules establishing requirements for the content of applications for revisions and major and minor amendments and the procedures for processing revisions and minor amendments.

(b) An amendment must be considered minor if:

(i) it is for the purpose of retention of mine-related facilities that are valuable for postmining use;

(ii) evidence is submitted showing that a local government has requested retention of the mine- related facilities for a postmining use; and

(iii) the postmining use of the mine-related facilities meets the requirements provided for in 82-4-336.

(c) An operator or licensee who is applying for a minor amendment or revision shall pay to the department a fee of $100. This fee must be included with the next annual fee payment required under 82-4-332(1) or 82-4-339(3).

(3) (a) An application for a major amendment to an operating permit must be processed pursuant to 82-4-337.

(b) Except as specified under 82-4-343(3)(c) or as provided in subsection (3)(c) of this section, an operator applying for a major amendment to an operating permit shall pay to the department a fee of $5,000 at the time of the application.

(c) A person mining primarily rock products as defined in 82-4-303 shall pay to the department a fee of $500 for an application for a major amendment.

(4) An applicant for an amendment to an exploration license shall pay to the department a fee of:

(a) for amendments that include activities beneath the surface of the land, $500; or

(b) for amendments that include activities only on the surface of the land, $250.

(5) The department shall review an application for a revision or a minor amendment and provide a notice of decision on the adequacy of the application within 30 days. If the department does not respond within 30 days, then the permit is revised or amended in accordance with the application.

(6) The department is not required to prepare an environmental assessment or an environmental impact statement for the following categories of action and permit revisions:

(a) actions that qualify for a categorical exclusion as defined by rule or justified by a programmatic review pursuant to Title 75, chapter 1;

(b) administrative actions, such as routine, clerical, or similar functions of a department, including but not limited to administrative procurement, contracts for consulting services, and personnel actions;

(c) repair or maintenance of the permittee's equipment or facilities;

(d) investigation and enforcement actions, such as data collection, inspection of facilities, or enforcement of environmental standards;

(e) ministerial actions, such as actions in which the agency does not exercise discretion, but acts upon a given state of facts in a prescribed manner;

(f) approval of actions that are primarily social or economic in nature and that do not otherwise affect the human environment;

(g) changes in a permit boundary that increase disturbed acres that are insignificant in impact relative to the entire operation, provided that the increase is less than 25 acres or 10% of the permitted area, whichever is less;

(h) changes to an approved reclamation plan if the changes are consistent with this part and rules adopted pursuant to this part;

(i) changes in an approved operating plan for an activity that was previously permitted if the changes will be insignificant relative to the entire operation and the changes are consistent with subsection (6)(g);

(j) changes in a permit for the purpose of retention of mine-related facilities that are valuable for postmining use;

(k) modifications to a tailings storage facility that result in a minor expansion to the facility if:

(i) the proposed modification is certified by the seal of the engineer of record;

(ii) the capacity increase resulting from the expansion is no greater than 15% of the capacity of the existing tailings storage facility; and

(iii) the modification complies with 82-4-376(2)(l) and (2)(dd) and is exempt under subsection (6)(g), (6)(h), or (6)(i) of this section; and

(l) applications for rock product permits and amendments pursuant to 82-4-343.

History: **En. Sec. 3, Ch. 472, L. 1993; amd. Sec. 397, Ch. 418, L. 1995; amd. Sec. 4, Ch. 365, L. 2003; amd. Sec. 5, Ch. 410, L. 2011; amd. Sec. 14, Ch. 399, L. 2015; amd. Sec. 8, Ch. 152, L. 2021; amd. Sec. 103, Ch. 324, L. 2021; amd. Sec. 8, Ch. 634, L. 2025.**

2025 Amendment: See 2025 Session Law for amendment made by sec. 8, Ch. 634, L. 2025. Amendment effective July 1, 2025.

82-4-343. Operating permit — rock products — fees. (1) A person may not engage in mining of rock products or disturb land in anticipation of mining rock products before obtaining a final operating permit from the department pursuant to this section.

(2) (a) A person mining rock products or a landowner allowing another person to mine rock products from the landowner's land may obtain an operating permit for a single site or multiple sites if the operation or operations cumulatively disturb no more than 100 acres of the earth's surface and the single site or each of the multiple sites do not:

(i) operate within 100 feet of surface water or in ground water or impact any wetland, surface water, or ground water;

(ii) have any water impounding structures other than for storm water control;

(iii) adversely impact a member of or the critical habitat of a member of a wildlife species that is listed as threatened or endangered under the Endangered Species Act of 1973; or

(iv) impact significant historic or archaeological features.

(b) A landowner who is a permittee and allows another person to mine on the landowner's land is responsible for compliance with this part, the rules adopted pursuant to this part, and the permit for mining activities conducted on sites permitted pursuant to this subsection (2) with the landowner's permission. The performance bond required under this part is and must be conditioned upon compliance with this part, the rules adopted pursuant to this part, and the permit of the landowner and any person who mines with the landowner's consent.

(3) (a) Prior to receiving a final operating permit from the department, a person shall pay a basic permit application fee of $500. The department may require a person applying for a permit pursuant to subsection (1) to pay an additional fee not to exceed the actual amount of contractor and employee expenses beyond the normal operating expenses of the department whenever those expenses are reasonably necessary to provide for timely and adequate review of the application, including any environmental review conducted under Title 75, chapter 1, parts 1 and 2. The department may further define these expenses by rule. Whenever the department determines that an additional fee is necessary and the additional fee will exceed $2,000, the department shall notify the applicant that a fee must be paid and submit to the applicant an itemized estimate of the proposed expenses. The department shall provide the applicant an opportunity to review the department's estimated expenses. The applicant may indicate which proposed expenses the applicant considers duplicative or excessive, if any.

(b) (i) Subject to subsection (3)(b)(ii), a contractor shall, at the request of the applicant, directly submit invoices of contractor expenses to the applicant.

(ii) A contractor's work is assigned, reviewed, accepted, or rejected by the department pursuant to this section.

(c) (i) A person applying for a minor amendment or revision to an operating permit shall pay to the department a fee of $100. This fee must be included with the next annual fee payment required by 82-4-339(3).

(ii) A person applying for a major amendment shall pay the department a fee of $500 at the time of the application.

(4) The person shall submit an application on a form provided by the department, which must contain the following information and any other pertinent data required by rule:

(a) the name and address of the operator, and, if a corporation or other business entity, the name and address of its officers, directors, owners of 10% or more of any class of voting stock, partners, and the like and its resident agent for service of process, if required by law;

(b) the rock products expected to be mined;

(c) a proposed reclamation plan;

(d) the expected starting date of operations;

(e) a map showing the specific area to be mined and the boundaries of the land that will be disturbed, the topographic detail, the location and names of all streams, roads, railroads, and utility lines on or immediately adjacent to the area, and the location of proposed access roads to be built;

(f) the names and addresses of the owners of record and any purchasers under contracts for deed of the surface of the land within the permit area, provided that the department is not required to verify this information;

(g) the names and addresses of the present owners of record and any purchasers under contracts for deed of all minerals in the land within the permit area, provided that the department is not required to verify this information;

(h) the source of the applicant's legal right to mine the mineral on the land affected by the permit, provided that the department is not required to verify this information;

(i) the types of access roads to be built and manner of reclamation of road sites on abandonment;

(j) a plan that will provide, within limits of normal operating procedures of the industry, for completion of the operation;

(5) A person may not be issued an operating permit if:

(a) that person's failure, or the failure of any firm or business association of which that person was a principal or controlling member, to comply with the provisions of this part, the rules adopted under this part, or a permit or license issued under this part has resulted in either the receipt of bond proceeds by the department or the completion of reclamation by the person's surety or by the department, unless that person meets the conditions described in 82-4-360;

(b) that person has not paid a penalty for which the department has obtained a judgment pursuant to 82-4-361;

(c) that person has failed to post a reclamation bond required by 82-4-305; or

(d) that person has failed to comply with an abatement order issued pursuant to 82-4-362, unless the department has completed the abatement and the person has reimbursed the department for the cost of abatement.

(6) A person may not be issued a permit under this part unless, at the time of submission of a bond, the person provides the current information required in subsection (4)(a) and:

(a) (i) certifies that the person is not currently in violation in this state of any law, rule, or regulation of this state or of the United States pertaining to air quality, water quality, or mined land reclamation; or

(ii) presents a certification by the administering agency that the violation is in the process of being corrected to the agency's satisfaction or is the subject of a bona fide administrative or judicial appeal; and

(b) if the person is a partnership, corporation, or other business association, provides the certification required by 82-4-335(9)(a)(i) or (9)(a)(ii), as applicable, for any partners, officers, directors, owners of 10% or more of any class of voting stock, and business association members.

(7) The department's action on an application submitted under this section does not require an environmental review under Title 75, chapter 1, for the following:

(a) an application for a new permit resulting in less than 15 acres of total disturbance;

(b) an application to amend a permit resulting in less than 15 acres of total disturbance; and

(c) an application to amend a permit that has been analyzed under Title 75, chapter 1, that results in less than 25 acres of new disturbance.

History: En. Sec. 4, Ch. 152, L. 2021; amd. Sec. 9, Ch. 634, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 9, Ch. 634, L. 2025. Amendment effective July 1, 2025.

82-4-344 through 82-4-348 reserved.

82-4-349. Limitations of actions — venue. (1) Legal actions seeking review of a department decision granting or denying an exploration license or operating permit issued under this part must be filed within 90 days after the decision is made. Summons must be issued and process served on all defendants within 60 days after the action is filed.

(2) An action to challenge the issuance of a license or permit pursuant to this part must be brought in the county in which the exploration or permitted activity is proposed to occur. If an activity is proposed to occur in more than one county, the action may be brought in any of the counties in which the exploration or activity is proposed to occur.

(3) A judicial challenge to an exploration license or operating permit issued pursuant to this part by a party other than the license or permitholder or applicant must include the party to whom the license or permit was issued unless otherwise agreed to by the license or permitholder or applicant. All judicial challenges of licenses or permits for projects with a project cost, as determined by the court, of more than $1 million must have precedence over any civil cause of a different nature pending in that court. If the court determines that the challenge was without merit or was for an improper purpose, such as to harass, to cause unnecessary delay, or to impose needless or increased cost in litigation, the court may award attorney fees and costs incurred in defending the action.

History: En. Sec. 1, Ch. 472, L. 1993; amd. Sec. 398, Ch. 418, L. 1995; amd. Sec. 7, Ch. 507, L. 1999; amd. Sec. 32, Ch. 361, L. 2003; amd. Sec. 16, Ch. 337, L. 2005.

82-4-350. Award of costs and attorney fees. When issuing a final order in an action challenging the grant or denial of an exploration license or operating permit issued under this part, the court may award costs of litigation, including reasonable attorney and expert witness fees, to a prevailing or substantially prevailing party whenever, in its discretion, the court determines an award is appropriate.

History: En. Sec. 2, Ch. 472, L. 1993.

82-4-351. Reasons for denial of permit. (1) An application for a permit or an application for an amendment to a permit may be denied for the following reasons:

(a) the plan of operation or reclamation conflicts with Title 75, chapter 2, as amended, Title 75, chapter 5, as amended, Title 75, chapter 6, as amended, or rules adopted pursuant to these laws;

(b) the reclamation plan does not provide an acceptable method for accomplishment of reclamation as required by this part.

(2) A denial of a permit must be in writing, state the reasons for denial, and be based on a preponderance of the evidence.

History: En. Sec. 14, Ch. 252, L. 1971; R.C.M. 1947, 50-1214; amd. Sec. 1, Ch. 174, L. 1979; amd. Sec. 7, Ch. 453, L. 1985; amd. Sec. 6, Ch. 472, L. 1993.

82-4-352. Reapplication with new reclamation plan. A permit may be denied and returned to the applicant with a request that the application be resubmitted with a different plan for reclamation. The person making application for a permit may then resubmit to the department a new plan for reclamation.

History: En. Sec. 15, Ch. 252, L. 1971; R.C.M. 1947, 50-1215; amd. Sec. 399, Ch. 418, L. 1995.

82-4-353. Administrative remedies — notice — appeals — parties. (1) Upon receipt of an application for an operating permit, the department shall provide notice of the application by publication in a newspaper of general circulation in the area to be affected by the operation. The notice must be published once a week for 3 successive weeks.

(2) An applicant for a permit or license or for an amendment or revision to a permit or license may request a hearing on a denial of the application by submitting a written request for a hearing within 30 days of receipt of written notice of the denial. The request must state the reason that the hearing is requested.

(3) All hearings and appeals under 82-4-337(4), 82-4-338(3)(b), 82-4-341(7) and (9), 82-4-361, 82-4-362, and subsection (2) of this section must be conducted by the board in accordance with the Montana Administrative Procedure Act. Any person whose interests may be adversely affected as a result of an action taken pursuant to this part may become a party to any proceeding held under this part upon a showing that the person is capable of adequately representing the interests claimed.

(4) As used in this section, "person" means any individual, corporation, partnership, or other legal entity.

History: En. Sec. 16, Ch. 252, L. 1971; amd. Sec. 9, Ch. 281, L. 1974; amd. Sec. 1, Ch. 313, L. 1975; amd. Sec. 2, Ch. 427, L. 1977; R.C.M. 1947, 50-1216; amd. Sec. 12, Ch. 79, L. 2001; amd. Sec. 6, Ch. 410, L. 2011; amd. Sec. 4, Ch. 458, L. 2019.

Cross-References

Montana Administrative Procedure Act, Title 2, ch. 4.

82-4-354. Mandamus to compel enforcement. (1) A person having an interest that is or may be adversely affected, with knowledge that a requirement of this part or a rule adopted under this part is not being enforced by a public officer or employee whose duty it is to enforce the requirement or rule, may bring the failure to the attention of the public officer or employee by an affidavit stating the specific facts of the failure. Knowingly making false statements or charges in the affidavit subjects the affiant to penalties prescribed for false swearing, as provided in 45-7-202.

(2) If the public officer or employee neglects or refuses for an unreasonable time after receipt of the affidavit to enforce the requirement or rule, the affiant may bring an action of mandamus in the district court of the first judicial district or in the district court of the county in which the land is located. If the court finds that a requirement of this part or a rule adopted under this part is not being enforced, it shall order the public officer or employee to perform the

duties. If the officer or employee fails to do so, the public officer or employee must be held in contempt of court and is subject to the penalties provided by law.

(3) A person having an interest that is or may be adversely affected may commence a civil action to compel compliance with this part against a person for the violation of this part or any rule, order, or permit issued under it. However, an action may not be commenced:

(a) prior to 60 days after the plaintiff has given notice in writing to the department and to the alleged violator; or

(b) if the department has commenced and is diligently prosecuting a civil action to require compliance with the provisions of this part or any rule, order, or permit issued under it. A person having an interest that is or may be adversely affected may intervene as a matter of right in the civil action.

(4) Legal actions under subsection (3)(a) must be brought in the district court of the county in which the alleged violation occurred.

(5) Nothing in this section restricts any right of any person under any statute or common law to seek enforcement of this part or the rules adopted under it or to seek any other relief.

History: En. Sec. 4, Ch. 345, L. 1985; amd. Sec. 1, Ch. 535, L. 1997; amd. Sec. 48, Ch. 535, L. 2021.

Cross-References

Mandamus — writ of mandate, Title 27, ch. 26.

82-4-355. Action for damages to water supply — replacement. (1) An owner of an interest in real property who obtains all or part of the owner's supply of water for beneficial uses, as defined in 85-2-102, from an underground source other than a subterranean stream having a permanent, distinct, and known channel may sue the operator engaged in an operation for which a license is required pursuant to 82-4-332 or for which a permit is required pursuant to 82-4-335 to recover damages for loss in quality or quantity of the water supply resulting from mining or exploration. The owner is required to exhaust the administrative remedy under subsection (2) prior to filing suit.

(2) (a) An owner described in subsection (1) may file a complaint with the department detailing the loss in quality or quantity of water. Upon receipt of a valid complaint, the department:

(i) shall investigate the statements and charges in the complaint using all available information, including monitoring data gathered at the exploration or mine site;

(ii) may require the operator, if necessary, to install monitoring wells or other practices that may be needed to determine the cause of water loss, if there is a loss, in terms of quantity and quality;

(iii) shall issue a written finding specifying the cause of the water loss, if there is a loss, in terms of quantity and quality;

(iv) shall, if it determines that the preponderance of evidence indicates that the loss is caused by an exploration or mining operation, order the operator, in compliance with Title 85, chapter 2, to provide the needed water immediately on a temporary basis and within a reasonable time replace the water in like quality, quantity, and duration. If the water is not replaced, the department shall order the suspension of the operator's exploration or operating permit until the operator provides substitute water, except that nothing in this section preempts the application of Title 85, chapter 2. The operator may not be required to replace a junior right if the operator's withdrawal or dewatering is not in excess of the operator's senior right.

(b) If the department determines that there is a great potential that surface or subsurface water quality and quantity may be adversely affected by a mining or exploration operation, the operator shall install a water quality monitoring program or a water quantity monitoring program, or both, which must be approved by the department prior to the commencement of exploration or mining.

History: En. Sec. 5, Ch. 345, L. 1985; amd. Sec. 8, Ch. 637, L. 1991; amd. Sec. 2734, Ch. 56, L. 2009.

Cross-References

Waste and contamination of ground water prohibited, 85-2-505.

82-4-356. Action in response to complaints related to use of explosives. (1) An owner of an interest in real property or an individual who resides within an area subject to property damage or safety hazards related to the use of explosives by any person subject to the provisions of this part may file a complaint with the department, describing the alleged property damage or safety hazards. The complainant shall provide credible evidence to the department to substantiate allegations of property damage or safety hazards.

(2) Upon receipt of a complaint, the department:

(a) shall investigate the statements and charges in the complaint, using all available information, including mine or exploration blasting records and other data obtained through an examination of the dwelling, structure, or site identified in the complaint;

(b) may conduct tests and make measurements, including reasonable efforts to replicate conditions that may have caused property damage or safety hazards, and may require the allegedly responsible person to cooperate as necessary to investigate the complaint;

(c) shall issue a written finding specifying the cause of any property damage or safety hazards that are validated by the investigation; and

(d) shall, if it determines that the preponderance of evidence indicates that property damage or safety hazards are or were caused by exploration or mining activities, order the responsible person to make changes in the use of explosives or other appropriate mitigation to alleviate property damage or safety hazards.

History: En. Sec. 1, Ch. 443, L. 1989.

Cross-References

Reckless or malicious use of explosives, 45-8-333.

Seismic geophysical exploration, Title 82, ch. 1, part 1.

Proof of insurance covering use of explosives in strip- or underground-coal-mining and reclamation operations required, 82-4-222.

Regulation of use of explosives in reclamation, 82-4-231.

82-4-357. Abatement of environmental emergencies. (1) Whenever an environmental emergency exists, as determined by the department, at an active, temporarily abandoned, or permanently abandoned exploration, mining, ore processing, or hard-rock mill site, the department may enter the site and may apply for and, if approved by the governor, use the funds in the environmental contingency account created in 75-1-1101 to abate the situation on either a temporary or a permanent basis, or both.

(2) The department may bring an action against the operator to recover the abatement costs in the district court of the first judicial district in Lewis and Clark County. Nothing in this section affects the right of the department to retain or pursue forfeiture of any bond posted pursuant to 82-4-338. Expenditures from the environmental contingency account that are recovered under this subsection must be deposited in the environmental contingency account.

History: En. Sec. 9, Ch. 637, L. 1991.

Cross-References

Environmental contingency account objectives, 75-1-1101.

82-4-358 and 82-4-359 reserved.

82-4-360. When activity prohibited — exception. (1) Except as provided in subsection (2), a person may not conduct mining or exploration activities in this state if that person or any firm or business association of which that person was a principal or controlling member had a bond forfeited under this part, if the department otherwise received proceeds from a surety to perform reclamation on that person's behalf, or if the person's surety completed reclamation on the person's behalf.

(2) A person described in subsection (1) may apply for an operating permit or an exploration license or may conclude a written agreement under 82-4-305 if:

(a) that person pays to the department:

(i) the full amount of the necessary expenses incurred by the department under 82-4-341(6) for reclamation of the area for which the bond was forfeited;

(ii) the full amount of any penalties assessed under this part; and

(iii) interest on the expenses incurred and penalties assessed at the rate of 6% a year; and

(b) the person demonstrates and the department determines that the person has remedied the conditions that led to the bond forfeiture or receipt of the bond proceeds and that those conditions no longer exist.

History: En. Sec. 7, Ch. 93, L. 1989; amd. Sec. 400, Ch. 418, L. 1995; amd. Sec. 296, Ch. 42, L. 1997; amd. Sec. 9, Ch. 488, L. 2001.

82-4-361. Violation — penalties — waiver. (1) When the department has reason to believe that a person is in violation of this part, a rule adopted or an order issued under this part, an administrative deficiency notice, or a term or condition of a permit issued under this part, it shall send a letter of warning or violation to the person. The letter of warning or violation must describe the provision of the statute, rule, order, or permit alleged to be violated and the facts alleged to constitute the violation. The letter must recommend corrective actions necessary to return to compliance. Issuance of a letter of warning or violation under this subsection does not limit the authority of the department under this part to bring a judicial action for penalties or injunctive relief or to initiate an administrative enforcement action.

(2) (a) By issuance of an order pursuant to subsection (6), the department may assess an administrative penalty of not less than $100 or more than $1,000 for each of the following violations and an additional administrative penalty of not less than $100 or more than $1,000 for each day during which the violation continues and may bring an action for an injunction from continuing the violation against:

(i) a person or operator who violates a provision of this part, a rule adopted or an order issued under this part, or a term or condition of a permit; or

(ii) any director, officer, or agent of a corporation who purposely or knowingly authorizes, orders, or carries out a violation of a provision of this part, a rule adopted or an order issued under this part, or a term or condition of a permit.

(b) If the violation created an imminent danger to the health or safety of the public or caused significant environmental harm, the maximum administrative penalty is $5,000 for each day of violation.

(c) This subsection does not limit the authority of the department to bring a judicial action for penalties or injunctive relief prior to or instead of initiating an administrative enforcement action under this part.

(3) The department may bring a judicial action seeking a penalty of not more than $5,000 for a violation listed in subsection (2)(a) and a penalty of not more than $5,000 for each day that the violation continues.

(4) Penalties assessed under this section must be determined in accordance with the penalty factors in 82-4-1001.

(5) The department may bring an action for a restraining order or a temporary or permanent injunction against an operator or other person violating or threatening to violate an order issued under this part.

(6) (a) In addition to the letter of warning or violation sent pursuant to subsection (1), the department may also issue an order if it has credible information that a violation listed in subsection (2) has occurred. The order must specify the provision of the part, rule, order, or permit alleged to be violated and the facts alleged to constitute the violation. The order may require necessary corrective action within a reasonable period of time, may assess an administrative penalty determined in accordance with this section, or both. The order must be served personally or by certified mail.

(b) An order issued pursuant to subsection (6)(a) becomes final unless, within 30 days after the order is served, the person to whom the order is issued submits to the board a written request for a hearing stating the reason for the request. Service of the order by mail is complete 3 business days after mailing. If a request for a hearing is submitted, a hearing must be held within a reasonable time under the contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6. After a hearing, the board shall affirm, modify, or rescind the order.

(7) Legal actions for penalties or injunctive relief under this section must be brought in the district court of the county in which the alleged violation occurred.

(8) For the purposes of this section, "administrative deficiency" means a deficiency in reporting, recordkeeping, fee payment, or notification that the department determines is minor in nature, nonsubstantive, and unlikely to recur.

History: En. Sec. 22, Ch. 252, L. 1971; amd. Sec. 11, Ch. 281, L. 1974; R.C.M. 1947, 50-1222; amd. Sec. 1, Ch. 284, L. 1985; amd. Sec. 3, Ch. 386, L. 1985; amd. Sec. 5, Ch. 93, L. 1989; amd. Sec. 2, Ch. 283, L. 1991; amd. Sec. 4, Ch. 204, L. 1995; amd. Sec. 1, Ch. 271, L. 1997; amd. Sec. 4, Ch. 273, L. 1997; amd. Sec. 2, Ch. 535, L. 1997; amd. Sec. 13, Ch. 79, L. 2001; amd. Sec. 2, Ch. 486, L. 2005; amd. Sec. 26, Ch. 487, L. 2005; amd. Sec. 49, Ch. 535, L. 2021; amd. Sec. 1, Ch. 191, L. 2023.

82-4-362. Suspension of permits — hearing. (1) If any of the requirements of this part, of the rules adopted under this part, or of a license or permit has not been complied with, the department shall serve a notice of violation on the licensee or permittee or, if necessary, the director shall order the suspension of the license or permit. A license or permit may also be suspended for failure to comply with an order to pay a civil penalty if the order is not subject to administrative or judicial review. The director may order immediate suspension of a license or permit whenever the director finds that a violation of this part, of the rules adopted under this part, or of a license or permit is creating an imminent danger to the health or safety of persons outside the permit area. The notice or order must be handed to the licensee or permittee in person or served on the licensee or permittee by certified mail addressed to the permanent address shown on the application for a license or permit. The notice of violation or order of suspension must specify the provision of this part, the rules adopted under this part, or the license or permit violated and the facts alleged to constitute the violation and must, if the violation has not been abated, order abatement within a specified time period.

(2) If the licensee or permittee has not complied with the requirements set forth in the notice of violation or order of suspension within the time limits set in the notice or order, the license or permit may be revoked by order of the department and the performance bond forfeited to the department. The notice of violation or order of suspension must state when those measures may be undertaken and must give notice of the opportunity for a hearing before the board. A hearing may be requested by submitting a written request stating the reason for the request to the board within 30 days after receipt of the notice or order. If a hearing is requested within the 30-day period, the license or permit may not be revoked and the bond may not be forfeited until a final decision is made by the board.

(3) If a permittee fails to pay the fee or file the report required under 82-4-339, the department shall serve notice of this failure, by certified mail or personal delivery, on the permittee. If the permittee does not comply within 30 days of receipt of the notice, the director shall suspend the permit. The director shall reinstate the permit upon compliance.

Cross-References

Contested case procedure, Title 2, ch. 4, part 6.

82-4-363 through 82-4-366 reserved.

82-4-367. Long-term or perpetual water treatment permanent trust fund. (1) There is established a fund of the permanent fund type to pay exclusively for the cost to the state of long-term or perpetual water treatment at the Zortman and Landusky mine sites.

(2) The fund is financed with:

(a) funds transferred from the orphan share account pursuant to 75-10-743; and

(b) other sources of funding that the legislature or congress may from time to time provide.

(3) The fund must be invested by the board of investments pursuant to Title 17, chapter 6, part 2, and the earnings from the investment must be credited to the principal of the fund until the year 2018.

(4) The annual earnings on the fund for the year 2018 and for each succeeding year may be appropriated for the purposes of subsection (1).

(5) The principal of the fund must remain inviolate unless appropriated by a vote of two-thirds of the members of each house of the legislature. An appropriation of the principal may only be made for payment of the costs of long-term or perpetual water treatment at the Zortman and Landusky mine sites.

History: En. Sec. 1, Ch. 278, L. 2005.

82-4-368 through 82-4-370 reserved.

82-4-371. Reclamation of abandoned mine sites. (1) Agents, employees, or contractors of the department may enter upon property for the purpose of conducting studies or exploratory work to determine whether the property has been mined and not reclaimed and rehabilitated in accordance with the requirements of this part and to determine the feasibility of restoration or reclamation of the property or abatement, control, or prevention of the adverse effects of past mining practices. The department may bring an injunctive action to restrain interference with the exercise of the right to enter and inspect granted in this subsection.

(2) (a) The department may enter upon property pursuant to subsection (2)(b) if it makes a finding that:

(i) land or water resources on the property have been adversely affected by past mining practices;

(ii) the adverse effects are at a stage that, in the public interest, action to restore or reclaim the property or to abate, control, or prevent the adverse effects should be taken; and

(iii) the owners of the land or water resources where entry must be made to restore or reclaim the property or to abate, control, or prevent the adverse effects of past mining practices are not known or readily available or the owners will not give permission for the department or its agents, employees, or contractors to enter upon the property to restore or reclaim the property or to abate, control, or prevent the adverse effects of past mining practices.

(b) If the department has made findings pursuant to subsection (2)(a), agents, employees, or contractors of the department may enter upon property adversely affected by past mining practices and other property necessary for access to the adversely affected property to do all things necessary or expedient to restore or reclaim the property or to abate, control, or prevent the adverse effects of past mining practices after:

(i) giving notice by mail to the owner, if known, and a purchaser under contract for deed, if known; or

(ii) if neither is known, posting notice upon the property and advertising in a newspaper of general circulation in the county in which the property lies.

(c) Entry upon property pursuant to this section is not an act of condemnation of property or of trespass but rather an exercise of the power granted by Article IX, sections 1 and 2, of the Montana constitution.

(3) The department may acquire the necessary property by gift or purchase. A gift or purchase must be approved by the board of land commissioners. If the property cannot be acquired by gift or purchase at a reasonable cost, proceedings may be instituted in the manner provided in Title 70, chapter 30, against all nonaccepting landholders if:

(a) acquisition of the property is necessary for successful reclamation;

(b) the acquired property after restoration or reclamation or after abatement, control, or prevention of the adverse effects of past mining practices will serve recreation and historic purposes or conservation and reclamation purposes or provide open space benefits; and

(c) (i) permanent facilities, such as treatment plants or relocated stream channels, will be constructed on the property for the restoration or reclamation of the property or for abatement, control, or prevention of the adverse effects of past mining practices; or

(ii) acquisition of refuse disposal sites and all refuse on the sites will serve the purposes of this part in that public ownership is desirable to meet emergency situations and prevent recurrences of the adverse effects of past mining practices.

(4) The department may record in the office of the clerk and recorder in the county in which property that has been reclaimed pursuant to 82-4-424 or this section is located a notice that the property has been mined and reclaimed. The notice must include the date and a brief description of the reclamation.

History: En. Sec. 2, Ch. 329, L. 1995; amd. Sec. 2, Ch. 78, L. 2009; amd. Sec. 104, Ch. 324, L. 2021.

Cross-References

Fees of County Clerk, 7-4-2631.

Injunctions, Title 27, ch. 19.

82-4-372. Filing of lien for abandoned mine reclamation project. (1) Before commencement of a project using public funds to restore or reclaim property or to abate, control, or prevent adverse effects of past mining practices on private property, the department may file a notice of the right to claim a lien in the clerk and recorder's office in the county in which the majority of the property lies.

(2) If the department expends or allocates public funds conducting mine reclamation work under this part and if the department determines, based on an appraisal by an independent qualified appraiser chosen by the department, that the work has resulted or will result in a significant increase in the fair market value of property, the department may file a lien against the property reclaimed.

(3) Within 6 months after the completion of the project, the department shall itemize the funds expended and may file a lien statement. The lien statement must include:

(a) the value of the property before commencing the work of restoration or reclamation or abatement, control, or prevention of adverse effects of the past mining practices;

(b) the value of the property after the work has been completed;

(c) a listing of the appraisal upon which the values in subsections (3)(a) and (3)(b) are based and the location where those appraisals may be examined;

(d) the amount of public funds spent by the department on the project; and

(e) the amount of the lien.

(4) The amount of the lien must be the lesser of either the increase in the value of the property or the amount of public funds actually expended by the department.

(5) A lien may not be filed under this section against the property of a person who owned the surface rights prior to May 2, 1977, and who did not consent to, participate in, or exercise control over the mining operation that necessitated the reclamation performed under this part.

(6) If a lien is filed, the department shall send, by certified mail to the owner's last-known address, copies of the lien, the statement of costs, and the appraisals to the owner of record of the property.

(7) The lien provided in this section is effective as of the date of expenditure of the public funds and has priority over all other liens or security interests that have attached to the property that is the subject of the lien, whenever those liens may have arisen, second only to real estate taxes imposed upon the property.

(8) Within 60 days after the department files the lien, the owner of the property to which the lien provided for in this section attaches may petition the district court for the county in which the majority of the property is located asking the district court to resolve disputes regarding the amount of actual funds spent by the department or to determine the increase in the market value of the property as a result of the restoration or reclamation or abatement, control, or prevention of the adverse effects of past mining practices. If it differs from the department's statement, the amount found by the court to be the lesser of the actual funds spent or the increase in market value is the amount of the lien and that amount must be recorded with the department's statement.

(9) A lien placed on property under this section may be satisfied by payment to the department of the amount of the lien. The department may accept partial payments on terms and conditions that the department specifies, but the lien is satisfied only to the extent of the value of the consideration received. A lien must be satisfied, to the extent of the value of the consideration received, at the time of transfer of ownership. Unsatisfied portions remain as a lien on the property. When a lien is partially or wholly satisfied, the department shall file with the clerk and recorder with whom the lien is filed an instrument releasing the lien in whole or in part.

(10) A lien placed on property under this section renews automatically, without a requirement on the part of the department to file a continuation notice, until the time that the lien is fully satisfied. Interest is payable on unsatisfied liens or portions of the liens provided for in this section, and it must be accumulated at the rate of 10% a year and may not be compounded.

(11) Funds derived from the satisfaction of liens established under this part must be deposited in the abandoned mine reclamation fund account from which the project was funded.

History: En. Sec. 3, Ch. 329, L. 1995.

Cross-References

Liens — generally, Title 71, ch. 3, part 1.

82-4-373 and 82-4-374 reserved.

82-4-375. Engineer of record — duties. (1) An operator with an existing tailings storage facility shall provide the department with written designation of an engineer of record, including contact information, within 180 days after October 1, 2015.

(2) An application for a permit pursuant to 82-4-335 or an amendment that will include a tailings storage facility must include the designation of an engineer of record and contact information.

(3) The engineer of record may not be an employee of an operator or permit applicant. The engineer of record shall:

(a) review designs and other documents pertaining to tailings storage facilities required by this part;

(b) certify and seal designs or other documents pertaining to tailings storage facilities submitted to the department;

(c) complete an annual inspection of the tailings storage facility as required in 82-4-381;

(d) notify the operator when credible evidence indicates the tailings storage facility is not performing as intended; and

(e) immediately notify the operator and the department when credible evidence indicates that a tailings storage facility presents an imminent threat or a high potential for imminent threat to human health or the environment.

(4) The engineer of record, operator, or permit applicant shall notify the department in writing if there is a change in the engineer of record.

(5) If the operator or permit applicant does not designate an engineer of record or replace an engineer of record within 90 days of receipt of notification that the engineer is no longer the engineer of record, the department shall order suspension of the deposition of tailings until an engineer of record is established pursuant to this section.

History: En. Sec. 4, Ch. 399, L. 2015.

82-4-376. Tailings storage facility — design document — fee. (1) An operator or a permit applicant proposing to construct a new tailings storage facility, an operator that is constructing a new tailings storage facility, or an operator proposing to expand an existing tailings storage facility shall submit to the department a design document and a $1,500 fee.

(2) The design document must contain:

(a) the certification of the engineer of record;

(b) a detailed description of the proposed facility and site characteristics;

(c) maps, sections, and appurtenances design drawings in both hard copy and electronic format with sufficient detail for an independent review;

(d) the raw data files for models used in developing and evaluating the design;

(e) an evaluation indicating that the proposed tailings storage facility will be designed, operated, monitored, and closed using the most applicable, appropriate, and current technologies and techniques practicable given site-specific conditions and concerns;

(f) a site geotechnical investigation commensurate in detail and scope with the complexity of the site geology and proposed tailings storage facility design. The investigation must include a geological model of site conditions and a rationalization of the site investigation process.

(g) a demonstration through site investigation, laboratory testing, geotechnical analyses, and other appropriate means that the tailings, embankment, and foundation materials controlling slope stability are not susceptible to liquefaction or to significant strain-weakening under the anticipated static or cyclic loading conditions, to the extent that the amount of estimated deformation under the loading conditions would result in loss of containment;

(h) for a new tailings storage facility, design factors of safety against slope instability not less than:

(i) 1.5 for static loading under normal operating conditions, with appropriate use of undrained shear strength analysis for saturated, contractive materials;

(ii) 1.3 for static loading under construction conditions if the independent review panel created pursuant to 82-4-377 agrees that site-specific conditions justify the reduced factor of safety and that the extent and duration of the reduced factor of safety are acceptable; and

(iii) 1.2 for postearthquake, static loading conditions with appropriate use of undrained analysis and selection of shear strength parameters. Under these conditions, a postearthquake factor of safety less than 1.2 but greater than 1.0 may be accepted if the amount of estimated deformation does not result in loss of containment.

(i) for a new tailings storage facility, an analysis showing that the seismic response of the tailings storage facility does not result in the uncontrolled release of impounded materials or other undesirable consequences when subject to the ground motion associated with the 1-in-10,000-year event, or the maximum credible earthquake, whichever is larger. Any numeric analysis of the seismic response must be calculated for the normal maximum loading condition with steady-state seepage. The analysis must include, without limitation, consideration of:

(i) anticipated ground motion frequency content;
(ii) fundamental period and dynamic response;
(iii) potential liquefaction;
(iv) loss of material strength;
(v) settlement;
(vi) ground displacement;
(vii) deformation; and
(viii) the potential for secondary failure modes.

(j) if a pseudo-static stability analysis is performed to support the design, a justification for the use of the method with respect to the anticipated response to cyclic loading of the tailings facility structure and constituent materials. The calculations must be accompanied by a description of the assumptions used in deriving the seismic coefficient.

(k) reduced factors of safety or seismic design criteria if the independent review panel agrees that site-specific conditions justify that design to the specified requirements of factors of safety or seismic design criteria in this section is not necessary;

(l) for expansion of an existing tailings storage facility, either an analysis showing the proposed expansion meets the minimum design requirements for a new tailings storage facility under this section or an analysis showing the proposed expansion does not reduce the tailings storage facility's original design factors of safety and seismic event design criteria;

(m) a probabilistic and deterministic seismic evaluation for the area and assessment of peak horizontal ground acceleration;

(n) a dam breach analysis, a failure modes and effects analysis or other appropriate detailed risk assessment, and an observational method plan addressing residual risk;

(o) a description of the chemical and physical properties of the materials and process solutions to be stored in the tailings storage facility;

(p) when appropriate, depending on the chemical and physical properties of the materials, a detailed description of how undesirable constituents contained in the impoundment will be isolated from the environment;

(q) a description of the tailings storage facility capacity over time and the estimated ultimate capacity;

(r) specifications for impoundment construction, including the specifications for the foundation, abutments, embankment, means of containment, and the borrow materials;

(s) a construction management plan that includes, at a minimum, parameters and levels of acceptability to be monitored during construction for quality control and quality assurance purposes. The frequency of sampling, the amount of oversight, the qualifications of the oversight personnel, and the role of the panel during and after construction must be specified and agreed to by the panel.

(t) a list of quantitative performance parameters for construction, operation, and closure of the tailings storage facility. The quantitative performance parameters may be expressed as minimums or maximums for embankment crest width, embankment slopes, beach width, operating pool volume, phreatic surface elevation in the embankment and foundation, pore pressures, or other parameters appropriate for the facility and location.

(u) a list of the assumptions used during the analysis and design of the facility and a description justifying the validity of each assumption;

(v) a description of how the design integrates into a closure plan that facilitates, to the extent possible, dam decommissioning resulting in a maintenance-free closure;

(w) requirements for postclosure monitoring, inspection, and review, including the frequency of engineer of record inspections, independent panel reviews, and retention of an engineer of record;

(x) a description of proposed risk management measures for each facility life-cycle stage, including construction, operation, and closure;

(y) a detailed water balance, evidence of calibration if available, and the raw data used to develop the water balance;

(z) a detailed description of how water, seepage, and process solutions are to be routed or managed during construction, operation, and closure;

(aa) a detailed description of storm water controls, including diversions, storage, freeboard, and how extreme storm events will be managed;

(bb) a design storm event for operation and closure conforming to current engineering best practices for the type of facility proposed that includes:

(i) a rationale for the selection of the design storm event;

(ii) the magnitude of the design storm event;

(iii) the magnitude of runoff generated by the design storm event to and around the impoundment; and

(iv) evidence that the dynamic nature of climatology was considered;

(cc) for a new tailings storage facility, design sufficient to store:

(i) the probable maximum flood event plus maximum operating water or solution volume plus sufficient freeboard for wave action; or

(ii) a flood event design criterion less than the probable maximum flood but greater than the 1-in-500-year, 24-hour event if the panel agrees that site-specific conditions justify that design to the probable maximum flood standard is unnecessary;

(dd) for an expansion of an existing tailings storage facility, either an analysis that the proposed expansion meets the minimum requirements in this section to manage storm or flood events or an analysis that the expansion does not reduce the tailings storage facility's ability to store or otherwise manage the original facility design storm or flood events; and

(ee) any other information, drawings, maps, detailed descriptions, or data to assist the panel in determining if the new or expanded tailings storage facility protects human health and the environment.

(3) The design document must be submitted prior to the issuance of the draft permit pursuant to 82-4-337.

History: **En. Sec. 5, Ch. 399, L. 2015.**

82-4-377. Independent review panel — selection — duties. (1) (a) The operator or permit applicant shall identify at least three independent review panel members to serve on the independent review panel and shall submit those names to the department. The department may reject any proposed panel members. If the department rejects a proposed panel member, the operator or permit applicant shall continue to select independent review panel members until at least three panel members are approved by the department.

(b) The independent review panel must consist of a majority of licensed engineers as described in 82-4-303(13)(a).

(c) An independent review panel member, as defined in 82-4-303, may not be held individually liable for any act or omission made in the course and scope of their capacity as a department-approved panel member on an independent review panel pursuant to this part.

(2) An independent review panel member may not be an employee of:

(a) an operator or permit applicant; or

(b) the design consultant, the engineer of record, or the constructor.

(3) The operator or permit applicant shall contract with panel members, process invoices, and pay costs.

(4) A representative of the department and a representative of the operator or permit applicant may participate on the panel, but they are not members of the panel and their participation is nonbinding on the review of the design document.

(5) The engineer of record is not a member of the panel but shall participate in the panel review of the design document.

(6) The operator or permit applicant shall provide each panel member with a copy of the design document and other information requested by the panel members.

(7) The panel members shall review the design document required pursuant to 82-4-376, underlying analysis, and assumptions for consistency with this part. The panel members shall assess the practicable application of current technology in the proposed design.

(8) Following the review of the design document, the panel members shall prepare a written report signed by each panel member that summarizes the review. The written report may include recommended modifications to the design document for consistency with this part. The panel members shall provide the written report to the operator or permit applicant and the department. The panel members' determination is conclusive.

(9) (a) If the written report does not contain any recommended modification to a design document, the engineer of record shall certify the completed design document. The operator or permit applicant shall submit the final design document to the department pursuant to 82-4-376.

(b) If a written report contains recommended modifications to the design document,the engineer of record shall modify the design document to address the recommended modifications and shall submit the revised designed document to the panel members for review. Following written concurrence from the panel members that the revised design document adequately addresses the recommended modifications stated in the written report, the engineer of record shall certify the completed design document. The operator or permit applicant shall submit the final design document to the department pursuant to 82-4-376. The panel members' determination is conclusive.

(10) For an expansion of a tailings storage facility for which the original design document was approved by the department, the operator shall make a reasonable effort to retain the previous panel members. To replace a panel member, the process in subsection (1) must be followed.

History: En. Sec. 6, Ch. 399, L. 2015; amd. Sec. 4, Ch. 504, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 4, Ch. 504, L. 2025. Amendment effective May 8, 2025.

82-4-378. Quality assurance during construction. (1) An operator constructing a new or expanded tailings storage facility shall:

(a) when indicated by the construction management plan, engage a professional engineer or other oversight specified in the plan to implement the construction management plan specified in the final design document. The professional engineer must be an employee of the engineer of record or an employee of the design firm represented by the engineer of record but may not be an employee of the constructor or the operator.

(b) ensure the collection of all records, including as-built plans and specifications, necessary to demonstrate that the tailings storage facility is constructed as specified in the final design document;

(c) when indicated by the construction management plan, secure a certification from the professional engineer for the records generated by the implementation of the quality assurance monitoring as specified in the final design document; and

(d) submit to the department the records collected during the quality assurance monitoring specified in the approved design document for all tailings storage facility construction conducted during a calendar year in the annual report required by the facility's operating permit or an independent submittal at the completion of the construction activity.

(2) After an appropriate investigation and consultation with the operator, the department shall, pursuant to 82-4-362, order the suspension of tailings storage facility construction activities if credible evidence is observed, submitted, or otherwise obtained that construction activities are not being conducted as specified in the design document.

History: En. Sec. 7, Ch. 399, L. 2015.

82-4-379. Tailings operation, maintenance, and surveillance manual. (1) A tailings operation, maintenance, and surveillance manual is required for a tailings storage facility.

(2) For a tailings storage facility that exists on or before October 1, 2015, the tailings operation, maintenance, and surveillance manual must be developed within 180 days of October 1, 2015. For a tailings storage facility proposed after October 1, 2015, the tailings operation,

maintenance, and surveillance manual must be developed prior to issuance of the draft permit pursuant to 82-4-337.

(3) The operator or permit applicant shall develop the manual, which must contain:

(a) an identification of the roles and responsibilities of the agents of the operator of the tailings storage facility. The specific organizational role with ultimate responsibility for the tailings storage facility must be identified as the senior ranking agent of the operator at the site of the tailings storage facility.

(b) an identification of necessary maintenance and frequency of maintenance to safely operate the tailings storage facility;

(c) an identification of training needs and training plans for persons with responsibilities identified in the manual;

(d) an identification of operational aspects employed to facilitate, to the extent possible, a maintenance-free closure;

(e) an identification of all inspections and monitoring and the frequency of inspections and monitoring to ensure that the tailings storage facility is performing as intended;

(f) an identification of monitoring and data collection necessary to maintain and calibrate the tailings storage facility's water balance;

(g) a description of how issues identified by routine inspection or monitoring will be resolved and how the progress toward resolution is tracked;

(h) a listing of quantitative performance parameters for construction, operation, and closure. The quantitative performance parameters may be expressed as minimums or maximums for parameters such as embankment crest width, embankment slopes, beach width, operating pool volume, phreatic surface elevation in the embankment and foundation, pore pressures, or other parameters appropriate for the facility and location.

(i) an emergency preparedness and response plan based on the failure modes and effects analysis or other appropriate risk assessment;

(j) an identification of specific trigger levels or events when the department and the engineer of record are immediately notified. When possible, trigger levels must be sufficiently conservative to allow time for corrective actions to be implemented.

(k) any other information necessary to ensure that the tailings storage facility is operated and maintained, is performing, and can be closed as intended.

(4) The engineer of record shall certify by seal that:

(a) the tailings operation, maintenance, and surveillance manual is consistent with the facility's design;

(b) the inspections and monitoring described in the tailings operation, maintenance, and surveillance manual are reasonably sufficient to ensure the tailings storage facility will perform as intended and will reasonably be expected to detect deviations if they occur; and

(c) the emergency preparedness and response plan describes reasonable measures that can be taken to protect human health and the environment.

(5) The operator shall review the tailings operation, maintenance, and surveillance manual annually to ensure that the manual reflects current conditions. Any revision of the manual during operation or at closure must be certified by the seal of the engineer of record.

History: En. Sec. 8, Ch. 399, L. 2015.

82-4-380. Periodic review required. (1) Following department approval of a design document pursuant to 82-4-376 during mining, or as required in a reclamation plan approved pursuant to 82-4-336, the operator shall assemble a panel in accordance with the panel requirements in 82-4-377. A reasonable effort must be made to retain previous panel members. The operator shall assemble the panel at a frequency to be determined by the panel, except that the panel shall assemble:

(a) 6 months prior to the anticipated start of initial construction of the new tailing storage facility and not less than annually afterward until construction is completed or the placement of tailings in the facility is initiated; and

(b) at least once every 5 years after initial construction and until completion of the tailings deposition.

(2) The panel shall:

(a) inspect the tailings storage facility after the initiation of construction;

(b) review the tailings operation, maintenance, and surveillance manual and records collected in association with the manual;

(c) interview people with responsibilities identified in the tailings operation, maintenance, and surveillance manual; and

(d) review annual engineer of record inspection reports, corrective action plans, records associated with construction, and any other aspect, plan, record, document, design, model, or report related to the tailings storage facility that the panel needs to review to ensure that the tailings storage facility is constructed, operated, and maintained as designed and is functioning, can be closed as intended, and meets acceptable engineering standards.

(3) The operator shall provide documents and records necessary for the panel to complete a periodic review.

(4) The panel shall prepare a report detailing the scope of review and include any recommendations resulting from the review.

(5) The panel shall immediately notify the department and the operator if there is an imminent threat to human health or the environment.

(6) The final review report must be signed by each panel member and provided to the department and the operator.

(7) The operator shall prepare a corrective action plan and schedule effectively implementing the recommendations included in the panel's report. The operator shall submit the corrective action plan and schedule to the panel within 60 days after receipt of the panel report.

(8) The panel shall review the corrective action plan and schedule to determine whether the corrective action plan and schedule proposed by the operator will effectively implement the recommendations included in the panel's report.

(9) Within 30 days after receipt of approval from the panel, the operator shall submit the corrective action plan with an implementation schedule to the department.

(10) Failure to implement the corrective action plan pursuant to the implementation schedule is subject to the provisions of 82-4-361 and 82-4-362.

History: En. Sec. 9, Ch. 399, L. 2015; amd. Sec. 5, Ch. 504, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 5, Ch. 504, L. 2025. Amendment effective May 8, 2025.

82-4-381. Annual inspections. (1) The engineer of record shall inspect a tailings storage facility annually during operation or as required during closure pursuant to a reclamation plan under 82-4-336.

(2) (a) The engineer of record shall prepare a report describing the scope of the inspection and actions recommended to ensure the tailings storage facility is properly operated and maintained.

(b) The engineer of record shall submit the report to the operator and the department and immediately notify the department and the operator if the tailings impoundment presents an imminent threat or the potential for an imminent threat to human health or the environment.

(3) (a) If the report contains recommendations, the operator shall prepare a corrective action plan implementing the recommendations of the engineer of record and an implementation schedule.

(b) The operator shall submit the corrective action plan and schedule to the engineer of record.

(c) The corrective actions proposed by the operator must reasonably be expected to effectively address the recommendations contained in the inspection report. The engineer of record shall verify the proposed corrective actions.

(d) The operator shall submit the corrective action plan verified by the engineer of record and the implementation schedule to the department within 120 days following the date of the inspection.

(e) The operator shall implement the corrective action plan pursuant to the implementation schedule.

(4) The department shall conduct inspections, review records, and take other actions necessary to determine if the tailings storage facility is being operated in a manner consistent

with the approved design document and the tailings operation, maintenance, and surveillance manual.

(5) Failure to implement the corrective action plan and the implementation schedule or material deviations from the approved design document or the tailings operation, maintenance, and surveillance manual are subject to the provisions of 82-4-361 and 82-4-362.

History: **En. Sec. 10, Ch. 399, L. 2015.**

82-4-382 through 82-4-389 reserved.

82-4-390. Cyanide heap and vat leach open-pit gold and silver mining prohibited. (1) Open-pit mining for gold or silver using heap leaching or vat leaching with cyanide ore-processing reagents is prohibited except as described in subsection (2).

(2) A mine described in this section operating on November 3, 1998, may continue operating under its existing operating permit or any amended permit that is necessary for the continued operation of the mine.

History: **En. Sec. 1, I.M. No. 137, approved Nov. 3, 1998; amd. Sec. 1, Ch. 457, L. 1999.**

Part 4
Opencut Mining Reclamation

Part Cross-References

Landowner notification of surface operations, Title 82, ch. 2, part 3.

82-4-401. Short title. This part shall be known and may be cited as "The Opencut Mining Act".

History: **En. Sec. 1, Ch. 326, L. 1973; R.C.M. 1947, 50-1501.**

82-4-402. Intent, findings, and policy. (1) The legislature, mindful of its constitutional obligations under Article II, section 3, and Article IX of the Montana constitution, has enacted The Opencut Mining Act. It is the legislature's intent that the requirements of this part provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(2) Because the extraction and use of opencut materials is important to the economy of this state, it is the policy of this state to provide for the reclamation and conservation of land subjected to opencut operations. Therefore, it is the purpose of this part:

(a) to preserve natural resources;

(b) to aid in the protection of wildlife and aquatic resources;

(c) to safeguard and reclaim through effective means and methods all agricultural, recreational, home, and industrial sites subjected to or that may be affected by opencut operations;

(d) to protect and perpetuate the taxable value of property through reclamation;

(e) to protect scenic, scientific, historic, or other unique areas; and

(f) to promote the health, safety, and general welfare of the people of this state.

History: **En. Sec. 2, Ch. 326, L. 1973; amd. Sec. 2, Ch. 209, L. 1974; amd. Sec. 2, Ch. 235, L. 1974; R.C.M. 1947, 50-1502; amd. Sec. 1, Ch. 280, L. 1987; amd. Sec. 8, Ch. 507, L. 1999; amd. Sec. 1, Ch. 325, L. 2001; amd. Sec. 33, Ch. 361, L. 2003; amd. Sec. 2, Ch. 385, L. 2007.**

82-4-403. Definitions. When used in this part, unless a different meaning clearly appears from the context, the following definitions apply:

(1) "Affected land" means the area of land and land covered by water that is disturbed by opencut operations. A private road may be included as affected land only with the landowner's consent.

(2) "Amendment" means a change to the approved permit.

(3) "Board" means the board of environmental review provided for in 2-15-3502.

(4) "Department" means the department of environmental quality provided for in 2-15-3501.

(5) "Landowner" means the holder of legal title to land subjected to an opencut operation.

(6) "Materials" means bentonite, clay, scoria, peat, sand, soil, gravel, or mixtures of those substances.

(7) "Occupied dwelling unit" means a structure with permanent water and sewer facilities that is used as a home, residence, or sleeping place by at least one person who maintains a household that is lived in as a primary residence.

(8) "Opencut operation" means activities conducted for the primary purpose of sale or utilization of materials, including:

(a) mine site preparation;

(b) (i) removing the overburden and mining directly from the exposed natural deposits; or

(ii) mining directly from natural deposits of materials;

(c) processing of materials mined from the natural deposits, except that processing facilities located more than 300 feet from where materials were mined or are permitted to be mined are not part of the opencut operation;

(d) transporting, depositing, staging, and stockpiling of overburden and materials unless the activity occurs more than 300 feet from where the materials were mined or are permitted to be mined;

(e) storing or stockpiling of materials at processing facilities that are part of the opencut operation;

(f) reclamation of affected land; and

(g) parking or staging of vehicles, equipment, or supplies unless:

(i) the activity is separated from other opencut operations by at least 25 feet and is connected to the opencut operation by a single road that is no more than 25 feet wide; or

(ii) the activity is inside the construction disturbance area shown on a construction project plan.

(9) "Operator" means a person who holds a permit issued pursuant to this part. For purposes of enforcing the provisions of this part, the term also includes any person conducting opencut operations on affected land that is not covered by a permit.

(10) "Overburden" means the earth that lies above a natural deposit of materials.

(11) "Person" means:

(a) a natural person;

(b) a firm, association, partnership, cooperative, or corporation;

(c) a department, agency, or instrumentality of the state or any governmental subdivision; or

(d) any other entity.

(12) "Plan of operation" means a plan that:

(a) meets the requirements of 82-4-434; and

(b) contains a description of current land use, topographical data, hydrologic data, soils data, proposed mine areas, proposed mining and processing operations, proposed reclamation, and appropriate maps.

(13) "Processing facilities" means:

(a) crushers, screens, and pug mills;

(b) asphalt, wash, and concrete plants;

(c) treatment, sedimentation, or retention areas for processing facilities; and

(d) areas receiving washout from vehicles and equipment using the processing facilities.

(14) "Reclamation" means the reconditioning of affected land to make the area suitable for productive use, including but not limited to forestry, agriculture, grazing, wildlife, recreation, or residential or industrial development.

(15) "Soil" means the dark or root-bearing surface matter that has been generated through time by the interaction of biological activity, climate, topography, and parent material and that is capable of sustaining plant growth and is recognized and identified as such by standard authorities and methods.

(16) "Water conveyance facilities" means existing diversions, aqueducts, canals, ditches, drains, flumes, headgates, syphons, or other structures or infrastructure actively used to facilitate the beneficial use of a water right under Title 85.

History: En. Sec. 4, Ch. 326, L. 1973; amd. Sec. 4, Ch. 209, L. 1974; amd. Sec. 4, Ch. 235, L. 1974; amd. Sec. 17, Ch. 39, L. 1977; R.C.M. 1947, 50-1504; amd. Sec. 2, Ch. 280, L. 1987; amd. Sec. 402, Ch. 418, L. 1995; amd. Sec. 9, Ch. 507, L. 1999; amd. Sec. 3, Ch. 385, L. 2007; amd. Sec. 2, Ch. 198, L. 2013; amd. Sec. 2, Ch. 545, L. 2021.

82-4-404. Exemption — operations covered by metal mine reclamation. Nothing in this part may be construed to be applicable to mining or exploration operations which are regulated under the provisions of part 3 of this chapter.

History: En. Sec. 18, Ch. 326, L. 1973; amd. Sec. 29, Ch. 39, L. 1977; R.C.M. 1947, 50-1516.

Cross-References

Landowner notification of surface operations, Title 82, ch. 2, part 3.

82-4-405. Inapplicability to government. The provisions of this part relating to fees or bonds do not apply to the federal government or its agencies, the state of Montana, counties, cities, or towns.

History: En. 50-1516.1 by Sec. 1, Ch. 81, L. 1975; amd. Sec. 30, Ch. 39, L. 1977; R.C.M. 1947, 50-1516.1; amd. Sec. 10, Ch. 507, L. 1999; amd. Sec. 5, Ch. 477, L. 2009; amd. Sec. 3, Ch. 334, L. 2019; amd. Sec. 2, Ch. 428, L. 2021.

82-4-406. Exemption — opencut operations on federal and state lands. This part is not applicable to operations on certain federal and state lands as specified by the department, provided it is first determined by the department that laws, regulations, or rules administered or issued by the federal or state agency administering or having jurisdiction over the affected land impose controls for opencut operations on those lands equal to or greater than those imposed by this part.

History: En. 50-1517 by Sec. 1, Ch. 219, L. 1975; amd. Sec. 31, Ch. 39, L. 1977; R.C.M. 1947, 50-1517; amd. Sec. 4, Ch. 385, L. 2007; amd. Sec. 105, Ch. 324, L. 2021.

Cross-References

Sovereignty and jurisdiction of state, 2-1-102.

82-4-421. Repealed. Sec. 18, Ch. 385, L. 2007.

History: En. Sec. 5, Ch. 326, L. 1973; amd. Sec. 18, Ch. 39, L. 1977; R.C.M. 1947, 50-1505; amd. Sec. 403, Ch. 418, L. 1995.

82-4-422. Powers, duties, and functions. (1) The department has the powers, duties, and functions to:

(a) issue permits when, on the basis of the information set forth in the application and an evaluation of the proposed opencut operations, the department finds that the requirements of this part and rules adopted to implement this part will be observed;

(b) amend permits in accordance with the provisions of 82-4-436;

(c) reclaim any affected land with respect to which a bond has been forfeited;

(d) make investigations or inspections that are considered necessary to ensure compliance with any provision of this part; and

(e) enforce and administer the provisions of this part and issue orders necessary to implement the provisions of this part.

(2) The department shall:

(a) adopt rules that pertain to opencut operations in order to accomplish the purposes of this part;

(b) adopt rules:

(i) establishing uniform procedures for filing of necessary records;

(ii) providing procedures for the issuance of permits and filing of annual reports; and

(iii) providing other administrative requirements necessary to implement this part.

(3) The board shall conduct hearings and, for the purposes of conducting those hearings, administer oaths and affirmations, subpoena witnesses, compel attendance of witnesses, hear evidence, and require the production of any books, papers, correspondence, memoranda, agreements, documents, or other records relevant or material to the inquiry.

History: En. Sec. 6, Ch. 326, L. 1973; amd. Sec. 19, Ch. 39, L. 1977; R.C.M. 1947, 50-1506; amd. Sec. 404, Ch. 418, L. 1995; amd. Sec. 11, Ch. 507, L. 1999; amd. Sec. 15, Ch. 79, L. 2001; amd. Sec. 2, Ch. 325, L. 2001; amd. Sec. 5, Ch. 385, L. 2007; amd. Sec. 106, Ch. 324, L. 2021.

82-4-423. Repealed. Sec. 18, Ch. 385, L. 2007.

History: En. Sec. 3, Ch. 326, L. 1973; amd. Sec. 3, Ch. 209, L. 1974; amd. Sec. 3, Ch. 235, L. 1974; amd. Sec. 16, Ch. 39, L. 1977; R.C.M. 1947, 50-1503; amd. Sec. 3, Ch. 280, L. 1987; amd. Sec. 405, Ch. 418, L. 1995; amd. Sec. 12, Ch. 507, L. 1999.

82-4-424. Receipt and expenditure of funds — disposition of penalties and other money. (1) The department may receive any federal funds, state funds, or any other funds for the reclamation of affected land. The department may cause the reclamation work to be done by its employees, by employees of other governmental agencies, by soil conservation districts, or through contracts with qualified persons.

(2) All penalties and other money paid under the provisions of this part, except fees provided for in 82-4-437, must be deposited in the environmental rehabilitation and response account in the state special revenue fund provided for in 75-1-110. Funds held by the department as bond or as a result of bond forfeiture that are no longer needed for reclamation and for which the department is not able to locate a surety or other person who owns the funds after diligent search must be deposited in the environmental rehabilitation and response account in the state special revenue fund.

History: En. Sec. 11, Ch. 326, L. 1973; amd. Sec. 24, Ch. 39, L. 1977; R.C.M. 1947, 50-1511; amd. Sec. 1, Ch. 431, L. 1991; amd. Sec. 406, Ch. 418, L. 1995; amd. Sec. 5, Ch. 338, L. 2001; amd. Sec. 6, Ch. 385, L. 2007; amd. Sec. 6, Ch. 477, L. 2009; amd. Sec. 4, Ch. 334, L. 2019.

Cross-References

Powers of soil conservation district, 76-15-403.

82-4-425. Inspection of opencut operations. The department or its representatives may enter upon lands subjected to opencut operations at all reasonable times for the purpose of inspection to determine whether the provisions of this part have been complied with. The department shall attempt to provide reasonable notice to a permitted operator when practicable under the circumstances.

History: En. Sec. 12, Ch. 326, L. 1973; amd. Sec. 25, Ch. 39, L. 1977; R.C.M. 1947, 50-1512; amd. Sec. 407, Ch. 418, L. 1995; amd. Sec. 7, Ch. 385, L. 2007; amd. Sec. 3, Ch. 198, L. 2013; amd. Sec. 5, Ch. 334, L. 2019.

82-4-426. Reclamation of land on which bond forfeited. In keeping with the provisions of this part, the department or its agents or contractors may enter and reclaim any affected land with respect to which a bond has been forfeited.

History: En. Sec. 14, Ch. 326, L. 1973; amd. Sec. 27, Ch. 39, L. 1977; R.C.M. 1947, 50-1514; amd. Sec. 408, Ch. 418, L. 1995; amd. Sec. 72, Ch. 509, L. 1995; amd. Sec. 6, Ch. 338, L. 2001; amd. Sec. 8, Ch. 385, L. 2007; amd. Sec. 6, Ch. 334, L. 2019.

82-4-427. Hearing — appeal — venue. (1) (a) Subject to subsections (1)(b) and (1)(c), a person whose interests are or may be adversely affected by a final decision of the department to approve or disapprove a permit application and accompanying material or a permit amendment application and accompanying material under this part is entitled to a hearing before the board if a written request stating the reasons for the appeal is submitted to the board within 30 days of the department's decision.

(b) If an application was noticed publicly as required by this part, to be eligible to file for an appeal a person must have either submitted comments to the department on an application or submitted comments at a public meeting held under 82-4-432.

(c) Subsection (1)(b) does not apply to a person filing for an appeal of an application that was not required to be noticed publicly by this part.

(2) An operator may request a hearing before the board on:

(a) a final decision of the department director pursuant to 82-4-436(4) by submitting a request for a hearing within 15 days of receipt of notice of the director's decision; and

(b) an order of suspension or revocation issued under 82-4-442 by filing a request for hearing within 30 days of receipt of the decision.

(3) The operator or the landowner may request a hearing before the board on a decision on a bond release application by submitting a written request stating the reasons for the appeal within 30 days of the receipt of the decision.

(4) The contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6, apply to a hearing held under this section.

(5) A petition for judicial review of a board decision made pursuant to this section must be brought in the county in which the permitted activity is proposed to occur. If an activity is proposed to occur in more than one county, the action may be brought in any of the counties in which the activity is proposed to occur.

(6) The petition for judicial review must include the party to whom the permit was issued or the applicant unless otherwise agreed to by the permitholder or applicant. All judicial challenges of permits for projects with a project cost, as determined by the court, of more than $1 million must have precedence over any civil cause of a different nature pending in that court. If the court determines that the challenge was without merit or was for an improper purpose, such as to harass, to cause unnecessary delay, or to impose needless or increased cost in litigation, the court may award attorney fees and costs incurred in defending the action.

History: En. Sec. 15, Ch. 326, L. 1973; amd. Sec. 28, Ch. 39, L. 1977; R.C.M. 1947, 50-1515; amd. Sec. 409, Ch. 418, L. 1995; amd. Sec. 13, Ch. 507, L. 1999; amd. Sec. 16, Ch. 79, L. 2001; amd. Sec. 34, Ch. 361, L. 2003; amd. Sec. 17, Ch. 337, L. 2005; amd. Sec. 9, Ch. 385, L. 2007; amd. Sec. 4, Ch. 198, L. 2013; amd. Sec. 7, Ch. 334, L. 2019; amd. Sec. 50, Ch. 535, L. 2021.

Cross-References

Montana Administrative Procedure Act, Title 2, ch. 4.

82-4-428 through 82-4-430 reserved.

82-4-431. Permit for mining, processing, and reclamation required. (1) Except as provided in subsections (2) and (3), a permit is required for an operator who:

(a) conducts an opencut operation that results in the removal of more than 10,000 cubic yards of materials and overburden; or

(b) conducts an opencut operation where less than 10,000 cubic yards of materials and overburden are removed from the site and:

(i) the open cut operation affects surface water, including intermittent or perennial streams, ground water, or water conveyance facilities; or

(ii) has never held a permit pursuant to this part.

(2) (a) An operator who holds a permit under this part may conduct a limited opencut operation without first securing an additional permit or an amendment to an existing permit if the limited opencut operation meets the following criteria:

(i) the area to be disturbed by the limited opencut operation is located more than one-half mile from the operator's nearest existing limited opencut operation;

(ii) the total amount of materials and overburden removed does not exceed 10,000 cubic yards and the total area from which the materials and overburden are removed does not exceed 5 acres;

(iii) the operator:

(A) submits appropriate site and opencut operation information on a limited opencut operation form provided by the department;

(B) within 1 year of the department's receipt of the limited opencut operation form, salvages all soil from the area to be disturbed, removes the materials, grades the affected land to 3:1 or flatter slopes, blends the graded land into the surrounding topography, replaces an appropriate amount of overburden and all soil, and reclaims to conditions present prior to mining all access roads used for the operation unless the landowner requests in writing that specific roads or portions of the roads remain open. Roads left open at the landowner's request must be sized to support the use of the road after opencut operations.

(C) at the first seasonal opportunity, seeds or plants all affected land with vegetative species that meet the requirements of 82-4-434; and

(iv) the limited opencut operation is not:

(A) in intermittent or perennial streams;

(B) in an area where the opencut operation will affect surface water, ground water, a water conveyance facility, or any slope that is steeper than 3:1;

(C) in an area where mining would be restricted by other laws; or

(D) in violation of local zoning regulations adopted under Title 76, chapter 2.

(b) At the operator's request and with department approval, the operator may have up to 1 additional year to perform the reclamation required by subsection (2)(a)(iii), provided the operator does not apply to extend or continue the limited opencut operation pursuant to subsection (2)(c).

(c) (i) An operator who commences a limited opencut operation pursuant to subsection (2)(a) may apply for a permit to continue or expand that opencut operation pursuant to the provisions of this subsection (2)(c).

(ii) The permit application must be complete within 180 days of the department's receipt of the limited opencut operation form.

(iii) If the complete permit application is acceptable within 1 year of the department's receipt of the limited opencut operation form, the provisions of subsections (2)(a)(iii)(B) and (2)(a)(iii)(C) do not apply and reclamation must be conducted as prescribed in the permit.

(iv) If the complete permit application is not acceptable within 1 year of the department's receipt of the limited opencut operation form, the application is considered abandoned and void. Starting 3 days after the department notifies the applicant that the application is considered abandoned and void, the applicant has 180 days to complete the reclamation provided for in subsections (2)(a)(iii)(B) and (2)(a)(iii)(C).

(v) If the permit application is withdrawn by the applicant within 1 year of the department's receipt of the limited opencut operation form, the reclamation provided for in subsections (2)(a)(iii)(B) and (2)(a)(iii)(C) must be completed within 180 days of the date of the withdrawal.

(3) A landowner may remove up to 10,000 cubic yards of opencut materials on the landowner's property for personal or agricultural uses without obtaining a permit, unless the removal affects surface water, including intermittent or perennial streams, ground water, or water conveyance facilities.

(4) The department may deny an application for issuance of a permit under subsection (1) or may prohibit the operator from conducting a limited opencut operation under subsection (2)(a) if, at the time of application or notification, the operator has a pattern of violations or is in current violation of this part, rules adopted under this part, or provisions of a permit.

(5) A permit is effective when the department provides written notice to the applicant that the information and materials provided to the department meet the requirements of this part and rules adopted pursuant to this part.

(6) (a) Except as provided in subsection (6)(b), a permit issued under this part expires on the reclamation date proposed by the operator and approved by the department.

(b) Prior to the expiration of a permit:

(i) the operator may file an application to amend the plan of operation to extend the reclamation date pursuant to 82-4-434(4)(a);

(ii) the department may amend the plan of operation pursuant to 82-4-436;

(iii) the department may revoke the permit pursuant to 82-4-442;

(iv) the operator and the department may agree to terminate the permit upon mutual written consent;

(v) (A) for a site permitted or for which an amendment was approved in 2010 or later, the operator may apply to extend the reclamation date on a site by submitting a form furnished by the department and provide an updated landowner consultation form and bond, if applicable; or

(B) for a site permitted or for which an amendment was approved prior to 2010, the department may use its discretion to allow the operator to request an extended reclamation date pursuant to subsection (6)(b)(v)(A); or

(vi) the operator may change the postmine land use on a site by submitting the request on a form furnished by the department and provide an updated landowner consultation form and bond, if applicable.

(7) The expiration or termination of a permit issued under this part does not relieve an operator from the obligation to conduct reclamation as required by the plan of operation or the liability for costs of reclamation exceeding the amount of the bond.

History: En. Sec. 7, Ch. 326, L. 1973; amd. Sec. 20, Ch. 39, L. 1977; R.C.M. 1947, 50-1507; amd. Sec. 4, Ch. 280, L. 1987; amd. Sec. 3, Ch. 408, L. 1991; amd. Sec. 2, Ch. 431, L. 1991; amd. Public contracts generally, Title 18, ch. 1.

82-4-432. Application for permit — contents — issuance — amendment. (1) (a) An operator who requires a permit pursuant to 82-4-431 shall apply for a permit on forms furnished by the department prior to commencing operations.

(b) Operations subject to subsections (2) through (13) are those:

(i) that affect ground water or surface water, including intermittent or perennial streams, or water conveyance facilities; or

(ii) where 10 or more occupied dwelling units are within one-half mile of the permit boundary of the operation.

(c) All other operations are subject to subsection (14).

(2) (a) An application for a permit pursuant to subsections (2) through (13) must be made using forms furnished by the department and must contain the following:

(i) the name of the applicant and, if other than the owner of the land, the name and address of the owner;

(ii) the type of operation to be conducted;

(iii) the estimated volume of overburden and materials to be removed;

(iv) the location of the proposed opencut operation by legal description and county accompanied by a map showing the location of the proposed operation sufficient to allow the public to locate the proposed site; and

(v) a statement that the applicant has the legal right to mine the designated materials in the lands described.

(b) The application must be accompanied by:

(i) a bond or security meeting the requirements as set out in this part;

(ii) a statement from the local governing body having jurisdiction over the area to be mined certifying that the proposed sand and gravel opencut operation complies with applicable local zoning regulations adopted under Title 76, chapter 2, and in effect prior to the filing of a permit application or at the time a written request is received for a preapplication meeting pursuant to this section;

(iii) a plan of operation that contains information sufficient to initiate acceptability review by addressing the requirements of 82-4-434 and rules adopted pursuant to this part related to 82-4-434;

(iv) written documentation that the landowner has been consulted about the proposed plan of operation;

(v) a written agreement between the landowner and the operator authorizing the operator access to the site to perform reclamation if the landowner revokes or otherwise terminates the operator's right to mine;

(vi) a list that is certified by the operator and generated on a form furnished by the department using cadastral and field information at the time of permit application of owners of real property on which occupied dwelling units exist located within one-half mile of the proposed permit boundary using the owners of record as shown no more than 60 days prior to the submission of an application in the paper or electronic records of the county clerk and recorder for the county where the proposed opencut operation is located; and

(vii) documentation of consultation with the state historic preservation office regarding possible archaeological or historical values on the affected land.

(3) If, prior to applying for a permit, a person notifies the department of the intention to submit an application and requests that the department examine the area to be mined, the department shall examine the area and make recommendations to the person regarding the proposed opencut operation. The person may request a preapplication meeting with the department. The department shall hold a meeting if requested.

(4) (a) (i) Except as provided in 75-1-208(4)(b), upon receipt of an application, the department shall, within 5 working days, review the application and notify the person as to whether or not the application is complete. An application is complete if it contains the items listed in subsections (1) and (2). If the department determines that the application is not complete, the department shall notify the applicant in writing and include a detailed identification of information necessary to make the application complete.

(ii) The time limit provided in subsection (4)(a)(i) applies to each submittal of the application until the department determines that the application is complete.

(b) (i) A determination that an application is complete does not ensure that the application is acceptable and does not limit the department's ability to request additional information or inspect the site during the review process.

(ii) Upon determining that an application is complete, the department shall begin reviewing the application for acceptability pursuant to this section.

(iii) The department shall accept public comment throughout the review process.

(c) The department may declare an application abandoned and void if:

(i) the applicant fails to respond to the department's written request for more information within 1 year; and

(ii) the department notifies the applicant of its intent to abandon the application and the applicant fails to provide information within 30 days.

(d) The department shall notify the applicant when an application is complete and post the complete application on the department's website.

(5) Within 15 days after the department sends notice of a complete application to the applicant, the applicant shall provide public notice, which must include:

(a) the name, address, and telephone number of the applicant;

(b) a description of the acreage, the estimated volume of overburden and materials to be removed, the type of materials to be removed, the facilities, the duration of activities, and the access points of the proposed opencut operation;

(c) a legal description of the proposed opencut operation and a map, or directions on how to access a map, showing the location of the proposed opencut operation and immediately surrounding property; and

(d) on a form provided by the department, notification that the application is complete and information on how to request a public meeting pursuant to this section.

(6) To provide public notice, the applicant shall:

(a) publish notice at least twice in a newspaper of general circulation in the locality of the proposed opencut operation. A map is not required in the notice if, in addition to the legal description of the proposed opencut operation, the notice provides an address for the map posted on the department's website and instructions for obtaining a paper copy of the map from an applicant. If the notice does not include a map, the applicant shall promptly provide a paper copy to a requestor.

(b) mail the notice by first-class mail to the board of county commissioners of the county in which the proposed opencut operation is located and to surface owners of land located within one-half mile of the boundary of the proposed opencut permit area using the most current known owners of record as shown in the paper or electronic records of the county clerk and recorder for the county where the proposed opencut operation is located;

(c) post the notice in at least two prominent locations at the site of the proposed opencut operation, including near a public road if possible; and

(d) provide the department with the names and addresses of those notified pursuant to subsection (6)(b).

(7) (a) Except as provided in subsection (7)(b), the department shall accept requests for a public meeting for 45 days after the department sends notice to the applicant of a complete application. Within this period, unless a public meeting is required pursuant to subsection (9), the department shall notify the applicant as to whether or not the application is acceptable pursuant to subsection (10).

(b) If the applicant and the department mutually agree or the applicant submits documentation on a form provided by the department showing that a public meeting will not be required pursuant to subsection (9), the department shall inform the applicant within 30 days of the notice of a complete application as to whether or not the application is acceptable pursuant to subsection (10).

(8) If a public meeting is required pursuant to subsection (9), within 30 days from the closing date of the public meeting request period in subsection (7), the department shall:

(a) hold a meeting; and

(b) notify the applicant as to whether or not the application is acceptable pursuant to subsection (10) or that the application requires an extended review pursuant to 82-4-439.

(9) (a) The department shall hold a public meeting in the area of the proposed opencut operation at the request of:

(i) the applicant; or

(ii) at least 51% of the real property owners on which occupied dwelling units exist or 10 real property owners on which occupied dwelling units exist, whichever is greater, notified pursuant to this section. For the purposes of this subsection (9)(a)(ii), multiple owners of the same occupied dwelling unit are to be counted as a single real property owner.

(b) To provide notice for a public meeting, the department shall notify by first-class mail or electronically the property owners on the list provided by the applicant pursuant to this section and the board of county commissioners in the county where the proposed opencut operation is located.

(10) (a) An application is acceptable if it complies with the requirements of subsections (1) and (2) and includes a plan of operation that satisfies the requirements of 82-4-434 and rules adopted pursuant to this part related to 82-4-434. If the department determines that the application is not acceptable, the department shall notify the applicant in writing and include a detailed identification of all deficiencies.

(b) Within 10 working days of receipt of the applicant's response to the identified deficiencies, the department shall review the responses and notify the applicant as to whether or not the application is acceptable. If the application is unacceptable, the department shall notify the applicant in writing and include a detailed identification of the deficiencies.

(c) If the application is acceptable, the department shall issue a permit to the operator that entitles the operator to engage in the opencut operation on the land described in the application.

(11) (a) An operator may amend a permit by submitting an amendment application to the department. Upon receipt of the amendment application, the department shall review it in accordance with the requirements and procedures in this section. If the amendment application is acceptable, the department shall issue an amendment to the original permit.

(b) An application for an amendment is not subject to the public notice or public meeting requirements of this section or an extended review pursuant to 82-4-439 unless it proposes an increase in permitted acreage of 50% or more of the amount of permitted acreage in the current permit.

(c) For amendment applications not subject to the public notice and public meeting requirements of this section, the department shall, within 45 days of notifying the applicant that the application is complete, notify the applicant as to whether or not the application is acceptable pursuant to subsection (10).

(12) (a) Except as provided in subsection (12)(b), if weather or other field conditions prevent the department from conducting an adequate site inspection to evaluate a permit or amendment application, the time limits provided in subsections (7) and (11) are suspended until the weather or other field conditions allow for an adequate site inspection.

(b) Before suspending time limits, the department shall allow the operator to provide the information needed from a site inspection by other means, including but not limited to surveys, photos, videos, or other reports.

(13) The department shall post a copy of an acceptable permit or amendment on its website.

(14) (a) Operations not described by subsection (1)(b) that apply for a permit or an amendment shall submit:

(i) a landowner consultation form;

(ii) documentation of consultation with the state historic preservation office regarding possible archaeological or historical values on the affected land;

(iii) a reclamation bond calculated pursuant to the requirements of 82-4-433 unless exempt pursuant to 82-4-405;

(iv) if applicable, documentation of compliance with Title 87, chapter 5, part 9;

(v) a statement from the local governing body having jurisdiction over the area to be mined certifying that the proposed sand and gravel opencut operation complies with applicable local zoning regulations adopted under Title 76, chapter 2, and in effect prior to the filing of a permit application or at the time a written request is received for a preapplication meeting pursuant to this section;

(vi) results from three soil test pits meeting the soil guideline requirements;

(vii) the appropriate fee as set forth in 82-4-437 and a $500 fee to be deposited in the opencut fund pursuant to 82-4-438;

(viii) the proposed permit boundary in a format acceptable to the department and a location map;

(ix) a certification from the operator that there are fewer than 10 occupied dwelling units within one-half mile of the permit boundary of the operation no more than 60 days from the date the application materials are submitted;

(x) certification from the operator that notice of the proposed opencut operation was:

(A) published at least twice in a newspaper of general circulation in the locality of the proposed opencut operation;

(B) mailed to surface owners of land located within one-half mile of the boundary of the proposed opencut permit area using the most current known owners of record as shown in the paper or electronic records of the county clerk and recorder for the county where the proposed opencut operation is located. If the notice does not include a map, the applicant shall promptly provide a copy to a requestor.

(C) posted in at least two prominent locations at the site of the proposed opencut operation, including near a public road if possible;

(xi) the date the site is to be fully reclaimed.

(b) Except as provided in 75-1-208(4)(b), upon receipt of an application under this subsection (14), the department shall, within 5 working days, review the application and notify the person as to whether or not the application is complete. An application is complete if it contains the items listed in subsection (14)(a). If the department determines that the application is not complete, the department shall notify the applicant in writing and include a detailed identification of information necessary to make the application complete.

(c) Upon determining that an application is complete, the department shall begin reviewing the application for acceptability pursuant to this section. Public comment may be submitted throughout the review period.

(d) Within 15 days of receiving the information required by subsection (14)(a), the department shall determine if the information meets the requirements of subsection (14)(a) and notify the operator in writing. If the requirements are met, the operator may commence the operation on receipt of the notification.

(e) If the information submitted does not meet the requirements of subsection (14)(a), the department shall notify the applicant in writing and include a detailed identification of all deficiencies.

(f) Within 10 working days of receipt of the applicant's response to the identified deficiencies, the department shall review the responses and notify the applicant as to whether the information submitted meets the requirements of subsection (14)(a). If the information submitted does not meet the requirements, the department shall notify the applicant in writing and include a detailed identification of the deficiencies.

(g) If the information submitted to the department meets the requirements of subsection (14)(a), the department shall notify the operator in writing. On receipt of the notification, the operator may commence opencut operations on the land described in the application.

(h) The department may prohibit an operation under this section if, at the time of submission of information required by subsection (14)(a), the operator has a pattern of violations of this part or is in current violation of this part, rules adopted under this part, or provisions of a permit.

(i) Prior to removing materials, the operator shall salvage all of the soil from the area to be disturbed.

(j) Prior to the final reclamation date, the operator shall grade the affected land to 3:1 or flatter slopes for rangeland and to 5:1 or flatter slopes for farmland and cropland, blend the graded land into the surrounding topography, replace an appropriate amount of overburden and all soils, and reclaim to conditions either present prior to operations or as specified by the landowner, including all access roads used for the operation unless the landowner requests in writing that specific roads or portions of roads remain in place. Roads left at the landowner's request must be sized to support the use of the road after operations.

History: **En. Sec. 8, Ch. 326, L. 1973; amd. Sec. 21, Ch. 39, L. 1977; R.C.M. 1947, 50-1508; amd. Sec. 4, Ch. 408, L. 1991; amd. Sec. 411, Ch. 418, L. 1995; amd. Sec. 15, Ch. 507, L. 1999; amd. Sec. 13, Ch. 299, L. 2001; amd. Sec. 3, Ch. 325, L. 2001; amd. Sec. 11, Ch. 385, L. 2007; amd. Sec. 7, Ch. 477, L. 2009; amd. Sec. 6, Ch. 198, L. 2013; amd. Sec. 9, Ch. 334, L. 2019; amd. Sec. 4, Ch. 545, L. 2021.**

82-4-433. Bond. (1) Before a permit or permit amendment may be issued, a surety bond made payable to the state of Montana and conditioned upon the operator's full compliance with all requirements of this part, the rules adopted under this part, and the permit must be submitted to and approved by the department. The bond must be signed by the applicant as principal and by a good and sufficient corporate surety licensed to do business in the state of Montana. The bond amount must be determined by the department at the cost of reclamation of the affected land by the department. The applicant shall submit a bond that is no less than the amount determined by the department.

(2) (a) For opencut operations on federal land within the state, the department may accept a bond payable to the state of Montana and the federal agency administering the land. The bond must provide at least the same amount of financial guarantee as required by this part.

(b) The bond must provide that the department may forfeit the bond without the concurrence of the federal land management agency. The bond may provide that the federal land management agency may forfeit the bond without the concurrence of the department. Upon forfeiture by either agency, the bond must be payable to the department and may also be payable to the federal land management agency. If the bond is payable to the department and the federal land management agency, the department, before accepting the bond, shall enter into an agreement or memorandum of understanding with the federal land management agency providing for administration of the bond funds in a manner that will allow the department to provide for compliance with the requirements of this part, the rules adopted under this part, and the permit.

(3) In lieu of submitting a surety bond pursuant to subsection (1), the operator may submit cash, a certificate of deposit, a letter of credit in a form acceptable to the department, or a bond with property sureties in an amount equal to that of the required bond on conditions as prescribed in this part. In the discretion of the department, surety bond requirements may be fulfilled by the operator's posting a bond with land and improvements and facilities located on the land as security, in which event a surety may not be required but the department may require that the amount of the bond be adjusted to reimburse the department for foreclosure costs.

(4) The bond or other security must be increased or reduced as provided in this part.

(5) The bond or security remains in effect until the affected land has been reclaimed as provided under the permit and the department has approved the reclamation and released the bond or security. The bond or security may cover only actual affected land and must be increased or reduced to cover only unreclaimed acreages.

(6) If the license of a surety that has issued a bond filed with the department pursuant to this part is suspended or revoked, the operator, within 30 days after receiving notice of the suspension or revocation from the department, shall substitute a good and sufficient bond from another surety licensed to do business in the state or shall submit another type of security pursuant to subsection (3). Upon failure of the operator to make the bond substitution within the 30-day time period, the department shall suspend the permit of the operator to conduct opencut operations upon the land described in the permit until the substitution has been made. If the operator demonstrates in writing that the operator has been pursuing a replacement bond in good faith but additional time is necessary to complete the transaction, the department may grant up to an additional 60 days for the operator to submit a replacement bond before suspending the permit.

(7) Whenever an operator has completed all of the reclamation requirements under the provisions of this part as to any affected land, the operator shall notify the department of the completed requirements and may request bond release. If the department releases the operator from further obligation regarding any affected land, the bond must be reduced proportionately. Within 365 days of receiving the bond release request, the department shall notify the operator and the landowner in writing of the decision on the bond release application.

(8) If the operator fails to complete reclamation as required, the bond is forfeited. The surety is liable to the state for the bond amount. The operator is liable for the remainder of the reasonable costs to the state of reclaiming the operation.

(9) (a) If the bond is canceled by the surety, the operator shall provide a replacement bond to the department within 30 days after receiving notice of the cancellation. The department may extend this timeframe if the operator exercised due diligence in attempting to obtain a replacement bond within the time required.

(b) The permit is suspended by operation of law if the operator fails to submit a replacement bond within 30 days or within an extended period provided by the department pursuant to subsection (9)(a).

(c) A suspended permit is reinstated upon department approval of a replacement bond.

History: **En. Sec. 9, Ch. 326, L. 1973; amd. Sec. 22, Ch. 39, L. 1977; R.C.M. 1947, 50-1509; amd. Sec. 1, Ch. 138, L. 1983; amd. Sec. 5, Ch. 280, L. 1987; amd. Sec. 3, Ch. 431, L. 1991; amd. Sec. 412, Ch. 418, L. 1995; amd. Sec. 16, Ch. 507, L. 1999; amd. Sec. 2, Ch. 32, L. 2005; amd. Sec. 12, Ch. 385, L. 2007; amd. Sec. 7, Ch. 198, L. 2013; amd. Sec. 10, Ch. 334, L. 2019.**

82-4-434. Plan of operation — requirements. (1) The department shall accept a plan of operation if the department finds that the plan complies with the requirements of this part and the rules adopted pursuant to this part and that after the opencut operation is completed, the affected land will be reclaimed to a productive use. Once the plan of operation is accepted by the department, it becomes a part of the permit but is subject to annual review and amendment by the department. Any amendment by the department must comply with the provisions of 82-4-436(2).

(2) A plan of operation must provide:

(a) that the affected land will be reclaimed for one or more specified uses, including but not limited to agriculture, forest, pasture, orchard, cropland, residence, recreation, industry, habitat for wildlife, including food, cover, or water, or other reasonable, practical, and achievable uses;

(b) that soil and other suitable overburden will be salvaged and replaced on affected land, when required by the postmining land use, after completion or termination of that particular phase of the opencut operation. The depth of soil and other suitable overburden to be placed on the reclaimed area must be specified in the plan.

(c) that grading will result in a postmining topography conducive to the designated postmining land use;

(d) that waste will be buried on site in a manner that protects water quality and is compatible with the postmining land use or will be disposed of off site in accordance with state laws and rules;

(e) that all access, haul, and other support roads will be located, constructed, and maintained in a manner that controls and minimizes erosion;

(f) that archaeological and historical values on affected lands will be given legally required protection;

(g) that except for those postmining land uses that do not require vegetation, each surface area of the mined premises that will be disturbed will be revegetated when its use for the opencut operation is no longer required;

(h) that seeding and planting will be done in a manner to achieve a permanent vegetative cover that is suitable for the postmining land use and that retards erosion;

(i) that reclamation will be as concurrent with the opencut operation as feasible and will be completed within a specified length of time;

(j) a declaration by the operator that the operator will comply with applicable federal, state, county, or local regulations, ordinances, and permits, licenses, and approvals for the operation;

(k) for the construction of berms between the opencut operation and residences located within 300 feet of the permit boundary; and

(l) procedures to prevent physical harm to water conveyance facilities or that allow the owner of a water conveyance facility to authorize in writing the relocation or disturbance of the water conveyance facility.

(3) If reclamation according to the plan of operation is not completed in the time specified, the department may:

(a) pursue an administrative order pursuant to 82-4-441;

(b) after 30 days' written notice, order the operator to cease mining and, if the operator does not cease, issue an order to reclaim, a notice of violation, or an order of abatement;

(c) institute an action to enjoin further operation; or

(d) on request of the operator:

(i) extend the timeframe for reclamation-only activities, including revegetation, up to 5 years by submitting the request on a form furnished by the department and provide an updated landowner consultation form and bond, as appropriate; or

(ii) change the postmine land use by submitting the request on a form furnished by the department and provide an updated landowner consultation form and bond, as appropriate.

(4) (a) At any time during the term of the permit, the operator may for good reason submit to the department a new plan of operation or amendments to the existing plan, including extensions of time for reclamation.

(b) The department may approve the proposed new plan of operation or amendments to the existing plan if:

(i) the new plan of operation or amendments comply with the requirements of this section; and

(ii) (A) the operator has in good faith conducted opencut operations according to the existing plan of operation; or

(B) it is highly improbable that reclamation will be successful unless the existing plan of operation is replaced or amended.

(5) The permit, plan of operation, and amendments accepted by the department are a public record and are open to inspection.

History: En. Sec. 10, Ch. 326, L. 1973; amd. Sec. 23, Ch. 39, L. 1977; R.C.M. 1947, 50-1510; amd. Sec. 6, Ch. 280, L. 1987; amd. Sec. 58, Ch. 16, L. 1991; amd. Sec. 413, Ch. 418, L. 1995; amd. sec. 36, Ch. 308, L. 1995; amd. Sec. 17, Ch. 507, L. 1999; amd. Sec. 4, Ch. 325, L. 2001; amd. Sec. 13, Ch. 385, L. 2007; amd. Sec. 11, Ch. 334, L. 2019; amd. Sec. 5, Ch. 545, L. 2021.

82-4-436. Plan amendments by department. (1) Unless an amendment to a plan of operation or permit is proposed by the operator, the department may amend only the terms of a plan or permit in compliance with this section.

(2) If the department believes, based on credible evidence, that a continued opencut operation under the terms of an existing plan of operation or permit would violate a substantive numerical or narrative state standard or regulation or otherwise violate a purpose of this part, it may propose to the operator an amendment to the plan or permit.

(3) The department shall notify the operator of the proposed amendment in writing. The notice must include:

(a) an identification of the existing plan or permit;

(b) the justification for the amendment, including all test results or other credible evidence that the department relied on in proposing the amendment; and

(c) the text, maps, drawings, and other appropriate information that constitute the proposed amendment.

(4) The operator may, within 15 days of receipt of the department's amendment notice, request a review of the amendment by the department director. The amendment is not effective or enforceable until 15 days following the issuance of the department's amendment notice or, if a review by the director is requested, until 15 days after the director affirms or modifies the amendment. A decision by the department director is subject to the contested case provisions in 82-4-427.

(5) If the operator requests a hearing on the proposed amendment, the amendment is not effective and enforceable until completion of the contested case process.

History: En. Sec. 5, Ch. 325, L. 2001; amd. Sec. 35, Ch. 361, L. 2003; amd. Sec. 18, Ch. 337, L. 2005; amd. Sec. 14, Ch. 385, L. 2007.

82-4-437. Annual report — fees. (1) For each opencut operation, the operator shall file an annual report on a form furnished by the department. The report must contain the information and be submitted at times provided in rules of the department.

(2) (a) Except as provided in subsection (2)(b), each opencut operation shall submit with the annual report a fee of 4.5 cents per cubic yard of materials for all operations mined during the period covered by the report.

(b) Opencut operations that mine, extract, or produce bentonite are not subject to the fee in subsection (2)(a).

(3) The department:

(a) shall require the operator to pay the following fees:

(i) $1,500 for each permit application submitted pursuant to 82-4-432(1); and

(ii) for each amendment application submitted pursuant to 82-4-432(11):

(A) $750 if the date of the amendment application is 10 years or less from the date of the permit approval; or

(B) $1,500 if the date of the amendment application is more than 10 years from the date of the permit approval; and

(b) shall adopt rules for applications or responses that are administrative. Fees, if any, for administrative actions identified under this subsection (3) may not exceed $250.

(4) Pursuant to the provisions of 82-4-441, a person who mines materials without a permit in violation of this part shall submit a report and the fees required by subsections (2)(a) and (3)(a)(i) of this section.

History: En. Sec. 1, Ch. 385, L. 2007; amd. Sec. 9, Ch. 477, L. 2009; amd. Sec. 8, Ch. 198, L. 2013; amd. Sec. 12, Ch. 334, L. 2019; amd. Sec. 107, Ch. 324, L. 2021.

82-4-438. Opencut fund — use of fund. (1) There is an account in the state special revenue fund established by 17-2-102 to be known as the opencut fund.

(2) There must be deposited in the account money received from the fees established in 82-4-437.

(3) Money in the fund must be spent for the purposes of administering and enforcing this part.

History: En. Sec. 1, Ch. 477, L. 2009; amd. Sec. 13, Ch. 334, L. 2019.

82-4-439. Extended review — criteria — timeframes. (1) The department may subject an opencut application to an extended review if the department determines that comments received at a public meeting held pursuant to 82-4-432 reveal the proposed plan of operation violates provisions of this part.

(2) (a) For a complete application subject to an extended review, the department shall, within 60 days from the date the department determines the application warrants an extended review, inspect the proposed site if the department determines an inspection is necessary and notify the applicant as to whether or not the application is acceptable pursuant to 82-4-432. If the application is unacceptable, the notice must include a detailed explanation of the deficiencies.

(b) Within 30 days of receipt of the applicant's response to the identified deficiencies, the department shall review the responses and notify the applicant as to whether or not the application is acceptable. If the application is unacceptable, the department shall notify the applicant in writing and include a detailed identification of the deficiencies.

(c) The department may for sufficient cause extend either or both of the review periods in subsection (2)(a) or (2)(b) for an additional 30 days if it notifies the applicant of the extension prior to the end of the respective original period. The department shall include in the notification of extension the reason for the extension.

(d) If the application is acceptable, the department shall issue a permit or a permit amendment to the operator that entitles the operator to engage in the opencut operation on the land described in the application.

History: En. Sec. 8, Ch. 477, L. 2009; amd. Sec. 6, Ch. 545, L. 2021.

82-4-440. Repealed. Sec. 7, Ch. 545, L. 2021.

History: En. Sec. 14, Ch. 334, L. 2019.

82-4-441. Administrative and judicial penalties — enforcement. (1) When the department has reason to believe that a person is in violation of this part, a rule adopted or an order issued under this part, an administrative deficiency notice, or a term or condition of a permit issued under this part, it shall send a letter of warning or violation to the person. The letter of warning or violation must describe the provision of the statute, rule, order, or permit alleged to be violated and the facts alleged to constitute the violation. The letter must recommend corrective actions necessary to return to compliance. Issuance of a letter of warning or violation under this subsection does not limit the authority of the department under this part to bring a judicial action for penalties or injunctive relief or to initiate an administrative enforcement action.

(2) By issuance of an order pursuant to subsection (5), the department may assess against a person who violates any of the provisions of this part, rules adopted or orders issued under this part, or provisions of a permit:

(a) an administrative penalty of not less than $100 or more than $1,000 for the violation; and

(b) an additional administrative penalty of not less than $100 or more than $1,000 for each day during which a violation continues.

(3) The department may bring a judicial action seeking a penalty of not more than $5,000 against a person who violates any of the provisions of this part, rules adopted or orders issued under this part, or provisions of a permit and a penalty of not more than $5,000 for each day that the violation continues. In determining the amount of the penalty, the district court shall consider the factors in subsection (4).

(4) Penalties assessed under this section must be determined in accordance with the penalty factors in 82-4-1001.

(5) (a) In addition to the letter of warning or violation sent pursuant to subsection (1), the department may also issue an order if it has credible information that a violation listed in subsection (2) has occurred. The order must specify the provision of the part, rule, order, or permit alleged to be violated and the facts alleged to constitute the violation. The order may require necessary corrective action within a reasonable period of time, may assess an administrative penalty determined in accordance with this section, or both. The order must be served personally or by certified mail.

(b) An order issued pursuant to subsection (5)(a) becomes final unless, within 30 days after the order is served, the person to whom the order is issued submits to the board a written request for a hearing stating the reason for the request. Service of an order by mail is complete 3 business days after mailing. If a request for a hearing is filed, a hearing must be held within a reasonable time under the contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6. After a hearing, the board shall affirm, modify, or rescind the order.

(6) The department may bring an action to enjoin an operator or other person violating or threatening to violate this part, rules adopted pursuant to this part, or a permit issued pursuant to this part. Actions for injunctions or penalties must be filed in the district court of the county in which the opencut operation is located.

(7) The provisions of this section do not limit the authority of the department to bring a judicial action for penalties or injunctive relief prior to or instead of initiating an administrative enforcement action under this part.

(8) For the purposes of this section, "administrative deficiency" means a deficiency in reporting, recordkeeping, fee payment, or notification that the department determines is minor in nature, nonsubstantive, and unlikely to recur.

History: En. Sec. 1, Ch. 113, L. 1981; amd. Sec. 7, Ch. 280, L. 1987; amd. Sec. 4, Ch. 431, L. 1991; amd. Sec. 414, Ch. 418, L. 1995; amd. Sec. 2, Ch. 271, L. 1997; amd. Sec. 5, Ch. 273, L. 1997; amd. Sec. 18, Ch. 507, L. 1999; amd. Sec. 17, Ch. 79, L. 2001; amd. Sec. 6, Ch. 325, L. 2001; amd. Sec. 4, Ch. 486, L. 2005; amd. Sec. 15, Ch. 385, L. 2007; amd. Sec. 51, Ch. 535, L. 2021; amd. Sec. 2, Ch. 191, L. 2023.

Cross-References

Contested case procedure, Title 2, ch. 4, part 6.
Judicial review of contested cases, Title 2, ch. 4, part 7.
Injunctions, Title 27, ch. 19.
Penalties, fees, and interest, Title 82, ch. 4, part 10.

82-4-442. Suspension and revocation orders. (1) (a) The department may, after affording the operator an opportunity for an informal conference, order the suspension of a permit if:

(i) the operator fails to comply with a penalty order or a corrective action order issued pursuant to 82-4-441; or

(ii) the operator has violated this part, a rule adopted pursuant to this part, or the permit and the violation could reasonably be expected to create a danger to the health or safety of persons outside the permit area or significant environmental harm to land, air, or water. The order of suspension must be served on the operator personally or by certified mail addressed to the permanent address shown on the most recently filed annual report. The order of suspension must specify the provision of this part, the rules adopted under this part, or the permit violated and the facts alleged to constitute the violation and must, if the violation has not been corrected, order corrective action within a specified time period.

(b) The department may order immediate suspension of a permit whenever it finds that a violation of this part, the rules adopted under this part, or a permit is creating an imminent danger to the health or safety of persons outside the permit area. The order must require immediate corrective action.

(c) The operator upon whom an order is served may file a request for hearing with the board within 30 days of service of the order. The request for hearing must specify the reason for the request. The filing of a request for hearing on an order issued does not stay the suspension or corrective action requirement, but the board may, upon written request of the operator, stay either or both of these requirements.

(2) If the operator has not complied with the requirements set forth in the order of suspension within the time limits set in the order, the permit may be revoked by order of the department and the performance bond forfeited to the department. The operator may request a hearing before the board by submitting a written request stating the reason for the request to the board within 30 days after service of the order. If a hearing is requested within the 30-day period, the permit may not be revoked and the bond may not be forfeited until the board makes a final decision.

(3) If an operator fails to file the report required under 82-4-437, the department shall serve personally or by certified mail a notice letter informing the operator of the failure. If the operator does not file the report within 30 days of receipt of the letter, the department may issue a penalty order pursuant to 82-4-441 or a suspension order pursuant to this section. If the permit has been suspended, the department shall reinstate the permit upon compliance.

(4) Maintenance, monitoring, reporting, reclamation, and other activities required by statute, rule, or the permit and intended to protect public health or safety or the environment must continue during any period of suspension unless otherwise provided in the order.

History: En. Sec. 16, Ch. 385, L. 2007.

82-4-443 and 82-4-444 reserved.

82-4-445. Reclamation of abandoned mine sites. (1) Agents, employees, or contractors of the department may enter upon property for the purpose of conducting studies or exploratory work to determine whether the property has been mined and not reclaimed and rehabilitated in accordance with the requirements of this part and to determine the feasibility of restoration or reclamation of the property or abatement, control, or prevention of the adverse effects of past mining practices. The department may bring an injunctive action to restrain interference with the exercise of the right to enter and inspect granted in this subsection.

(2) (a) The department may enter upon property pursuant to subsection (2)(b) if it makes a finding that:

(i) land or water resources on the property have been adversely affected by past mining practices;

(ii) the adverse effects are at a stage that, in the public interest, action to restore or reclaim the property or to abate, control, or prevent the adverse effects should be taken; and

(iii) the owners of the land or water resources where entry must be made to restore or reclaim the property or to abate, control, or prevent the adverse effects of past mining practices are not known or readily available or the owners will not give permission for the department or its agents, employees, or contractors to enter upon the property to restore or reclaim the property or to abate, control, or prevent the adverse effects of past mining practices.

(b) If the department has made findings pursuant to subsection (2)(a), agents, employees, or contractors of the department may enter upon property adversely affected by past mining practices and other property necessary for access to the adversely affected property to do all things necessary or expedient to restore or reclaim the property or to abate, control, or prevent the adverse effects of past mining practices after:

(i) giving notice by mail to the owner, if known, and a purchaser under contract for deed, if known; or

(ii) if neither is known, posting notice upon the property and advertising in a newspaper of general circulation in the county in which the property lies.

(c) Entry upon property pursuant to this section is not an act of condemnation of property or of trespass but rather an exercise of the power granted by Article IX, sections 1 and 2, of the Montana constitution.

(3) The department may acquire the necessary property by gift or purchase, or if the property cannot be acquired by gift or purchase at a reasonable cost, proceedings may be instituted in the manner provided in Title 70, chapter 30, against all nonaccepting landholders if:

(a) acquisition of the property is necessary for successful reclamation;

(b) the acquired property after restoration or reclamation or after abatement, control, or prevention of the adverse effects of past mining practices will serve recreation and historic purposes or conservation and reclamation purposes or provide open space benefits; and

(c) (i) permanent facilities, such as treatment plants or relocated stream channels, will be constructed on the property for the restoration or reclamation of the property or for abatement, control, or prevention of the adverse effects of past mining practices; or

(ii) acquisition of refuse disposal sites and all refuse on the sites will serve the purposes of this part in that public ownership is desirable to meet emergency situations and prevent recurrences of the adverse effects of past mining practices.

(4) The department may record in the office of the clerk and recorder in the county in which property that has been reclaimed pursuant to 82-4-424 or this section is located a notice that the property has been mined and reclaimed. The notice must include the date and a brief description of the reclamation.

History: En. Sec. 2, Ch. 329, L. 1995; amd. Sec. 108, Ch. 324, L. 2021.

Cross-References

Fees of County Clerk, 7-4-2631.
Injunctions, Title 27, ch. 19.

82-4-446. Filing of lien for abandoned mine reclamation project. (1) Before commencement of a project using public funds to restore or reclaim property or to abate, control, or prevent adverse effects of past mining practices on private property, the department may file a notice of the right to claim a lien in the clerk and recorder's office in the county in which the majority of the property lies.

(2) If the department expends or allocates public funds conducting mine reclamation work under this part and if the department determines, based on an appraisal by an independent qualified appraiser chosen by the department, that the work has resulted or will result in a significant increase in the fair market value of property, the department may file a lien against the property reclaimed.

(3) Within 6 months after the completion of the project, the department shall itemize the funds expended and may file a lien statement. The lien statement must include:

(a) the value of the property before commencing the work of restoration or reclamation or abatement, control, or prevention of adverse effects of the past mining practices;

(b) the value of the property after the work has been completed;

(c) a listing of the appraisal upon which the values in subsections (3)(a) and (3)(b) are based and the location where those appraisals may be examined;
(d) the amount of public funds spent by the department on the project; and
(e) the amount of the lien.

(4) The amount of the lien must be the lesser of either the increase in the value of the property or the amount of public funds actually expended by the department.

(5) A lien may not be filed under this section against the property of a person who owned the surface rights prior to May 2, 1977, and who did not consent to, participate in, or exercise control over the mining operation that necessitated the reclamation performed under this part.

(6) If a lien is filed, the department shall send, by certified mail to the owner's last-known address, copies of the lien, the statement of costs, and the appraisals to the owner of record of the property.

(7) The lien provided in this section is effective as of the date of expenditure of the public funds and has priority over all other liens or security interests that have attached to the property that is the subject of the lien, whenever those liens may have arisen, second only to real estate taxes imposed upon the property.

(8) Within 60 days after the department files the lien, the owner of the property to which the lien provided for in this section attaches may petition the district court for the county in which the majority of the property is located asking the district court to resolve disputes regarding the amount of actual funds spent by the department or to determine the increase in the market value of the property as a result of the restoration or reclamation or abatement, control, or prevention of the adverse effects of past mining practices. If it differs from the department's statement, the amount found by the court to be the lesser of the actual funds spent or the increase in market value is the amount of the lien and that amount must be recorded with the department's statement.

(9) A lien placed on property under this section may be satisfied by payment to the department of the amount of the lien. The department may accept partial payments on terms and conditions that the department specifies, but the lien is satisfied only to the extent of the value of the consideration received. A lien must be satisfied, to the extent of the value of the consideration received, at the time of transfer of ownership. Unsatisfied portions remain as a lien on the property. When a lien is partially or wholly satisfied, the department shall file with the clerk and recorder with whom the lien is filed an instrument releasing the lien in whole or in part.

(10) A lien placed on property under this section renews automatically, without a requirement on the part of the department to file a continuation notice, until the time that the lien is fully satisfied. Interest is payable on unsatisfied liens or portions of the liens provided for in this section, and it must be accumulated at the rate of 10% a year and may not be compounded.

(11) Funds derived from the satisfaction of liens established under this part must be deposited in the abandoned mine reclamation fund account from which the project was funded.

Part 6
Interstate Mining Compact

82-4-601. Interstate Mining Compact. This state enacts into law and enters into the Interstate Mining Compact with all states that enact the compact in the form substantially contained in 82-4-602.

History: En. Sec. 1, Ch. 310, L. 2023.

82-4-602. Text of Interstate Mining Compact. The Interstate Mining Compact referred to in 82-4-601 through 82-4-604 reads as follows:

ARTICLE I
FINDINGS AND PURPOSES

(1) The party states find that:

(a) Mining and the contributions of mining to the economy and well-being of every state are of basic significance.

(b) The effects of mining on the availability of land, water, and other resources for other uses present special problems which properly can be approached only with due consideration for the rights and interests of those engaged in mining, those using or proposing to use these resources for other purposes, and the public.

(c) Measures for the reduction of the adverse effects of mining on land, water, and other resources may be costly and the devising of means to deal with them are of both public and private concern.

(d) Variables including soil structure and composition, physiography, climatic conditions, and the needs of the public make impracticable the application to all mining areas of a single standard for the conservation, adaptation, or restoration of mined land, or the development of mineral and other natural resources; but justifiable requirements of law and practice relating to the effects of mining on lands, water, and other resources may be reduced in equity or effectiveness unless they pertain similarly from state to state for all mining operations similarly situated.

(e) The states are in a position and have the responsibility to assure that mining is conducted in accordance with sound conservation principles and with due regard for local conditions.

(2) The purposes of this compact are to:

(a) Advance the protection and restoration of land, water, and other resources affected by mining.

(b) Assist in the reduction or elimination or counteracting of pollution or deterioration of land, water, and air attributable to mining.

(c) Encourage, with due recognition of relevant regional, physical, and other differences, programs in each of the party states which will achieve comparable results in protecting, conserving, and improving the usefulness of natural resources, to the end that the most desirable conduct of mining and related operations may be universally facilitated.

(d) Assist the party states in their efforts to facilitate the use of land and other resources affected by mining, so that the use may be consistent with sound land use, public health, and public safety, and to this end to study and recommend, wherever desirable, techniques for the improvement, restoration, or protection of the land and other resources.

(e) Assist in achieving and maintaining an efficient and productive mining industry and in increasing economic and other benefits attributable to mining.

ARTICLE II
DEFINITIONS

As used in this compact, the term:

(1) "Mining" means the breaking of the surface soil in order to facilitate or accomplish the extraction or removal of minerals, ores, or other solid matter, any activity or process constituting all or part of a process for the extraction or removal of minerals, ores, and other solid matter from its original location, and the preparation, washing, cleaning, or other treatment of minerals, ores, or other solid matter so as to make them suitable for commercial, industrial, or construction use; but does not include those aspects of deep mining not having significant effect on the surface, and does not include excavation of grading when conducted solely in aid of on-site farming or construction.

(2) "State" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or a Territory or Possession of the United States.

ARTICLE III
STATE PROGRAMS

Each party state agrees that within a reasonable time it will formulate and establish an effective program for the conservation and use of mined land, by the establishment of standards, enactment of laws, or the continuing of the same in force, to accomplish:

(1) The protection of the public and the protection of adjoining and other landowners from damage to their lands and the structures and other property on that land resulting from the conduct of mining operations or the abandonment or neglect of land and property formerly used in the conduct of those operations.

(2) The conduct of mining and the handling of refuse and other mining wastes in ways that will reduce adverse effects on the economic, residential, recreational, or aesthetic value and utility of land and water.

(3) The institution and maintenance of suitable programs of adaptation, restoration, and rehabilitation of mined lands.

(4) The prevention, abatement and control of water, air, and soil pollution resulting from mining — present, past, and future.

ARTICLE IV
POWERS

In addition to any other powers conferred upon the Interstate Mining Commission, established by article V of this compact, the Commission shall have power to:

(1) Study mining operations, processes, and techniques for the purpose of gaining knowledge concerning the effects of the operations, processes, and techniques on land, soil, water, air, plant and animal life, recreation, and patterns of community or regional development or change.

(2) Study the conservation, adaptation, improvement, and restoration of land and related resources affected by mining.

(3) Make recommendations concerning any aspect or aspects of law or practice and governmental administration dealing with matters within the purview of this compact.

(4) Gather and disseminate information relating to any of the matters within the purview of this compact.

(5) Cooperate with the federal government and any public or private entities having interests in any subject coming within the purview of this compact.

(6) Consult, upon the request of a party state and within available resources, with the officials of the state in respect to any problem within the purview of this compact.

(7) Study and make recommendations with respect to any practice, process, technique, or course of action that may improve the efficiency of mining or the economic yield from mining operations.

(8) Study and make recommendations relating to the safeguarding of access to resources which are or may become the subject of mining operations to the end that the needs of the economy for the products of mining may not be adversely affected by unplanned or inappropriate use of land and other resources containing minerals or otherwise connected with actual or potential mining sites.

ARTICLE V
THE COMMISSION

(1) There is an agency of the party states to be known as the "Interstate Mining Commission", or "the Commission". The Commission is composed of one commissioner from each party state who is the governor of that state. Pursuant to the laws of the party state, each governor shall have the assistance of an advisory body (including membership from mining industries, conservation interests, and other public and private interests as may be appropriate) in considering problems relating to mining and in discharging the responsibilities as a Commissioner on the Commission. In any instance where a governor is unable to attend a meeting of the commission or perform any other function in connection with the business of the commission, the governor shall designate an alternate, from among the members of the advisory body required by this paragraph, who shall represent the governor and act in the governor's

place and stead. The designation of an alternate shall be communicated by the governor to the commission as provided in its bylaws.

(2) The commissioner is entitled to one vote each on the commission. No action of the commission making a recommendation pursuant to article IV-3, IV-7, and IV-8 or requesting, accepting, or disposing of funds, services, or other property pursuant to this paragraph, article V (7), V (8), or VII shall be valid unless taken at a meeting at which a majority of the total number of votes on the commission is cast in favor of the action. All other action shall be by a majority of those present and voting: provided that action of the commission is only at a meeting at which a majority of the commissioners, or their alternates, is present. The commission may establish and maintain facilities as may be necessary for the transaction of its business. The commission may acquire, hold, and convey real and personal property and any interest in that property.

(3) The commission shall have a seal.

(4) The commission shall elect annually, from among its members, a presiding officer, a vice-presiding officer, and a treasurer. The commission shall appoint an executive director and fix the executive director's duties and compensation. The executive director shall serve at the pleasure of the commission. The executive director, the treasurer, and other personnel as the commission designates shall be bonded. The amount or amounts of the bond or bonds is determined by the commission.

(5) Irrespective of the civil service, personnel, or other merit system laws of any of the party states, the executive director, with the approval of the commission, shall appoint, remove, or discharge personnel as may be necessary for the performance of the commission's functions, and shall fix the duties and compensation of personnel.

(6) The commission may establish and maintain independently or in conjunction with a party state, a suitable retirement system for its employees. Employees of the commission are eligible for social security coverage in respect of old age and survivor's insurance provided that the commission takes steps necessary pursuant to the laws of the United States to participate in a program of insurance as a governmental agency or unit. The commission may establish and maintain or participate in additional programs of employee benefits as it deems appropriate.

(7) The commission may borrow, accept, or contract for the services of personnel from any state, the United States, or any other governmental agency, or from any person, firm, association, or corporation.

(8) The commission may accept for any of its purposes and functions under this compact any and all donations, and grants of money, equipment, supplies, materials, and services, conditional or otherwise, from any state, the United States, or any other governmental agency, or from any person, firm, association, or corporation, and may receive, utilize, and dispose of the same. Any donation or grant accepted by the commission pursuant to this paragraph or services borrowed pursuant to paragraph (7) of the article shall be reported in the annual report of the commission. The report shall include the nature, amount, and conditions, if any, of the donation, grant, or services borrowed and the identity of the donor or lender.

(9) The commission shall adopt bylaws for the conduct of its business and has the power to amend and rescind these bylaws. The commission shall publish its bylaws in convenient form and file a copy of its bylaws and a copy of any amendment to the bylaws with the appropriate agency or officer in each of the party states.

(10) The commission annually shall make to the governor, legislature, and advisory body required by article V(1) of each party state a report covering the activities of the commission for the preceding year, and embodying the recommendations made by the commission. The commission may make additional reports as it deems desirable.

ARTICLE VI
ADVISORY, TECHNICAL, AND REGIONAL COMMITTEES

The commission shall establish advisory, technical, and regional committees as it deems necessary, membership on which includes private persons and public officials and shall cooperate with the use and services of any committees and the organizations which the members represent in furthering any of its activities. The committees may be formed to consider problems of special interest to any party states, problems dealing with particular commodities or types of mining operations, problems related to reclamation, development, or use of mined land, or any other matters of concern to the commission.

ARTICLE VII
FINANCE

(1) The commission shall submit to the governor or designated officer or officers of each party state a budget of its estimated expenditures for such period as may be required by the laws of that party state for presentation to the legislature.

(2) Each of the commission's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states. The total amount of appropriations requested under any budget shall be apportioned among the party states as follows: one-half in equal shares, and the remainder in proportion to the value of minerals, ores, and other solid matter mined. In determining the values, the commission shall employ available public source or sources of information as, in its judgment, present the most equitable and accurate comparisons among the party states. Each of the commission's budgets of estimated expenditures and requests for appropriations shall indicate the source or sources used in obtaining information concerning value of minerals, ores, and other solid matter mined.

(3) The commission shall not pledge the credit of any party state. The commission may meet any of its obligations in whole or in part with funds available to it under article V(8) of this compact; provided that the commission takes specific action setting aside the funds prior to incurring any obligation to be met in whole or in part in such manner. Except where the commission makes use of funds available to it under article V(8), the commission shall not incur any obligation prior to the allotment of funds by the party states adequate to meet the same.

(4) The commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the commission are subject to the audit and accounting procedures established under its bylaws. All receipts and disbursements of funds handled by the commission shall be audited yearly by a qualified public accountant and the report of the audit shall be included in and become part of the annual report of the commission.

(5) The accounts of the commission shall be open at any reasonable time for inspection by duly constituted officers of the party states and by any persons authorized by the commission.

(6) This compact may not be construed to prevent commission compliance with laws relating to audit or inspection of accounts by or on behalf of any government contributing to the support of the commission.

ARTICLE VIII
ENTRY INTO FORCE AND WITHDRAWAL

(1) This compact shall enter into force when enacted into law by any four or more states. After that enactment, this compact becomes effective as to any other state upon its enactment of the compact.

(2) Any party state may withdraw from this compact by enacting a statute repealing the compact, but withdrawal does not take effect until one year after the governor of the withdrawing state has given notice in writing of the withdrawal to the governors of all other party states. A withdrawal does not affect any liability already incurred by or chargeable to a party state prior to the time of withdrawal.

ARTICLE IX
EFFECT ON OTHER LAWS

This compact does not limit, repeal, or supersede any other law of any party state.

ARTICLE X
CONSTRUCTION AND SEVERABILITY

This compact shall be liberally construed so as to effectuate the purposes of the compact. The provisions of this compact are severable and if any phrase, clause, sentence, or provision of this compact is declared to be contrary to the constitution of any state or of the United States, or the applicability of the compact to any government, agency, person, or circumstance is held invalid, the validity of the remainder of this compact and the applicability of the compact to any government, agency, person, or circumstance is not affected. If this compact is held contrary to the constitution of any state participating in the compact, the compact remains in full force and effect as to the remaining party states and in full force and effect as to the state affected as to all severable matters.

History: En. Sec. 2, Ch. 310, L. 2023.

82-4-603. Membership and applicability. (1) The governor may appoint a designee to serve as the governor's official representative to the compact and to perform all functions in connection with the business of the compact.

(2) Provisions and policies of the Interstate Mining Compact may not be construed to limit, repeal, or supersede any law of the state of Montana.

(3) (a) The governor and the legislature, or agents of either, may inspect the books and accounts of the Interstate Mining Compact Commission at any reasonable time while the state is a member.

(b) A copy of the bylaws of the Interstate Mining Compact Commission must be placed on file with the department of environmental quality and be available for inspection at any reasonable time by the legislature or any interested citizen.

(4) The state of Montana is not liable for the obligations or solvency of:

(a) the retirement system described in article V(6) of the compact; or

(b) a program of employee benefits described in article V(6) of the compact.

(5) As used in article V(1) of the compact, "agency" does not mean an agency of the state of Montana or any political subdivision of the state of Montana.

History: En. Sec. 3, Ch. 310, L. 2023.

82-4-604. Expenses. The department of environmental quality may pay annually out of funds collected from mining fees, abandoned mine land fees and funds, natural resource operations, or from funds granted to the state by the federal office of surface mining reclamation and enforcement, the annual membership dues payable to the Interstate Mining Compact commission for the membership of the state of Montana in that organization.

History: En. Sec. 4, Ch. 310, L. 2023.

Parts 7 through 9 reserved

Part 10
Penalties, Fees, and Interest

82-4-1001. Penalty factors. (1) In determining the amount of an administrative or civil penalty assessed under the statutes listed in subsection (4), the department of environmental quality or the district court, as appropriate, shall take into account the following factors:

(a) the nature, extent, and gravity of the violation;

(b) the circumstances of the violation;

(c) the violator's prior history of any violation, which:

(i) must be a violation of a requirement under the authority of the same chapter and part as the violation for which the penalty is being assessed;

(ii) must be documented in an administrative order or a judicial order or judgment issued within 3 years prior to the date of the occurrence of the violation for which the penalty is being assessed; and

(iii) may not, at the time that the penalty is being assessed, be undergoing or subject to administrative appeal or judicial review;

(d) the economic benefit or savings resulting from the violator's action;

(e) the violator's good faith and cooperation;

(f) the amounts voluntarily expended by the violator, beyond what is required by law or order, to address or mitigate the violation or impacts of the violation; and

(g) other matters that justice may require.

(2) Except for penalties assessed under 82-4-254, after the amount of a penalty is determined under (1), the department of environmental quality or the district court, as appropriate, may consider the violator's financial ability to pay the penalty and may institute a payment schedule or suspend all or a portion of the penalty.

(3) Except for penalties assessed under 82-4-254, the department of environmental quality may accept a supplemental environmental project as mitigation for a portion of the penalty. For purposes of this section, a "supplemental environmental project" is an environmentally beneficial project that a violator agrees to undertake in settlement of an enforcement action but which the violator is not otherwise legally required to perform.

(4) This section applies to penalties assessed by the department of environmental quality or the district court under 82-4-141, 82-4-254, 82-4-361, and 82-4-441.

(5) The department of environmental quality may adopt rules to implement this section.

History: **En. Sec. 3, Ch. 487, L. 2005; amd. Sec. 109, Ch. 324, L. 2021.**

82-4-1002. Collection of penalties, fees, late fees, and interest. (1) If the department of environmental quality is unable to collect penalties, fees, late fees, or interest assessed pursuant to the provisions of this chapter, the department of environmental quality may assign the debt to a collection service or transfer the debt to the department of revenue pursuant to Title 17, chapter 4, part 1.

(2) (a) The reasonable collection costs of a collection service, if approved by the department of environmental quality, or assistance costs charged the department of environmental quality by the department of revenue pursuant to 17-4-103(3) may be added to the debt for which collection is being sought.

(b) (i) All money collected by the department of revenue is subject to the provisions of 17-4-106.

(ii) All money collected by a collection service must be paid to the department of environmental quality and deposited in the general fund or the accounts specified in statute for the assessed penalties, fees, late fees, or interest, except that the collection service may retain those collection costs or, if the total debt is not collected, that portion of collection costs that are approved by the department.

History: **En. Sec. 4, Ch. 487, L. 2005.**

82-4-1003 through 82-4-1005 reserved.

82-4-1006. Abandoned mine reclamation account. (1) There is an abandoned mine reclamation account in the federal special revenue fund provided for in 17-2-102.

(2) There must be deposited in the account:

(a) money received by the state from the federal government pursuant to 30 U.S.C. 1232 through 1243; and

(b) interest earned on the account.

(3) (a) Money in the account is available to the department of environmental quality by appropriation and must be used to pay for reclamation or drainage abatement on eligible lands or waters. Eligible lands and waters are those:

(i) that were mined or processed for minerals or materials or were affected by that mining or processing;

(ii) that were abandoned or left in an inadequate reclamation status prior to:

(A) November 26, 1980, for federal lands administered by the United States bureau of land management;

(B) August 28, 1974, for federal lands administered by the United States forest service; and

(C) August 3, 1977, for state lands, private lands, and federal lands not subject to subsection (3)(a)(ii)(A) or (3)(a)(ii)(B); and

(iii) for which there is no continuing reclamation responsibility under state or federal law.

(b) Allowable reclamation or abatement activities under subsection (3)(a) include but are not limited to:

(i) reclamation of abandoned surface mine areas, abandoned mine processing areas, and abandoned mine refuse disposal areas;

(ii) sealing and filling abandoned mine entries and voids;

(iii) planting of land adversely affected by past mining practices to prevent erosion and sedimentation;

(iv) prevention, abatement, treatment, and control of water pollution created by abandoned mine drainage, including restoration of stream beds and construction and operation of water treatment plants;

(v) prevention, abatement, and control of burning coal refuse disposal areas and burning coal in situ;

(vi) prevention, abatement, and control of abandoned mine subsidence; and

(vii) payment of costs of administration of the abandoned mine land reclamation program administered by the department of environmental quality.

(4) Money in the account that is subject to restrictions on use pursuant to federal law, regulation, or grant condition may be used only for the purposes allowed by the federal provision.

(5) Any unspent or unencumbered money in the account at the end of a fiscal year must remain in the account until spent or appropriated by the legislature.

History: En. Sec. 1, Ch. 357, L. 2007.

CHAPTERS 5 THROUGH 9
RESERVED

CHAPTER 10
OIL AND GAS — GENERAL PROVISIONS

Part 1 — Royalty Interests

82-10-101. Action for accounting for royalty.
82-10-102. Remedy not exclusive.
82-10-103. Obligation to pay royalties as essence of contract — interest.
82-10-104. Payment of royalties — form of record required.
82-10-105 through 82-10-109 reserved.
82-10-110. Division order — definition — effect.

Part 2 — Lease of Local Government Land

82-10-201. Authorization for lease and terms — land not subject to leasing.
82-10-202. Acreage pooling.
82-10-203. Interference with normal use of land prohibited.
82-10-204. Lease of acquired oil and gas interests.

Part 3 — Underground Gas Storage Reservoirs

82-10-301. Definitions.
82-10-302. Policy.
82-10-303. Use of eminent domain to acquire underground reservoirs.
82-10-304. Certificate of board required prior to use of eminent domain.
82-10-305. Proceedings.

Part 4 — Abandoned Oil and Gas Wells — Reclamation

82-10-401. Notice required before abandonment of well — owner's option.
82-10-402. Inventory of abandoned wells and seismic operations — reclamation procedures.

Part 5 — Surface Owner Damage and Disruption Compensation

82-10-501. Purpose — legislative findings.
82-10-502. Definitions.
82-10-503. Notice of drilling operations.
82-10-504. Surface damage and disruption payments — dispute resolution — penalty for late payment.
82-10-505. Liability for damages to property.
82-10-506. Notification of injury.
82-10-507. Agreement — offer of settlement.
82-10-508. Rejection — legal action.
82-10-509 reserved.
82-10-510. Penalty for notice violation.
82-10-511. Remedies cumulative.

Part 6 — Disclosure of Fracturing Fluids

82-10-601. Legislative findings — purpose.
82-10-602. Definitions.
82-10-603. Fracturing fluid disclosure — requirements.
82-10-604. Confidentiality request for trade secrets.

Part 1
Royalty Interests

82-10-101. Action for accounting for royalty. (1) Whenever an owner of a royalty interest in or attaching to lands producing natural gas, oil, or other minerals or in or to the natural gas, oil, or other mineral production from said lands, whether said royalty is payable in kind out of the product of the lands or out of the money proceeds from the sale of the product of said lands, shall make a written demand upon the person or persons obligated to deliver or pay such royalty for an accounting of the natural gas, oil, or other minerals produced from said lands and makes written demand for delivery or payment of such owner's royalty as may then be due and the person or persons obligated for the delivery or payment of said royalty fail to make the accounting demanded and the payment or delivery of the royalty due within a period of 60 days following the date upon which said demand is made, then the owner of said royalty may file an action in the district court of the county wherein said lands are located to compel the accounting demanded and to recover the payment or delivery of the royalty due against the person or persons obligated as aforesaid.

(2) In said action the successful party or parties recovering judgment against the person or persons obligated shall, in addition to relief by way of accounting and recovery of the royalty due as hereinabove provided, also recover judgment for a sum of money by way of reasonable attorney fees to be allowed by the court together with the costs allowed to successful parties by law in actions generally in said court.

(3) Whenever the same person or persons is or are obligated for delivery or payment of said royalty to separate owners of royalty in or to a tract of land or any portion of said land or the product of the whole or any part of said land, then any number of said owners of royalty may join their separate causes of action as parties plaintiff in the action herein provided for, and in their complaint filed in said action, each cause of action of each of the several plaintiffs shall be set forth separately in said complaint, and the judgment given, made, and rendered upon said complaint shall adjudge the relief to one or more of the plaintiffs and deny relief to any one or more of said plaintiffs accordingly as the evidence may establish.

(4) If the defendant or defendants prevail in said action against any one or more of said plaintiffs, the court shall adjudge and allow to such defendant or defendants and against the unsuccessful plaintiff or plaintiffs recovery of a sum of money as reasonable attorney fees to be allowed by the court and adjudge and allow costs to said defendant to be recovered from the said unsuccessful plaintiff or plaintiffs in said action, as provided for by law in actions generally in said court.

History: **En. Sec. 1, Ch. 78, L. 1943; R.C.M. 1947, 60-501.**

Cross-References

Allowable costs, Title 25, ch. 10, part 2.

82-10-102. Remedy not exclusive. The remedy provided for in 82-10-101 is in the nature of a special remedy additional to and not a substitute for other remedies given by law to owners of royalties in lands of the character specified, and all acts or parts of acts in conflict with the provisions of 82-10-101 shall not apply in actions authorized and provided for by that section.

History: **En. Sec. 2, Ch. 78, L. 1943; R.C.M. 1947, 60-502; amd. Sec. 2, Ch. 500, L. 1983; amd. Sec. 3, Ch. 582, L. 1983.**

82-10-103. Obligation to pay royalties as essence of contract — interest. (1) The obligation arising under an oil and gas lease to pay oil or gas royalties to the royalty owner or the owner's assignee, to deliver oil or gas to a purchaser to the credit of the royalty owner or the owner's assignee, or to pay a portion of the proceeds of the sale of the oil or gas to the royalty owner or the owner's assignee is of the essence in the lease contract.

(2) If the operator under an oil and gas lease fails to pay oil or gas royalties to the royalty owner or the owner's assignee within 120 days after the initial oil or gas produced under the lease is marketed and within 60 days for all oil and 90 days for all gas produced and marketed, the unpaid royalties must bear interest at the maximum rate of interest authorized under 31-1-107 from the date due until paid. The operator may remit semiannually to a person entitled to royalties the aggregate of 6 months' royalties whenever the aggregate amount is less than $50 and annually whenever the aggregate amount is less than $10.

(3) A royalty owner seeking a remedy for failure to make payments under the lease or seeking payments under this section shall bring the action in the district court for the county in which the oil or gas well is located, and that court has jurisdiction over any actions brought under this section. The prevailing party in any proceeding brought under this section is entitled to recover court costs and reasonable attorney fees.

(4) This section does not apply if a royalty owner or the owner's assignee has elected to take the owner's or assignee's proportionate share of production in kind or whenever there is a dispute as to the title of the minerals or entitlement to royalties, the outcome of which would affect distribution of royalty payments.

History: En. Sec. 1, Ch. 500, L. 1983; amd. Sec. 1, Ch. 118, L. 1985; amd. Sec. 2735, Ch. 56, L. 2009.

Cross-References

Allowable costs, Title 25, ch. 10, part 2.

82-10-104. Payment of royalties — form of record required. (1) An oil and gas producer paying royalties by check, draft, or order shall include with every payment a form showing the following matters relating to that payment:

(a) the name of the royalty owner to whom the payment is made;
(b) the date of the check, draft, or order;
(c) any royalty owner identification number used by the producer for the royalty owner;
(d) the time period during which production occurred for which payment is being made;
(e) any number used to identify the lease under which production occurred;
(f) the type of product produced;
(g) barrels of oil and cubic feet of gas for which payment is made;
(h) the amount and type of all taxes withheld;
(i) the net value of production;
(j) the royalty owner's net value; and
(k) contact information for obtaining additional information regarding the payment and answers to questions.

(2) In addition to the information required in subsection (1), an oil and gas producer paying royalties to a royalty owner shall, at the time of payment, specify by line item every charge assessed against the royalty owner.

(3) Any person purposely and knowingly violating the provisions of subsection (1) or (2) is guilty of a misdemeanor and upon conviction shall be punished by a fine of not more than $1,000.

History: En. Sec. 1, Ch. 582, L. 1983; amd. Sec. 1, Ch. 19, L. 2005.

Cross-References

Actions arising from seizure or sale of property for taxes, 27-2-210.

82-10-105 through 82-10-109 reserved.

82-10-110. Division order — definition — effect. (1) As used in this section, the term "division order" is limited to mean an instrument executed by the lessor of an oil or gas lease to authorize the sale of and direct the distribution of proceeds from the sale of oil, gas, casinghead gas, or other related hydrocarbons.

(2) A division order may not alter or amend the terms of the underlying oil or gas lease. A division order does not relieve a lessee of any liabilities or obligations under the terms of the underlying oil or gas lease.

(3) A division order must be in writing and:

(a) must warrant the division of interest;

(b) must contain the name, address, and tax identification number of each interest owner to whom disbursements are made by the holder of the proceeds from the sale of oil, gas, casinghead gas, or other related hydrocarbons;

(c) must contain a provision requiring notice of change of ownership; and
(d) may contain any other terms that are necessary to facilitate the transaction.

History: En. Sec. 1, Ch. 607, L. 1993.

Part 2
Lease of Local Government Land

Part Cross-References

Actions arising from seizure or sale of property for taxes, 27-2-210.
Lease of state land, Title 77, ch. 3, part 4.

82-10-201. Authorization for lease and terms — land not subject to leasing. The governing body of any county, city, town, school district, or incorporated political subdivision within the state of Montana may, if in the best interests of the county, city, town, school district, or incorporated political subdivision, lease any real property owned by the county, city, town, school district, or incorporated political subdivision for oil and gas development purposes. Such leases shall be made upon the best terms obtainable, shall provide for such terms, except as hereinafter provided, as the governing body shall consider to be for the best interests of the county, city, town, school district, or incorporated political subdivision, shall reserve a royalty of not less than 12½% which shall include any royalty payable to any person other than the lessor, and shall be for a period not exceeding 10 years and so long thereafter as oil, gas, or other hydrocarbons shall be produced from the premises embraced in the lease. However, nothing contained herein shall authorize the leasing of lands acquired by a county by tax deed except under the provisions of Title 7, chapter 8, part 25.

History: En. Sec. 1, Ch. 131, L. 1953; R.C.M. 1947, 60-701; amd. Sec. 6, Ch. 201, L. 1979.

Cross-References

Management of county lands, Title 7, ch. 8, part 25.
"School district" to include community college district, 20-15-403.
Actions arising from seizure or sale of property for taxes, 27-2-210.
Oil and gas leases authorized on state lands, 77-3-401.

82-10-202. Acreage pooling. When deemed in the best interests of the county, city, town, school district, or incorporated political subdivision, the governing body may enter into agreements for the pooling of acreage with others for unit operations for the production of oil or gas or both and for the apportionment of oil or gas royalties or both on an acreage or other equitable basis and may modify existing leases and leases hereafter entered into with respect to delay rentals, delay drilling penalties, and royalties in accordance with such pooling agreements and such unit plans of operation; provided, however, that such agreements shall not change the percentages of royalties to be paid to the county, city, town, school district, or incorporated political subdivision from the percentages as fixed in its leases.

History: En. Sec. 2, Ch. 131, L. 1953; R.C.M. 1947, 60-702.

Cross-References

"School district" to include community college district, 20-15-403.
Pooling of interest within spacing unit, 82-11-202.

82-10-203. Interference with normal use of land prohibited. In the event such real property is held or used for a specific purpose, any lease made under the provisions of this part shall contain such protective provisions as may be necessary to prevent any interference by the lessee with the normal use of such real property for such purpose by the county, city, town, school district, or incorporated political subdivision.

History: En. Sec. 3, Ch. 131, L. 1953; R.C.M. 1947, 60-703.

Cross-References

"School district" to include community college district, 20-15-403.

82-10-204. Lease of acquired oil and gas interests. When in any deed or contract for sale a county has reserved or excepted an interest in oil and gas in and under any land acquired by tax deed, the board of county commissioners may lease such interest for oil and gas development purposes upon the same terms and conditions as are provided for the leasing of lands which have been acquired by tax deed, offered for sale and not sold or may ratify, confirm, and adopt any then-existing mineral or oil and gas lease insofar as it describes such land. All such leases, ratifications, confirmations, and adoptions heretofore executed by the board of county commissioners are declared to be valid and are ratified, approved, and confirmed.

History: **En. Sec. 1, Ch. 155, L. 1957; R.C.M. 1947, 60-704.**

Cross-References

Reservation of royalty in tax deed lands, 7-8-2305.

Actions arising from seizure or sale of property for taxes, 27-2-210.

Part 3
Underground Gas Storage Reservoirs

Part Cross-References

Underground natural gas reservoir — appropriation by eminent domain, 70-30-104, 70-30-203.

Underground natural gas reservoir — preliminary condemnation order, 70-30-206.

Underground storage of natural gas on state land, Title 77, ch. 3, part 5.

82-10-301. Definitions. Unless the context requires otherwise, in this part the following definitions apply:

(1) "Board" means the board of oil and gas conservation provided for in 2-15-3303.

(2) "Native gas" means gas which has not been previously withdrawn from the earth.

(3) "Natural gas" means gas either while in its original state or after the same has been processed by removal therefrom of component parts not essential to its use for light and fuel.

(4) "Natural gas public utility" means any person, firm, or corporation authorized to do business in this state and engaged in the business of transporting or distributing natural gas by means of pipelines into, within, or through this state for ultimate public use.

(5) "Underground reservoir" means any subsurface sand, stratum, or formation of the earth suitable for the injection and storage of natural gas therein and the withdrawal of natural gas therefrom.

(6) "Underground storage" means the process of injecting and storing of natural gas within and withdrawing of natural gas from an underground reservoir.

History: **En. Sec. 1, Ch. 259, L. 1955; amd. Sec. 83, Ch. 253, L. 1974; R.C.M. 1947, 60-801.**

Cross-References

Underground natural gas reservoir — estates subject to eminent domain, 70-30-104.

82-10-302. Policy. (1) The underground storage of natural gas which promotes conservation thereof, which permits the building of reserves for orderly withdrawal in periods of peak demand, which makes more readily available natural gas to the domestic, commercial, and industrial consumers of this state, or which provides a better year-round market to the various gas fields serves the public interest and welfare of this state.

(2) Therefore, in the manner hereinafter provided, the board and the court may find and determine that the underground storage of natural gas as hereinbefore defined is in the public interest.

History: **En. Sec. 2, Ch. 259, L. 1955; amd. Sec. 84, Ch. 253, L. 1974; R.C.M. 1947, 60-802.**

82-10-303. Use of eminent domain to acquire underground reservoirs. (1) A natural gas public utility may acquire, through the exercise of the right of eminent domain as provided in Title 70, chapter 30, and this part, an underground reservoir for its use for the underground storage of natural gas. The right of eminent domain may be exercised only if the board finds that the reservoir is suitable and its taking is in the public interest for the underground storage of natural gas. In connection with the underground reservoir, the utility may acquire other interests in property that may be required to adequately maintain and operate the underground reservoir facilities. The acquisition by the exercise of the right of eminent domain of underground reservoirs granted by this section is limited as follows:

(a) Sand, a formation, or a stratum that is producing, that has produced, or that is capable of producing oil is not subject to taking under this section.

(b) A gas-bearing sand, formation, or stratum is not subject to taking under this section unless the recoverable volumes of native gas in the interest sought to be taken have all been produced or unless the sand, formation, or stratum has a greater value or utility as an underground reservoir for the purpose of ensuring an adequate supply of natural gas for domestic, commercial, or industrial consumers of natural gas or for the conservation of natural gas than for the production of the remaining relatively small volumes of native gas as compared with the original volumes of natural gas in the sand, formation, or stratum. Gas, sand, formation, or stratum may not be acquired under this part when the gas in the underground reservoir is being used for the secondary recovery of oil unless gas in necessary and required amounts is furnished to the operator of the secondary recovery operations for as long as oil is produced in paying quantities in the secondary operations for the recovery of oil at the same cost as the cost to the operator at the time of acquisition of the gas being used in the secondary operations. However, the amount of gas furnished may not exceed the quantity of the appropriated gas that remained recoverable from the sand, formation, or stratum at the time of its taking if the operator was at that time entitled to all of the gas or if entitled to less than all of the gas, then an amount not to exceed the quantity of gas to which the operator was entitled.

(c) Only the area of the underground sand, formation, or stratum that may reasonably be expected to be penetrated by gas displaced or injected into the underground reservoir may be taken.

(d) Rights or interests in existing underground reservoirs being used for the injection, storage, or withdrawal of natural gas owned or operated by a natural gas public utility other than the natural gas public utility seeking to acquire the reservoir are not subject to appropriation.

(2) The exercise of the right of eminent domain granted by this section is without prejudice to the rights of the owner of the land or of other rights or interests in the land to drill or bore into or through the underground reservoir in a manner that complies with orders and rules of the board issued for the purpose of protecting the underground reservoir against pollution and against the escape of natural gas and is without prejudice to the rights of the owner of the land or other rights or interests in the land as to all other uses of the land. The additional cost of complying with those rules or orders in order to protect the reservoir must be paid by the natural gas public utility.

History: **En. Sec. 3, Ch. 259, L. 1955; amd. Sec. 85, Ch. 253, L. 1974; R.C.M. 1947, 60-803; amd. Sec. 100, Ch. 125, L. 2001.**

Cross-References

Eminent domain generally, Title 70, ch. 30, 31.

82-10-304. Certificate of board required prior to use of eminent domain. (1) A natural gas public utility desiring to exercise the right of eminent domain pursuant to Title 70, chapter 30, and this chapter for taking property to use for underground storage of natural gas shall, as a condition precedent to the filing of its complaint in the district court, apply for and obtain a certificate from the board. The certificate must contain the following findings of the board:

(a) that the underground sand, stratum, or formation sought to be taken is suitable for an underground reservoir for the storage of natural gas and that its use for that purpose is in the public interest;

(b) the amount of native gas, if any, remaining in the reservoir and the portion of gas recoverable; and

(c) that the applicant has in good faith sought to acquire the rights sought under this part.

(2) The board may not issue the certificate until after a public hearing is held on the application, pursuant to notice given to all persons known to have an interest in the property proposed to be acquired in the manner provided by the laws of the state for service of process in a civil action.

History: **En. Sec. 4, Ch. 259, L. 1955; amd. Sec. 86, Ch. 253, L. 1974; R.C.M. 1947, 60-804; amd. Sec. 101, Ch. 125, L. 2001.**

Cross-References

Contents of complaint for eminent domain, 70-30-203.

82-10-305. Proceedings. After obtaining a certificate from the board, a natural gas public utility desiring to exercise the right of eminent domain for the purpose of acquiring property for the underground storage of natural gas shall proceed as provided in this section. The natural gas public utility shall present to the district court of the county in which the land is situated a complaint setting forth the purpose for which the property is sought to be taken, a description of the property sought to be taken, and the names of the owners of the property as shown by the records of the county. The utility shall file the certificate of the board as a part of its complaint, and an order by the court granting the complaint may not be entered without the certificate being filed with the complaint. Subsequent proceedings must follow the procedure provided by Title 70, chapter 30.

History: **En. Sec. 5, Ch. 259, L. 1955; amd. Sec. 87, Ch. 253, L. 1974; R.C.M. 1947, 60-805; amd. Sec. 102, Ch. 125, L. 2001.**

Part 4
Abandoned Oil and Gas Wells — Reclamation

82-10-401. Notice required before abandonment of well — owner's option. A person may not plug and abandon an oil or gas well located within this state without first giving reasonable notice of the intention to do so to the surface owner of record of the land on which the well is located. Upon receipt of notice to plug and abandon, the surface owner may, by written notice given within 15 days after notice, direct that the well pipe for the well must be buried to a depth of not less than 3 feet. The board of oil and gas conservation shall adopt regulations to implement this section.

History: **En. 60-901 by Sec. 1, Ch. 161, L. 1974; R.C.M. 1974, 60-901; amd. Sec. 2736, Ch. 56, L. 2009.**

Cross-References

Adoption and publication of rules, Title 2, ch. 4, part 3.
Geophysical exploration — surety bond — restoration of surface, 82-1-104.

82-10-402. *(Temporary)* **Inventory of abandoned wells and seismic operations — reclamation procedures.** (1) The board of oil and gas conservation shall maintain a record of the abandoned oil or gas wells, injection wells, sumps, and seismographic shot holes in the state that disturb land, water, or wildlife resources to a degree not in compliance with plugging, pollution prevention, and reclamation rules of the board. This record must be compiled from petitions or written statements from the owners of surface rights or lessees.

(2) The board shall check the record compiled under subsection (1) against its drilling records and shall determine and list the name of the person who abandoned the well, sump, or hole, whenever this information is available. When a listed person applies to the board for a new drilling permit, the board may issue the permit only after approving a plan by which the applicant will reclaim the land disturbed by the applicant's abandoned wells, sumps, or holes within 3 years.

(3) When the person who abandoned a well, sump, or hole cannot be identified or located or when the person does not have sufficient financial resources to pay for complete reclamation, the board may then reclaim the disturbed land with funds available from the oil and gas production damage mitigation account in a manner consistent with the requirements for the use of the account provided in 82-11-161 and 82-11-164.

(4) As used in subsection (3), "well" includes a class II injection well, as defined in 82-11-101, for which a drilling permit or a permit authorizing use of a well for that purpose was granted by the board after June 30, 1989, and water source wells used in connection with enhanced recovery projects.

82-10-402. *(Effective on occurrence of contingency)* **Inventory of abandoned wells and seismic operations — reclamation procedures.** (1) The board of oil and gas conservation shall maintain a record of the abandoned oil or gas wells, injection wells, sumps, and seismographic shot holes in the state that disturb land, water, or wildlife resources to a degree not in compliance with plugging, pollution prevention, and reclamation rules of the board. This record must be compiled from petitions or written statements from the owners of surface rights or lessees.

(2) The board shall check the record compiled under subsection (1) against its drilling records and shall determine and list the name of the person who abandoned the well, sump, or hole, whenever this information is available. When a listed person applies to the board for a new drilling permit, the board may issue the permit only after approving a plan by which the applicant will reclaim the land disturbed by the applicant's abandoned wells, sumps, or holes within 3 years.

(3) When the person who abandoned a well, sump, or hole cannot be identified or located or when the person does not have sufficient financial resources to pay for complete reclamation, the board may then reclaim the disturbed land with funds available from the oil and gas production damage mitigation account in a manner consistent with the requirements for the use of the account provided in 82-11-161 and 82-11-164.

(4) As used in subsection (3), "well" includes a class II injection well, as defined in 82-11-101, for which a drilling permit or a permit authorizing use of a well for that purpose was granted by the board after June 30, 1989, and water source wells used in connection with enhanced recovery projects.

(5) When the person who abandoned a carbon dioxide injection well, as defined in 82-11-101, cannot be identified or located to pay for complete reclamation, the board may then reclaim the disturbed land with funds available in the geologic storage reservoir program account.

History: En. 60-149 by Sec. 3, Ch. 260, L. 1974; R.C.M. 1947, 60-149; amd. Sec. 3, Ch. 530, L. 1989; amd. Sec. 2737, Ch. 56, L. 2009; amd. Sec. 11, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

Cross-References

Part 5
Surface Owner Damage and Disruption Compensation

82-10-501. Purpose — legislative findings. (1) The purpose of this part is to provide for the protection of surface owners of land underlaid with oil and gas reserves while allowing for the necessary development of those reserves.

(2) To carry out the purpose described in subsection (1), the legislature finds that:

(a) it is necessary to protect the economic well-being of individuals engaged in agricultural production;

(b) exploration for and development of oil and gas reserves in this state, while necessary, interferes with the use, agricultural or otherwise, of the surface of certain land; and

(c) owners of the surface estate should be justly compensated for use of their property and interference with the use of their property due to oil and gas development.

History: En. Sec. 1, Ch. 199, L. 1981.

Cross-References

Availability of remedies, Title 27, ch. 1.

82-10-502. Definitions. As used in this part, the following definitions apply:

(1) "Agricultural production" means the production of any growing grass, crops, or trees attached to the surface of the land or farm animals with commercial value.

(2) "Lost land value" means the value of the highest and best reasonably available use of the land directly utilized by oil and gas operations and production, other than uses appurtenant to the mineral estate.

(3) "Oil and gas developer or operator" means the person who acquires the oil and gas lease for the purpose of extracting oil and gas.

(4) "Oil and gas estate" means an estate in or ownership of all or part of the oil and gas underlying a specified tract of land.

(5) "Oil and gas operations" means the exploration for or drilling of an oil and gas well that requires entry upon the surface estate and is begun subsequent to June 1, 1981, and the production operations directly related to the exploration or drilling.

(6) "Reasonably available use" means the present use or a future use for which a permit, if necessary, has been issued under applicable law.

(7) "Surface owner" means the person who holds record title to or has a purchaser's interest in the surface of the land.

History: En. Sec. 2, Ch. 199, L. 1981; amd. Sec. 1, Ch. 345, L. 2013.

Cross-References

Prohibited transactions with foreign adversaries, 35-30-103.

82-10-503. Notice of drilling operations. (1) In addition to the requirements for geophysical exploration activities governed by Title 82, chapter 1, part 1, the oil and gas developer or operator shall give the surface owner and any purchaser under contract for deed written notice of the drilling operations that the oil and gas developer or operator plans to undertake. The notice must be given to the record surface owner and any purchaser under contract for deed at their addresses as shown by the records of the county clerk and recorder at the time the notice is given. The notice must include a copy of this part and, if available, a current publication produced by the environmental quality council entitled "A Guide to Split Estates in Oil and Gas Development". The notice must sufficiently disclose the plan of work and operations to enable the surface owner to evaluate the effect of drilling operations on the surface owner's use of the property. The notice must be given no more than 180 days and no fewer than 20 days before any activity that disturbs the land surface. The surface owner may waive the notice requirement.

(2) The surface owner is responsible for providing the name and address of the oil and gas developer or operator to any lessees, tenants, or other parties responsible for surface operations on the property.

(3) Prior to the oil and gas developer or operator providing the notice required in subsection (1), a person qualified under 70-16-111 may enter the land to investigate and use boundary evidence and perform boundary, well site location, and access road surveys if the notice requirements of 70-16-111 are met. However, the oil and gas developer or operator shall provide the notice required pursuant to subsection (1) prior to any activity that disturbs the land surface.

History: En. Sec. 3, Ch. 199, L. 1981; amd. Sec. 27, Ch. 526, L. 1983; amd. Sec. 1, Ch. 497, L. 1985; amd. Sec. 2, Ch. 57, L. 2007.

Cross-References

Notice of intention to explore, 82-1-103.
Notice of intention to drill or conduct seismic operations, 82-11-122.

82-10-504. Surface damage and disruption payments — dispute resolution — penalty for late payment. (1) (a) The surface owner and the oil and gas developer or operator shall attempt to negotiate in good faith an agreement on damages. The oil and gas developer or operator shall pay the surface owner a sum of money or other compensation equal to the amount of damages sustained by the surface owner for loss of agricultural production and income, lost land value, and lost value of improvements caused by oil and gas operations.

(b) The amount of damages may be determined by any formula mutually agreeable between the surface owner and the oil and gas developer or operator. When determining damages, consideration must be given to the period of time during which the loss occurs.

(c) At any time during the negotiation, at the request of either party and upon mutual agreement, the surface owner and the oil and gas developer or operator may enter into a dispute resolution process, including mediation.

(d) The surface owner may elect to receive annual damage payments over a period of time, except that the surface owner must be compensated by a single sum payment for harm caused by exploration only.

(e) The payments under this subsection (1) may cover only land directly affected by oil and gas operations and production. Payments under this subsection (1) are intended to compensate the surface owner for damage and disruption. A person may not reserve or assign damage and disruption compensation apart from the surface estate except to a tenant of the surface estate.

(2) An oil and gas developer or operator who fails to timely pay an installment under any annual damage agreement negotiated with a surface owner is liable for payment to the surface owner of twice the amount of the unpaid installment if the installment payment is not paid within 60 days of receipt of notice of failure to pay from the surface owner.

History: En. Sec. 4, Ch. 199, L. 1981; amd. Sec. 2, Ch. 497, L. 1985; (2)En. Sec. 3, Ch. 497, L. 1985; amd. Sec. 3, Ch. 57, L. 2007; amd. Sec. 2, Ch. 345, L. 2013.

Cross-References

Measure of damages, Title 27, ch. 1, part 3.
Geophysical exploration, Title 82, ch. 1, part 1.

82-10-505. Liability for damages to property. The oil and gas developer or operator is responsible for all damages to real or personal property resulting from the lack of ordinary care by the oil and gas developer or operator. The oil and gas developer or operator is responsible for damages to real or personal property caused by oil and gas operations and production.

History: En. Sec. 5, Ch. 199, L. 1981; amd. Sec. 4, Ch. 57, L. 2007.

Cross-References

Measure of damages, Title 27, ch. 1, part 3.

82-10-506. Notification of injury. To receive compensation under this part, a surface owner shall give written notice to the oil and gas developer or operator of the damages sustained by the surface owner within 2 years after the injury occurs or would become apparent to a reasonable person.

History: En. Sec. 6, Ch. 199, L. 1981; amd. Sec. 2738, Ch. 56, L. 2009.

82-10-507. Agreement — offer of settlement. Unless both parties provide otherwise by written agreement, within 60 days after the oil and gas developer or operator receives notice of damages pursuant to 82-10-506, the developer or operator shall make a written offer of settlement to the person seeking compensation for the damages. The surface owner seeking compensation may accept or reject any offer.

History: En. Sec. 7, Ch. 199, L. 1981; amd. Sec. 2739, Ch. 56, L. 2009.

82-10-508. Rejection — legal action. If the person seeking compensation receives a written rejection, rejects the offer of the oil and gas developer or operator, or receives no reply, that person may bring an action for compensation in the district court of the county in which the damage was sustained.

History: En. Sec. 8, Ch. 199, L. 1981.

Cross-References

Measure of damages, Title 27, ch. 1, part 3.

82-10-509 reserved.

82-10-510. Penalty for notice violation. Failure to comply with the notice requirements of 82-10-503 subjects the oil and gas developer or operator to the provisions of 82-11-122 and 82-11-147 through 82-11-149.

History: En. Sec. 5, Ch. 57, L. 2007.

82-10-511. Remedies cumulative. The remedies provided by this part do not preclude any person from seeking other remedies allowed by law.

History: En. Sec. 9, Ch. 199, L. 1981.

Cross-References

Availability of remedies, Title 27, ch. 1.

Part 6
Disclosure of Fracturing Fluids

82-10-601. Legislative findings — purpose. The purpose of this part is to provide a fair process for disclosure of fracturing fluids to facilitate transparency, while protecting valuable trade secrets and allowing well owners, operators, and service companies to protect their right to obtain an advantage over competitors.

History: En. Sec. 1, Ch. 316, L. 2017.

82-10-602. Definitions. For the purposes of this part, the following definitions apply:

(1) "Administrator" means the administrator of the division of oil and gas conservation.

(2) "Fracturing" means the introduction of fluid that may carry in suspension a propping agent under pressure into a formation containing oil or gas for the purpose of creating cracks in the formation to serve as channels for fluids to move to or from the well bore.

(3) "Systems approach" means the reporting of the identity of chemicals separately from the additive products they go into or the reporting of fracturing chemicals without attribution to the specific products in the fracturing fluid.

History: En. Sec. 2(4), Ch. 316, L. 2017.

82-10-603. Fracturing fluid disclosure — requirements. (1) The board of oil and gas conservation shall require the disclosure of fracturing fluids in accordance with 82-10-604 and this section.

(2) The fracturing fluid disclosure required by subsection (1) must include:

(a) except as provided in 82-10-604, the chemical compound name and the chemical abstracts service registry number of the ingredients, including any hazardous component listed on a material safety data sheet as defined in 50-78-102, the product name, and the type of additives used; and

(b) the proposed rate or concentration for each ingredient or additive, which may be expressed as percent by weight, percent by volume, parts per million, or parts per billion.

(3) Except as provided in 82-10-604(4)(b), the administrator shall post the information submitted pursuant to subsection (2) to the board of oil and gas conservation's website or to a website established for education and disclosure of fracturing fluids hosted by a nonprofit organization dedicated to ground water protection with members consisting of state ground water regulatory agencies, the interstate oil and gas compact commission, or both or their successors.

History: En. Sec. 2(1)-(3), Ch. 316, L. 2017.

82-10-604. Confidentiality request for trade secrets. (1) (a) If the owner or operator or service company providing fracturing services for a well believes that disclosing the complete composition of the fracturing fluid, including a specific ingredient's identity, concentrations, or both required in accordance with 82-10-603(2), will, if disclosed, reveal information entitled to protection as trade secrets as defined in 30-14-402 that should be exempt from public disclosure, the owner, operator, or service company may request that the administrator withhold the information.

(b) When an owner, operator, or service company requests that information be withheld, the department shall charge a fee of no more than $25 per ingredient or concentration for the request.

(2) To meet the requirement of subsection (1), the owner, operator, or service company shall provide the administrator with information demonstrating all of the following:

(a) that the ingredient identity, concentrations, or both, as appropriate, have not appeared in a public source or been publicly disclosed:

(i) pursuant to a federal or state law or regulation;

(ii) in a professional trade publication; or

(iii) through any other media or publication available to the public or competing oil and gas owners, operators, or service companies;

(b) to what extent the identity of the ingredient, its concentrations, or both, as appropriate, are known within a company and how the information is housed in the company and what steps employees, officers, agents, and directors take to prevent disclosure of the information;

(c) whether any other federal or state entity has determined that the ingredient identity, concentrations, or both, as appropriate, are not entitled to protection from public disclosure. A copy of the regulatory entity's determination, along with any explanation as to why the administrator should not make a similar determination, must be provided. Any information concerning prior requests for confidentiality that an owner, operator, or service company determines to be relevant also must be provided to the administrator;

(d) how the identity of the ingredient, its concentrations, or both, as appropriate, are commercially valuable to the owner, operator, or service company. A description of why the use of the ingredient, its concentrations, or both, as appropriate, is not common knowledge in the industry, including any novel or unusual aspects about the ingredient, must be provided.

(e) the ease or difficulty with which the complete composition of the fracturing fluid, including the ingredient identity, concentrations, or both, as appropriate, could be determined because of public disclosure. The information must explain why a systems approach format would not adequately protect a proprietary interest.

(3) An owner, operator, or service company shall provide the administrator with a description of the investigation completed by the owner, operator, or service company to meet the requirements of subsection (2).

(4) (a) Within 5 days of receiving the information provided in accordance with subsection (2), the administrator shall determine whether an owner, operator, or service company must disclose the ingredient identity, concentrations, or both, as appropriate.

(b) If the administrator determines disclosure of the ingredient identity, concentrations, or both, as appropriate, is not required, the administrator shall:

(i) post the information required in accordance with 82-10-603 to the board of oil and gas conservation's website or to a website hosted by a nonprofit organization dedicated to ground water protection with members consisting of state ground water regulatory agencies, the interstate oil and gas compact commission, or both or their successors and redact the specific information about the ingredient identity, concentrations, or both, as appropriate, that the administrator has determined may be withheld from public disclosure in accordance with this section;

(ii) make available to the public the chemical family name in lieu of a specific chemical compound name and number for any ingredient, concentration, or both, as appropriate, that is being withheld; and

(iii) maintain the unredacted version of the information in the board of oil and gas conservation's confidential files.

(5) If the administrator makes a determination in accordance with subsection (4)(b) that information must be withheld from public disclosure, the owner, operator, or service company shall every 3 years update the information required in accordance with subsection (2) to confirm that the ingredient identity, concentrations, or both, as appropriate, have not been disclosed to the public in another forum.

(6) If an owner, operator, or service company disagrees with a determination by the administrator in accordance with subsections (1) through (5) that certain material will not be maintained as confidential, the owner, operator, or service company may file a declaratory judgment action in a court of competent jurisdiction to establish the existence of a trade secret if the owner, operator, or service company wishes the information to enjoy confidential status. The board must be served in the action and may intervene as a party. Information submitted to the board or administrator by an owner, operator, or service company and contested in accordance with this subsection may only be publicly disclosed after a determination is made by a court of competent jurisdiction. Information submitted in accordance with 82-10-603 must be treated in accordance with this part.

History: En. Sec. 3, Ch. 316, L. 2017.

CHAPTER 11

OIL AND GAS CONSERVATION

Part 1 — Regulation by Board of Oil and Gas Conservation

82-11-101. Definitions.
82-11-102. Oil or gas wells not public utilities.
82-11-103. Lands subject to law.
82-11-104. Construction — no conflict with board of land commissioners' authority.
82-11-105 through 82-11-109 reserved.
82-11-110. Oil and gas education and research account.
82-11-111. Powers and duties of board.
82-11-112. Intergovernmental cooperation.
82-11-113. Repealed.
82-11-114. Repealed.
82-11-115. Repealed.
82-11-116. Repealed.
82-11-117. Confidentiality of records.
82-11-118. Fees for processing applications.
82-11-119 and 82-11-120 reserved.
82-11-121. Oil and gas waste prohibited.
82-11-122. Notice of intention to drill or conduct seismic operations — notice to surface owner.
82-11-123. Requirements for oil and gas operations.
82-11-124. Requirements relating to waste prevention.
82-11-125. Availability of cores or chips, cuttings, and bottom-hole temperatures to board.
82-11-126. Availability of facilities to bureau of mines.
82-11-127. Prohibited activity — Makoshika state park.

82-11-128 through 82-11-130 reserved.
82-11-131. Privilege and license tax.
82-11-132. Repealed.
82-11-133. Repealed.
82-11-134. Permit fees.
82-11-135. Money earmarked for board expenses.
82-11-136. Expenditure of funds from bonds for plugging wells.
82-11-137. Class II injection well operating fee.
82-11-138. Rulemaking — microbial conversion wells.
82-11-139 and 82-11-140 reserved.
82-11-141. Administrative procedure.
82-11-142. Subpoena power — civil actions.
82-11-143. Rehearing.
82-11-144. Court review.
82-11-145. Injunction or restraining order.
82-11-146. Appeal.
82-11-147. Violations.
82-11-148. Criminal penalties.
82-11-149. Civil penalties.
82-11-150. Legal assistance.
82-11-151. Emergencies — notice and hearing.
82-11-152 through 82-11-160 reserved.
82-11-161. Oil and gas production damage mitigation account — statutory appropriation.
82-11-162. Repealed.
82-11-163. Landowner's bond on noncommercial well.
82-11-164. Lien created.
82-11-165 through 82-11-170 reserved.
82-11-171. Terminated.
82-11-172. Short title.
82-11-173. Legislative findings — purpose.
82-11-174. Offset permitting — geographic requirements.
82-11-175. Coal bed methane wells — requirements.
82-11-176 through 82-11-179 reserved.
82-11-180. Preservation of property rights.
82-11-181. Geologic storage reservoir administrative fee — account established.
82-11-182. Liability for carbon dioxide during injection.
82-11-183. Certificate of completion — department of environmental quality participation — transfer of liability.
82-11-184. Conversion of enhanced recovery wells.
82-11-185. Makoshika state park requirements.
82-11-186 and 82-11-187 reserved.
82-11-188. Incidental carbon dioxide storage — certification.

Part 2 — Unit Operations

82-11-201. Establishment of well spacing units.
82-11-202. Pooling of interest within spacing unit.
82-11-203. Pooling agreements not in violation of antitrust laws.
82-11-204. Hearing on operation of pool as unit.
82-11-205. Board order for unit operation — criteria.
82-11-206. Terms and conditions of plan for unit operations.
82-11-207. Approval of plan for unit operations by persons paying costs.
82-11-208. Board orders — amendment.
82-11-209. Units established by previous order.
82-11-210. Unit operations — less than whole of pool.
82-11-211. Operations considered as done by all owners in unit.
82-11-212. Property rights and operator's lien.
82-11-213. Contract not terminated by board order.
82-11-214. Title to oil and gas rights not affected by board order.
82-11-215. Unit operation not restraint of trade.
82-11-216. No creation of relationship between parties in unit.

Part 3 — Interstate Oil and Gas Conservation Compact

82-11-301. Authorization to join interstate compact for conservation of oil and gas.
82-11-302. Interstate oil and gas compact.
82-11-303. Extension of expiration date.
82-11-304. Governor as member of interstate oil compact commission.
82-11-305. Limitation on power of representative.
82-11-306. Expenses of representative.

Chapter Cross-References

Board of Oil and Gas Conservation, 2-15-3303.

Duty to notify weed management district when proposed project will disturb land, 7-22-2152.

Duties of Board of Oil and Gas Conservation relating to underground natural gas reservoir appropriations, 70-30-203, 70-30-206.

Production of water from oil and gas wells, 85-2-510.

Part 1
Regulation by Board of Oil and Gas Conservation

82-11-101. *(Temporary)* **Definitions.** As used in this chapter, unless the context requires otherwise, the following definitions apply:

(1) "Administrator" means the administrator of the division of oil and gas conservation.

(2) "Board" means the board of oil and gas conservation provided for in 2-15-3303.

(3) "Class II injection well" means a well, as defined by the federal environmental protection agency or any successor agency, that injects fluids:

(a) that have been brought to the surface in connection with oil or natural gas production;

(b) for purposes of enhancing the ultimate recovery of oil or natural gas; or

(c) for purposes of storing liquid hydrocarbons.

(4) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(5) "Determinations" means those decisions delegated to the state by or under authority of the Natural Gas Policy Act of 1978 or any successor or similar legislation relating to oil and gas.

(6) "Enhanced recovery" means the increased recovery from a pool achieved by artificial means or by the application of energy extrinsic to the pool; such artificial means or application includes pressuring, cycling, pressure maintenance, or injection into the pool of any substance or form of energy as is contemplated in secondary recovery and tertiary programs but does not include the injection in a well of a substance or form of energy for the sole purpose of aiding in the lifting of fluids in the well or stimulating of the reservoir at or near the well by mechanical, chemical, thermal, or explosive means.

(7) "Field" means the general area underlaid by one or more pools.

(8) "Fluid" means any material or substance that flows or moves, whether in a semisolid, liquid, sludge, gas, or any other form or state.

(9) "Owner" means the person who has the right to drill into and produce from a pool and to appropriate the oil or gas the person produces from a pool either for the person or others or for the person and others, and the term includes all persons holding that authority by or through the person with the right to drill.

(10) "Person" means any natural person, corporation, association, partnership, receiver, trustee, executor, administrator, guardian, fiduciary, or other representative of any kind and includes any agency or instrumentality of the state or any governmental subdivision of the state.

(11) "Pollution" means contamination or other alteration of the physical, chemical, or biological properties of any state waters that exceeds that permitted by state water quality standards or standards adopted by the board, including but not limited to the disposal, discharge, seepage, drainage, infiltration, flow, or injection of any liquid, gaseous, solid, or other substance into any state waters that will or is likely to create a nuisance or render the waters harmful, detrimental, or injurious to public health, recreation, safety, welfare, livestock, wild animals, birds, fish, or other wildlife. A disposal, discharge, seepage, drainage, infiltration, flow, or injection of fluid that is authorized under a rule, permit, or order of the board is not pollution under this chapter.

(12) "Pool" means an underground reservoir containing a common accumulation of oil or gas or both; each zone of a structure which is completely separated from any other zone in the same structure is a pool, as that term is used in this chapter.

(13) "Producer" means the owner of a well or wells capable of producing oil or gas or both.

(14) "Responsible person" means a person who is determined by the board under 82-10-402 to have abandoned an oil or gas well, injection well, disposal well, water source well, drill site, sump, seismographic shot hole, or other area where oil and gas drilling and production operations were conducted.

(15) "State waters" means any body of water, either surface or underground.

(16) (a) "Waste" means:

(i) physical waste, as that term is generally understood in the oil and gas industry;

(ii) the inefficient, excessive, or improper use of or the unnecessary dissipation of reservoir energy;

(iii) the location, spacing, drilling, equipping, operating, or producing of any oil or gas well or wells in a manner which causes or tends to cause reduction in the quantity of oil or gas ultimately recoverable from a pool under prudent and proper operations or which causes or tends to cause unnecessary or excessive surface loss or destruction of oil or gas; and

(iv) the inefficient storing of oil or gas. (The production of oil or gas from any pool or by any well to the full extent that the well or pool can be produced in accordance with methods designed to result in maximum ultimate recovery, as determined by the board, is not waste within the meaning of this definition.)

(b) The loss of gas to the atmosphere during coal mining operations is not waste within the meaning of this definition.

82-11-101. *(Effective on occurrence of contingency)* **Definitions.** As used in this chapter, unless the context requires otherwise, the following definitions apply:

(1) "Administrator" means the administrator of the division of oil and gas conservation.

(2) "Board" means the board of oil and gas conservation provided for in 2-15-3303.

(3) "Carbon dioxide" means carbon dioxide produced by anthropogenic sources that is of such purity and quality that it will not compromise the safety of a geologic storage reservoir and will not compromise those properties of a geologic storage reservoir that allow the reservoir to effectively enclose and contain a stored gas.

(4) (a) "Carbon dioxide injection well" means a well that injects carbon dioxide for the underground storage of carbon dioxide in a geologic storage reservoir.

(b) The term does not include a class II injection well in which carbon dioxide is injected for the purpose of enhancing the recovery of oil and gas.

(5) "Class II injection well" means a well, as defined by the federal environmental protection agency or any successor agency, that injects fluids:

(a) that have been brought to the surface in connection with oil or natural gas production;

(b) for purposes of enhancing the ultimate recovery of oil or natural gas; or

(c) for purposes of storing liquid hydrocarbons.

(6) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(7) "Determinations" means those decisions delegated to the state by or under authority of the Natural Gas Policy Act of 1978 or any successor or similar legislation relating to oil and gas.

(8) "Enhanced recovery" means the increased recovery from a pool achieved by artificial means or by the application of energy extrinsic to the pool; artificial means or application includes pressuring, cycling, pressure maintenance, or injection into the pool of any substance or form of energy as is contemplated in secondary recovery and tertiary programs but does not include the injection in a well of a substance or form of energy for the sole purpose of aiding in the lifting of fluids in the well or stimulating of the reservoir at or near the well by mechanical, chemical, thermal, or explosive means.

(9) "Field" means the general area underlaid by one or more pools.

(10) "Fluid" means any material or substance that flows or moves, whether in a semisolid, liquid, sludge, gas, or any other form or state.

(11) "Geologic storage operator" means a person holding or applying for a carbon dioxide injection well permit.

(12) (a) "Geologic storage reservoir" means a subsurface sedimentary stratum, formation, aquifer, cavity, or void, whether natural or artificially created, including vacant or filled reservoirs, saline formations, and coal seams suitable for or capable of being made suitable for injecting and storing carbon dioxide.

(b) The term does not include a natural gas storage reservoir. However, the owner of a natural gas storage reservoir may convert a depleted natural gas storage reservoir into a geologic storage reservoir to be used pursuant to Title 82, chapter 11, parts 1 and 2.

(13) "Owner" means the person who has the right to drill into and produce from a pool and to appropriate the oil or gas the person produces from a pool either for the person or others or for the person and others, and the term includes all persons holding that authority by or through the person with the right to drill.

(14) "Person" means any natural person, corporation, association, partnership, receiver, trustee, executor, administrator, guardian, fiduciary, or other representative of any kind and includes any agency or instrumentality of the state or any governmental subdivision of the state.

(15) "Pollution" means contamination or other alteration of the physical, chemical, or biological properties of any state waters that exceeds that permitted by state water quality standards or standards adopted by the board, including but not limited to the disposal, discharge, seepage, drainage, infiltration, flow, or injection of any liquid, gaseous, solid, or other substance into any state waters that will or is likely to create a nuisance or render the waters harmful, detrimental, or injurious to public health, recreation, safety, welfare, livestock, wild animals, birds, fish, or other wildlife. A disposal, discharge, seepage, drainage, infiltration, flow, or injection of fluid that is authorized under a rule, permit, or order of the board is not pollution under this chapter.

(16) "Pool" means an underground reservoir containing a common accumulation of oil or gas or both. Each zone of a structure that is completely separated from any other zone in the same structure is a pool. For the purposes of unitization pursuant to Title 82, chapter 11, part 2, "pool" also includes an underground reservoir for the long-term storage of carbon dioxide after the effective date of this section.

(17) "Producer" means the owner of a well or wells capable of producing oil or gas or both.

(18) "Responsible person" means a person who is determined by the board under 82-10-402 to have abandoned an oil or gas well, injection well, disposal well, water source well, drill site, sump, seismographic shot hole, or other area where oil and gas drilling and production operations were conducted.

(19) "State waters" means any body of water, either surface or underground.

(20) "Verification and monitoring" means measuring the amount of carbon dioxide stored at a specific geologic storage reservoir, checking the site for leaks or deterioration of storage integrity, and ensuring that carbon dioxide is stored in a way that is permanent and not harmful to the ecosystem. The term includes:

(a) using models to show, before injection is allowed, that injected carbon dioxide will be securely stored. Modeling includes but is not limited to consideration of seismic activity, possible paths for fugitive emissions, and chemical reactions in the geologic formation.

(b) tracking plume behavior after injection of carbon dioxide, including the use of pressure monitoring; and

(c) establishing a system of leak monitors.

(21) (a) "Waste" means:

(i) physical waste, as that term is generally understood in the oil and gas industry;

(ii) the inefficient, excessive, or improper use of or the unnecessary dissipation of reservoir energy;

(iii) the location, spacing, drilling, equipping, operating, or producing of any oil or gas well or wells in a manner that causes or tends to cause reduction in the quantity of oil or gas ultimately recoverable from a pool under prudent and proper operations or that causes or tends to cause unnecessary or excessive surface loss or destruction of oil or gas; and

(iv) the inefficient storing of oil or gas.

(b) (i) The production of oil or gas from any pool or by any well to the full extent that the well or pool can be produced in accordance with methods designed to result in maximum ultimate recovery, as determined by the board, is not waste within the meaning of subsection (21)(a).

(ii) The loss of gas to the atmosphere during coal mining operations is not waste within the meaning of subsection (21)(a).

History: En. Sec. 3, Ch. 238, L. 1953; amd. Sec. 55, Ch. 253, L. 1974; amd. Sec. 1, Ch. 336, L. 1977; R.C.M. 1947, 60-126(part); amd. Sec. 1, Ch. 19, L. 1979; amd. Sec. 5, Ch. 239, L. 1983; amd. Sec. 1, Ch. 503, L. 1987; amd. Sec. 10, Ch. 530, L. 1989; amd. Sec. 1, Ch. 734, L. 1991; amd. Sec. 3, Ch. 379, L. 1993; amd. Sec. 12, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-102. Oil or gas wells not public utilities. Nothing in this chapter shall in any manner be construed as constituting or attempting to constitute oil or gas wells as a public utility or utilities.

History: En. Sec. 20, Ch. 238, L. 1953; amd. Sec. 79, Ch. 253, L. 1974; R.C.M. 1947, 60-143.

82-11-103. Lands subject to law. This chapter applies to all lands in the state lawfully subject to its police powers, including all state-owned lands. It applies to lands of the United States or to lands subject to the jurisdiction of the United States only to the extent that control and supervision of conservation of oil and gas by the United States on its lands fails to effect the intent and purposes of this chapter and otherwise applies to those lands to the extent that any officer of the United States having jurisdiction or the officer's duly authorized representative approves any of the provisions of this chapter or an order of the board that affects those lands. This chapter also applies to any lands committed to a unit agreement approved by the secretary of the interior or the secretary's duly authorized representative, except that the board may, with respect to those unit agreements, suspend the application of this chapter or any part of this chapter so long as the conservation of oil and gas and the prevention of waste as provided in this chapter is accomplished under the unit agreements. The suspension does not relieve an operator or owner from making reports that may be required by the board with respect to operations and production under the unit agreement, and the suspension does not relieve an operator or owner from the payment of taxes on oil and gas production or payment for permit fees as required by this chapter.

History: En. Sec. 17, Ch. 238, L. 1953; amd. Sec. 76, Ch. 253, L. 1974; R.C.M. 1947, 60-140; amd. Sec. 2, Ch. 734, L. 1991; amd. Sec. 2740, Ch. 56, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-105 through 82-11-109 reserved.

82-11-110. Oil and gas education and research account. There is an oil and gas education and research account within the state special revenue fund established in 17-2-102. Interest or other income earned on money in the oil and gas education and research account accrues to that account.

History: En. Sec. 2, Ch. 329, L. 2009.

82-11-111. *(Temporary)* **Powers and duties of board.** (1) The board shall make investigations that it considers proper to determine whether waste exists or is imminent or whether other facts exist that justify any action by the board under the authority granted by this chapter.

(2) Subject to the administrative control of the department under 2-15-121, the board shall:

(a) require measures to be taken to prevent contamination of or damage to surrounding land or underground strata caused by drilling operations and production, including but not limited to regulating the disposal or injection of water and disposal of oil field wastes;

(b) classify wells as oil or gas wells or class II injection wells for purposes material to the interpretation or enforcement of this chapter;

(c) adopt and enforce rules and orders to implement this chapter; and

(d) adopt and enforce rules and orders to implement the provisions of 85-2-510, including the establishment of a fee for petitioners seeking a hearing.

(3) The board shall determine and prescribe which producing wells are defined as "stripper wells" and which wells are defined as "wildcat wells" and make orders that in its judgment are required to protect those wells and provide that stripper wells may be produced to capacity if that is considered necessary in the interest of conservation.

(4) With respect to any pool from which gas was being produced by a gas well on or prior to April 1, 1953, this chapter does not authorize the board to limit or restrain the rate, daily or otherwise, of production of gas from that pool by any existing well or a well drilled after that date and producing from that pool to less than the rate at which the well can be produced without adversely affecting the quantity of gas ultimately recoverable by the well.

(5) The board has exclusive jurisdiction over all class II injection wells and all pits and ponds in relation to those injection wells. The board may:

(a) issue, suspend, revoke, modify, or deny permits to operate class II injection wells consistent with rules made by it;

(b) examine plans and other information needed to determine whether a permit should be issued or require changes in plans as a condition to the issuance of a permit;

(c) clearly specify in a permit any limitations imposed as to the volume and characteristics of the fluids to be injected and the operation of the well;

(d) authorize its staff to enter upon any public or private property at reasonable times to:

(i) investigate conditions relating to violations of permit conditions;

(ii) have access to and copy records required under this chapter;

(iii) inspect monitoring equipment or methods; and

(iv) sample fluids that the operator is required to sample; and

(e) adopt standards for the design, construction, testing, and operation of class II injection wells.

(6) The board shall determine, for the purposes of using the oil and gas production damage mitigation account established in 82-11-161:

(a) when the person responsible for an abandoned well, sump, or hole cannot be identified or located or, if the person is identified or located, when the person does not have sufficient financial resources to properly plug the well, sump, or hole; or

(b) when a previously abandoned well, sump, or hole is the cause of potential environmental problems and no responsible party can be identified or located or, if a responsible party can be identified and located, when the person does not have sufficient financial resources to correct the problems.

(7) The board may take measures to demonstrate to the general public the importance of the state's oil and gas exploration and production industry, to encourage and promote the wise and efficient use of energy, to promote environmentally sound exploration and production methods and technologies, to develop the state's oil and gas resources, and to support research and educational activities concerning the oil and natural gas exploration and production industry. The board may:

(a) make grants or loans and provide other forms of financial assistance as necessary or appropriate from available funds to qualified persons for research, development, marketing, educational projects, and processes or activities directly related to the state's oil and gas exploration and production industry;

(b) enter into contracts or agreements to carry out the purposes of this subsection (7), including the authority to contract for the administration of an oil and gas research, development, marketing, and educational program;

(c) cooperate with any private, local, state, or national commission, organization, agent, or group and enter into contracts and agreements for programs benefiting the oil and gas exploration and production industry;

(d) coordinate with the Montana university system, including Montana technological university or any of its affiliated research programs;

(e) accept donations, grants, contributions, and gifts from any public or private source for deposit in the oil and gas education and research account established in 82-11-110;

(f) distribute funds from the oil and gas education and research account to carry out the provisions of this subsection (7); and

(g) make orders and rules to implement the provisions of this subsection (7).

82-11-111. *(Effective on occurrence of contingency)* **Powers and duties of board.** (1) The board shall investigate matters it considers proper to determine whether waste exists or is imminent or whether other facts exist that justify any action by the board under the authority granted by this chapter.

(2) Subject to the administrative control of the department under 2-15-121, the board shall:

(a) require measures to be taken to prevent contamination of or damage to surrounding land or underground strata caused by drilling operations and production, including but not limited to regulating the disposal or injection of water or carbon dioxide and disposal of oil field wastes;

(b) classify wells as oil or gas wells, carbon dioxide injection wells, or class II injection wells for purposes material to the interpretation or enforcement of this chapter;

(c) adopt and enforce rules and orders to implement this chapter; and

(d) adopt and enforce rules and orders to implement the provisions of 85-2-510, including the establishment of a fee for petitioners seeking a hearing.

(3) The board shall determine and prescribe which producing wells are defined as "stripper wells" and which wells are defined as "wildcat wells" and make orders that in its judgment are required to protect those wells and provide that stripper wells may be produced to capacity if that is considered necessary in the interest of conservation.

(4) With respect to any pool with gas being produced by a gas well on or prior to April 1, 1953, this chapter does not authorize the board to limit or restrain the rate, daily or otherwise, of production of gas from that pool by any existing well or a well drilled after that date and producing from that pool to less than the rate at which the well can be produced without adversely affecting the quantity of gas ultimately recoverable by the well.

(5) Subject to subsection (8), the board has exclusive jurisdiction over carbon dioxide injection wells, geologic storage reservoirs, all class II injection wells, and all pits and ponds in relation to those injection wells. The board may:

(a) issue, suspend, revoke, modify, or deny permits to operate carbon dioxide injection wells and class II injection wells, consistent with rules made by it and pursuant to 82-11-123. If a permit for a carbon dioxide injection well is revoked, an operator may not seek a refund of application or permitting fees or fees paid pursuant to 82-11-181 or 82-11-184(2)(b).

(b) examine plans and other information needed to determine whether a permit should be issued or require changes in plans as a condition to the issuance of a permit;

(c) clearly specify in a permit any limitations imposed as to the volume and characteristics of the fluids to be injected and the operation of the well;

(d) authorize its staff to enter upon any public or private property at reasonable times to:

(i) investigate conditions relating to violations of permit conditions;

(ii) have access to and copy records required under this chapter;

(iii) inspect monitoring equipment or methods; and

(iv) sample fluids that the operator or geologic storage operator is required to sample; and

(e) adopt standards for the design, construction, testing, and operation of carbon dioxide injection wells and class II injection wells.

(6) The board shall determine, for the purposes of using the oil and gas production damage mitigation account established in 82-11-161 or the geologic storage reservoir program account established in 82-11-181:

(a) when the person responsible for an abandoned well, sump, or hole cannot be identified or located or, if the person is identified or located, when the person does not have sufficient financial resources to properly plug the well, sump, or hole; or

(b) when a previously abandoned well, sump, or hole is the cause of potential environmental problems and a responsible party cannot be identified or located or, if a responsible party can be identified and located, when the person does not have sufficient financial resources to correct the problems.

(7) The board may take measures to demonstrate to the general public the importance of the state's oil and gas exploration and production industry, to encourage and promote the wise and efficient use of energy, to promote environmentally sound exploration and production methods and technologies, to develop the state's oil and gas resources, and to support research and educational activities concerning the oil and natural gas exploration and production industry. The board may:

(a) make grants or loans and provide other forms of financial assistance as necessary or appropriate from available funds to qualified persons for research, development, marketing, educational projects, and processes or activities directly related to the state's oil and gas exploration and production industry;

(b) enter into contracts or agreements to carry out the purposes of this subsection (7), including the authority to contract for the administration of an oil and gas research, development, marketing, and educational program;

(c) cooperate with any private, local, state, or national commission, organization, agent, or group and enter into contracts and agreements for programs benefiting the oil and gas exploration and production industry;

(d) coordinate with the Montana university system, including Montana technological university or any of its affiliated research programs;

(e) accept donations, grants, contributions, and gifts from any public or private source for deposit in the oil and gas education and research account established in 82-11-110;

(f) distribute funds from the oil and gas education and research account to carry out the provisions of this subsection (7); and

(g) make orders and rules to implement the provisions of this subsection (7).

(8) (a) Before holding a hearing on a proposed permit for a carbon dioxide injection well, the board shall solicit, document, consider, and address comments from the department of environmental quality on the proposal.

(b) Notwithstanding the provisions of subsection (8)(a), the board makes the final decision on issuance of a permit.

(9) Solely for the purposes of administering carbon dioxide injection wells under this part, carbon dioxide within a geologic storage reservoir is not a pollutant, a nuisance, or a hazardous or deleterious substance.

History: **En. Sec. 4, Ch. 238, L. 1953; amd. Sec. 16, Ch. 93, L. 1969; amd. Sec. 56, Ch. 253, L. 1974; amd. Sec. 1, Ch. 260, L. 1974; amd. Sec. 1, Ch. 222, L. 1975; R.C.M. 1947, 60-127(part); amd. 82-11-117. Confidentiality of records. (1) Except as provided in subsection (4), any information that is furnished to the board or the board's staff or that is obtained by either of them is a matter of public record and open to public use. Except as provided in subsection (4), information unique to the owner or operator that would, if disclosed, reveal methods or processes entitled to protection as trade secrets must be maintained as confidential if so determined by the board.

(2) If an owner, operator, or service company disagrees with a determination by the board in accordance with this section or by the administrator in accordance with Title 82, chapter 10, part 6, that certain material will not be maintained as confidential, the owner, operator, or service company may file a declaratory judgment action in a court of competent jurisdiction to establish the existence of a trade secret if the owner, operator, or service company wishes the information to enjoy confidential status. The board must be served in the action and may intervene as a party. Information submitted to the board or administrator by an owner, operator, or service company and contested in accordance with this subsection may only be publicly disclosed after a determination is made by a court of competent jurisdiction.

(3) Any information not intended to be public when submitted to the board or the board's staff must be submitted in writing and clearly marked as confidential.

(4) Information submitted in accordance with 82-10-603 must be treated in accordance with Title 82, chapter 10, part 6.

(5) Data describing physical and chemical characteristics of a liquid, gaseous, solid, or other substance injected or discharged into state waters under this chapter or Title 82, chapter 10, part 6, may not be considered confidential.

(6) The board may use any information in compiling or publishing analyses or summaries relating to water pollution if the analyses or summaries do not identify the owner or operator or reveal any information that is otherwise made confidential by this section.

History: En. Sec. 3, Ch. 503, L. 1987; amd. Sec. 2741, Ch. 56, L. 2009; amd. Sec. 5, Ch. 316, L. 2017.

82-11-118. *(Temporary)* **Fees for processing applications.** (1) The board shall establish a fee schedule to defray the expenses incurred for processing an application from an operator or producer of oil seeking approval of a new or expanded enhanced recovery project, as defined in 15-36-303. The fee must be paid by the owner or operator seeking approval of the project.

(2) The board shall, by rule, determine the amount of the fee based on the complexity of processing the application.

82-11-118. *(Effective on occurrence of contingency)* **Fees for processing applications.** (1) The board shall establish a fee schedule to defray the expenses incurred for processing an application from a geologic storage operator or an operator or producer of oil seeking approval of a new or expanded enhanced recovery project, as defined in 15-36-303. The fee must be paid by the owner, geologic storage operator, or operator seeking approval of the project.

(2) The board shall, by rule, determine the amount of the fee based on the complexity of processing the application.

History: En. Sec. 20, Ch. 9, Sp. L. November 1993; amd. Sec. 47, Ch. 451, L. 1995; amd. Sec. 15, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-119 and 82-11-120 reserved.

82-11-121. Oil and gas waste prohibited. Waste of oil and gas or either of them as waste is defined in this chapter is prohibited.

History: En. Sec. 1, Ch. 238, L. 1953; Sec. 60-124, R.C.M. 1947; amd. and redes. 60-127.1 by Sec. 54, Ch. 253, L. 1974; R.C.M. 1947, 60-127.1.

82-11-122. *(Temporary)* **Notice of intention to drill or conduct seismic operations — notice to surface owner.** It is unlawful to commence the drilling of a well for oil or gas without first filing with the board written notice of intention to drill and obtaining a drilling permit as provided in 82-11-134. After the permit is issued, an oil and gas developer or operator as defined under 82-10-502 shall comply with the notice requirements of 82-10-503 before commencing drilling operations. It is unlawful to conduct seismic explorations without first giving the board a copy of the notice of intention to explore filed with the county under 82-1-103.

82-11-122. *(Effective on occurrence of contingency)* **Notice of intention to drill or conduct seismic operations — notice to surface owner.** (1) It is unlawful to commence the drilling of a well for oil or gas without first filing with the board written notice of intention to drill and obtaining a drilling permit as provided in 82-11-134. After the permit is issued, an oil and gas developer or operator as defined under 82-10-502 shall comply with the notice requirements of 82-10-503 before commencing drilling operations. It is unlawful to conduct seismic explorations without first giving the board a copy of the notice of intention to explore filed with the county under 82-1-103.

(2) It is unlawful to commence the drilling of a carbon dioxide injection well without first filing with the board written notice of intention to drill and obtaining a drilling permit. Prior to issuing the permit, the board shall provide notice of an application for a permit. The notice must be:

(a) published in a newspaper of general circulation in each county where the carbon dioxide injection well and geologic storage reservoir is located; and

(b) mailed to all surface owners, mineral claimants, mineral owners, lessees, and other owners of record of subsurface interests that are located within 1 mile of the proposed boundary of the geologic storage reservoir.

History: En. Sec. 5, Ch. 238, L. 1953; amd. Sec. 57, Ch. 253, L. 1974; amd. Sec. 2, Ch. 260, L. 1974; R.C.M. 1947, 60-128; amd. Sec. 5, Ch. 339, L. 1985; amd. Sec. 4, Ch. 497, L. 1985; amd. Sec. 16, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

Landowner notification of surface operations, Title 82, ch. 2, part 3.
Surface owner damage and disruption compensation, Title 82, ch. 10, part 5.

82-11-123. *(Temporary)* **Requirements for oil and gas operations.** Subject to the administrative control of the department under 2-15-121, the board shall require:

(1) identification of ownership of oil or gas wells, producing properties, and tanks;

(2) the making and filing of acceptable well logs, including bottom-hole temperatures (in order to facilitate the discovery of potential geothermal energy sources), the making and filing of reports on well locations, and the filing of directional surveys, geological sample logs, mud logs, core descriptions, and ordinary core analysis, if made; however, logs of exploratory or wildcat wells need not be filed for a period of 6 months following completion of those wells;

(3) the drilling, casing, producing, and plugging of wells and class II injection wells in a manner that prevents the escape of oil or gas out of one stratum into another, the intrusion of water into oil or gas strata, blowouts, cave-ins, seepages, and fires and the pollution of fresh water supplies by oil, gas, salt, or brackish water;

(4) the restoration of surface lands to their previous grade and productive capability after a well is plugged or a seismographic shot hole has been utilized and necessary measures to

prevent adverse hydrological effects from the well or hole, unless the surface owner agrees in writing, with the approval of the board or its representatives, to a different plan of restoration;

(5) the furnishing of a reasonable bond with good and sufficient surety, conditioned for performance of the duty to properly plug each dry or abandoned well. The bond may be forfeited in its entirety by the board for failure to perform the duty to properly plug each dry or abandoned well and may not be canceled or absolved if the well fails to produce oil or gas in commercial quantities, until:

(a) the board determines the well is properly plugged and abandoned as provided in the board's rules; or

(b) the requirements of 82-11-163 are met.

(6) proper gauging or other measuring of oil and gas produced and saved to determine the quantity and quality of oil and gas;

(7) that every person who produces, transports, or stores oil or gas or injects or disposes of water in this state shall make available within this state for a period of 5 years complete and accurate records of the quantities. The records must be available for examination by the board or its employees at all reasonable times. The person shall file with the board reports as it may prescribe with respect to quantities, transportations, and storages of the oil, gas, or water.

(8) the installation, use, and maintenance of monitoring equipment or methods in the operation of class II injection wells.

82-11-123. *(Effective on occurrence of contingency)* **Requirements for oil and gas and carbon dioxide injection operations.** (1) Subject to the administrative control of the department under 2-15-121, the board shall require:

(a) identification of ownership of carbon dioxide injection wells, carbon dioxide, geologic storage reservoirs, and oil or gas wells, producing properties, and tanks;

(b) the making and filing of acceptable well logs, including bottom-hole temperatures, in order to facilitate the discovery of potential geothermal energy sources, the making and filing of reports on well locations, and the filing of directional surveys, geological sample logs, mud logs, core descriptions, and ordinary core analysis, if made. However, logs of exploratory or wildcat wells need not be filed for a period of 6 months following completion of those wells.

(c) the drilling, casing, producing, and plugging of wells, carbon dioxide injection wells, and class II injection wells in a manner that prevents the escape of carbon dioxide, oil, or gas out of one stratum into another, the intrusion of water into carbon dioxide, oil, or gas strata, blowouts, cave-ins, seepages, and fires and the pollution of fresh water supplies by carbon dioxide, oil, gas, salt, or brackish water;

(d) the restoration of surface lands to their previous grade and productive capability after a well is plugged or a seismographic shot hole has been utilized and necessary measures to prevent adverse hydrological effects from the well or hole, unless the surface owner agrees in writing, with the approval of the board or its representatives, to a different plan of restoration;

(e) except as provided in subsection (1)(f), the furnishing of a reasonable bond with good and sufficient surety, conditioned for performance of the duty to properly plug each dry or abandoned well. The bond may be forfeited in its entirety by the board for failure to perform the duty to properly plug each dry or abandoned well and may not be canceled or absolved if the well fails to produce oil or gas in commercial quantities, until:

(i) the board determines the well is properly plugged and abandoned as provided in the board's rules; or

(ii) the requirements of 82-11-163 are met.

(f) the furnishing of reasonable bond or other surety for a carbon dioxide injection well, geologic storage reservoir, and the carbon dioxide stored in the reservoir with good and sufficient surety for performance of the duty to operate and manage a carbon dioxide injection well, geologic storage reservoir, and the carbon dioxide stored in the reservoir and to properly plug and reclaim each carbon dioxide injection well. The bond or other surety may be forfeited in its entirety by the board for failure to perform the duty to properly manage and operate a well, reservoir, and stored carbon dioxide or to plug a well. Except as provided in 82-11-183(8), the bond or other surety may not be canceled or absolved.

(g) proper gauging or other measuring of oil and gas produced and saved to determine the quantity and quality of oil and gas;

(h) that every person who produces, transports, or stores oil or gas or injects or disposes of water or carbon dioxide in this state shall make available within this state for a period of 5 years complete and accurate records of the quantities. The records must be available for examination by the board or its employees at all reasonable times. The person shall file with the board reports as it may prescribe with respect to quantities, transportations, and storages of the oil, gas, carbon dioxide, or water.

(i) the installation, use, and maintenance of monitoring equipment or methods in the operation of carbon dioxide injection wells and class II injection wells.

(2) In addition to the requirements of subsection (1), the geologic carbon dioxide injection well permitting system must include:

(a) recordkeeping and reporting requirements sufficient to measure the effectiveness of carbon dioxide injection wells and geologic storage reservoirs;

(b) characterization of the injection zone and aquifers above and below the injection zone that may be affected, including applicable pressure and fluid chemistry data to describe the projected effects of injection activities;

(c) verification and monitoring at geologic storage reservoirs;

(d) mitigation of leaks, including the ability to stop the leaking of carbon dioxide and to address impacts of leaks;

(e) adequate baseline monitoring of drinking water wells within 1 mile of the perimeter of the geologic storage reservoir; and

(f) at a minimum, requirements pursuant to applicable federal regulatory standards established by:

(i) the Energy Independence and Security Act of 2007, Public Law 110-140, and subsequent acts;

(ii) the Safe Drinking Water Act, 42 U.S.C. 300f, et seq.; and

(iii) the underground injection control program, 40 CFR, parts 144 through 147.

Sec. 4, Ch. 503, L. 1987; amd. Sec. 78, Ch. 83, L. 1989; amd. Sec. 5, Ch. 530, L. 1989; amd. Sec. 1, Ch. 376, L. 1993; amd. Sec. 6, Ch. 34, L. 1997; amd. Sec. 17, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

Cross-References

Geophysical exploration, Title 82, ch. 1, part 1.

82-11-124. Requirements relating to waste prevention. Subject to the administrative control of the department under 2-15-121, the board shall, for the purpose of preventing waste:

(1) regulate the drilling, producing, and plugging of wells, the shooting and chemical treatment of wells, the spacing of wells, operations voluntarily entered into to increase ultimate recovery such as cycling of gas, the maintenance of pressure, and the introduction of gas, water, or other substances into producing formations; and

(2) fix, upon application made by any interested person after hearing, efficient gas-oil and water-oil ratios for any particular well or wells.

History: En. Sec. 4, Ch. 238, L. 1953; amd. Sec. 16, Ch. 93, L. 1969; amd. Sec. 56, Ch. 253, L. 1974; amd. Sec. 1, Ch. 260, L. 1974; amd. Sec. 1, Ch. 222, L. 1975; R.C.M. 1947, 60-127(part).

82-11-125. Availability of cores or chips, cuttings, and bottom-hole temperatures to board. (1) An owner drilling a well for gas or oil shall make available to the board at its field offices representative cores or chips, when available, the cuttings from the well, and the bottom-hole temperatures of the wells, in order to facilitate the discovery of geothermal potential. However, cores, chips, or cuttings need not be so made available for a period of 6 months following completion or abandonment of the wells. The board may, however, relieve the owner of a well of the obligation to furnish cores, chips, or cuttings when, in the opinion of the board, the furnishing thereof would be unduly burdensome for the owner; however, the owner desiring relief must apply to and receive permission from the board to not so furnish.

(2) The owner of a stratigraphic test well drilled for the purpose of obtaining lithologic information useful in potential oil and gas operations, as such well is defined by the board's

rules, shall within 3 years from the date of the cessation of the drilling of the well make available to the board complete sets of sample cuttings and representative cores or chips and well logs of the wells, which logs shall include among other information the size of casing used, the type and depth of water if any located, and bottom-hole temperatures for geothermal purposes. The board shall require and the owner of a stratigraphic test well shall furnish, prior to the commencement of drilling of the well, a good and sufficient surety bond, to be approved prior to the commencement of the drilling, conditioned upon the proper plugging of the well prior to abandonment, the amount of the bond to be determined by the estimated depth as in the board's rules provided for oil and gas wells; prior to abandonment, the wells shall be plugged by the owner thereof or by the surety should the owner be in default, the plugging to conform to the standards set down and determined by the board.

History: En. Sec. 21, Ch. 238, L. 1953; amd. Sec. 1, Ch. 224, L. 1955; amd. Sec. 1, Ch. 234, L. 1959; amd. Sec. 1, Ch. 208, L. 1973; amd. Sec. 80, Ch. 253, L. 1974; amd. Sec. 2, Ch. 222, L. 1975; R.C.M. 1947, 60-144; amd. Sec. 1, Ch. 248, L. 1983.

Suretyship, Title 28, ch. 11, part 4.

82-11-126. Availability of facilities to bureau of mines. The board may make available to the authorized personnel or representatives of the bureau of mines and geology such facilities, equipment, records, and cores and cuttings or samples of cores and cuttings as are or may be required by the bureau in the furtherance of its oil and gas research and study. Bottom-hole temperatures of oil and gas wells shall be made available to the bureau of mines and geology by the board in order to facilitate the determination of possible geothermal energy sources.

History: En. Sec. 3, Ch. 32, L. 1957; amd. Sec. 82, Ch. 253, L. 1974; amd. Sec. 3, Ch. 222, L. 1975; R.C.M. 1947, 60-148.

82-11-127. *(Temporary)* **Prohibited activity — Makoshika state park.** (1) A person may not:

(a) cause pollution of any state waters or place or cause to be placed any liquid, gaseous, solid, or other substance in a location where the substance is likely to cause pollution of any state waters;

(b) violate any provision set forth in a permit or stipulation, including but not limited to limitations and conditions contained in it;

(c) violate an order issued pursuant to this chapter; or

(d) violate a provision of this chapter.

(2) A person may not drill, construct, convert, or operate a class II injection well or drill an oil or gas well or stratigraphic test well or core hole as described under 82-11-134 without a valid permit or order from the board.

(3) Except as provided in subsection (5), on lands managed as Makoshika state park, pursuant to Title 23, chapter 1, and under the control of the department of fish, wildlife, and parks, by grant, acquisition, lease, easement, or other means, a person may not:

(a) drill, construct, convert, or operate an oil or gas well, stratigraphic test well, or core hole;

(b) conduct vibroseis, drill a seismic shot hole, or set a surface charge;

(c) explore for oil or gas in a manner that damages the land surface; or

(d) construct or place any surface facility associated with oil or gas exploration or development.

(4) The prohibitions in subsection (3) do not preclude the development of oil or gas resources from beneath Makoshika state park through directional drilling or access from property outside the boundaries of the state park provided that the surface resources of the state park are not disturbed.

(5) The prohibitions listed in subsection (3) do not apply to oil or gas resources within Makoshika state park that are owned by a private person, nor do the prohibitions apply to school trust lands within the boundaries of the park. The state acknowledges the mineral rights of Dawson County and the state school trust and the private property rights of persons owning

private mineral rights within Makoshika state park. The department of fish, wildlife, and parks is directed to conduct negotiations with the owners of mineral rights within Makoshika state park, with the purpose of acquiring those rights in the name of the state, and to report the results of the negotiations to the legislature no later than January 8, 2001.

82-11-127. *(Effective on occurrence of contingency)* **Prohibited activity.** (1) A person may not:

(a) cause pollution of any state waters or place or cause to be placed any liquid, gaseous, solid, or other substance in a location where the substance is likely to cause pollution of any state waters;

(b) violate any provision set forth in a permit or stipulation, including but not limited to limitations and conditions contained in it;

(c) violate an order issued pursuant to this chapter; or

(d) violate a provision of this chapter.

(2) A person may not drill, construct, convert, or operate a class II injection well or a carbon dioxide injection well or drill an oil or gas well or stratigraphic test well or core hole as described under 82-11-134 without a valid permit or order from the board.

History: En. Sec. 7, Ch. 503, L. 1987; amd. Sec. 1, Ch. 522, L. 1999; amd. Sec. 18, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-128 through 82-11-130 reserved.

82-11-131. Privilege and license tax. (1) For the purpose of providing funds for defraying the expenses of the operation and enforcement of this chapter and expenses of the board, an operator or producer of oil and gas shall pay an assessment of 0.3% of the market value of each barrel of crude petroleum produced, saved and marketed, or stored within the state or exported from the state and the same rate on the market value of each 10,000 cubic feet of natural gas produced, saved and marketed, or stored within the state or exported from the state.

(2) The board shall, by rule adopted pursuant to the provisions of the Montana Administrative Procedure Act, fix a percentage of the assessment and may from time to time reduce or increase the percentage of the assessment as the expenses chargeable against the oil and gas conservation fund may require.

(3) The board shall give the department of revenue at least 90 days' notice of any change in the percentage of the rate adopted pursuant to this section.

(4) For the purposes of this section, the provisions of Title 15, chapter 36, part 3, apply to the privilege and license tax assessment.

History: En. Sec. 22, Ch. 238, L. 1953; amd. Sec. 1, Ch. 234, L. 1955; amd. Sec. 1, Ch. 198, L. 1957; amd. Sec. 1, Ch. 47, L. 1961; amd. Sec. 160, Ch. 147, L. 1963; amd. Sec. 1, Ch. 254, L. 1977; R.C.M. 1947, 60-145(4).

82-11-135. Money earmarked for board expenses. The state treasurer shall deposit all money distributed to the board under 15-36-331 and collected under this chapter in the state special revenue fund. The money must first be used for the purpose of paying all expenses of the board as provided in 15-36-331(2)(a) and then allocated as provided in 15-36-331(2)(b) and (2)(c). The board shall use the money subject to biennial appropriations by the legislature. Income and interest from investment of the board's money in the state special revenue fund must be credited to the board.

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-137. *(Temporary)* **Class II injection well operating fee.** (1) For the purpose of providing funds for defraying the expenses of operating and enforcing the class II injection well regulatory program, as defined by the federal environmental protection agency or any successor agency, each operator of a class II injection well may be required to pay an annual operating fee not to exceed $300 per injection well.

(2) The department shall collect the operating fee at such time as the board may prescribe by rule. All money collected under this section must be forwarded to the state treasurer for deposit in the state special revenue fund and must be used for the purpose prescribed in subsection (1).

(3) The board shall, by rule adopted pursuant to the provisions of the Montana Administrative Procedure Act, fix the amount of the fee described in subsection (1) and may from time to time reduce or increase the amount thereof as the expenses chargeable against the state special revenue fund may require. However, the assessment fixed by the board may not exceed the limits prescribed in subsection (1). The amount of the fee must be expressed in dollars.

82-11-137. *(Effective on occurrence of contingency)* **Class II injection well operating fee — carbon dioxide injection well operating fee.** (1) For the purpose of providing funds for defraying the expenses of operating and enforcing:

(a) the class II injection well regulatory program, as defined by the federal environmental protection agency or any successor agency, each operator of a class II injection well may be required to pay an annual operating fee not to exceed $300 per injection well; and

(b) the carbon dioxide injection well regulatory program, each geologic storage operator of a carbon dioxide injection well may be required to pay an annual operating fee not to exceed $5,000 per injection well.

(2) The department shall collect the operating fee at a time established by board rule. All money collected under this section must be forwarded to the state treasurer for deposit in the state special revenue fund and must be used for the purpose prescribed in subsection (1).

(3) The board shall, by rule adopted pursuant to the provisions of the Montana Administrative Procedure Act, fix the amount of the fee described in subsection (1) and may from time to time reduce or increase the amount of the fee as the expenses chargeable against the state special revenue fund may require. However, the assessment fixed by the board may not exceed the limits prescribed in subsection (1). The amount of the fee must be expressed in dollars.

Adoption and publication of rules, Title 2, ch. 4, part 3.

82-11-138. Rulemaking — microbial conversion wells. The board may adopt rules necessary to regulate well injections to restore or enhance the microbial conversion of hydrocarbon substrates to methane gas as class II injection wells.

History: En. Sec. 1, Ch. 184, L. 2011.

82-11-139 and 82-11-140 reserved.

82-11-141. Administrative procedure. (1) Unless otherwise provided, the Montana Administrative Procedure Act applies to this chapter.

(2) An order or amendment of an order, except in an emergency, may not be made by the board without a public hearing upon at least 10 days' notice. The public hearing must be held at a time and place as prescribed by the board, and any interested person is entitled to be heard.

(3) When an emergency requiring immediate action is found to exist, the board may issue an emergency order without advance notice or hearing that is effective upon promulgation. An emergency order may not remain in effect beyond the next regular meeting of the board.

(4) (a) If notice is required by the chapter and the Montana Administrative Procedure Act does not apply, the notice must be made by publication in one or more issues of a newspaper in general circulation in Helena and a newspaper of general circulation in the county where the land or some part of the land is situated, and the board may also cause publication to be made in a trade journal or bulletin of general circulation in the oil and gas industry in the state.

(b) At least 20 days prior to the public hearing, a person who applies to establish a well spacing unit under 82-11-201 or who applies to pool all interests in a well spacing unit pursuant to 82-11-202 shall cause written notice of any hearing on the application to be served upon the record owners of the oil and gas and leasehold interests sought to be spaced or pooled. Notice must be given by mailing the written notice, postage prepaid, to their addresses as shown by the record of the county clerk and recorder at the time the notice is given.

(5) If written notice is not possible, proof of service by publication under subsection (4) must be made by the affidavit of the printer or publisher of the newspaper, trade journal, or bulletin in which the notice is published or by a supervisor or principal clerk of the newspaper, bulletin, or trade journal.

(6) Except as provided otherwise in this chapter, the board may act upon its own motion or upon the petition of an interested person. On the filing of a petition concerning a matter within the jurisdiction of the board, the board shall promptly fix a date for a hearing on the petition and shall cause notice of the hearing to be given. The hearing must be held without undue delay after the filing of the petition. The board shall enter its order within 30 days after the hearing.

History: En. Sec. 9, Ch. 238, L. 1953; amd. Sec. 1, Ch. 213, L. 1961; amd. Sec. 71, Ch. 253, L. 1974; R.C.M. 1947, 60-132; amd. Sec. 6, Ch. 19, L. 1979; amd. Sec. 1, Ch. 238, L. 1987; amd. Sec. 5, Ch. 503, L. 1987; amd. Sec. 2742, Ch. 56, L. 2009.

Cross-References

Montana Administrative Procedure Act, Title 2, ch. 4.

82-11-142. Subpoena power — civil actions. (1) If the Montana Administrative Procedure Act does not apply, the board may subpoena witnesses, administer oaths, and require the production of records, books, and documents for examination at any hearing or investigation conducted by it. Witnesses subpoenaed under this subsection must be paid the same per diem and mileage as is provided to be paid to witnesses attending the district courts of this state.

(2) This chapter, a suit by or against the board, a violation charged or asserted against a person under this chapter, or a rule or order issued under this chapter does not impair, abridge, or delay a cause of action for damages or other civil remedy that a person may have or assert against a person violating this chapter or a rule or order issued under it. A person aggrieved by the violation may sue for and recover damages or relief that the person otherwise may be entitled to receive.

(3) A person, association, corporation, or agency of the state or federal government may apply to the board protesting a violation or a threatened violation of this chapter. The board shall make an investigation and make a written report to the person, association, corporation, or agency that made the protest. If a violation is established by the investigation of the board, the board shall take appropriate enforcement action. If the board fails to take appropriate enforcement action or to bring suit to enjoin a threatened violation of this chapter or a rule or order of the board within 10 days after receipt of written request to do so by a person who is or will be adversely affected, the person making the request may bring the suit in the person's own behalf to restrain the threatened violation in a court in which the board might have brought suit. The board must be made a party defendant in the suit in addition to the person threatening to violate this chapter or a rule or order of the board, and the action must proceed and injunctive relief may be granted without bond in the same manner as if suit had been brought by the board.

(4) If a person fails or refuses to comply with the subpoena issued by the board or if a witness refuses to testify as to any material matter regarding which the person may be interrogated, any district court in the state, upon good cause shown by the application of the board, may issue a warrant of attachment for the person and, if after hearing the court finds the person's failure or refusal to be unjustified, compel the person to comply with the subpoena and to attend before the board and produce any subpoenaed records, books, and documents for examination and to give testimony. The court may punish for contempt as in the case of disobedience to a like subpoena issued by the court or for refusal to testify in the proceeding.

History: En. Sec. 10, Ch. 238, L. 1953; amd. Sec. 72, Ch. 253, L. 1974; R.C.M. 1947, 60-133; amd. Sec. 6, Ch. 503, L. 1987; amd. Sec. 2743, Ch. 56, L. 2009.

82-11-143. Rehearing. A person adversely affected by a rule or order of the board may within 20 days after its effective date apply to the board in writing for a rehearing. The application for rehearing must be acted upon at the board's next regularly scheduled meeting after filing of the application, and if granted, the rehearing must be held without undue delay.

History: En. Sec. 11, Ch. 238, L. 1953; amd. Sec. 73, Ch. 253, L. 1974; R.C.M. 1947, 60-134; amd. Sec. 1, Ch. 363, L. 1991.

82-11-144. Court review. Any interested person adversely affected by any provision of this chapter or by any rule or order adopted by the board hereunder or by any act done or threatened thereunder may obtain court review and seek relief by a suit for an injunction against the board as defendant, which suit may be instituted in the district court of the county where the board keeps its principal office or in the district court of any county wherein the land involved or any part thereof is situated. The term "interested person", as used herein, shall be interpreted broadly and liberally, especially where the suit involves the right to drill a well or involves some other act which clearly affects the plaintiff even though the effect is indirect. If the act complained of involves a general order for a pool or the right to drill a well therein, a person who owns or has an interest in a well in the pool, which well is capable of producing oil or gas, shall be considered to be prima facie an interested person. The suit shall be given a preferential setting and shall be tried de novo and disposed of as an ordinary civil suit and not upon the record of any hearing before the board. The statute, rule, order, or decision involved in the suit shall be prima facie valid; however, the finding of fact, actual or presumed, made by the board in support of the rule, order, or decision involved in the suit is not binding on the court though supported by evidence introduced at a hearing before the board. The court shall decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of any board action. The court shall:

(1) compel board action unlawfully withheld or unreasonably delayed;

(2) hold unlawful and set aside board action, findings, and conclusions found to be:

(a) arbitrary, unreasonable, capricious, and abuse of discretion or otherwise not in accordance with law;

(b) contrary to constitutional right, power, privilege, or immunity;

(c) in excess of statutory jurisdiction, authority, or limitations or short of statutory right;

(d) without observance of procedure required by law; or

(e) unwarranted by the facts; and

(3) consider all the evidence, pass on the credibility of witnesses and the weight to be given their testimony, and resolve such fact issues as may be necessary for decision in the case.

History: En. Sec. 12, Ch. 238, L. 1953; amd. Sec. 74, Ch. 253, L. 1974; R.C.M. 1947, 60-135(1).

Cross-References

Judicial review of contested cases, Title 2, ch. 4, part 7.

82-11-145. Injunction or restraining order. (1) A temporary restraining order or temporary injunction of any kind may not be granted against the board and its members or against the attorney general or against an employee of the board, restraining the board and its members or employees or the attorney general from enforcing this chapter or any rule or order made thereunder, until it is shown to the satisfaction of the court that the act done or threatened is probably without sanction of the law or that the provisions of this chapter or the rule or order complained of is probably invalid or unreasonable and that, if enforced against the complaining party, will probably cause an irreparable injury.

(2) With respect to an order or decree granting temporary injunctive relief, the nature and extent of the probable invalidity of the statute or of any provision of this chapter or of a rule or order thereunder involved in the suit must be recited in the order or decree granting the temporary relief, as well as a clear statement of the probable damage relied upon by the court as justifying temporary injunctive relief.

(3) A temporary restraining order or temporary injunction of any kind against the board or its members or its employees or the attorney general may not be effective until the plaintiff executes a bond with sufficient sureties in such amount and upon such conditions as the court directs. The bond shall be made payable to the state of Montana, shall be approved by the judge of the court, and shall be for the use and benefit of all persons who may be injured by the acts done under the protection of the temporary restraining order or temporary injunction. A person claiming injury must bring suit within 6 months after the date of the final determination of the validity in whole or in part of the provisions of the chapter or the rule or order, the enforcement of which was enjoined; otherwise the right to bring such suit is forever barred.

History: En. Sec. 12, Ch. 238, L. 1953; amd. Sec. 74, Ch. 253, L. 1974; R.C.M. 1947, 60-135(2), (3).

82-11-146. Appeal. An appeal to the supreme court may be taken from any final judgment, decree, or order in the action, as provided in the Montana Rules of Appellate Procedure.

History: En. Sec. 12, Ch. 238, L. 1953; amd. Sec. 74, Ch. 253, L. 1974; R.C.M. 1947, 60-135(4).

82-11-147. Violations. (1) Notwithstanding any other provisions of this chapter, if the board finds upon receipt of evidence:

(a) that a person is violating or threatening to violate this chapter or a rule or order of the board, the board may bring suit against that person in the district court of any county where the violation occurs or is threatened to restrain the person from continuing the violation or from carrying out the threat of violation; or

(b) that a person is violating this chapter or a rule or order of the board in a manner for which the board is authorized to institute proceedings pursuant to 82-11-149, the board may issue an order either assessing a civil penalty in the amount prescribed in 82-11-149, up to a maximum administrative penalty of $125,000, or requiring compliance with this chapter or a rule or order, or both.

(2) In a suit under subsection (1)(a), the court may grant to the board, without bond or other undertaking, such prohibitory and mandatory injunctions as the facts may warrant, including temporary restraining orders.

History: En. Sec. 13, Ch. 238, L. 1953; amd. Sec. 75, Ch. 253, L. 1974; R.C.M. 1947, 60-136; amd. Sec. 10, Ch. 503, L. 1987.

82-11-148. Criminal penalties. A person is guilty of a misdemeanor and shall be subject to a fine of not more than $10,000 per day of violation or imprisonment in a county jail for a term not exceeding 6 months or to both the fine and imprisonment if that person willfully violates any lawful rule or order of the board or if that person, for the purpose of evading this chapter or any rule or order of the board, knowingly and willfully:

(1) makes or causes to be made a false entry or statement in a report required by this chapter or by a rule or order of the board or a false entry in a record, account, or memorandum required by this chapter or by a rule or order;

(2) omits or causes to be omitted from the record, account, or memorandum full, true, and correct entries as required by this chapter or by a rule or order; or

(3) removes from this state or destroys, mutilates, alters, or falsifies the record, account, or memorandum.

History: En. Sec. 19, Ch. 238, L. 1953; amd. Sec. 78, Ch. 253, L. 1974; R.C.M. 1947, 60-142; amd. Sec. 12, Ch. 503, L. 1987.

82-11-149. Civil penalties. (1) A person is guilty of a misdemeanor and is subject to a civil penalty of at least $75 and not more than $10,000 a day for each violation if that person violates any rule or order of the board or a provision of this chapter. Each day of violation constitutes a separate violation.

(2) Action under this section does not bar enforcement of this chapter or of rules or orders issued under it by injunction or other appropriate remedy.

(3) The board, or the attorney general upon request of the board, shall institute and maintain any enforcement proceedings in the name of the state.

(4) Civil penalties collected pursuant to this section must be deposited in the state general fund.

History: En. Sec. 11, Ch. 503, L. 1987; amd. Sec. 2, Ch. 363, L. 1991; amd. Sec. 73, Ch. 509, L. 1995.

82-11-150. Legal assistance. When requested by the board, the attorney general or the county attorneys within their respective counties shall perform legal services and conduct legal proceedings necessary to carry out the purposes of this chapter. The board may also employ legal counsel to enforce this chapter and to conduct proceedings under it.

History: En. Sec. 8, Ch. 503, L. 1987.

82-11-151. Emergencies — notice and hearing. (1) Notwithstanding any other provisions of this chapter, if the administrator or a board member finds that a person is committing or about to commit an act in violation of this chapter or any order or rule issued under it that, if it occurs or continues, will cause substantial pollution, the administrator under order of the board or the board member is authorized to order the person to stop, avoid, or moderate the act, including immediate closure or shutdown of any well. This authority is limited to acts the harmful effects of which will not be remedied immediately after the commission or cessation of the act or will represent an immediate threat to public health, safety, or welfare.

(2) When any emergency requiring immediate action is found pursuant to subsection (1), the board is authorized to issue an emergency order without notice or hearing, which is effective upon issuance as provided in 82-11-141(3).

(3) The board may have written notice served, personally or by mail, on the alleged violator or the violator's agent. The notice must state the provision alleged to be violated, the facts alleged to constitute the violation, the nature of corrective action the board requires, and the time within which the action is to be taken. For the purposes of this section, service by mail is complete on the date of mailing.

(4) The notice must indicate that the order is an emergency order.

(5) Pursuant to 82-11-141(3), the board may consider the emergency order at its next regular meeting, without compliance with the notice requirements of this chapter if they cannot be accomplished within the time available, and enter a second emergency order.

(6) Upon issuing an order under subsection (2), the board may fix a place and time for a hearing, not later than 5 days after issuance unless the person to whom the order is directed requests a later time. The board may deny a request for a later time if it finds that the person to whom the order is directed is not complying with the order. If the board considers it practicable, the hearing must be held in the county where the violation is alleged to have occurred. As soon as practicable after the hearing, the board shall affirm, modify, or set aside the order.

(7) If the order of the board is affirmed, it must be accompanied by a statement specifying the date or dates by which a violation must cease and may prescribe timetables for necessary action in preventing, abating, or controlling the pollution. An action for review of the order of the board may be initiated in the manner specified in 82-11-144. The initiation of an action or taking of an appeal may not stay the effectiveness of the order unless the court finds that the board did not have reasonable cause to issue an order under this section.

82-11-152 through 82-11-160 reserved.

82-11-161. *(Temporary)* **Oil and gas production damage mitigation account — statutory appropriation.** (1) There is an oil and gas production damage mitigation account within the state special revenue fund established in 17-2-102. The oil and gas production damage mitigation account is controlled by the board.

(2) (a) At the beginning of each biennium, there must be allocated to the oil and gas production damage mitigation account $650,000 from the interest income of the resource indemnity trust fund, except that if at the beginning of a biennium the unobligated cash balance in the oil and gas production damage mitigation account:

(i) equals or exceeds $1 million, no allocation will be made; or

(ii) is less than $1 million, then an amount less than or equal to the difference between the unobligated cash balance and $1 million, but not more than $650,000, must be allocated to the oil and gas production damage mitigation account from the interest income of the resource indemnity trust fund.

(b) If $650,000 is not allocated pursuant to subsection (2)(a), the remainder must be deposited in the natural resources projects state special revenue account established in 15-38-302 for the purpose of making grants.

(3) In addition to the allocation provided in subsection (2), there must be deposited in the oil and gas production damage mitigation account all funds received by the board pursuant to 15-36-331(2)(c) and 82-11-136.

(4) If a sufficient balance exists in the account, funds are statutorily appropriated, as provided in 17-7-502, from the oil and gas production damage mitigation account, upon the authorization of the board, to pay the reasonable costs of properly plugging a well and either reclaiming or restoring, or both, a drill site or other drilling or producing area damaged by oil and gas operations if the board determines that the well, sump, hole, drill site, or drilling or producing area has been abandoned and the responsible person cannot be identified or located or if the responsible person fails or refuses to properly plug, reclaim, or restore the well, sump, hole, drill site, or drilling or producing area within a reasonable time after demand by the board. The responsible person shall, however, pay costs to the extent of that person's available resources and is subsequently liable to fully reimburse the account or is subject to a lien on property as provided in 82-11-164 for costs expended from the account to properly plug, reclaim, or restore the well, sump, hole, drill site, or drilling or producing area and to mitigate any damage for which the person is responsible.

(5) Interest from funds in the oil and gas production damage mitigation account accrues to that account.

82-11-161. *(Effective on occurrence of contingency)* **Oil and gas production damage mitigation account — statutory appropriation.** (1) There is an oil and gas production damage mitigation account within the state special revenue fund established in 17-2-102. The oil and gas production damage mitigation account is controlled by the board.

(2) (a) At the beginning of each biennium, there must be allocated to the oil and gas production damage mitigation account $650,000 from the interest income of the resource indemnity trust fund, except that if at the beginning of a biennium the unobligated cash balance in the oil and gas production damage mitigation account:

(i) equals or exceeds $1 million, no allocation will be made; or

(ii) is less than $1 million, then an amount less than or equal to the difference between the unobligated cash balance and $1 million, but not more than $650,000, must be allocated to the oil and gas production damage mitigation account from the interest income of the resource indemnity trust fund.

(b) If $650,000 is not allocated pursuant to subsection (2)(a), the remainder must be deposited in the natural resources projects state special revenue account established in 15-38-302 for the purpose of making grants.

(3) In addition to the allocation provided in subsection (2), there must be deposited in the oil and gas production damage mitigation account all funds received by the board pursuant to 15-36-331(2)(c) and 82-11-136(1).

(4) If a sufficient balance exists in the account, funds are statutorily appropriated, as provided in 17-7-502, from the oil and gas production damage mitigation account, upon the authorization of the board, to pay the reasonable costs of properly plugging a well and either reclaiming or restoring, or both, a drill site or other drilling or producing area damaged by oil and gas operations if the board determines that the well, sump, hole, drill site, or drilling or producing area has been abandoned and the responsible person cannot be identified or located or if the responsible person fails or refuses to properly plug, reclaim, or restore the well, sump, hole, drill site, or drilling or producing area within a reasonable time after demand by the board. However, the responsible person shall pay costs to the extent of that person's available resources and is subsequently liable to fully reimburse the account or is subject to a lien on property as provided in 82-11-164 for costs expended from the account to properly plug, reclaim, or restore the well, sump, hole, drill site, or drilling or producing area and to mitigate any damage for which the person is responsible.

(5) Interest from funds in the oil and gas production damage mitigation account accrues to that account.

History: En. Sec. 36, Ch. 15, Sp. L. July 1992.

82-11-172. Short title. Sections 82-11-172 through 82-11-174 may be known as the "Coal Bed Methane Production Offset Act".

History: En. Sec. 1, Ch. 578, L. 2001.

82-11-173. Legislative findings — purpose. (1) The legislature finds that a delay in the development of certain coal bed methane wells may inadvertently result in the loss of coal bed methane resources.

(2) The legislature further finds that because of the nature of this subsurface mineral resource, it is highly susceptible to collateral extraction and use through development efforts on adjacent federal, tribal, or other states' lands to the economic detriment of Montana and its citizens.

(3) The legislature further finds that there is a compelling state interest to authorize the board through this limited program to act in a timely and expeditious manner to permit coal bed methane wells to offset the collateral permitting of wells by other entities on nonjurisdictional lands that are not subject to permitting by the board under 82-11-103 in order to:

(a) protect coal bed methane mineral reserves from collateral extraction by others;

(b) provide economic benefits to the state;

(c) protect the private property rights of the owners of the mineral reserves;

(d) promote the balanced development of state lands and protect the mineral reserve interest held in trust for the benefit of state schools; and

(e) assist in providing much needed energy resources to the region.

History: En. Sec. 2, Ch. 578, L. 2001.

82-11-174. Offset permitting — geographic requirements. The board is authorized and directed to issue, upon application and subject to the regulatory requirements of the program and 82-11-175, permits for coal bed methane production wells that will offset permitting by federal agencies, tribal agencies, or agencies of other states of coal bed methane wells that are located within 1 mile of the perimeter of lands that are under the jurisdiction of the board.

History: En. Sec. 3, Ch. 578, L. 2001.

82-11-175. Coal bed methane wells — requirements. (1) Coal bed methane production wells that involve the production of ground water must comply with this section.

(2) Ground water produced in association with a coal bed methane well must be managed in any of the following ways:

(a) used as irrigation or stock water or for other beneficial uses in compliance with Title 85, chapter 2, part 3;

(b) reinjected to an acceptable subsurface strata or aquifer pursuant to applicable law;

(c) discharged to the surface or surface waters subject to the permit requirements of Title 75, chapter 5; or

(d) managed through other methods allowed by law.

(3) (a) Prior to the development of a coal bed methane well that involves the production of ground water from an aquifer that is a source of supply for appropriation rights or permits to appropriate under Title 85, chapter 2, the developer of the coal bed methane well shall notify and offer a reasonable mitigation agreement to each appropriator of water who holds an appropriation right or a permit to appropriate under Title 85, chapter 2, that is for ground water and for which the point of diversion is within:

(i) 1 mile of the coal bed methane well; or

(ii) one-half mile of a well that is adversely affected by the coal bed methane well.

(b) The mitigation agreement must address the reduction or loss of water resources and must provide for prompt supplementation or replacement of water from any natural spring or water well adversely affected by the coal bed methane well. The mitigation agreement is not required to address a loss of water well productivity that does not result from a reduction in the amount of available water because of production of ground water from the coal bed methane well.

History: En. Sec. 4, Ch. 578, L. 2001; Sec. 85-2-521, MCA 2001; redes. 82-11-175 by Sec. 1, Ch. 117, L. 2003.

82-11-176 through 82-11-179 reserved.

82-11-180. Preservation of property rights. (1) Title 82, chapter 11, parts 1 and 2, and the issuance of a permit for a carbon dioxide injection well pursuant to Title 82, chapter 11, parts 1 and 2, do not:

(a) prejudice the rights of property owners within a geologic storage reservoir to exercise rights that have not been committed to a storage reservoir; or

(b) prevent a mineral owner or mineral lessee from drilling through or near a storage reservoir to explore for and develop minerals, provided that the drilling, production, and related activities comply with board requirements that preserve the storage reservoir's integrity and implement Title 82, chapter 11, parts 1 and 2.

(2) Title 82, chapter 11, parts 1 and 2, may not be construed to:

(a) change or alter common law in accordance with 1-1-108 as it relates to the rights belonging to or the dominance of the mineral estate, including but not limited to the right to mine, drill, or recomplete a well, to inject substances to facilitate production, or to implement enhanced recovery for the purposes of recovery of oil, gas, or other minerals;

(b) impede or impair the ability of an oil and gas operator to inject carbon dioxide for enhanced recovery or to establish, verify, register, and sell emission reduction credits or attributes associated with the project;

(c) change or alter common law or statutory provisions regarding the ownership of surface or subsurface rights;

(d) diminish, impair, or in any way affect the rights of a natural gas public utility, as defined in 82-10-301, to own, operate, or control a gas storage reservoir in use prior to May 6, 2009; or

(e) apply within the exterior boundaries of any federally recognized Indian reservation within the state of Montana unless the governing body of the tribe adopts a carbon sequestration law and enters into a cooperative agreement with the state.

(3) If the ownership of the geologic storage reservoir cannot be determined from the deeds or severance documents related to the property by reviewing statutory or common law, it is presumed that the surface owner owns the geologic storage reservoir.

History: En. Sec. 1, Ch. 474, L. 2009.

82-11-181. *(Effective on occurrence of contingency)* **Geologic storage reservoir administrative fee — account established.** (1) (a) A geologic storage operator shall pay to the board a fee on each ton of carbon dioxide injected for storage for the purpose of carrying out the state's responsibility to monitor and manage geologic storage reservoirs. If a geologic storage operator chooses to indefinitely accept liability pursuant to 82-11-183(9)(a), the board shall remit the fee to the operator. If a geologic storage operator is required to maintain liability pursuant to 82-11-183(9)(b), the board may not remit the fee.

(b) The fee must be in the amount set by board rule.

(c) The amount must be based on the anticipated actual expenses that the board will incur in monitoring and managing geologic storage reservoirs during their postclosure phases.

(2) There is a geologic storage reservoir program account in the special revenue fund.

(3) (a) Each fiscal year there must be deposited in the account the fees collected pursuant to 82-11-184(2)(b) and subsection (1) of this section, to be used by the board for monitoring and managing geologic storage reservoirs pursuant to 82-11-183(6) and (8).

(b) Funds received from bonds or other surety as authorized in 82-11-123(1)(f) and 82-11-183 must be deposited in the account.

(4) Interest and earnings on the funds in the geologic storage reservoir program account accrue to that account.

History: En. Sec. 2, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-182. *(Effective on occurrence of contingency)* **Liability for carbon dioxide during injection.** (1) Until the certificate of project completion is issued pursuant to 82-11-183(1) and title to the stored carbon dioxide and geologic storage reservoir is transferred to the state pursuant to 82-11-183(7), the geologic storage operator is liable for the operation and management of the carbon dioxide injection well, the geologic storage reservoir, and the injected or stored carbon dioxide.

(2) Bond or other surety furnished pursuant to 82-11-123(1)(f) must be adequate to meet the requirements of subsection (1).

(3) For the purposes of 82-11-183 and this section, "title" includes title to the geologic storage reservoir and the stored carbon dioxide.

History: En. Sec. 3, Ch. 474, L. 2009; amd. Sec. 26, Ch. 123, L. 2013.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-183. *(Effective on occurrence of contingency)* **Certificate of completion — department of environmental quality participation — transfer of liability.** (1) Pursuant to subsection (3), after carbon dioxide injections into a reservoir end and upon completion of the certification requirements pursuant to subsections (4) and (5), the board shall issue the geologic storage operator a certificate of project completion.

(2) The board:

(a) shall adopt rules pursuant to 82-11-111 necessary for implementing subsection (4) of this section, including rules for public notice and hearing; and

(b) may, pursuant to 82-11-111, adopt any other rules necessary for administration of this section.

(3) Except as provided in subsection (11), the certificate may not be issued until at least 25 years after carbon dioxide injections end.

(4) Subject to subsection (5), the certificate may be issued only if the geologic storage operator:

(a) is in full compliance with regulations governing the geologic storage reservoir pursuant to this part;

(b) shows that the geologic storage reservoir will retain the carbon dioxide stored in it;

(c) shows that all wells, equipment, and facilities to be used in the postclosure period are in good condition and retain mechanical integrity;

(d) shows that it has plugged wells, removed equipment and facilities, and completed reclamation work as required by the board;

(e) shows that the carbon dioxide in the geologic storage reservoir has become stable, which means that it is essentially stationary or chemically combined or, if it is migrating or may migrate, that any migration will not cross the geologic storage reservoir boundary; and

(f) except as provided in subsection (11), shows that the geologic storage operator will continue to provide adequate bond or other surety after receiving the certificate of completion for at least 25 years following issuance of the certificate of completion and that the operator continues to accept liability for the geologic storage reservoir and the stored carbon dioxide.

(5) (a) Prior to issuing a certificate of completion, the board shall solicit, document, consider, and address comments from the department of environmental quality.

(b) Notwithstanding subsection (5)(a), the board makes the final decision on issuance of the certificate.

(6) Except as provided in subsection (11), after issuing a certificate of completion, the board shall ensure adequate monitoring by the operator of the wells and reservoir, verifying compliance with subsection (4), for a period of 25 years.

(7) (a) Following the monitoring and verification required in subsection (6) and subject to subsections (7)(b) and (7)(c), if the geologic storage operator has title to the geologic storage reservoir and the stored carbon dioxide, the geologic storage operator may transfer title to the geologic storage reservoir and to the stored carbon dioxide to the state.

(b) Prior to a transfer of title, the monitoring pursuant to subsection (6) must show that:

(i) the reservoir and wells are in full compliance with regulations pursuant to this part; and

(ii) the reservoir will maintain its structural integrity and will not allow carbon dioxide to move out of one stratum into another or pollute drinking water supplies.

(c) (i) Prior to a transfer of title, the board shall solicit, document, consider, and address comments from the department of environmental quality.

(ii) The board shall make a recommendation to the board of land commissioners as to whether title should transfer to the state.

(iii) Notwithstanding subsections (7)(c)(i) and (7)(c)(ii), the board of land commissioners shall make the final decision on the transfer of title.

(8) If liability is transferred pursuant to subsection (7):

(a) title is transferred, without payment or any compensation, to the state;

(b) title acquired by the state includes all rights and interests in and all responsibilities associated with the geologic storage reservoir and the stored carbon dioxide;

(c) the geologic storage operator and all persons who generated any injected carbon dioxide are released from all regulatory requirements and liability associated with the geologic storage reservoir and the stored carbon dioxide;

(d) any bonds or other surety posted by the geologic storage operator must be released; and

(e) monitoring and managing the geologic storage reservoir and the stored carbon dioxide is the state's responsibility to be overseen by the board until the federal government assumes responsibility for the long-term monitoring and management of geologic storage reservoirs and stored carbon dioxide.

(9) (a) If the operator does not transfer title to the state pursuant to subsection (7), the operator indefinitely accepts liability, except as provided in subsection (10), for the stored carbon dioxide and the geologic storage reservoir.

(b) If the operator is found not to be in compliance with subsection (7)(b), the operator retains liability until the operator is able to meet the requirements.

(10) After receiving a certificate of completion, every 25 years after completing the monitoring and verification required by subsection (6), an operator may petition the board and request to transfer liability to the state and be released from liability pursuant to subsection (8). An operator who petitions the board pursuant to this subsection (10) may not request that the fee required by 82-11-181(1) or 82-11-184(2)(b) be remitted.

(11) (a) The board, in consultation with the appropriate federal agencies, the department of environmental quality, and the department of natural resources and conservation, may adopt rules allowing for compliance with the requirements of this part in a period of time of less than 50 years.

(b) The rules must:

(i) ensure compliance with monitoring and verification requirements; and

(ii) ensure that an operator provides an adequate bond or other surety and accepts liability for the geologic storage reservoir and the stored carbon for a period of at least 30 years before transferring liability to the state pursuant to subsection (7).

Contingent Effective Date: Section 1, Ch. 264, L. 2011, provided: "[This act] is effective on occurrence of the contingency contained in section 31(1), Chapter 474, Laws of 2009."

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-184. *(Effective on occurrence of contingency)* **Conversion of enhanced recovery wells.** (1) A well regulated under this chapter in which carbon dioxide is injected for the purpose of enhancing the recovery of oil and gas may be converted to a carbon dioxide injection well.

(2) (a) The board shall develop rules with regard to the conversion of wells referred to in subsection (1) to carbon dioxide injection wells. The rules must be in accordance with all application, permitting, and regulatory requirements for carbon dioxide injection wells pursuant to this part.

(b) The rules must include provisions for a fee to be paid by the owner of a converted well in an amount equivalent to the fee required to be paid by a geologic storage operator pursuant to 82-11-181(1).

(3) Wells converted to carbon dioxide injection wells pursuant to this section are subject to carbon dioxide injection well and geologic storage reservoir regulations pursuant to this chapter, including requirements for bonding or other surety, the issuance of a certificate of completion, and acceptance or transfer of liability.

History: **En. Sec. 5, Ch. 474, L. 2009.**

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-185. *(Effective on occurrence of contingency)* **Makoshika state park requirements.** (1) Except as provided in subsection (3), on lands managed as Makoshika state park pursuant to Title 23, chapter 1, and under the control of the department of fish, wildlife, and parks by grant, acquisition, lease, easement, or other means, a person may not:

(a) drill, construct, convert, or operate an oil or gas well, stratigraphic test well, or core hole;

(b) conduct vibroseis, drill a seismic shot hole, or set a surface charge;

(c) explore for oil or gas in a manner that damages the land surface; or

(d) construct or place any surface facility associated with oil or gas exploration or development.

(2) The prohibitions in subsection (1) do not preclude the development of geologic storage reservoirs or of oil or gas resources from beneath Makoshika state park through directional

drilling or access from property outside the boundaries of the state park provided that the surface resources of the state park are not disturbed.

(3) The prohibitions listed in subsection (1) do not apply to geologic storage reservoirs or to oil or gas resources within Makoshika state park that are owned by a private person, nor do the prohibitions apply to school trust lands within the boundaries of the park. The state acknowledges the mineral rights of Dawson County and the state school trust and the private property rights of persons owning private mineral rights within Makoshika state park. The department of fish, wildlife, and parks is directed to conduct negotiations with the owners of mineral rights within Makoshika state park with the purpose of acquiring those rights in the name of the state.

History: **En. Sec. 6, Ch. 474, L. 2009.**

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-186 and 82-11-187 reserved.

82-11-188. Incidental carbon dioxide storage — certification. (1) An operator or producer of an oil or gas enhanced recovery project may request that the board certify the quantity of carbon dioxide being stored incidentally through the enhanced recovery project.

(2) The operator or producer shall submit a plan to account for the incidentally stored carbon dioxide on a form provided by the board.

(3) Upon approval of the plan, the board shall certify the amount of carbon dioxide incidentally stored through the enhanced recovery project.

(4) An application for certification pursuant to this section is not an application for a geologic storage project or a carbon dioxide injection well for injection in a geologic storage reservoir. Certification of incidentally stored carbon dioxide pursuant to this section does not convert an enhanced recovery project to a geologic storage project and does not subject the enhanced recovery project to the requirements of the carbon dioxide injection well regulations or geologic storage reservoir regulations pursuant to this chapter.

History: **En. Sec. 1, Ch. 129, L. 2015.**

Part 2
Unit Operations

82-11-201. *(Temporary)* **Establishment of well spacing units.** (1) To prevent or to assist in preventing waste of oil or gas prohibited by this chapter, to avoid the drilling of unnecessary wells, or to protect correlative rights, the board, upon its own motion or upon application of an interested person, after hearing, may by order establish:

(a) temporary spacing units on a statewide basis or for defined areas within the state for oil, gas, or oil and gas wells drilled to varying depths; and

(b) permanent spacing units for a discovered pool, except in those pools that, prior to April 1, 1953, have been developed to such an extent that it would be impracticable or unreasonable to establish spacing units at the existing stage of development.

(2) The size and the shape of temporary spacing units must be established to promote the orderly development of unproven areas and must be uniform throughout the surface area and depths covered by the unit. A temporary spacing unit must remain in effect until superseded by an order issued by the board or until a permanent spacing unit is established.

(3) Permanent spacing units do not need to be uniform in size or shape but must result in the efficient and economic development of the pool as a whole. In establishing permanent spacing units, the acreage to be embraced within a unit and the shape of the unit must be determined by the board based upon evidence introduced at the hearing. The board may divide a pool into zones and establish spacing units for each zone if necessary for a purpose mentioned in subsection (1) or to facilitate production through the use of innovative drilling and completion methods. The spacing units within the zone may differ in size and shape from spacing units in any other zone but may not be smaller than the maximum area that can be efficiently and economically drained by one well.

(4) An order establishing temporary or permanent spacing units may permit only one well to be drilled and produced from the common source of supply on any spacing unit. The well must be drilled at a location authorized by the order, with an exception as may be reasonably necessary. The well location exception may be included in the request to establish permanent or temporary spacing units if, upon application, notice, and hearing, the board finds that the spacing unit is located on the edge of a pool or field and adjacent to a producing unit or, for some other reason, that the requirement to drill the well at the authorized location on the spacing unit would be inequitable or unreasonable. The board shall take action to offset any advantage that the person securing the exception may have over other producers by reason of drilling the well as an exception. The order must include provisions to prevent production from the spacing unit from being more than its just and equitable share of the producible oil and gas in the pool.

(5) An order establishing temporary or permanent spacing units for a pool must cover all lands determined or believed to be underlaid by the pool and may be modified after notice and hearing by the board to include additional areas subsequently determined to be underlaid by the pool.

(6) The board, upon application, notice, and hearing, may increase or decrease the size of a temporary or permanent spacing unit or permit the drilling of additional wells in a spacing unit for a purpose mentioned in subsection (1).

82-11-201. *(Effective on occurrence of contingency)* **Establishment of well spacing units.** (1) To prevent or to assist in preventing waste of oil or gas prohibited by this chapter, to avoid the drilling of unnecessary wells, or to protect correlative rights, the board, upon its own motion or upon application of an interested person, after hearing, may by order establish:

(a) temporary spacing units on a statewide basis or for defined areas within the state for carbon dioxide injection wells or oil, gas, or oil and gas wells drilled to varying depths; and

(b) permanent spacing units for a discovered pool, except in those pools that, prior to April 1, 1953, have been developed to an extent that it would be impracticable or unreasonable to establish spacing units at the existing stage of development.

(2) The size and the shape of temporary spacing units must be established to promote the orderly development of unproven areas and must be uniform throughout the surface area and depths covered by the unit. A temporary spacing unit must remain in effect until superseded by an order issued by the board or until a permanent spacing unit is established.

(3) Permanent spacing units do not need to be uniform in size or shape but must result in the efficient and economic development of the pool as a whole. In establishing permanent spacing units, the acreage to be embraced within a unit and the shape of the unit must be determined by the board based upon evidence introduced at the hearing. The board may divide a pool into zones and establish spacing units for each zone if necessary for a purpose mentioned in subsection (1) or to facilitate production through the use of innovative drilling and completion methods. The spacing units within the zone may differ in size and shape from spacing units in any other zone but may not be smaller than the maximum area that can be efficiently and economically drained by one well.

(4) An order establishing temporary or permanent spacing units may permit only one well to be drilled and produced from the common source of supply on any spacing unit. The well must be drilled at a location authorized by the order, with an exception as may be reasonably necessary. The well location exception may be included in the request to establish permanent or temporary spacing units if, upon application, notice, and hearing, the board finds that the spacing unit is located on the edge of a pool or field and adjacent to a producing unit or, for some other reason, that the requirement to drill the well at the authorized location on the spacing unit would be inequitable or unreasonable. The board shall take action to offset any advantage that the person securing the exception may have over other producers by reason of drilling the well as an exception. The order must include provisions to prevent production from the spacing unit from being more than its just and equitable share of the producible oil and gas in the pool.

(5) An order establishing temporary or permanent spacing units for a pool must cover all lands determined or believed to be underlaid by the pool and may be modified after notice and hearing by the board to include additional areas subsequently determined to be underlaid by the pool.

(6) The board, upon application, notice, and hearing, may increase or decrease the size of a temporary or permanent spacing unit or permit the drilling of additional wells in a spacing unit for a purpose mentioned in subsection (1).

History: En. Sec. 6, Ch. 238, L. 1953; amd. Sec. 58, Ch. 253, L. 1974; R.C.M. 1947, 60-129; amd. Sec. 1, Ch. 313, L. 1993; amd. Sec. 1, Ch. 244, L. 2009; amd. Sec. 23, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

Cross-References

Montana Administrative Procedure Act, Title 2, ch. 4.
Administrative procedure, 82-11-141.

82-11-202. Pooling of interest within spacing unit. (1) (a) When two or more separately owned tracts are embraced within a temporary or permanent spacing unit or when there are separately owned interests in all or a part of the spacing unit, then the persons owning those interests may pool their interests for the development and operation of the spacing unit.

(b) The board, upon the application of an interested person, may enter an order pooling all interests in the permanent spacing unit for the development and operation of the permanent spacing unit and the allocation of production if the applicant has made an unsuccessful, good faith attempt to voluntarily pool the interests within the permanent spacing unit. The applicant must be a person who owns an interest in the oil or gas underlying the permanent spacing unit or who has drilled a well, proposes to drill a well, or proposes to conduct other operations on a well, including recompleting, deepening, or stimulation. The pooling order must be made after a board hearing, is effective from the date of first operations within the spacing unit, and must be upon terms and conditions that are just and reasonable and that afford to the owner of each tract or interest in the permanent spacing unit the opportunity to recover or receive without unnecessary expense a just and equitable share of the oil or gas produced and saved from the spacing unit. Operations incident to the drilling of a well upon any portion of a permanent spacing unit covered by a pooling order are considered, for all purposes, the conduct of the operations upon each separately owned tract in the spacing unit by the several owners of the tracts. That portion of the production allocated to each tract included in a permanent spacing unit covered by a pooling order must when produced be considered for all purposes to have been produced from the tract by a well drilled on the tract.

(2) (a) As to each owner who refuses to pay the owner's share of the costs of development or other operations referred to in subsection (1), the order must provide for payment of the owner's share of the cost out of and only out of production from the well allocable to the owner's interest in the permanent spacing unit, excluding royalty or other interest not obligated to pay any part of the cost and excluding the royalty provided for in subsection (2)(c). If a well has not been drilled prior to the hearing on the application, the pooling order must provide for the drilling and operating of a well on the permanent spacing unit and for the payment of the cost of the well, which may include a reasonable charge for supervision, handling, and storage. If a dispute arises as to the cost, the board by subsequent order, after notice and hearing, shall determine the proper cost. The order may provide in substance that the owners who agree to share in the cost of drilling and operating the well are, unless they agree otherwise, entitled to receive, subject to royalty or similar obligations, all of the production of the well until they have recovered all of the costs out of the production. After all costs of drilling and operation are recovered, all of the owners in the permanent spacing unit are entitled to receive their respective shares of the production of the well as their interest may appear after deducting their respective shares of current operating costs.

(b) If a well has been drilled prior to the hearing on the application and an owner, after written demand, has failed or refused to pay the owner's share of the costs of development or other operations referred to in subsection (1) or if a well has not been drilled prior to the hearing on the application and an owner refuses to agree to pay the owner's share of drilling and completion costs, in addition to the costs under subsection (2)(a), the order must include as costs:

(i) 100% of the refusing owner's share of the cost of newly acquired surface equipment beyond the wellhead connections, including but not limited to stock tanks, separators, treaters, pumping equipment, and piping, plus 100% of the refusing owner's share of the cost of operation of the well commencing with first production and continuing until the agreeing owners have recovered the costs; and

(ii) 200% of the refusing owner's share of the costs and expenses of staking, well site preparation, obtaining rights-of-way, rigging up, drilling, reworking, deepening or plugging back, testing, and completing the well, after deducting any cash contributions received from the refusing owners by the agreeing owners, and 200% of that portion of the cost of equipment in the well, including the wellhead connections.

(c) A refusing owner of an oil and gas interest in a spacing unit that is not subject to any lease or other contract for development of oil and gas is considered to own a landowner royalty equal to one-eighth of the owner's proportionate share of production from the well until such time as the consenting owners recover the costs specified in subsection (2)(b). Any interest in production from the spacing unit to which the interest of the refusing owner may be subject must be deducted from the royalty considered to be owned by the refusing owner. After costs have been recovered by the agreeing owners, the refusing owner owns the refusing owner's proportionate share of the well, surface facilities, and production and is liable for further costs as if the refusing owner had originally agreed to drilling of the well.

(d) The operator of a well under a pooling order in which there is a refusing owner shall upon demand furnish the refusing owner with a monthly statement of all costs incurred, together with the quantity of oil or gas produced and the amount of proceeds realized from the sale of production during the preceding month.

(e) If an owner of an oil and gas interest in a temporary spacing unit refuses to agree to pay the owner's share of the costs of drilling and operating a well drilled within the unit and an application is filed for pooling of the interests in the well in a permanent spacing unit, the board shall, upon hearing the application for pooling of the interests for the well, order that the parties who agreed to share in the cost of drilling and operating the well prior to commencement of the drilling operation recover out of the refusing owner's share of the costs as provided in subsections (2)(a) and (2)(b).

(3) (a) An owner is presumed to have refused to pay the owner's share of costs if the owner fails to pay or agree in writing to promptly pay their share of the costs after notice by the well operator of either:

(i) an acknowledgment in writing by the owner; or

(ii) by certified mail to the owner, addressed to the owner's address of record in the office of the clerk and recorder of the county where the well is to be drilled or to the owner's address on file with the board.

(b) The notice must:

(i) allow the owner 30 days to elect to pay the owner's share of costs; and

(ii) set forth the location of the well, the projected depth and target formations, the anticipated costs of drilling and completing the well, and the anticipated or actual spud date of the well.

History: En. Sec. 7, Ch. 238, L. 1953; amd. Sec. 59, Ch. 253, L. 1974; R.C.M. 1947, 60-130; amd. Sec. 1, Ch. 694, L. 1985; amd. Sec. 2, Ch. 313, L. 1993; amd. Sec. 1, Ch. 441, L. 2023.

Cross-References

Acreage pooling by political subdivisions, 82-10-202.
Administrative procedure, 82-11-141.

82-11-203. Pooling agreements not in violation of antitrust laws. (1) An agreement for the unit or cooperative development and operation of a field or pool or any part of either or for conducting repressuring or pressure maintenance operations, cycling or recycling operations, including the extraction and separation of liquid hydrocarbons from natural gas in connection therewith, or any other method of unit or cooperative operation, including water flooding, is authorized and may be performed.

(2) Such an agreement does not violate any of the statutes of this state relating to trusts, monopolies, or contracts and combinations in restraint of trade if the agreement is approved by the board as being in the public interest and reasonably necessary to increase ultimate recovery or to prevent waste of oil or gas.

History: En. Sec. 8, Ch. 238, L. 1953; amd. Sec. 60, Ch. 253, L. 1974; R.C.M. 1947, 60-131.

Cross-References

Restraint of trade, Title 30, ch. 14, part 2.

82-11-204. *(Temporary)* **Hearing on operation of pool as unit.** (1) The board, upon the application of persons owning leasehold interests underlying 60% of the surface within the delineated area, shall hold a hearing to consider the need for the operation as a unit of one or more pools or parts thereof in a field for enhanced recovery purposes as to oil or oil and gas, to increase ultimate recovery, or to prevent waste of gas from pools or portions of pools where gas only is produced.

(2) At least 60 days prior to application, the applicant shall, by registered or certified mail, notify all known persons owning an interest in the oil and gas within the proposed unit area as disclosed by the records of the county or counties in which the proposed unit area is situated, at those persons' last-known addresses, of the applicant's intention to make the application. At the same time producers shall be furnished with a plan of unit operations. Upon written request of an operator of a lease which is in whole or in part within the confines of the proposed delineated area, the applicant shall furnish the operator with copies of any exhibits to be submitted to the board at the time of hearing.

82-11-204. *(Effective on occurrence of contingency)* **Hearing on operation of pool as unit.** (1) (a) The board, upon the application of persons owning leasehold interests underlying 60% of the surface within the delineated area, shall hold a hearing to consider the need for the operation as a unit of one or more pools or parts of the pools in a field for enhanced recovery purposes related to oil or oil and gas, to increase ultimate recovery, or to prevent waste of gas from pools or portions of pools where gas only is produced.

(b) The board, upon the application of persons owning or holding subsurface storage rights of 60% of the storage capacity of the proposed storage area, shall hold a hearing to consider the need for the operation of a unit for the long-term storage of carbon dioxide.

(2) (a) At least 60 days prior to application, the applicant shall, by registered or certified mail, notify all known persons owning an interest in the oil and gas within the proposed unit area as disclosed by the records of the county or counties where the proposed unit area is situated, at those persons' last-known addresses, of the applicant's intention to make the application.

(b) At least 60 days prior to application, if the application is for a carbon dioxide storage reservoir, the applicant shall, by registered or certified mail, notify all persons with an ownership interest in the surface, subsurface storage rights, and the subsurface minerals within the proposed unit area as disclosed by the records of the county or counties where the proposed unit area is situated, at those persons' last-known addresses, of the applicant's intention to make the application.

(c) At the same time producers must be furnished with a plan of unit operations. Upon written request of an operator of a lease that is in whole or in part within the confines of the proposed delineated area, the applicant shall furnish the operator with copies of any exhibits to be submitted to the board at the time of hearing.

History: En. Sec. 1, Ch. 33, L. 1969; amd. Sec. 1, Ch. 150, L. 1971; amd. Sec. 61, Ch. 253, L. 1974; amd. Sec. 2, Ch. 336, L. 1977; R.C.M. 1947, 60-131.1; amd. Sec. 24, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

Cross-References

Unit operation not restraint of trade, 82-11-215.

82-11-205. *(Temporary)* **Board order for unit operation — criteria.** The board shall make an order providing for the unit operation of a pool or pools or part thereof if it determines, based on evidence presented at the hearing, that:

(1) such operation is reasonably necessary to increase the ultimate recovery of oil or gas;

(2) the value of the estimated additional recovery of oil or gas less royalties or, as to gas pools only, the value of the economies to be effected, exceeds the estimated additional cost incident to conducting such operations; and

(3) the full areal extent of the pool or pools or part thereof has been reasonably defined and determined by drilling operations.

82-11-205. *(Effective on occurrence of contingency)* **Board order for unit operation — criteria.** The board shall make an order providing for the unit operation of a pool or pools or part of the pools or of a geologic storage reservoir if it determines, based on evidence presented at the hearing, that:

(1) the operation is reasonably necessary to increase the ultimate recovery of oil or gas or the operation is necessary for the long-term storage of carbon dioxide;

(2) the value of the estimated additional recovery of oil or gas less royalties or, as to gas pools only, the value of the economies to be effected, exceeds the estimated additional cost incident to conducting the operations; and

(3) (a) the full areal extent of the pool or pools or part of the pools has been reasonably defined and determined by drilling operations; or

(b) in the case of a geologic storage reservoir, the full areal extent of the project has been reasonably defined and determined by drilling operations, geologic interpretation, seismic information, or other information acceptable to the board.

History: En. Sec. 2, Ch. 33, L. 1969; amd. Sec. 2, Ch. 150, L. 1971; amd. Sec. 62, Ch. 253, L. 1974; R.C.M. 1947, 60-131.2; amd. Sec. 25, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-206. Terms and conditions of plan for unit operations. The order under 82-11-205 must be upon terms and conditions that are just and reasonable and must prescribe a plan for unit operations that includes:

(1) a description of the pool or pools or parts of a pool or pools to be operated, termed the unit area, but only so much of a pool as has reasonably been defined and determined by drilling operations to be productive of oil or gas may be included within the unit area. If the unit is formed solely for production of gas, a spacing unit on which is located a well producing or capable of producing gas on March 1, 1971, may not be included in the unit area without the written consent of the majority in interest of the working interest owners of the spacing unit and well.

(2) a statement of the nature and purpose of the plan and operations contemplated, together with a copy of the proposed unit agreement and unit operating agreement;

(3) a plan for allocating to each tract in the unit area its fair share of the oil and gas produced from the unit area and not required or consumed in the conduct of the operation of the unit area or unavoidably lost. A plan may not be approved by the board until it has considered the relative value that the share of production bears to the relative value of all of the separately owned tracts in the unit area, exclusive of physical equipment utilized in unit operations. In considering this relative value, the board shall weigh the economic value of the gas to all persons affected as compared to the economic value of the oil to all persons affected.

(4) a provision for the credits and charges to be made in the adjustment among the owners in the unit area for their respective investments in wells, tanks, pumps, machinery, materials, and equipment contributed to the unit operations;

(5) a provision providing how the costs of unit operations, including overhead and capital investments, must be determined and charged to the separately owned tracts, including a provision for carrying or otherwise financing any owner who has not executed the proposed unit operating agreement and who elects to be carried or otherwise financed, allowing an interest charge of the then-current prime rate plus 2% for the service. Recovery of the money advanced plus interest must be limited to and only be recoverable from the owners' share of production. The recovery must be as follows:

(a) (i) in the case of a field producing oil or oil and gas, during the period of depletion of the remaining estimated primary reserves from the unit, only from the production that is in excess of the owners' average actual rate of production during the 18 months immediately preceding the effective date of the unit;

(ii) during the period subsequent to the depletion of the remaining estimated primary reserves from the unit, from 100% of the owners' share of production;

(iii) for purposes of this subsection (5)(a), the term "primary reserves" means the oil or gas that would be produced from the unitized pool or pools as a result of the natural energy in the pool or pools and without the introduction of an enhanced recovery program;

(b) in the case of a field producing only gas, from 100% of the owners' share of production;

(c) in the case of any enhanced recovery program that is initiated subsequent to a secondary recovery program, the recovery must be from 75% of the owners' increased share of production from the subsequent program;

(6) a provision for the supervision and conduct of the unit operations, in respect to which each owner has a vote with a value corresponding to the percentage of the costs of unit operations chargeable against the interest of the owner;

(7) a provision by which the unit operator, after having operated for a minimum period of 2 years, may be challenged by any other owner in the unit, and the challenging owner may succeed to the unit operations upon a showing that:

(a) the challenging owner can operate more efficiently and economically than the present operator;

(b) the challenging owner is qualified and financially responsible;

(c) a majority of the other owners, both in number and in percentage and exclusive of the challenged operator, approved the challenging owner becoming unit operator; and

(d) the challenged operator does not initiate the conditions of operations of the challenging owner within 60 days of the challenged operator's receipt of the conditions of operations;

(8) the time when the unit operations must commence and the manner in which and the circumstances under which the unit operations must terminate; and

(9) additional provisions that are found to be appropriate for carrying on unit operations and for the protection and adjustment of correlative rights.

History: **En. Sec. 3, Ch. 33, L. 1969; amd. Sec. 3, Ch. 150, L. 1971; amd. Sec. 63, Ch. 253, L. 1974; amd. Sec. 3, Ch. 336, L. 1977; R.C.M. 1947, 60-131.3; amd. Sec. 2745, Ch. 56, L. 2009.**

82-11-207. Approval of plan for unit operations by persons paying costs. An order of the board providing for unit operations may not become effective unless the plan for unit operations prescribed by the board has been approved in writing by those persons who under the board's order will be required to pay at least 70% of the costs of the unit operations and also by the persons owning at least 60% of the production or proceeds of the unit operations that will be credited to interests that are free of cost, such as royalties, overriding royalties, and production payments, and the board has made a finding, either in the order providing for unit operations or in a supplemental order, that the plan for unit operations has been approved. However, if one owner who is obligated to pay costs of the unit operation owns 70% or more but less than 100%, the approval of that owner and at least one other owner is required, and if one person entitled to production or proceeds of the production that will be credited to interests that are free of costs owns 60% or more but less than 100%, the approval of that person and at least one other owner is required. If the plan for unit operations has not been approved at the time the order providing for unit operations is made, the board shall, upon application and notice, hold supplemental hearings that may be required to determine if and when the plan for unit operations has been approved. If the requisite number of owners and persons and the requisite percentage of interests in the unit area do not approve the plan for unit operations within a period of 6 months from the date on which the order providing for unit operations is made, the board shall revoke the order unless, for good cause shown, the board extends the time.

History: **En. Sec. 4, Ch. 33, L. 1969; amd. Sec. 64, Ch. 253, L. 1974; R.C.M. 1947, 60-131.4; amd. Sec. 1, Ch. 311, L. 2009.**

82-11-208. Board orders — amendment. An order providing for unit operations may be amended by an order made by the board in the same manner and subject to the same conditions and notice as an original order providing for unit operations; however, if such an amendment affects only the rights and interests of the owners, the approval of the amendment by the persons owning interests which are free of costs, such as royalties, overriding royalties, and production payments, is not required, and an order of amendment may not change the percentage for the allocation of oil and gas as established for any tract by the original order, except with the consent of all persons owning oil and gas rights in the tract, or change the percentage for the allocation of cost as established for any tract by the original order, except with the consent of all owners in the tract.

History: **En. Sec. 5, Ch. 33, L. 1969; amd. Sec. 65, Ch. 253, L. 1974; R.C.M. 1947, 60-131.5.**

82-11-209. Units established by previous order. The board may provide by an order for the unit operation of a pool or pools or parts of a pool or pools that embrace a unit established by an order of the board made prior to February 13, 1969. The order, in providing for the allocation of unit production, must first treat the unit area previously established as a single tract, and the portion of the unit production allocated to that tract must then be allocated among the tracts included in the previously established unit area in the same proportions as those specified in the previous order. A new owner whose interest by the order is added to the unit area and who becomes liable for the owner's proportionate share of the costs of unit operations is not liable for any unit operating costs incurred prior to the person's entry in the unit. At the time the interest is included in the unit, an equipment inventory must be made in order to charge the newly committed interest with its proportionate share of capital investment at its current value. An oil-in-storage inventory must be taken immediately prior to adding the newly committed interest.

History: **En. Sec. 6, Ch. 33, L. 1969; amd. Sec. 4, Ch. 150, L. 1971; amd. Sec. 66, Ch. 253, L. 1974; R.C.M. 1947, 60-131.6; amd. Sec. 2746, Ch. 56, L. 2009.**

82-11-210. Unit operations — less than whole of pool. An order may provide for unit operations on less than the whole of a pool where the unit area is of such size and shape as may be reasonably required for that purpose and the conduct thereof will have no adverse effect upon other portions of the pool.

History: **En. Sec. 7, Ch. 33, L. 1969; R.C.M. 1947, 60-131.7.**

82-11-211. Operations considered as done by all owners in unit. (1) All operations, including but not limited to the commencement, drilling, or operation of a well upon any portion of the unit area, shall be considered for all purposes the conduct of those operations upon each tract in the unit area by the several owners thereof. The portion of the unit production allocated to a tract in a unit area shall, when produced, be considered for all purposes to have been actually produced from the tract by a well drilled thereon.

(2) Operations conducted pursuant to an order of the board providing for unit operations shall constitute a fulfillment of all the express or implied obligations of each lease or contract covering lands in the unit area to the extent that the obligations cannot be performed because of the order of the board.

History: **En. Sec. 8, Ch. 33, L. 1969; amd. Sec. 67, Ch. 253, L. 1974; R.C.M. 1947, 60-131.8.**

82-11-212. Property rights and operator's lien. That portion of the unit production allocated to any tract and the proceeds from the sale of that production must be the property and income of the persons to whom or to whose credit the proceeds are allocated or payable under the order providing for unit operations, except that the operator of the unit shall, subject to 82-11-206(5)(a), have a first and prior lien upon each owner's oil and gas rights and the owner's share of unitized production to secure the payment of that owner's proportionate part of developing and operating the unit area. The lien may be perfected and enforced in the same manner as provided in Title 71, chapter 3, part 5. Upon demand by any owner of working interest in any tract to which gas has been allocated, the unit operator shall deliver the allocated share of gas to the owner in kind. However, the operator and the other owners of interest may not be required to bear the cost of providing additional facilities for the delivery of the gas.

History: **En. Sec. 9, Ch. 33, L. 1969; amd. Sec. 5, Ch. 150, L. 1971; R.C.M. 1947, 60-131.9; amd. Sec. 2747, Ch. 56, L. 2009.**

Cross-References

Liens — generally, Title 71, ch. 3.

82-11-213. Contract not terminated by board order. A division order or other contract relating to the sale or purchase or production from a tract may not be terminated by the order providing for unit operations but shall remain in force and apply to oil and gas allocated to the tract until terminated in accordance with the provisions thereof.

History: **En. Sec. 10, Ch. 33, L. 1969; amd. Sec. 68, Ch. 253, L. 1974; R.C.M. 1947, 60-131.10.**

82-11-214. *(Temporary)* **Title to oil and gas rights not affected by board order.** Except to the extent that the parties affected so agree, an order providing for unit operations does not result in a transfer of all or any part of the title of any person to the oil and gas rights in any tract in the unit area. All property, whether real or personal, that may be acquired in the conduct of unit operations hereunder shall be acquired for the account of the owners within the unit area and shall be the property of those owners in the proportion that the expenses of unit operations are charged.

82-11-214. *(Effective on occurrence of contingency)* **Title to oil and gas rights not affected by board order.** Except to the extent that the parties affected agree and in accordance with 82-11-183(8), an order providing for unit operations does not result in a transfer of all or any part of the title of any person to the carbon dioxide rights or oil and gas rights in any tract in the unit area. All property, whether real or personal, that may be acquired in the conduct of unit operations under this part must be acquired for the account of the owners within the unit area and are the property of those owners in the proportion that the expenses of unit operations are charged.

History: En. Sec. 11, Ch. 33, L. 1969; amd. Sec. 69, Ch. 253, L. 1974; R.C.M. 1947, 60-131.11; amd. Sec. 26, Ch. 474, L. 2009.

Compiler's Comments

Contingent Effective Date: Section 31(1), Ch. 474, L. 2009, provided that this section is effective on the date that the board of oil and gas conservation is granted primacy to administer activities at carbon dioxide sequestration wells by the United States environmental protection agency.

82-11-215. Unit operation not restraint of trade. The formation of a unit as provided in 82-11-204 through 82-11-216 and the operation of the unit under order of the board shall not be in violation of any statute of this state relating to trusts, monopolies, contracts, or combinations in restraint of trade.

History: En. Sec. 12, Ch. 33, L. 1969; amd. Sec. 70, Ch. 253, L. 1974; R.C.M. 1947, 60-131.12.

Cross-References

Restraint of trade, Title 30, ch. 14, part 2.

82-11-216. No creation of relationship between parties in unit. The formation of such a unit as herein provided will not create a relationship between the parties thereto which shall be deemed to be or constitute a joint endeavor, adventure, undertaking, association, or mining or other partnership.

History: En. Sec. 13, Ch. 33, L. 1969; R.C.M. 1947, 60-131.13.

Part 3

Interstate Oil and Gas Conservation Compact

82-11-301. Authorization to join interstate compact for conservation of oil and gas. The governor of the state of Montana is hereby authorized and directed, for and in the name of the state of Montana, to join with other states in the Interstate Compact To Conserve Oil and Gas, which was heretofore executed in the city of Dallas, Texas, on February 16, 1935, and is now deposited with the department of state of the United States and which has been extended with the consent of congress to September 1, 1947.

History: En. Sec. 1, Ch. 121, L. 1945; R.C.M. 1947, 60-601.

82-11-302. Interstate oil and gas compact. The Interstate Compact To Conserve Oil and Gas referred to in the above section, and which it is hereby proposed to enter and to extend by agreement reads as follows:

AN INTERSTATE COMPACT TO CONSERVE OIL AND GAS

Article I

This agreement may become effective within any compacting state at any time as prescribed by that state and shall become effective within those states ratifying it whenever any three of the states of Texas, Oklahoma, California, Kansas, and New Mexico have ratified and Congress has given its consent. Any oil-producing state may become a party hereto as hereinafter provided.

Article II

The purpose of this compact is to conserve oil and gas by the prevention of physical waste thereof from any cause.

Article III

(1) Each state bound hereby agrees that within a reasonable time it will enact laws or if laws have been enacted, then it agrees to continue the same in force, to accomplish within reasonable limits the prevention of:

(a) the operation of any oil well with an inefficient gas-oil ratio;

(b) the drowning with water of any stratum capable of producing oil or gas or both oil and gas in paying quantities;

(c) the avoidable escape into the open air or the wasteful burning of gas from a natural gas well;

(d) the creation of unnecessary fire hazards;

(e) the drilling, equipping, locating, spacing, or operating of a well or wells so as to bring about physical waste of oil or gas or loss in the ultimate recovery thereof;

(f) the inefficient, excessive, or improper use of the reservoir energy in producing any well.

(2) The enumeration of the foregoing subjects shall not limit the scope of the authority of any state.

Article IV

Each state bound hereby agrees that it will, within a reasonable time, enact statutes or if such statutes have been enacted then that it will continue the same in force, providing in effect that oil produced in violation of its valid oil and/or gas conservation statutes or any valid rule, order, or regulation promulgated thereunder shall be denied access to commerce; and providing for stringent penalties for the waste of either oil or gas.

Article V

It is not the purpose of this compact to authorize the states joining herein to limit the production of oil or gas for the purpose of stabilizing or fixing the price thereof or create or perpetuate monopoly or to promote regimentation but is limited to the purpose of conserving oil and gas and preventing the avoidable waste thereof within reasonable limitations.

Article VI

(1) Each state joining herein shall appoint one representative to a commission hereby constituted and designated as the interstate oil compact commission, the duty of which said commission shall be to make inquiry and ascertain from time to time such methods, practices, circumstances, and conditions as may be disclosed for bringing about conservation and the prevention of physical waste of oil and gas, and at such intervals as said commission deems beneficial, it shall report its findings and recommendations to the several states for adoption or rejection.

(2) The commission shall have the power to recommend the coordination of the exercise of the police powers of the several states within their several jurisdictions to promote the maximum ultimate recovery from the petroleum reserves of said states and to recommend measures for the maximum ultimate recovery of oil and gas. Said commission shall organize and adopt suitable rules and regulations for the conduct of its business.

(3) No action shall be taken by the commission except:

(a) by the affirmative votes of the majority of the whole number of the compacting states, represented at any meeting; and

(b) by a concurring vote of a majority in interest of the compacting states at said meeting, such interest to be determined as follows: Such vote of each state shall be in the decimal proportion fixed by the ratio of its daily average production during the preceding calendar half year to the daily average production of the compacting states during said period.

Article VII

No state by joining herein shall become financially obligated to any other state, nor shall the breach of the terms hereof by any state subject such state to financial responsibility to the other states joining herein.

Article VIII

(1) This compact shall expire September 1, 1947. But any state joining herein may, upon 60 days' notice, withdraw herefrom.

(2) The representatives of the signatory states have signed this agreement in a single original which shall be deposited in the archives of the department of state of the United States, and a duly certified copy shall be forwarded to the governor of each of the signatory states.

(3) This compact shall become effective when ratified and approved as provided in Article I. Any oil-producing state may become a party hereto by affixing its signature to a counterpart to be similarly deposited, certified, and ratified.

(4) Done in the city of Dallas, Texas, this sixteenth day of February, 1935.

(Originally signed by the representatives of the following states: Oklahoma, Texas, New Mexico, Colorado, Illinois, Michigan, California, Arkansas, and Kansas.)

History: En. Sec. 2, Ch. 121, L. 1945; R.C.M. 1947, 60-602.

82-11-303. Extension of expiration date. The governor of Montana is further authorized and empowered, for and in the name of the state of Montana, to execute agreements for the further extension of the expiration date of the Interstate Compact To Conserve Oil and Gas and to determine if and when it is in the best interest of the state of Montana to withdraw from the compact upon 60 days' notice as provided by its terms. If the governor determines that the state should withdraw from the compact, the governor has full power and authority to give necessary notice and to take any and all steps necessary and proper to effect the withdrawal of the state of Montana from the compact.

History: En. Sec. 3, Ch. 121, L. 1945; R.C.M. 1947, 60-603; amd. Sec. 2748, Ch. 56, L. 2009.

82-11-304. Governor as member of interstate oil compact commission. The governor is the official representative of the state of Montana on the interstate oil compact commission, provided for in the Interstate Compact To Conserve Oil and Gas, and shall exercise and perform for the state of Montana all the powers and duties as a member of the interstate oil compact commission. However, the governor may appoint an assistant representative who shall act in the governor's stead as the official representative of the state of Montana as a member of the commission. The assistant representative shall take the oath of office prescribed by The Constitution of the State of Montana, which must be filed with the secretary of state.

History: En. Sec. 4, Ch. 121, L. 1945; R.C.M. 1947, 60-604; amd. Sec. 2749, Ch. 56, L. 2009.

Cross-References

Oath of office, Art. III, sec. 3, Mont. Const.

82-11-305. Limitation on power of representative. This part may not be construed as granting any power to the representative of the state of Montana in the representative's private or official capacity or to the interstate oil compact commission to prorate, allocate, regulate, or control oil or gas production or refined products of the production within the state of Montana or the markets for the production and may not have the effect or be construed as in any manner surrendering to the federal government any rights over or in the production, sale, or transportation of oil or gas or the refined products of oil or gas in the state of Montana. This part may not be construed to bind or obligate the state of Montana to enact any new legislation or to amend or alter any laws pertaining to the oil and gas industries in Montana.

History: En. Sec. 5, Ch. 121, L. 1945; R.C.M. 1947, 60-605; amd. Sec. 2750, Ch. 56, L. 2009.

Cross-References

Separation of powers, Art. III, sec. 1, Mont. Const.

82-11-306. Expenses of representative. The representative or the assistant representative appointed by the governor of the state of Montana to the oil compact commission must be allowed and paid the person's reasonable expenses while engaged in the performance of official duties, and the person's expenses and all other expense incurred in connection with the interstate oil compact and the interstate oil compact commission must be paid out of the board of oil and gas conservation revenue fund in accordance with the provisions of 82-11-135.

History: En. Sec. 6, Ch. 121, L. 1945; amd. Sec. 33, Ch. 39, L. 1977; R.C.M. 1947, 60-606; amd. Sec. 2751, Ch. 56, L. 2009.

CHAPTER 15
REGULATION OF PETROLEUM PRODUCTS

Part 1 — Regulation of Manufacture and Distribution

82-15-101. Definitions.
82-15-102. Enforcement of part — rules.
82-15-103. Standards and specifications for petroleum products.
82-15-104. Departments authorized to employ laboratory for testing.
82-15-105. Licenses and fees — status of license on transfer of ownership.
82-15-106. Refusing, suspending, and revoking licenses — hearing required.
82-15-107. Inspections, sampling, and tests by department to insure compliance with part.
82-15-108. Approved measure required for part delivery.
82-15-109. Full compartment sales — approval of meter.
82-15-110. Unlawful acts.
82-15-111. Penalty for violations.
82-15-112. Injunction against violations.
82-15-113. Refilling of liquefied petroleum product containers — unlawful acts.
82-15-114. Violation — penalty.
82-15-115. Owner identification.
82-15-116 through 82-15-119 reserved.
82-15-120. Department of environmental quality to enforce prohibition on methyl tertiary butyl ether — notice requirements — hearing — penalties.
82-15-121. Repealed.
82-15-122. Repealed.

Part 2 — Price Discrimination

82-15-201. Standard petroleum product defined.
82-15-202. Purpose.
82-15-203. Discrimination in price of petroleum products.
82-15-204. Investigation of complaints — revocation of license.
82-15-205. County attorney to prosecute violations.
82-15-206. Penalty.
82-15-207. Liability for civil and exemplary damages.

Part 1
Regulation of Manufacture and Distribution

82-15-101. Definitions. As used in this part, the following definitions apply:

(1) "Antiknock index number" means the octane rating of the antiknock characteristics of a grade or type of motor fuel determined as provided in 16 CFR 306.0.

(2) "Dealer" means any person engaged in the petroleum business and includes petroleum dealers and liquefied petroleum dealers.

(3) "Department" means the department of labor and industry provided for in Title 2, chapter 15, part 17.

(4) "Liquefied petroleum dealer" means a dealer engaged, directly or indirectly, in the business of delivering or distributing to a consumer or of selling or offering or advertising for sale or refining or manufacturing or keeping for sale in this state any petroleum product composed predominantly of any of the following hydrocarbons or mixtures of hydrocarbons: propane, propylene, butanes (normal butane or isobutane), and butylenes but excluding prepackaged liquefied petroleum products.

(5) "Liquefied petroleum product" means a product composed predominantly of any of the following hydrocarbons or mixtures of hydrocarbons: propane, propylene, butanes (normal butane or isobutane), and butylenes.

(6) "Liquefied petroleum product container" means a container approved by the American society of mechanical engineers that can hold 110 gallons or more of a liquefied petroleum product.

(7) "Mislabeled" means a package label or dispensing device of a product that bears any statement, design, or device regarding the product or regarding ingredients or substances in the

product or regarding the properties, quality, or kind of products that is false or misleading in any manner.

(8) "Owner" means a person:

(a) who is listed with the American society of mechanical engineers or with the manufacturer as owner by the serial number of the liquefied petroleum product container;

(b) who holds a written bill of sale or other instrument under which title to a liquefied petroleum product container was transferred; or

(c) who holds a paid invoice showing purchase of and payment for a liquefied petroleum product container.

(9) "Person" means an individual, trust, estate, partnership, corporation, joint-stock company, firm, agency, association, or any receiver appointed by law.

(10) "Petroleum dealer" means a dealer engaged, directly or indirectly, in the business of delivering or distributing to a consumer or offering or advertising for sale, refining, manufacturing, or keeping for sale in this state any gasoline, kerosene, distillate, road oil, fuel oil, lubricating oil, or greases or any oil or gas or oil and gas product except prepackaged petroleum products and except as otherwise defined as a liquefied petroleum dealer in subsection (4).

(11) "Sell" and "sale" includes barter and exchange.

History: En. 60-234 by Sec. 1, Ch. 77, L. 1977; R.C.M. 1947, 60-234; amd. Sec. 2, Ch. 274, L. 1981; amd. Sec. 1, Ch. 65, L. 1993; amd. Sec. 213, Ch. 483, L. 2001; amd. Sec. 8, Ch. 452, L. 2005.

82-15-102. Enforcement of part — rules. (1) Except as provided in subsection (2), this part must be enforced by the department. It may adopt necessary and reasonable rules for the implementation of the provisions and intent of this part, and those rules have the effect of law.

(2) Section 82-15-110(8) must be enforced by the department of environmental quality.

(3) The department of environmental quality shall adopt rules for the regulation of methyl tertiary butyl ether in accordance with this part. The rules must establish:

(a) a trace level or trace levels of methyl tertiary butyl ether that may be contained in gasoline that is imported into the state, stored, distributed, sold, offered or exposed for sale, or dispensed in the state of Montana. The department of environmental quality shall establish trace levels in a manner that prevents the intentional addition of methyl tertiary butyl ether to gasoline but that allows for a residual amount of methyl tertiary butyl ether to remain in tanks following implementation of 82-15-110(8).

(b) reasonable sampling and reporting requirements; and

(c) requirements that the department of environmental quality determines are reasonable and necessary for implementation of the portions of this part that apply to methyl tertiary butyl ether.

History: En. 60-235 by Sec. 2, Ch. 77, L. 1977; R.C.M. 1947, 60-235; amd. Sec. 1, Ch. 385, L. 2005; amd. Sec. 9, Ch. 452, L. 2005; amd. Sec. 110, Ch. 324, L. 2021.

Cross-References

Adoption and publication of rules, Title 2, ch. 4, part 3.

82-15-103. Standards and specifications for petroleum products. The standards and specifications for petroleum products, including but not limited to gasoline, ethanol-blended gasoline, fuel oils, diesel fuel, kerosene, and liquefied petroleum gases, must be determined by the department and must be based on nationally recognized standards and specifications such as the standards and specifications that are published by the American society for testing and materials. The standards and specifications adopted by rule by the department are the standards and specifications for products sold in this state, and official tests of the products must be based on the adopted standards and specifications.

History: En. 60-236 by Sec. 3, Ch. 77, L. 1977; R.C.M. 1947, 60-236; amd. Sec. 78, Ch. 130, L. 2005; amd. Sec. 10, Ch. 452, L. 2005; amd. Sec. 1, Ch. 15, L. 2017.

82-15-104. Departments authorized to employ laboratory for testing. The department and, when testing for methyl tertiary butyl ether, the department of environmental quality may employ a laboratory that has sufficient facilities to make tests of petroleum products as required and may pay reasonable compensation for the analyses and tests made by the laboratory.

History: En. 60-237 by Sec. 4, Ch. 77, L. 1977; R.C.M. 1947, 60-237; amd. Sec. 2, Ch. 385, L. 2005; amd. Sec. 11, Ch. 452, L. 2005.

82-15-105. Licenses and fees — status of license on transfer of ownership. (1) A petroleum dealer or liquefied petroleum dealer may not do business in this state until licensed by the department. The license must be obtained by the dealer by making application to the department upon forms provided by the department. A dealer who has not been issued a license and who is found selling, offering for sale, delivering, or distributing petroleum products shall be punished upon conviction as provided by this part.

(2) The department shall adopt rules establishing license fees based upon the measuring devices used by the dealer. The fees may be paid by credit card and may be discounted for payment processing charges paid by the department to a third party. The fees must be deposited in the state special revenue fund of the department for use in administrating and enforcing this part.

(3) All licenses are annual and expire on the anniversary date established by rule by the board of review established in 30-16-302. There is an additional charge of 50% on all license fees that are not paid within 60 days of the licensee's anniversary date. If the fee is not paid, the equipment must be sealed and removed from service by the department. It is unlawful for anyone to use a device removed from service or to break the seal until all fees have been paid.

History: En. 60-238 by Sec. 5, Ch. 77, L. 1977; R.C.M. 1947, 60-238; amd. Sec. 1, Ch. 252, L. 1983; amd. Sec. 1, Ch. 56, L. 1991; amd. Sec. 1, Ch. 498, L. 1993; amd. Sec. 20, Ch. 366, L. 1997; amd. Sec. 8, Ch. 54, L. 1999; amd. Sec. 1, Ch. 62, L. 2007.

Cross-References

Adoption and publication of rules, Title 2, ch. 4, part 3.

82-15-106. Refusing, suspending, and revoking licenses — hearing required. The department may refuse to grant a license or may suspend or revoke a license already granted for due cause after a hearing for which notice was provided for not less than 10 days. Violation of any provision of this part, except 82-15-110(8), or any lawful order or rule of the department is cause for which the department may suspend, revoke, or refuse to issue a license. The suspension, revocation, or refusal may be conditioned on terms that the department considers appropriate.

History: En. 60-239 by Sec. 6, Ch. 77, L. 1977; R.C.M. 1947, 60-239; amd. Sec. 3, Ch. 385, L. 2005; amd. Sec. 12, Ch. 452, L. 2005.

Cross-References

Contested case procedure, Title 2, ch. 4, part 6.

82-15-107. Inspections, sampling, and tests by department to insure compliance with part. (1) For the purpose of obtaining information regarding suspected violation of this part, the department has access to all places where the commodities subject to regulation under this part are sold, offered for sale or kept for sale, manufactured, transported, or stored or where the books, papers, records, or documents relative to those transactions are kept and may inspect and copy them at any place in this state.

(2) The department may sample, inspect, and test any of the commodities subject to this part upon tendering payment for them, whether they originate at points outside the state or otherwise and whether they are in transport or at rest in places where they are to be sold.

History: En. 60-240 by Sec. 7, Ch. 77, L. 1977; R.C.M. 1947, 60-240.

Cross-References

Sale of gasoline and distillates on other than gross basis unlawful — exception, 30-12-409.

82-15-108. Approved measure required for part delivery. Part of a compartment delivery may be made only by an approved, calibrated, and sealed meter or an approved measure. Gauge stick measurement is not permitted. All tank markers must be positioned and sealed as provided by the department. The department shall fix by rule fees for retesting meters or measuring devices or vehicle tanks used for distribution by petroleum or liquefied petroleum dealers and for any other special service rendered.

History: En. 60-241 by Sec. 8, Ch. 77, L. 1977; R.C.M. 1947, 60-241.

Cross-References

Sale of gasoline and distillates on other than gross basis unlawful — exception, 30-12-409.

82-15-109. Full compartment sales — approval of meter. Full compartment sales or deliveries may only be made in a manner that shall be provided by the department by rule. All other sales or deliveries may only be made through a meter which has been approved, calibrated, and sealed by the department or by weight, unless otherwise provided by the department.

History: **En. 60-242 by Sec. 9, Ch. 77, L. 1977; R.C.M. 1947, 60-242.**

Cross-References

Sale of gasoline and distillates on other than gross basis unlawful — exception, 30-12-409.

82-15-110. Unlawful acts. It is unlawful to:

(1) use any meter or mechanical device for the measurement of gasoline or liquid fuels unless the meter or mechanical device has been approved by the department and sealed as correct;

(2) change or in any way tamper with the department's seal without written consent from the department;

(3) make delivery from petroleum vehicle tanks through a hose unless the tanks have been calibrated by the department under 82-15-108;

(4) sell or deliver liquefied petroleum to a consumer as a liquid or vapor except as provided by 82-15-109;

(5) sell or offer for sale or deliver liquefied petroleum to a consumer as a liquid or vapor, the measurement of which has not been temperature corrected to 60 degrees F by means of an automatic compensating device that has been approved, calibrated, and sealed by the department, unless otherwise provided by the department;

(6) sell, offer, or expose for sale any petroleum product for which standards or minimum specifications have been set by the department unless the fuel product meets in all respects the tests and standards prescribed;

(7) sell or offer or expose for sale any petroleum product that is adulterated, mislabeled, or misrepresented with respect to the use for which it is reasonably intended; or

(8) import into the state, store, distribute, sell, offer or expose for sale, or dispense any gasoline that contains methyl tertiary butyl ether in amounts that exceed the trace level or levels allowed by the rules adopted pursuant to 82-15-102(3)(a).

History: **En. 60-243 by Sec. 10, Ch. 77, L. 1977; R.C.M. 1947, 60-243; amd. Sec. 4, Ch. 385, L. 2005; amd. Sec. 13, Ch. 452, L. 2005.**

Cross-References

82-15-111. Penalty for violations. A person who purposely, knowingly, or negligently violates any of the provisions of this part, except 82-15-110(8), or any rule promulgated by the department is guilty of a misdemeanor and upon conviction shall for the first offense be punished by a fine of not less than $10 or more than $1,000 and shall be punished for any subsequent offense by a fine of not less than $50 or more than $5,000, by imprisonment in the county jail for a term not exceeding 1 year, or by both fine and imprisonment.

History: **En. 60-244 by Sec. 11, Ch. 77, L. 1977; R.C.M. 1947, 60-244; amd. Sec. 5, Ch. 385, L. 2005; amd. Sec. 15, Ch. 452, L. 2005.**

82-15-112. Injunction against violations. The department may apply to any court of competent jurisdiction for a temporary or permanent injunction, or both, restraining any person for violating any provision of this part or any rule promulgated by the department pursuant to this part.

History: **En. 60-245 by Sec. 12, Ch. 77, L. 1977; R.C.M. 1947, 60-245.**

Cross-References

Injunctions, Title 27, ch. 19.

82-15-113. Refilling of liquefied petroleum product containers — unlawful acts. Only the owner or a person authorized by the owner may:

(1) fill or refill a liquefied petroleum product container;

(2) deface, erase, obliterate, cover up, remove, conceal, or change the name or other identification of the owner or the information on the manufacturer's specification plate; or

(3) place the name of a person other than the owner on the liquefied petroleum product container.

History: **En. Sec. 2, Ch. 65, L. 1993.**

82-15-114. Violation — penalty. A person who violates 82-15-113 is guilty of a misdemeanor and upon conviction shall be punished by a fine not to exceed $500 or by imprisonment in the county jail for a term not exceeding 120 days, or both.

History: **En. Sec. 3, Ch. 65, L. 1993.**

82-15-115. Owner identification. The owner of a liquefied petroleum product container shall place the name, initials, or trademark of the owner on the dome near the filling apparatus of each container.

History: **En. Sec. 4, Ch. 65, L. 1993.**

82-15-116 through 82-15-119 reserved.

82-15-120. Department of environmental quality to enforce prohibition on methyl tertiary butyl ether — notice requirements — hearing — penalties. (1) (a) Whenever the department of environmental quality believes that a violation of 82-15-110(8) or of the rules adopted pursuant to 82-15-102(3) has occurred, it may serve written notice of the violation on the alleged violator or an agent of the alleged violator.

(b) The notice must specify the facts alleged to constitute a violation and may include an order assessing an administrative penalty pursuant to subsection (3), an order to take necessary corrective action within a reasonable period of time stated in the order, or both.

(c) The order becomes final unless, within 30 days after the notice is served, the person named in the order requests in writing a hearing before the board of environmental review. Service by mail is complete on the date of mailing.

(d) Upon receipt of the request, the board of environmental review shall schedule a hearing. The contested case provisions of the Montana Administrative Procedure Act provided in Title 2, chapter 4, part 6, apply to a hearing conducted under this section.

(2) If, after a hearing held under subsection (1), the board of environmental review finds that a violation has occurred, it shall either affirm or modify the order of the department of environmental quality. An order issued by the department of environmental quality or by the board of environmental review may prescribe the date by which the violation must cease and may prescribe time limits for a particular action. If, after hearing, the board of environmental review finds no violation has occurred, it shall rescind the department of environmental quality's order.

(3) A violation of 82-15-110(8) or of a rule adopted pursuant to 82-15-102(3) is subject to an administrative penalty of up to $1,000. Each day of violation constitutes a separate violation.

(4) Any person who violates 82-15-110(8), a rule adopted pursuant to 82-15-102(3), or an order issued under this section is subject to a civil penalty not to exceed $5,000 for each violation. Each day of violation constitutes a separate violation.

(5) The department of environmental quality is authorized to commence a civil action seeking appropriate relief, including temporary and permanent injunctions and penalties under subsection (4) of this section, for a violation of 82-15-110(8), a rule adopted pursuant to 82-15-102(3), or a violation of an order issued under this section. The action must be brought in the district court of the county in which the violation occurred.

History: **En. Sec. 6, Ch. 385, L. 2005; en. Sec. 14, Ch. 452, L. 2005; amd. Sec. 52, Ch. 535, L. 2021.**

82-15-121. Repealed. Sec. 2, Ch. 15, L. 2017.

History: **En. Sec. 2, Ch. 452, L. 2005.**

Part 2
Price Discrimination

82-15-201. Standard petroleum product defined. The term "standard petroleum product" as used herein refers to and includes gasoline, fuel oil, distillates, greases, and lubricating oils.

History: **En. Sec. 2, Ch. 111, L. 1935; re-en. Sec. 4193.2, R.C.M. 1935; R.C.M. 1947, 60-402.**

82-15-202. Purpose. This part is intended to compel a person, firm, company, association, or corporation doing business in the state of Montana and engaged in the selling of and dealing in standard petroleum products to treat a customer in one part of the state of Montana on an equal basis with a customer in another part of the state or in the nearest adjoining state and to promote the uniform application of the law of the state of Montana providing a tax on gasoline used by a motor vehicle when traveling over a public highway. This part shall be liberally construed to accomplish those purposes.

History: **En. Sec. 3, Ch. 111, L. 1935; re-en. Sec. 4193.3, R.C.M. 1935; R.C.M. 1947, 60-403; amd. Sec. 8, Ch. 201, L. 1979.**

Cross-References

Gasoline and vehicle fuels taxes, Title 15, ch. 70.

82-15-203. Discrimination in price of petroleum products. (1) Any person, firm, company, association, or corporation, either domestic or foreign, doing business in the state of Montana and engaged in the selling of any standard petroleum product that shall demand or collect from any person or customer a higher price for any standard petroleum product in one part of the state of Montana than the price being demanded or collected at substantially the same time by such person, firm, company, association, or corporation from other persons or customers in another part of the state of Montana or in the nearest adjoining state for a like article of standard petroleum product shall be guilty of discrimination which is hereby declared to be a fraud and the agents or officers of such person, firm, company, association, or corporation participating, guilty of a misdemeanor.

(2) In the trial of an action under the provisions of this part, in the determination of the justification of the price demanded or collected by a person, firm, company, association, or corporation charged with a violation of the provisions of this part, transportation, quantity of sales, emergencies, cost of doing business, or similar differences under the respective conditions may be offered as a matter of defense or justification for the differences in price demanded or collected. When competent evidence is offered in the trial of any action under this part of a demand for or the receipt of a higher price for any standard petroleum product in the state of Montana by any person, firm, company, association, or corporation than such person, firm, company, association, or corporation demanded, collected, or received at substantially the same time for the same or a similar article of standard petroleum product in another part of the state of Montana or in the nearest adjoining state, the burden of proof shall then be upon such person, firm, company, association, or corporation or agents or officers on trial to prove that the difference in the price demanded or collected was justified.

History: **En. Sec. 1, Ch. 111, L. 1935; re-en. Sec. 4193.1, R.C.M. 1935; R.C.M. 1947, 60-401.**

Cross-References

82-15-204. Investigation of complaints — revocation of license. If a complaint is made to the attorney general that a person, firm, company, association, or corporation is guilty of discrimination as defined by this part, the attorney general shall investigate the complaint in a timely manner, and for that purpose the attorney general shall subpoena witnesses, administer oaths, take testimony, and require the production of books or other documents, and if, in the attorney general's opinion, sufficient grounds exist, the attorney general shall prosecute an action in the name of the state in the proper court to annul the charter or revoke the permit or license of the person, firm, company, association, or corporation, as the case may be, and to permanently enjoin the person, firm, company, association, or corporation from doing business in this state. If in the action the court finds that the person, firm, company, association, or corporation is guilty of discrimination as defined by this part, the court shall annul the charter or revoke the permit or license of the person, firm, company, association, or corporation and may permanently enjoin it or them from transacting business in this state.

History: **En. Sec. 4, Ch. 111, L. 1935; re-en. Sec. 4193.4, R.C.M. 1935; R.C.M. 1947, 60-404; amd. Sec. 2752, Ch. 56, L. 2009.**

82-15-205. County attorney to prosecute violations. If a person presents to the county attorney of any county in which the discriminatory acts of a person, firm, company, association, or corporation have been committed a sworn written statement of the price paid, the date, and the parties selling and buying and reasonably reliable information of the price demanded or collected by the person, firm, company, association, or corporation for a corresponding or similar article of standard petroleum product sold or offered for sale in another part of the state of Montana or in the nearest adjoining state by the person, firm, company, association, or corporation, the county attorney shall promptly investigate and either commence and prosecute an action or furnish the informant with a written statement of reasons for not commencing and prosecuting an action under this part.

History: En. Sec. 4-A, Ch. 111, L. 1935; re-en. Sec. 4193.5, R.C.M. 1935; R.C.M. 1947, 60-405; amd. Sec. 2753, Ch. 56, L. 2009.

82-15-206. Penalty. Any person, firm, company, association, or corporation violating any of the provisions of this part shall be guilty of a misdemeanor and shall be punishable by a fine of not exceeding $500.

History: En. Sec. 5, Ch. 111, L. 1935; re-en. Sec. 4193.6, R.C.M. 1935; R.C.M. 1947, 60-406.

85-1-205. Acquisition of water in federal reservoirs.

85-1-206. Construction of works by department.
85-1-207. Determination of costs of works.
85-1-208. Construction across streams, highways, or other obstacles.
85-1-209. Acquisition of property by department.
85-1-210. Disposal of property by department.
85-1-211. Management of property — water contracts.
85-1-212. Repealed.
85-1-213. Institution of court actions by department.
85-1-214. Exercise of department powers — scope of jurisdiction.
85-1-215. Department duties — records and operations.
85-1-216. Limitations on liabilities and obligations.
85-1-217. Restoration and repair of damaged property.
85-1-218. Employment of county surveyors.
85-1-219. State-owned works — department approval — bids — procurement of goods and services.
85-1-220. State water project hydroelectric power generation special revenue account created — revenue allocated.
85-1-221. Contracts with the United States.
85-1-222. Conformity to federal regulations authorized.
85-1-223. Negotiations with other states by the department.
85-1-224. Contracts with state agencies and counties.

Part 3 — Finance

85-1-301. Water conservation revenue bonds.
85-1-302. Limitations on state liability.
85-1-303. Procedure in case of insufficient bond proceeds.
85-1-304. Lien upon bond proceeds.
85-1-305. Use of trust indenture to secure bonds.
85-1-306. Provisions for protecting bondholders.
85-1-307. Provisions to secure payment of bonds.
85-1-308. Provisions for conveyance in trust or mortgage.
85-1-309. Actions by trustee and bondholders.
85-1-310. Refunding revenue bonds.
85-1-311 through 85-1-319 reserved.
85-1-320. Montana water development state special revenue account.
85-1-321. Funds in general.
85-1-322. Construction capital projects funds.
85-1-323. Debt service funds.
85-1-324 through 85-1-330 reserved.
85-1-331. Acceptance and use of appropriations and contributions.
85-1-332. Disposition of money collected.
85-1-333. Repealed.
85-1-334. Repealed.

Part 4 — Special Projects (Repealed)

Part 5 — Power Generation at Projects

85-1-501. Survey of power generation capacity.
85-1-502. Notice of availability of lease sites.
85-1-503. Receipt of applications.
85-1-504. Determinations by department.
85-1-505. Lease conditions.
85-1-506. Compliance with federal law.
85-1-507. Duration of lease.
85-1-508. Duties of the department.
85-1-509. Power generation by department authorized.
85-1-510. Sale of power and allocation of revenue.
85-1-511. Determination by the public service commission.
85-1-512. Standards for the determination.
85-1-513. Purchase of power by electric cooperative not agreeing to be bound by public service commission determination.
85-1-514. Power generation negotiation process.

Part 6 — Renewable Resource Grant and Loan Program

85-1-601. Purpose and policies.
85-1-602. Objectives.
85-1-603. Renewable resource loan debt service fund created — coal severance tax allocated — renewable resource loan loss reserve fund created.
85-1-604. Repealed.
85-1-605. Grants, loans, and bonds for state, local, or tribal government assistance.
85-1-606. Grants and loans to private persons.
85-1-607. Repealed.

85-1-608. Applications for grants and loans to private persons.
85-1-609. Eligibility for a loan or grant to a private person.
85-1-610. Evaluation of grants and loans to private persons.
85-1-611. Department to solicit views.
85-1-612. Rulemaking authority.
85-1-613. Limits on loans.
85-1-614. Limits on grants from natural resources projects state special revenue account.
85-1-615. Security interests — purchase, operation, and resale of encumbered property.
85-1-616. Administration of loans and grants.
85-1-617. Issuing renewable resource bonds — renewable resource loan proceeds account.
85-1-618. Restrictions on use of bond proceeds.
85-1-619. Debt service fund — pledge and administration of sufficient balance.
85-1-620. Renewable resource refunding bonds.
85-1-621. Report.
85-1-622. Penalty.
85-1-623. Repealed.
85-1-624. Authorization of bonds.
85-1-625 through 85-1-630 reserved.
85-1-631. Water storage state special revenue account created — revenues allocated — appropriations from account.
85-1-632. Exemption from environmental review.

Part 7 — Water Storage Policy

85-1-701. Short title.
85-1-702. Purpose.
85-1-703. Water storage policy.
85-1-704. Prioritization of water storage projects — governor's report.

Part 8 — Lease Management Program

85-1-801. Statement of policy.
85-1-802. Leases authorized.
85-1-803. Rulemaking.
85-1-804. Appraisal of project lands — adjustment of lease fee.
85-1-805. Full market value required.
85-1-806. Withdrawal of lands from leasing.
85-1-807. Assignment of leases — subleasing not allowed.
85-1-808. Changes in lease use not authorized — cancellation.
85-1-809. Improvements authorized — no compensation — removal.
85-1-810. No pledge or mortgage of leasehold interest.
85-1-811. Project lands lease and sales account.
85-1-812. Sale of leased cabin or home sites — rulemaking.
85-1-813. Valuation of cabin or home sites and improvements.

Part 9 — Western Montana Conservation Commission Act

85-1-901. Short title.
85-1-902. Purpose.
85-1-903. Definitions.
85-1-904. Duties of the commission.
85-1-905. Commission authority.
85-1-906. Special county government authority.
85-1-907. Cooperation with other agencies and organizations.

Part 1
General Provisions

85-1-101. Policy considerations. It is hereby declared as follows:

(1) The general welfare of the people of Montana, in view of the state's population growth and expanding economy, requires that water resources of the state be put to optimum beneficial use and not wasted.

(2) The public policy of the state is to promote the conservation, development, and beneficial use of the state's water resources to secure maximum economic and social prosperity for its citizens.

(3) The state, in the exercise of its sovereign power, acting through the department of natural resources and conservation, shall coordinate the development and use of the water resources of the state so as to effect full utilization, conservation, and protection of its water resources.

(4) The development and utilization of water resources and the efficient, economic distribution thereof are vital to the people in order to protect existing uses and to assure adequate future supplies for domestic, industrial, agricultural, and other beneficial uses.

(5) The water resources of the state must be protected and conserved to assure adequate supplies for public recreational purposes and for the conservation of wildlife and aquatic life.

(6) The public interest requires the construction, operation, and maintenance of a system of works for the conservation, development, storage, distribution, and utilization of water, which construction, operation, and maintenance is a single object and is in all respects for the welfare and benefit of the people of the state.

(7) It is necessary to coordinate local, state, and federal water resource development and utilization plans and projects through a single agency of state government, the department of natural resources and conservation.

(8) The greatest economic benefit to the people of Montana can be secured only by the sound coordination of development and utilization of water resources with the development and utilization of all other resources of the state.

(9) Any attempt to gain control of or speculate on large quantities of ground water of the state of Montana is not in the interest of the people and is to be restricted.

(10) To achieve these objectives and to protect the waters of Montana from diversion to other areas of the nation, it is essential that a comprehensive, coordinated multiple-use water resource plan be progressively formulated, to be known as the "state water plan".

History: En. Sec. 2, Ch. 158, L. 1967; amd. Sec. 119, Ch. 253, L. 1974; R.C.M. 1947, 89-101.2; amd. Sec. 1, Ch. 631, L. 1979.

85-1-102. Definitions. Unless the context requires otherwise, in this chapter, the following definitions apply:

(1) "Administrative costs" means costs incurred by the department:

(a) for the purpose of protecting the department's properties and assets;

(b) to oversee the operation and maintenance of the projects;

(c) to administer contracts and receivables;

(d) to maintain project financial records;

(e) to provide technical assistance for operating, maintaining, and rehabilitating the projects; and

(f) to assist in securing funds for operating, maintaining, and rehabilitating the projects.

(2) "Cost of operation and maintenance" means the costs of operation, maintenance, and routine repairs and the costs incurred by the water users' association or the department in the distribution of water from the project, excluding the department's administrative costs.

(3) "Cost of works" means:

(a) the cost of construction, including any rehabilitation or alteration of the project;

(b) the cost of all lands, property, rights, easements, and franchises acquired that are considered necessary for the construction;

(c) the cost of all water rights acquired or exercised by the department in connection with the works;

(d) the cost of all machinery and equipment, financing charges, and interest prior to and during construction and for a period not exceeding 3 years after the completion of construction;

(e) the cost of engineering and legal services, plans, specifications, surveys, estimates of cost, and other expenses necessary or incident to determining the feasibility or practicability of any project;

(f) administrative expense; and

(g) other expenses that are necessary or incident to the financing authorized in this part and the construction of the works and the placing of the works in operation.

(4) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(5) "Owner" means all individuals, irrigation districts, drainage districts, flood control districts, incorporated companies, societies, or associations that have any title or interest in any properties, rights, easements, or franchises to be acquired.

(6) (a) "Private person" means any individual, association, partnership, corporation, or other nongovernmental entity that is not eligible for loans and grants under 85-1-605.

(b) The term does not include a governmental entity, such as an agency, local government, or political subdivision of the state, the United States, or any agency of the United States, or any other governmental entity.

(7) "Project" means any one of the works defined in this section or any combination of works that are physically connected or jointly managed and operated as a single unit.

(8) "Public benefits" means those benefits that accrue from a water development project or activity to persons other than the private grant or loan recipient and that enhance the common well-being of the people of Montana. Public benefits include but are not limited to recreation, flood control, erosion reduction, agricultural flood damage reduction, water quality enhancement, sediment reduction, access to recreation opportunities, and wildlife conservation.

(9) "Renewable resource loan debt service fund" means a separate fund created by 85-1-603 within the debt service fund type of the state treasury, to be used as provided in 85-1-619.

(10) "Renewable resource loan proceeds account" means a separate account created by 85-1-617 within the state special revenue fund of the state treasury to:

(a) finance loans under the provisions of the renewable resource grant and loan program to agencies, local governments, and political subdivisions of the state, to private persons, and to any other eligible recipients; and

(b) purchase liens and operate property, as provided in 85-1-615, from proceeds of bonds issued under part 6 of this chapter.

(11) "Tribal government" means the officially recognized government of an Indian tribe, nation, or other organized group or community that is located in Montana, that exercises self-government powers, and that is recognized as eligible for those services that are provided by the United States to Indians because of their status as Indians.

(12) "Water development activity" means an action or program to protect and enhance water-based recreation or to protect or enhance water resources for the benefit of agriculture, flood control, or other uses, including but not limited to the promotion of efficient use of water in agriculture, the improvement of water quality in agriculture and other nonpoint source uses, the protection and enhancement of water-based recreation, the control of erosion of streambanks and control of sedimentation in rivers and streams, and the provision of greater local and state control of Montana's water resources. Water development activities may provide any combination of marketable and nonmarketable benefits.

(13) "Water development project" means a project as defined in subsection (7), except that water development projects:

(a) are not limited to projects owned or operated by the department; and

(b) for purposes of the renewable resource grant and loan program, must include water development activities.

(14) (a) "Works" means all property and rights, easements, and franchises relating to property and considered necessary or convenient for the operation of the works and all water rights acquired or exercised by the department in connection with those works.

(b) The term includes:

(i) all means of conserving and distributing water, including but not limited to reservoirs, dams, diversion canals, distributing canals, waste canals, drainage canals, dikes, lateral ditches and pumping units, mains, pipelines, and waterworks systems; and

(ii) all works for the conservation, development, storage, distribution, and utilization of water, including but not limited to works for the purpose of irrigation, flood prevention, drainage, fish and wildlife, recreation, development of power, watering of stock, and supplying water for public, domestic, industrial, or other uses and for fire protection.

85-1-203. State water plan. (1) The department shall gather from any source reliable information relating to Montana's water resources and prepare from that information a continuing comprehensive inventory of the water resources of the state. In preparing this inventory, the department may:

(a) conduct studies;

(b) adopt studies made by other competent water resource groups, including federal, regional, state, or private agencies;

(c) perform research or employ other competent agencies to perform research on a contract basis; and

(d) hold public hearings in affected areas at which all interested parties must be given an opportunity to appear.

(2) The department shall formulate and adopt and amend, extend, or add to a comprehensive, coordinated multiple-use water resources plan known as the "state water plan". The state water plan may be formulated and adopted in sections, with some of these sections corresponding with hydrologic divisions of the state. The state water plan must set out a progressive program for the conservation, development, utilization, and sustainability of the state's water resources and must propose the most effective means by which these water resources may be applied for the benefit of the people, with due consideration of alternative uses and combinations of uses.

(3) Sections of the state water plan must be completed for the Missouri River basin, the Yellowstone River basin, and the Clark Fork and Kootenai River basins, be submitted to the 2035 legislature, and be updated at least every 20 years. These basinwide plans must include:

(a) an inventory of consumptive and nonconsumptive uses associated with existing water rights;

(b) identified data gaps;

(c) an estimate of the amount of surface and ground water needed to satisfy new future demands;

(d) analysis of the effects of frequent drought and of new or increased depletions on the availability of future water supplies;

(e) proposals for the best means to satisfy existing water rights and new water demands, such as an evaluation of opportunities for storage of water by both private and public entities;

(f) possible sources of water to meet the needs of the state; and

(g) any legislation necessary to address water resource concerns in these basins.

(4) (a) The department shall create a basin advisory council in the Missouri River basin, in the Yellowstone River basin, and in the Clark Fork and Kootenai River basins that is inclusive and representative of all water interests and interests in those basins.

(b) The basin advisory councils must consist of key water interests within the basins, including, on recommendation from relevant water user interest groups, at least one representative each from the following groups or organizations:

(i) agricultural;
(ii) conservation;
(iii) industrial;
(iv) irrigation;
(v) municipal;
(vi) recreational;
(vii) tribal;
(viii) watershed; and
(ix) conservation districts.

(c) Each basin advisory council may have up to 20 members.

(d) Each basin advisory council shall make recommendations to the department on the basinwide plans required by subsection (3).

(e) The department may use existing basin councils as a basin advisory council if the composition and purpose of the existing basin council is consistent with this subsection (4).

(5) Before adopting the entire state water plan or any section of the plan, the department shall hold public hearings across the state, or in an area of the state encompassed by a section of the plan if adoption of a section is proposed. Notice of the hearing or hearings must be published for 2 consecutive weeks in a newspaper of general circulation published in each county encompassed by the proposed plan or section of the plan at least 30 days prior to the hearing.

(6) The legislature, by joint resolution, may revise the state water plan.

(7) The department shall prepare a continuing inventory of the ground water resources of the state. The ground water inventory must be included in the comprehensive water resources inventory described in subsection (1) but must be a separate component of the inventory.

(8) The department shall publish the comprehensive inventory, the state water plan, the ground water inventory, or any part of each, and the department may assess and collect a reasonable charge for these publications.

(9) In developing and revising the state water plan as provided in this section, the department shall consult with the water policy committee established in 5-5-231 and solicit the advice of the water policy committee in carrying out its duties under this section.

History: En. Sec. 5, Ch. 158, L. 1967; amd. Sec. 138, Ch. 253, L. 1974; R.C.M. 1947, 89-132.1(1) thru (5); amd. Sec. 18, Ch. 573, L. 1985; amd. Sec. 1, Ch. 381, L. 1989; amd. Sec. 417, Ch. 418, L. 1995; amd. Sec. 70, Ch. 545, L. 1995; amd. Sec. 1, Ch. 404, L. 2009; amd. Sec. 7, Ch. 122, L. 2015; amd. Sec. 113, Ch. 261, L. 2021; amd. Sec. 1, Ch. 284, L. 2021; amd. Sec. 10, Ch. 460, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 10, Ch. 460, L. 2025. Amendment effective October 1, 2025.

Cross-References

Public participation in governmental operations, Title 2, ch. 3.
Publication of legal notices, Title 18, ch. 7, part 2.

85-1-204. Department powers over state water. (1) The department may sell, lease, and otherwise dispose of water impounded under this chapter. The water may be sold for the purpose of irrigation, development of power, watering of stock, or other purposes. The department may also lease water under the state water leasing program established under the provisions of 85-2-141. To the extent that it may be necessary to carry out this chapter and subject to compliance with the other provisions of this chapter, the department has full control of all the water of the state not under the exclusive control of the United States and not appropriated for private use. The department shall take the necessary actions to appropriate and conserve the water for the use of the people. The authority of the department conferred by this chapter extends and applies to rights to the natural flow of the water of this state that it may acquire by condemnation pursuant to Title 70, chapter 30, or by purchase, exchange, appropriation, or agreement.

(2) For the purpose of regulating the diversion of water, the department may enter upon the means and place of use of all appropriators for making surveys of respective rights and seasonal needs.

(3) The department may take into consideration the decrees of the courts of this state having jurisdiction that purport to adjudicate the water of a stream or its tributaries. A fair,

reasonable, and equitable reconciliation must be made between the claimants asserting rights under different decrees and between decreed rights and asserted rights of appropriation not adjudicated by a court.

(4) The department may hold hearings relating to the rights of respective claimants after first giving the notice that it considers appropriate. The department shall make findings of the date and quantity of appropriation and use of all claimants that the department recognizes and observes in diverting the water that the department is appropriated. The department may measure and distribute the water to the holder of the recognized appropriation right under agreed-upon terms.

(5) The department, when engaged in controlling and dividing the natural flow of a stream under the authority granted by this chapter, is exercising a police power of the state, and water commissioners appointed by any court may not deprive the department of any of the water appropriated or administered under agreement with respective water right holders. The holder of a prior right who contends that the department is not recognizing and respecting the appropriation may resort to a court for the purpose of determining whether or not the rights of the claimant have been invaded, and the department shall observe the terms of the final decree.

(6) When the department impounds or acquires the right of appropriation of the water of a stream, it may divert or authorize the diversion at a point on the stream or a portion of the stream when it is done without injury to a prior appropriator.

85-1-205. Acquisition of water in federal reservoirs. The department may acquire water or water storage by purchase option or agreement with the federal government from any federal reservoir for the purpose of sale, rent, or distribution for any beneficial use. In such cases, the department is not required to construct any diversion or appropriation facilities or works, and it may sell, rent, or distribute such water at such rates and under such terms and conditions as it considers appropriate.

85-1-206. Construction of works by department. (1) The department may construct works, with the cost of the construction to be paid wholly by means of or with the proceeds of revenue bonds or of a grant or loan to aid in financing the construction from the United States or any instrumentality or agency of the United States and other funds provided for the construction. Before constructing a project, the department shall estimate the cost of the project, the cost of operation and maintenance, and the revenue to be derived from the operation of the project. A project may not be constructed unless, according to the estimates, the revenue to be derived will be sufficient to pay the cost of operation and maintenance and the principal and interest of loans or revenue bonds issued for the cost of the project. In connection with the issuance of revenue bonds, the failure of the department to make the estimates required by this section or to make them in proper form does not affect the validity or enforceability of the bonds or of the trust indenture, resolution, or other security for the bonds.

(2) If the bid of the lowest responsible bidder on any capital improvement associated with public works exceeds the department estimates of the cost of the improvements by more than 5%, the department shall obtain approval from the water users' association, whenever

an association is involved, before the bid is accepted. Capital improvements of an emergency nature necessary to protect life or property or to supply immediate needs for water do not require approval of the water users' association.

(3) A purpose of this chapter is to meet, so far as possible, a statewide need for the conservation and use of water through the construction and operation of projects. The projects to be constructed must qualify as parts of the statewide program and must be approved by the department upon the showing of prospective ability to meet, through the sale of water or other services, the cost of operation and maintenance and the principal and interest of loans and revenue bonds issued to finance the construction. The failure to determine the prospective ability of a project does not affect the validity or enforceability of the bonds or of the trust indenture, resolution, or other security for the bonds.

85-1-207. Determination of costs of works. The department, in determining how the cost of works must be met, shall consider the value of public benefits and the repayment capacity of the water users. A state grant may be provided by the department to compensate for the value of public benefits, to minimize the liabilities of the state of Montana, and to pay the difference between the water users' repayment capacity and the cost of works.

85-1-208. Construction across streams, highways, or other obstacles. (1) The department may construct irrigation works across any stream of water, watercourse, streets, avenues, highways, railways, canals, ditches, or flumes in such manner as to afford security to life and property. The department shall restore the same, when so crossed or intersected, to its former state, as near as may be, so as not to destroy its usefulness. A company whose railroads are intersected or crossed by the works shall unite with the department in forming the intersection and crossing. If the railroad company and the department or the owners and controllers of the property, thing, or franchise so to be crossed cannot agree upon the amount to be paid therefor or the points or the manner of the crossing or intersections, the amount shall be ascertained and determined in all respects as herein provided in respect to taking of land for public use.

(2) This section does not require the payment to the state or any subdivision thereof of a sum for the right to cross a public highway with the works. A right-of-way is hereby given, dedicated, and set apart to locate, construct, and maintain the works over and through the lands which are the property of this state.

History: **En. Sec. 1, Ch. 69, L. 1937; amd. Sec. 125, Ch. 253, L. 1974; R.C.M. 1947, 89-106.**

85-1-209. Acquisition of property by department. (1) The department may acquire by purchase or exchange, upon terms and conditions and in a manner it considers proper, and may acquire by condemnation, in accordance with Title 70, chapter 30, any land, rights, water rights, easements, franchises, and other property considered necessary for the construction, operation, and maintenance of works. Title to property purchased or condemned must be taken in the name of the department. The department is under no obligation to accept and pay for any property condemned under this chapter except from the funds provided by this chapter. In any proceedings to condemn, orders may be made by the court that has jurisdiction of the suit, action, or proceeding that may be warranted by law and the facts.

(2) In a condemnation proceeding brought under Title 70, chapter 30, for the purpose of carrying out this chapter, all persons interested in the title of or holding liens upon the property sought to be taken, as disclosed by the public records, must be made parties and the court in the action shall partition and distribute the damages awarded, if any, among those persons. If there is controversy between the condemnees, the court may direct the amount of the damage awarded to be paid into court to be allocated in further appropriate proceedings either at law or in equity.

(3) Taking possession of the property sought to be condemned may not be delayed by reason of any dispute between the rival claimants or the failure to join any of them as a party to the condemnation proceedings.

(4) If water rights are acquired or exercised by the department in connection with two or more works or projects, the department by order shall apportion or allocate to each of the works or projects the part of the water rights that the department determines is necessary. Upon the adoption of the order, the water rights are considered a part of each of the works or projects to the extent that the water rights have been apportioned or allocated to the works or projects.

85-1-210. Disposal of property by department. In addition to the powers conferred upon the department to sell, lease, or otherwise dispose of water for the purpose of irrigation, development of power, watering of stock, or other purposes, the department may sell, lease, or otherwise dispose of water from its waterworks systems for public, domestic, industrial, and other uses and for fire protection. The department may sell or otherwise dispose of a water project, after the discharge of all of the bonds issued to finance the construction or acquisition of the project, if any, and of all interest on the bonds, costs, and expenses incurred in connection with any action or proceeding by or on behalf of the holders of the bonds. Except for a water project for which no water purchase contracts are managed by the department and for which no money is collected by the department, the department shall make a determination of the market value of a water project prior to its sale or other disposition. The department's determination of market value must consider all liens, encumbrances, and other limitations on the water project.

History: En. Sec. 6, Ch. 95, L. 1935; re-en. Sec. 349.24, R.C.M. 1935; amd. Sec. 137, Ch. 253, L. 1974; R.C.M. 1947, 89-127; amd. Sec. 1, Ch. 156, L. 1981; amd. Sec. 1, Ch. 305, L. 1987; amd. Sec. 16, Ch. 301, L. 1995; amd. Sec. 421, Ch. 418, L. 1995.

Cross-References

85-1-211. Management of property — water contracts. (1) Subject to this chapter, the department may fix and establish the prices, rates, and charges at which the resources and facilities made available under this chapter may be sold and disposed of and enter into contracts and agreements and do those things that in its judgment are necessary, convenient, or expedient for the accomplishment of the purposes and objects of this chapter, under general rules and upon terms, limitations, and conditions as it prescribes.

(2) The department shall enter into the contracts and fix and establish the prices, rates, and charges to provide at all times funds that are sufficient to pay all costs of operation and maintenance of the works authorized by this chapter, together with necessary repairs to the

works, and that will provide at all times sufficient funds to meet and pay the principal and interest of all bonds or loans as they severally become due and payable.

(3) This chapter does not authorize any change, alteration, or revision of the rates, prices, or charges as established by a contract entered into under this chapter except as provided by the contract.

(4) A contract made by the department for the sale of water, use of water, water storage, or other service or for the sale of property or facilities must provide that, in the event of a failure or default in the payment of money specified in the contract to be paid to the department, the department may, upon notice as is prescribed in the contract, terminate the contract and all obligations under the contract. The act of the department in ceasing on default to furnish or deliver water, use of water, water storage, or other service under the contract does not deprive the department of or limit a remedy provided by the contract or by law for the recovery of money due or that may become due under the contract.

(5) (a) The department may sell, transfer to water users' associations, abandon, lease or rent, or otherwise dispose of any rights-of-way, easements, properties, or interests or otherwise take and receive the income or profit and revenue from property without regard to other laws providing for the disposition of state property. Except for a water project for which no water management contracts are managed by the department and for which no money is collected by the department, prior to the department's sale, transfer, or other disposition, a determination must be made by the department as to the market value of the rights-of-way, easements, properties, or interests to be sold, transferred, abandoned, or otherwise disposed of. The department's determination of market value must consider all liens, encumbrances, and other limitations on the project properties or interests. In the disposal of a project, the department shall comply with the provisions of 85-6-109 and shall give purchase preference to existing water users' associations operating and maintaining the project proposed for disposal.

(b) Subject to the provisions of subsection (5)(a), the department shall attempt to dispose of the Willow Creek Dam project by June 30, 2015.

(6) An employee or agent of the department authorized by the director may enter upon any land to carry out the purposes of this section, including but not limited to entry to make an inspection of the project that the department considers necessary, entry to salvage or remove project property, and entry to make physical alterations to project property. The department shall give reasonable notice to the landowner of its intention to enter upon the land. The department is responsible for actual damages done to property.

85-1-213. Institution of court actions by department. The department may institute in any court any actions, suits, and special proceedings necessary to enable it to acquire, own, and hold title to lands for dam sites, reservoir sites, water rights, rights-of-way for diversion and distributing canals, and lateral ditches and other means of distribution of water and may also in any court institute, maintain, and prosecute to final determination actions, suits, and special proceedings necessary to have the water rights adjudicated upon any stream or source of water supply from which is derived the water for the reservoir, diversion and distributing canals, lateral ditches, and other means of distribution of the water. The department may join owners of waters appropriated by a person, association, or corporation from the streams of the state so that adjudication may be had of all surplus water upon all the streams and sources of water supply of a project constructed by the department. All costs and expenses of the actions, suits, or special proceedings shall be paid by the department out of funds provided under this chapter.

History: En. Sec. 14, Ch. 35, Ex. L. 1933; re-en. Sec. 349.15, R.C.M. 1935; amd. Sec. 43, Ch. 177, L. 1965; amd. Sec. 132, Ch. 253, L. 1974; R.C.M. 1947, 89-118(2).

85-1-215. Department duties — records and operations. The department shall keep accounting records of each project and by July 1 of each year prepare a financial statement showing the financial status of each project. All books and papers pertaining to matters provided for in this chapter shall at all reasonable times be open to the inspection of an interested party or citizen of the state. Except as otherwise provided in this chapter, the department has full charge and control of the construction, operation, and maintenance of the works and the collection of all rates, charges, and revenue from them. The department shall proceed immediately with the construction of the works as soon as funds are made available and shall complete the works as rapidly as possible.

85-1-219. State-owned works — department approval — bids — procurement of goods and services. (1) For all state-owned works constructed, repaired, altered, improved, maintained, rehabilitated, or reconstructed, the department shall:

(a) review and approve all plans and working drawings prepared by engineers or architects, if any;

(b) approve all bond issues or other financial arrangements and supervise and approve the expenditure of all money;

(c) solicit, accept, and reject bids and award all contracts to the lowest qualified bidder, considering conformity with specifications and terms and reasonableness of bid amount;

(d) review and approve all change orders;

(e) accept the works when completed according to approved plans and specifications.

(2) Except as provided in subsection (3), the department shall solicit sealed, competitive bids before awarding a contract under subsection (1) and may award a contract only after receipt of at least one bid, if reasonably available.

(3) The department may negotiate a contract, without competitive bidding, with a contractor qualified to do business in Montana if:

(a) the department rejects all bids for the work;

(b) an emergency threatening life or property exists;

(c) an exigency exists; or

(d) the cost of goods, nonconstruction services, or professional services is $15,000 or less.

(4) (a) The provisions of Title 18, chapter 2, parts 2 through 4, apply to contracts awarded for construction under this section.

(b) The requirements of Title 18, chapter 4, do not apply to contracts for which the cost of goods or nonconstruction services is $15,000 or less.

(c) (i) Except as provided in subsection (4)(c)(ii), the department may contract for professional services by direct negotiation when the cost of professional services covered by the contract does not exceed $15,000.

(ii) The department may contract for architectural, engineering, and land surveying services by direct negotiation when the cost of the services covered by the contract does not exceed the limits provided in Title 18, chapter 8, part 2.

(iii) The department may not separate service contracts or split or break projects for the purpose of circumventing the provisions of Title 18, chapter 8, part 2.

Sale of power and allocation of revenue, 85-1-510.

85-1-221. Contracts with the United States. The department may enter into contracts and leases with the United States, its instrumentalities or agencies, for the purpose of financing the construction of any works authorized by this chapter and may in those contracts or leases authorize the United States, its instrumentalities, or agencies to supervise and approve the construction, maintenance, and operation of the works or any project or portion thereof, until such times as any money expended, advanced, or loaned by said United States, its instrumentalities, or agencies and agreed to be repaid thereto by the department is fully repaid. It is a purpose and intent of this chapter that the department may accept cooperation from the United States, its instrumentalities, and agencies in the construction, maintenance, and operation and in financing the construction of any works authorized by this chapter, and the department may do all things necessary in order to avail itself of that aid, assistance, and cooperation under federal legislation now or hereafter enacted by congress.

History: En. Sec. 13, Ch. 35, Ex. L. 1933; re-en. Sec. 349.14, R.C.M. 1935; amd. Sec. 131, Ch. 253, L. 1974; R.C.M. 1947, 89-117.

85-1-222. Conformity to federal regulations authorized. For the purpose of obtaining financial aid from the United States of America, the department may adjust the plans and operation of a project, created under this chapter, to conform to the laws and regulations of the federal government and the supervision of any agency constituted under that authority and may exercise those powers whenever conferred.

History: En. Sec. 20, Ch. 35, Ex. L. 1933; amd. Sec. 135, Ch. 253, L. 1974; R.C.M. 1947, 89-124.

Cross-References

85-1-223. Negotiations with other states by the department. The department may negotiate with the duly constituted authorities or agencies of other states and of the United States in the preparation of interstate compacts or agreements governing the use, distribution, and allocation of the water of any stream or streams flowing from Montana into such other states or flowing from such other states into Montana. It shall cooperate with other states and with the United States in making the necessary studies and obtaining the data necessary to the preparation of the compacts. This authority and the duties hereby imposed are limited to the preparation and proposal of the compact and the compact or agreement is not binding upon the state of Montana until approved by the legislature of Montana and the legislatures of the other state or states involved in the compact.

85-1-224. Contracts with state agencies and counties. (1) A state agency or the boards of county commissioners having jurisdiction over any lands which may require the use of any water or water rights owned or controlled by the department or the United States or its agencies may enter into:

(a) such contracts as are necessary with the department, the United States, or agencies of the United States or others for the purchase of water or water rights needed for those lands; and

(b) any contracts as necessary or expedient, similar to contracts executed by individuals or others, to secure for the state, state institutions, counties, and state school and county lands the benefits of the water or water rights, which obligations may be similar to those of persons who become stockholders in corporations or who may agree to purchase and pay for water for irrigation purposes.

(2) These contracts may include agreements that the state and counties shall be subject to the same charges and payments as are other water users within the projects; however, none of those charges, payments, or costs shall constitute a lien against the state's interest in the lands.

(3) The obligations provided for in this section to be incurred upon behalf of the counties and the state shall not be in the nature of general obligations by either said counties or the state of Montana but shall constitute liens only upon such water or water rights purchased for the benefit of such lands.

Part Cross-References

Bond issues, Title 17, ch. 5.

85-1-301. Water conservation revenue bonds. (1) The department may provide, by resolution, at one time or from time to time, for the issuance of water conservation revenue bonds of the state for the purpose of paying the cost, of any one or more public works. The principal and interest of the bonds are payable solely from the special fund provided for payment. The bonds must mature at the time or times, not more than 40 years from their date or dates, that may be fixed by the resolution but may be made redeemable before maturity at the option of the state, to be exercised by the department, at the price or prices and under the terms and conditions that may be fixed by the department prior to the issuance of the bonds. The department shall determine the rate of interest the bonds shall bear, the time or times of payment of interest, the form of the bonds and the interest coupons to be attached to the bonds, and the manner of executing the bonds and coupons and shall fix the denomination or denominations of the bonds and the place or places of payment of principal and interest, which may be at any bank or trust company within or outside of the state.

(2) Provisions may be made for the registration of any of the bonds in the name of the owner as to principal alone or as to both principal and interest. The bonds authorized under the provisions of this section and 85-1-303 may be issued and sold from time to time and in amounts that may be determined by the department, and the department may sell the bonds in a manner and for a price as it may determine to be for the best interests of the state. The proceeds of the bonds must be used solely for the payment of the cost of the works and must be checked out in the manner and under the restrictions, if any, that the department may provide.

(3) Each resolution providing for the issuance of bonds must set forth the project or projects for which the bonds are to be issued, and the bonds authorized by each resolution constitute a separate series. The bonds of each series must be identified by a series letter or letters and may be sold and delivered at one time or from time to time.

History: **En. Sec. 6, Ch. 35, Ex. L. 1933; re-en. Sec. 349.6, R.C.M. 1935; amd. Sec. 11-156, Ch. 264, L. 1963; R.C.M. 1947, 89-109(1), (3), (5); amd. Sec. 45, Ch. 505, L. 1981; amd. Sec. 423, Ch. 418, L. 1995.**

85-1-302. Limitations on state liability. All bonds issued under 85-1-301 and 85-1-303 shall contain a statement on their face that the state shall not be obligated to pay the same or the interest thereon except from the special fund hereinafter set forth. In case any of the officers whose signatures appear on the bonds or coupons shall cease to be such officers before the delivery of such bonds, such signatures shall nevertheless be valid and sufficient for all purposes, the same as if they had remained in office until such delivery. All such bonds shall be fully negotiable, as provided by the Uniform Commercial Code—Investment Securities. Such bonds shall not constitute or be a debt, liability, or obligation of the state and shall be secured only by the revenues of such works and the funds received from the sale or disposal of water and from the operation, lease, sale, or other disposition of the works, property, and facilities to be acquired out of the proceeds of such bonds.

History: En. Sec. 6, Ch. 35, Ex. L. 1933; re-en. Sec. 349.6, R.C.M. 1935; amd. Sec. 11-156, Ch. 264, L. 1963; R.C.M. 1947, 89-109(2).

Cross-References

85-1-303. Procedure in case of insufficient bond proceeds. If the proceeds of the bonds, by error of calculation or otherwise, are less than the cost of the works, additional bonds may in like manner be issued to provide the amount of the deficit and, unless otherwise provided in the trust indenture or in the resolution authorizing the bonds, are considered to be of the same issue and are entitled to payment from the same fund, without preference or priority of the bonds first issued for the same works. If the proceeds of bonds issued for the works exceed the cost of the works, the surplus must be paid into the fund provided for the payment of principal and interest of the bonds. Prior to the preparation of definitive bonds, the department may, under like restrictions, issue temporary bonds with or without coupons, exchangeable for definitive bonds when the bonds have been executed and are available for delivery. The bonds may be issued without any other proceedings or the happening of any other conditions or things than those proceedings, conditions, and things that are specified and required by this chapter or by the constitution of the state.

History: En. Sec. 6, Ch. 35, Ex. L. 1933; re-en. Sec. 349.6, R.C.M. 1935; amd. Sec. 11-156, Ch. 264, L. 1963; R.C.M. 1947, 89-109(4); amd. Sec. 424, Ch. 418, L. 1995.

85-1-304. Lien upon bond proceeds. All moneys received from any bonds issued pursuant to 85-1-301 and 85-1-303 shall be applied solely to the payment of the cost of the works or to the appurtenant debt service fund and to the "administration fund", as hereinafter provided, and there shall be and hereby is created and granted a lien upon such moneys, until so applied, in favor of the holders of the bonds or the trustee hereinafter provided for in respect of such bonds.

History: En. Sec. 7, Ch. 35, Ex. L. 1933; R.C.M. 1947, 89-110; amd. Sec. 30, Ch. 298, L. 1983.

Cross-References

Fund structure, 17-2-102.
Liens, Title 71, ch. 3.

85-1-305. Use of trust indenture to secure bonds. In the discretion of the department, a series of the bonds may be secured by a trust indenture by and between the department and a corporate trustee, which may be any trust company or bank having the powers of a trust company within or outside of the state. Each trust indenture or an executed counterpart must be filed in the office of the secretary of state. The filing of a trust indenture or an executed counterpart in the office of the county clerk of the county in which the property covered by the trust indenture is located is constructive notice of its contents to all persons from the time of the filing, and the recording of the trust indenture or its contents is not necessary.

History: En. Sec. 8, Ch. 35, Ex. L. 1933; amd. Sec. 3, Ch. 95, L. 1935; re-en. Sec. 349.8, R.C.M. 1935; amd. Sec. 126, Ch. 253, L. 1974; R.C.M. 1947, 89-111(1); amd. Sec. 425, Ch. 418, L. 1995.

Trust indentures — applicable laws, 71-1-112.

85-1-306. Provisions for protecting bondholders. Either the resolution providing for the issuance of bonds or the trust indenture may contain provisions for protecting and enforcing the rights and remedies of the bondholders as are reasonable, proper, and not in violation of law, including covenants setting forth the duties of the state and the department in relation to the acquisition, construction, improvement, maintenance, operation, repair, and insurance of the works and the custody, safeguarding, and application of all money. It may provide that the works must be acquired, constructed, or partly acquired and partly constructed and paid for under the supervision and approval of consulting engineers employed or designated by the department and satisfactory to the original purchasers of the bonds issued for the works, or to their successors, assigns, or nominees, who may be given the right to require that security given by contractors and by any depositary of the proceeds of the bonds or receipts and revenue of the works or other money pertaining to the works must be satisfactory to the purchasers, successors, assigns, or nominees. The resolution or indenture may set forth the rights and remedies of the bondholders and trustee, restricting the individual rights of action of bondholders as is customary in trust indentures, deeds of trusts, and mortgages securing bonds or debentures of corporations. The enumeration of particular powers granted by this section may not be construed to impair any general grant of power contained in this chapter. All expenses incurred in carrying out the trust indenture may be treated as a part of the cost of maintenance, operation, and repairs of the works affected by the indenture.

History: **En. Sec. 8, Ch. 35, Ex. L. 1933; amd. Sec. 3, Ch. 95, L. 1935; re-en. Sec. 349.8, R.C.M. 1935; amd. Sec. 126, Ch. 253, L. 1974; R.C.M. 1947, 89-111(2); amd. Sec. 426, Ch. 418, L. 1995.**

85-1-307. Provisions to secure payment of bonds. In connection with the issuance of the bonds for the purpose of paying in whole (or as supplemented by a grant from the United States or any instrumentality or agency of the United States) the cost of the works or project or in order to secure the payment of the bonds, the department may:

(1) pledge all or any part of the income, profit, and revenue of the works or project and all money received from the sale or disposal of water, use of water, water storage, or other service and from the operation, lease, sale, or other disposition of all or any part of the works or project and covenant to pay the income, profit, and revenue into the appropriate water fund and debt service fund;

(2) covenant against pledging all or any part of the income, profit, and revenue of the works or project and all money received from the sale or disposal of water, use of water, water storage, or other service and from the operation, lease, sale, or other disposition of all or any part of the works or project;

(3) covenant against mortgaging all or any part of the works or project or against permitting or suffering any lien on the works or project;

(4) covenant to fix and establish prices, rates, and charges for water and other services made available in connection with the works or project to provide at all times funds that will be sufficient to:

(a) pay all costs of operation and maintenance of the works or project, together with necessary repairs to the works or project;

(b) meet and pay the principal and interest of all the bonds as they severally become due and payable; and

(c) create reserves for the principal and interest of all the bonds and for the meeting of contingencies in the operation and maintenance of the works or project as the department determines;

(5) make further covenants as to the prices, rates, and charges as the department determines;

(6) create special funds, in addition to those required by this chapter, for money reserved for principal and interest on bonds or for the meeting of contingencies in the operation and maintenance of the works or project and determine the manner in which and the depositary or depositaries in which those funds must be deposited and the manner in which they must be secured. It is lawful for any bank or trust company incorporated under the laws of the state to act as that depositary and to furnish indemnifying bonds or to pledge securities as required by the department;

(7) provide for the replacement of lost, destroyed, or mutilated bonds;

(8) covenant against extending the time for the payment of the principal or interest on any of the bonds, directly or indirectly, by any means or in any manner;

(9) prescribe and covenant as to the events of default and terms and conditions upon which any or all of the bonds become or may be declared due before maturity and as to the terms and conditions upon which the declaration and its consequences may be waived;

(10) covenant as to the rights, liabilities, powers, and duties arising upon the breach by it of any covenant, condition, or obligation;

(11) vest in a trustee or trustees the right to enforce any covenant made to secure or to pay the bonds or to foreclose any trust indenture in relation to the bonds, provide for the powers and duties of the trustee or trustees, limit the liabilities of trustees, and provide the terms and conditions upon which the trustee or trustees or the holders of bonds or any proportion of them may enforce the covenant or exercise the right of foreclosure;

(12) make covenants and do any and all acts and things as may be necessary or convenient or desirable in order to secure the bonds or, in the absolute discretion of the department, to make the bonds more marketable, notwithstanding that the covenants, acts, or things may not be enumerated or expressly authorized in this chapter;

(13) do all things in the issuance of the bonds and provide for their security not inconsistent with the constitution of Montana.

History: En. Sec. 8, Ch. 35, Ex. L. 1933; amd. Sec. 3, Ch. 95, L. 1935; re-en. Sec. 349.8, R.C.M. 1935; amd. Sec. 126, Ch. 253, L. 1974; R.C.M. 1947, 89-111(3); amd. Sec. 31, Ch. 298, L. 1983; amd. Sec. 427, Ch. 418, L. 1995.

85-1-308. Provisions for conveyance in trust or mortgage. In the discretion of the department, any trust indenture executed by it as security for a series of bonds may contain provisions for conveying in trust or mortgaging the works, the project, or any part of the works or project, including all water rights that are a part of the works or project, constructed with the proceeds of the bonds or with the proceeds as supplemented by the proceeds of a grant to aid in financing the construction from the United States or any instrumentality or agency of the United States. The trust indenture may be in a form and with rights, remedies, and provisions as is customary in trust indentures, deeds of trust, and mortgages securing bonds or debentures of corporations. Any purchaser at any sale of any works or project pursuant to a judgment or decree in an action to foreclose a trust indenture conveying in trust or mortgaging any works or project shall obtain title to the works or project free from any trust or other obligation of the department, the state of Montana, or the public as to its operation, maintenance, use, or disposition except the obligation to use all water impounded in the works or project for sale, rental, distribution, or other beneficial use.

History: En. Sec. 4, Ch. 95, L. 1935; re-en. Sec. 349.9, R.C.M. 1935; R.C.M. 1947, 89-112; amd. Sec. 428, Ch. 418, L. 1995.

85-1-309. Actions by trustee and bondholders. (1) Any holder of any bonds issued under 85-1-301 or 85-1-303 or any of the coupons attached to the bonds and the trustee, if any, except to the extent the rights may be restricted by resolution passed before the issuance of the bonds or by the trust indenture, may:

(a) either at law or in equity, by suit, action, mandamus, or other proceeding, including proceedings for the appointment of a receiver, protect and enforce any and all rights granted under this chapter or under the resolution or trust indenture; and

(b) enforce and compel performance of all duties required by this chapter or by the resolution or trust indenture to be performed by the department.

(2) While any bonds issued by the department remain outstanding, the powers, duties, or existence of the department or any official or agency of the state may not be diminished or impaired in any manner that will affect adversely the interests and rights of the holders of the bonds.

History: **En. Sec. 15, Ch. 35, Ex. L. 1933; re-en. Sec. 349.16, R.C.M. 1935; amd. Sec. 133, Ch. 253, L. 1974; R.C.M. 1947, 89-119; amd. Sec. 429, Ch. 418, L. 1995.**

Compiler's Comments

Effective Date: Section 46, Ch. 775, L. 2025, provided: "[This act] is effective on passage and approval." Approved June 19, 2025.

85-1-321. Funds in general. The department shall create a fund to be known as the "administration fund" and shall also create three separate funds in respect of the bonds of each series, one fund to be known as the "construction fund, series....", another fund to be known as the "water fund, series....", and another fund to be known as the "debt service fund, series....", each fund to be identified by the same series letter or letters as the bonds of the series. The money in each fund must be deposited in a depository or depositories and secured in the manner determined by the department. It is lawful for any bank or trust company incorporated under the laws of this state to act as the depository and to furnish indemnifying bonds or to pledge securities as may be required by the department. A separate account must be kept in each construction fund and in each water fund for each project. All expenditures not properly chargeable to the construction fund account or to the water fund account of any one project must be charged by the department in proportions as it shall determine to the construction fund accounts or to the water fund accounts, as the case may be, of the projects in respect of which the expenditures were incurred.

History: **En. Sec. 9, Ch. 35, Ex. L. 1933; re-en. Sec. 349.10, R.C.M. 1935; amd. Sec. 127, Ch. 253, L. 1974; R.C.M. 1947, 89-113; amd. Sec. 32, Ch. 298, L. 1983; amd. Sec. 431, Ch. 418, L. 1995.**

Cross-References

Banks and trust companies, Title 32, ch. 1.

85-1-322. Construction capital projects funds. The proceeds of the bonds of each series issued under 85-1-301 and 85-1-303 shall be placed to the credit of the appropriate construction capital projects fund, which fund shall at all times be kept segregated and set apart from all other funds. There shall also be credited to the appropriate construction capital projects fund all accrued interest upon the bonds and the interest received upon the deposits of moneys in the fund and moneys received by way of grant from the United States or from any other source for the construction of the works. The moneys in each construction capital projects fund shall be paid out or disbursed in such manner as may be determined by the department, subject to this chapter, to pay the cost of the works. Any surplus which may remain in any construction capital projects fund after providing for the payment of the cost of the works shall be added to and become a part of the appropriate debt service fund hereinafter provided for.

History: En. Sec. 10, Ch. 35, Ex. L. 1933; re-en. Sec. 349.11, R.C.M. 1935; amd. Sec. 128, Ch. 253, L. 1974; R.C.M. 1947, 89-114; amd. Sec. 33, Ch. 298, L. 1983.

Federal assistance management, Title 17, ch. 3, part 1.
Bond issues, Title 17, ch. 5.

85-1-323. Debt service funds. (1) The department shall provide, in the proceedings authorizing the issuance of each series of bonds or in the trust indenture securing the bonds, for the paying into the appropriate debt service fund at stated intervals all money then remaining in the water fund after paying all costs of operation, maintenance, and repairs of the works. All money in each debt service fund must be pledged for the payment of and used only for the purpose of paying:

(a) the interest upon the bonds as interest is due;
(b) the necessary fiscal agency charges for paying bonds and interest;
(c) the principal of the bonds as due; and
(d) any premiums upon bonds retired by call or purchase as provided in this chapter.

(2) (a) Prior to the issuance of the bonds of each series:

(i) the department may provide by resolution or by trust indenture for using the debt service fund or any part of the fund in the purchase of any of the outstanding bonds payable from the fund at the market price of the bonds but not exceeding the price, if any, at which the bonds, at the next interest date, are payable or redeemable;

(ii) all bonds redeemed or purchased must be canceled, and bonds may not be issued in place of the canceled bonds.

(b) The money in each debt service fund, less the reserve that may be provided for in the resolution authorizing the bonds or in the trust indenture for the payment of interest and principal, if not used within a reasonable time for the purchase of bonds for cancellation as provided in this section, must be applied to the redemption of bonds then subject to redemption at the redemption price then applicable.

History: En. Sec. 12, Ch. 35, Ex. L. 1933; re-en. Sec. 349.13, R.C.M. 1935; R.C.M. 1947, 89-116; amd. Sec. 34, Ch. 298, L. 1983; amd. Sec. 432, Ch. 418, L. 1995.

85-1-332. Disposition of money collected. (1) For the purpose of carrying out the provisions of this chapter and other water resource authority, powers, and duties that are conferred upon the department by law, the following money must be deposited in the water storage state special revenue account created by 85-1-631:

(a) all gifts, donations, bequests, and devises made to the state for purposes of this chapter and proceeds of the sale of the gifts, donations, bequests, and devises; and the proceeds of the sale or redemption of and the interest earned by the securities purchased or acquired with money received under this subsection;

(b) all reimbursements for money advanced for the payment of the assessments upon state, school-granted, and other public lands for the improvement of the lands as provided by law;

(c) all reimbursements for money advanced for the investigation and survey of reclamation, electrification, and rehabilitation systems or projects proposed to be financed in whole or in part by the reclamation of lands and diking, drainage, and diking and drainage dams for conservation of water to be used in reclamation of land or stock reservoirs or for the construction, maintenance, and operation of plants or projects for the manufacture or distribution of electric current;

(d) all reimbursements for costs of surveys and investigations for money advanced to counties, cities, or towns or their proportion of the cost of the surveys and investigations or from any other sources;

(e) except as otherwise provided by law, all income or profit and revenue of the works and all money received from the sale or disposal of water, use of water, water storage, or other service and from the operation, lease, sale, or other disposition of the works, property, and facilities acquired under this chapter; and

(f) except as otherwise provided by law, all sums received by the department for the use of electricity in excess of the maintenance and operation of the electrification system or project.

(2) All sums of money donated or contributed by the federal government or any department or agency of the federal government must be deposited in a federal special revenue account.

Part 5
Power Generation at Projects

Part Cross-References

Hydroelectric resources, Title 77, ch. 4, part 2.

85-1-501. Survey of power generation capacity. The department shall study the economic and environmental feasibility of constructing and operating a small-scale hydroelectric power generating facility on each of the water projects under its control and shall periodically update those studies as the cost of the electrical energy increases. In determining whether small-scale hydroelectric generation may be economically feasible on a particular project, the department shall consider:

(1) the estimated cost of construction of a facility;

(2) the estimated cost of maintaining, repairing, and operating the facility;

(3) the estimated cost of tying into an existing power distribution channel;

(4) the ability of public utilities or rural electric cooperatives to lease and operate such a facility;

(5) the debt burden to be serviced;

(6) the revenue expected to be derived;

(7) the likelihood of a reasonable rate of return on the investment; and

(8) the potential impacts on water supply and streamflows.

History: En. Sec. 1, Ch. 503, L. 1981; amd. Sec. 1, Ch. 275, L. 2011; amd. Sec. 114, Ch. 261, L. 2021; amd. Sec. 11, Ch. 460, L. 2025; amd. Sec. 12, Ch. 625, L. 2025.

Compiler's Comments

2025 Amendments — Composite Section: See 2025 Session Law for amendment made by sec. 11, Ch. 460, L. 2025. Amendment effective October 1, 2025.

See 2025 Session Law for amendment made by sec. 12, Ch. 625, L. 2025. Amendment effective May 13, 2025. The amendment by Ch. 460 rendered the amendment by Ch. 625 void.

85-1-502. Notice of availability of lease sites. (1) If after completion of the feasibility study of a particular project the department determines that hydroelectric power generation at the project would be feasible and in the best interest of the people of the state of Montana, it shall publish notice and make the site available for lease for the purpose of small-scale hydroelectric power generation, pursuant to 85-1-502 through 85-1-508, unless that action would result in the forfeiture of any necessary federal license, permit, or exemption, in which case the department may proceed under 85-1-509.

(2) In issuing a notice of availability of a site for lease under this section, the department shall include in the notice any reasonable conditions it may find necessary in order to protect the interests of the state.

History: En. Sec. 2, Ch. 503, L. 1981; amd. Sec. 1, Ch. 96, L. 1983; amd. Sec. 433, Ch. 418, L. 1995.

Cross-References

Printing and legal notices, Title 18, ch. 7.

85-1-503. Receipt of applications. (1) Applications for lease may be submitted by any person qualified to do business in Montana.

(2) The department shall consider only applications received within 180 days after the final publication of the notice.

(3) Applications must include a statement of the capability of the applicant to achieve the annual production output estimated by the department, the estimated time to make the project operational, the bid amount of the royalty, and any other information that the department requests.

History: En. Sec. 3, Ch. 503, L. 1981; amd. Sec. 1, Ch. 293, L. 1985; amd. Sec. 434, Ch. 418, L. 1995.

85-1-504. Determinations by department. (1) Within a reasonable time following the conclusion of the lease application period, the department shall hold a hearing to examine all applications that have been received for the lease of the project.

(2) Within 180 days following the conclusion of the lease application period, the department shall reject any or all applications or shall award a lease to the party whose offer, considered in its totality, is the most advantageous to the state.

(3) The decision must include a determination that the potential developer will provide an adequate royalty payment, is capable of carrying out the proposed development, can provide efficient and reliable service, and intends in good faith without unnecessary delay to proceed with the development.

(4) If all lease applications are rejected, the department may negotiate with all applicants on an equal basis in an effort to arrive at an acceptable application.

History: **En. Sec. 4, Ch. 503, L. 1981; amd. Sec. 435, Ch. 418, L. 1995.**

85-1-505. Lease conditions. (1) The lessee shall pay a royalty to the state as required in the lease.

(2) The department may authorize provisions in the lease that offer economic incentives for rapid development of the project or impose economic penalties for delays in development, which may include cancellation of the lease.

History: **En. Sec. 5, Ch. 503, L. 1981; amd. Sec. 436, Ch. 418, L. 1995.**

85-1-506. Compliance with federal law. The department may hold a license, permit, or exemption under federal law on a project.

History: **En. Sec. 6, Ch. 503, L. 1981; amd. Sec. 2, Ch. 293, L. 1985.**

85-1-507. Duration of lease. The term of the lease may not exceed the term of the license, permit, or exemption held by the department under 85-1-506 and may in no event exceed 55 years.

History: **En. Sec. 7, Ch. 503, L. 1981.**

85-1-508. Duties of the department. The department has primary responsibility for supervision of any lease.

History: **En. Sec. 8, Ch. 503, L. 1981; amd. Sec. 437, Ch. 418, L. 1995.**

85-1-509. Power generation by department authorized. (1) If lease applications are not received under 85-1-503 or if the department rejects all lease applications under 85-1-504, the department may proceed to obtain any necessary license, permit, or exemption under federal law and commence construction and operation of a small-scale hydroelectric generation facility pursuant to the provisions of this chapter. Construction may not commence until the department has clear and convincing evidence that construction is economically feasible and is the most practical means by which the facility could be developed.

(2) Financing of construction and operation of the facility must be accomplished in a manner determined by the department to be most feasible.

History: **En. Sec. 9, Ch. 503, L. 1981; amd. Sec. 438, Ch. 418, L. 1995; amd. Sec. 1, Ch. 209, L. 1999.**

Cross-References

Rural cooperative utilities, Title 35, ch. 18.
Public Utilities and Carriers, Title 69.

85-1-510. Sale of power and allocation of revenue. (1) If the operator of a small-scale hydroelectric generation facility under this chapter and a public utility or an electric cooperative are unable to mutually agree to a contract for the sale of electricity or a price for the electricity purchased by the utility or electric cooperative, the public service commission shall require the utility or electric cooperative to purchase the power under rates and terms established as provided in 85-1-511 through 85-1-513.

(2) The revenue derived from hydroelectric power generation under this part must be deposited in the state water project hydroelectric power generation special revenue account created under 85-1-220. The funds in the account must be used to repair and rehabilitate state-owned water projects and works and to pay the cost of financing those activities.

History: **En. Sec. 10, Ch. 503, L. 1981; amd. Sec. 3, Ch. 370, L. 1991.**

Cross-References

Rural cooperative utilities, Title 35, ch. 18.
Public Utilities and Carriers, Title 69.

85-1-511. Determination by the public service commission. A determination of the rates and terms under which the power must be purchased shall be made by the public service commission upon petition of the facility operator or a public utility or electric cooperative or during a rate proceeding involving the review of rates paid for electricity purchased from the facility. The commission shall render a decision within 120 days from receipt of the petition or before the completion of the rate review proceeding. The rate and terms of the determination must be according to the standards specified in 85-1-512.

History: En. Sec. 11, Ch. 503, L. 1981.

Cross-References

Public Service Commission, Title 69, ch. 1, part 1.

85-1-512. Standards for the determination. (1) The standards for the determination provided for in 85-1-511 by the public service commission shall include the following:

(a) Long-term contracts for the purchase of electricity by the utility or electric cooperative from a small-scale hydroelectric facility under this chapter shall be encouraged in order to enhance the economic feasibility of such facilities.

(b) The rates paid by a utility or electric cooperative to a small-scale hydroelectric facility may not exceed, over the term of the purchase contract, the incremental cost to the utility or electric cooperative of the electricity that, but for the purchase from the small-scale hydroelectric facility, the utility or electric cooperative would generate or purchase from another source.

(c) The rates to be paid by a utility or an electric cooperative for power purchased from a small-scale hydroelectric facility shall be established with consideration of the availability and reliability of the power produced.

(2) The commission may set these rates by use of any of the following methods:

(a) the levelized avoided cost over the term of the contract;

(b) the cost of production for the small-scale hydroelectric facility plus a just and reasonable return; or

(c) any other method that will promote the development of small-scale hydroelectric facilities.

History: En. Sec. 12, Ch. 503, L. 1981.

Cross-References

Public Service Commission, Title 69, ch. 1, part 1.

85-1-513. Purchase of power by electric cooperative not agreeing to be bound by public service commission determination. If any electric cooperative wishing to purchase power from a small-scale hydroelectric facility under this chapter refuses to submit to the ratemaking authority of the public service commission established in 85-1-511, then the rate for such cooperative may be determined by the federal energy regulatory commission upon proper petition. The facility shall sell power in accordance with such determination, so long as the rates and terms so established will allow the facility a reasonable return.

History: En. Sec. 13, Ch. 503, L. 1981.

Cross-References

Rural cooperative utilities, Title 35, ch. 18.

85-1-514. Power generation negotiation process. (1) A person with federal authorization or, if authorization is not required, a person planning to construct a small-scale hydroelectric generation facility at a state-owned project shall submit an application to the department for hydroelectric development at the state-owned project site.

(2) Upon receipt of a written application under subsection (1), the department shall make an investigation and prepare a report on the value of the power site, the plans of development submitted by the applicant, and any other matters relating to the proposed development that the department considers necessary for the proper development of hydroelectric generation at the state-owned project.

(3) Upon completion of the report, the department may negotiate with the applicant for the acquisition of the necessary interest in the state-owned project to effectively allow the applicant to operate a hydroelectric facility. The terms, conditions, and compensation agreed to must include but not be limited to the full market value of the interest disposed of by the department. Full market value must be determined by the department in the report completed under subsection (2).

(4) An applicant under subsection (1) shall pay to the department all costs incurred by the department in carrying out its duties under this section. The department and the applicant shall contract for the provision of services and payment of fees required by this section prior to accepting an application under subsection (2).

(5) Nothing in this section requires the department to construct, rehabilitate, reconstruct, operate, or otherwise maintain the state-owned project to accommodate the hydroelectric facility except as negotiated under subsection (3).

History: **En. Sec. 3, Ch. 293, L. 1985; amd. Sec. 439, Ch. 418, L. 1995.**

Bond issues, Title 17, ch. 5.

85-1-601. Purpose and policies. (1) The legislature finds and declares that in order that the people of Montana may enjoy the benefits of the state's water and other renewable resources, the state shall establish this long-term renewable resource grant and loan program providing financial and administrative assistance to private for-profit, private, nonprofit, local government, state government, and tribal government entities for renewable resource grant and loan projects.

(2) The purpose of the renewable resource grant and loan program is to further the state's policies, set forth in 85-1-101, regarding the conservation, development, and beneficial use of water resources and to invest in renewable natural resource projects that will preserve for the citizens of Montana the economic and other benefits of the state's natural heritage.

(3) The legislature recognizes the value of Montana's renewable resources; therefore, it is appropriate that a portion of the taxes and other revenue from nonrenewable resources be invested in the replacement of nonrenewable resources with the development of renewable resource projects that will continue to provide tax and other revenue and will preserve for the citizens the economic and other benefits of the state's natural heritage.

(4) The conservation, development, management, and preservation of water and other renewable resources are high priorities because a large portion of Montana's present and future economy is based either directly or indirectly on the wise use of these resources.

(5) Developments supported by this part may not significantly diminish the quality of existing public resources, such as land, air, fish, wildlife, and recreation opportunities.

(6) This renewable resource grant and loan program supports, in part, the implementation and development of the comprehensive, coordinated, multiple-use water resources plan known as the "state water plan". In making funding recommendations for grants and loans, the department shall give preference to projects that will implement state water plan priorities if, in all other respects, the proposed projects are equal in public benefit and technical feasibility.

(7) Source watersheds are an integral component of Montana's water resources. Source watersheds that provide the majority of the state's drinking and irrigated agricultural water are particularly important to maintaining the reliability, quantity, timing, and quality of Montana's environmental, drinking, and agricultural water supply. Because source watersheds have a critical role in enhancing water supply reliability, the maintenance and repair of source watersheds are eligible for the renewable resource grant and loan program.

(8) Soil and range health play a vital role in protecting and sustaining Montana's renewable natural resources by retaining water, soil, and nutrients in place on the landscape. Enhancing soil and range health will provide long-term benefits to Montana's water and other renewable resources and to the users, wildlife, and economies they support.

History: **En. Sec. 1, Ch. 505, L. 1981; amd. Sec. 9, Ch. 478, L. 1993; amd. Sec. 2, Ch. 436, L. 1997; amd. Sec. 1, Ch. 341, L. 2017.**

Cross-References

Protection and improvement of environment — remedies to prevent unreasonable depletion, Art. IX, sec. 1, Mont. Const.

85-1-602. Objectives. (1) The department shall administer a renewable resource grant and loan program to enhance Montana's renewable resources through projects that measurably conserve, develop, manage, or preserve resources. Either grants or loans may be provided to fund the following:

(a) feasibility, design, research, and resource assessment studies;

(b) preparation of construction, rehabilitation, or production plans; and

(c) construction, rehabilitation, production, education, or other implementation efforts.

(2) Projects that may enhance renewable resources in Montana include but are not limited to:

(a) development of natural resource-based recreation;

(b) development of natural, offstream, and tributary storage;

(c) improvement of water use efficiency, including development of new, efficient water systems, rehabilitation of older, less efficient water systems, and acquisition and installation of measuring devices required under 85-2-113; monitoring; and development of state, tribal, and federal water projects;

(d) water-related projects that improve water quality, including livestock containment facility projects, soil and range health projects, and the maintenance and repair of source watersheds;

(e) water-related projects that improve water quantity, including streamflows and water storage in existing natural systems, such as riparian areas, flood plains, and wetlands;

(f) advancement of farming practices that reduce agricultural chemical use; and

(g) projects that facilitate the use of alternative renewable energy sources, as defined in 15-6-225.

(3) The renewable resource grant and loan program is the key implementation portion of the state water plan and must be administered to encourage grant and loan applications for projects designed to accomplish the objectives of the plan.

(4) A grant or loan may not be awarded to a project that affects source watersheds or soil and range health if the project would reduce, restrict, or prohibit any lawful access to the property that existed prior to the project's implementation. This subsection does not apply to access that is temporarily created, granted, or reduced due to project operations.

History: En. Sec. 2, Ch. 505, L. 1981; amd. Sec. 1, Ch. 116, L. 1989; amd. Sec. 4, Ch. 543, L. 1991; amd. Sec. 10, Ch. 478, L. 1993; amd. Sec. 3, Ch. 436, L. 1997; amd. Sec. 1, Ch. 169, L. 2001; amd. Sec. 1, Ch. 117, L. 2005; amd. Sec. 2, Ch. 341, L. 2017.

Cross-References

State water plan, 85-1-203.

85-1-603. Renewable resource loan debt service fund created — coal severance tax allocated — renewable resource loan loss reserve fund created. (1) (a) There is created a renewable resource loan debt service fund within the debt service fund type established in 17-2-102.

(b) The state pledges and allocates and directs to be credited to the renewable resource loan debt service fund, as received:

(i) 0.95% of all money from time to time received from the coal severance tax collected under Title 15, chapter 35;

(ii) any principal and accrued interest under 85-1-613(5)(a) received in repayment of a loan made from the proceeds of bonds issued under 85-1-617;

(iii) all interest income earned on proceeds of renewable resource grant and loan program bonds;

(iv) revenue or money otherwise required to be paid into the natural resources projects state special revenue account pursuant to 15-38-302, as determined by the board of examiners in connection with the issuance of bonds pursuant to 85-1-617; and

(v) money received from the renewable resource loan loss reserve fund as the result of a loan loss.

(2) (a) There is a renewable resource loan loss reserve fund within the debt service fund type established in 17-2-102.

(b) The state pledges and allocates and directs to be credited to the renewable resource loan loss reserve fund all accrued interest under 85-1-613(5)(b) received in repayment of a loan made from the proceeds of bonds issued under 85-1-617.

(c) If the department determines that a loan loss has occurred on a loan made pursuant to this part, funds from the renewable resource loan loss reserve fund must be transferred to the renewable resource loan debt service fund in an amount equal to the amount that would otherwise be available for debt service under subsection (1)(b) as a result of the loan loss.

85-1-604. Repealed. Sec. 30, Ch. 432, L. 2007.

History: En. Sec. 5, Ch. 505, L. 1981; amd. Sec. 2, Ch. 149, L. 1983; amd. Sec. 36, Ch. 298, L. 1983; amd. Sec. 10, Ch. 512, L. 1985; amd. Sec. 2, Ch. 6, Sp. L. March 1986; amd. Sec. 2, Ch. 116, L. 1989; amd. Sec. 3, Ch. 491, L. 1989; amd. Sec. 5, Ch. 543, L. 1991; amd. Sec. 9, Ch. 659, L. 1991; amd. Sec. 12, Ch. 478, L. 1993; amd. Sec. 3, Ch. 577, L. 1995; amd. Sec. 297, Ch. 42, L. 1997; amd. Sec. 5, Ch. 444, L. 1997; amd. Sec. 8, Ch. 144, L. 1999; amd. Sec. 7, Ch. 307, L. 2005.

85-1-605. Grants, loans, and bonds for state, local, or tribal government assistance. (1) The department may recommend to the legislature that grants and loans be made from revenue deposited in the natural resources projects state special revenue account established in 15-38-302, that loans be made from renewable resource bond proceeds deposited in the renewable resource loan proceeds account established in 85-1-617(5), and that coal severance tax bonds be authorized pursuant to Title 17, chapter 5, part 7, to provide financial assistance to a department, agency, board, commission, or other division of state government, to a city, county, or other political subdivision or local government body of the state, including an authority as defined in 75-6-304, or to a tribal government. The legislature may approve by appropriation or other appropriate means those grants and loans that it finds consistent with the policies and purposes of the program.

(2) In addition to legislative approval pursuant to subsection (1), the department may request that the board of examiners issue renewable resource bonds of the state so the department may make loans for projects from renewable resource bond proceeds deposited in the renewable resource loan proceeds account established in 85-1-617(5) to a department, agency, board, commission, or other division of state government, to a municipality, county, or other political subdivision or local government body of the state, including an authority as defined in 75-6-304, an irrigation district, a water and sewer district, or other special districts, or to a tribal government.

(3) Nothing in this part creates or expands the state's or a local government's authority to incur debt, and the legislature may authorize and the department may make loans only to state and local government entities otherwise structured to incur debt.

(4) Loans may not be authorized except to a state, local, or tribal government entity that agrees to secure the authorized loan with its bond.

(5) In addition to implementing those projects approved by the legislature or requested by the department pursuant to subsection (2), the department may request up to 10% of the grant funds available and up to $10 million for loans from the natural resources projects state special revenue account established in 15-38-302 and the renewable resource loan proceeds account in any biennium to be used for emergencies. These emergency grant projects or loan projects, or both, may not be made because of the gross negligence of the state, local, or tribal government applicant, must be approved by the department, and must be defined as those projects otherwise eligible for either grant funding or loan funding or both that, if delayed, will cause substantial damages or legal liability to the project sponsor. In allocating the funds, the department shall inform the legislative fiscal analyst. The department shall provide a copy of the information to the legislature in accordance with 5-11-210.

(6) The grants and loans provided for by this section may be made for projects that enhance renewable resources in the state through conservation, development, management, or preservation, for assessing feasibility or planning, for implementing renewable resource

projects, and for similar purposes approved by the legislature or requested by the department pursuant to subsection (2).

(7) Grant and loan agreements with tribal governments in Montana entered into under this part must contain, in addition to other appropriate terms and conditions, the following conditions:

(a) a requirement that in the event a dispute or claim arises under the agreement, state law will govern as to the interpretation and performance of the agreement and that any judicial proceeding concerning the terms of the agreement will be brought in the district court of the first judicial district of the state of Montana;

(b) an express waiver of the tribal government's immunity from suit on any issue specifically arising from the transaction of a loan or grant; and

(c) an express waiver of any right to exhaust tribal remedies signed by the tribal government.

85-1-606. Grants and loans to private persons. (1) To encourage the construction and development of water-related projects, the department may make grants and loans to private persons from funds appropriated from the natural resources projects state special revenue account established in 15-38-302 and may make loans to private persons from the renewable resource loan proceeds account.

(2) The department shall publicize the statutes and rules governing grants and loans to private persons for water-related projects, set and publicize application deadlines, and accept applications for grants and loans.

(3) The department shall review, evaluate, and select the water-related projects for which grants or loans may be awarded.

History: En. Sec. 7, Ch. 505, L. 1981; amd. Sec. 38, Ch. 298, L. 1983; amd. Sec. 14, Ch. 478, L. 1993; amd. Sec. 17, Ch. 432, L. 2007.

85-1-607. Repealed. Sec. 35, Ch. 478, L. 1993.

History: En. Sec. 8, Ch. 505, L. 1981.

85-1-608. Applications for grants and loans to private persons. (1) A private person may apply for a grant or loan to finance a water-related project to be constructed, developed, and operated in Montana.

(2) An application for a loan or grant must be in the form prescribed by rule and contain or be accompanied by any information necessary to adequately describe the proposed project and necessary for evaluation of the proposed project under the criteria set out in 85-1-609 and 85-1-610.

History: En. Sec. 9, Ch. 505, L. 1981; amd. Sec. 15, Ch. 478, L. 1993.

85-1-609. Eligibility for a loan or grant to a private person. The department may not award a grant or loan to a private person unless the department finds, based on the application and the department's investigation and evaluation of the proposal, that:

(1) the proposed water-related project:

(a) will promote, enhance, or advance the purpose, policies, and objectives of the renewable resource grant and loan program;

(b) will be constructed, developed, and operated within the state of Montana;

(c) will be economically feasible. (A project is economically feasible if the project benefits exceed the project costs. The department shall consider only quantifiable benefits and costs in calculating economic feasibility.)

(d) will be an efficient use of natural resources, including water, energy, land, and air. (An efficient use is one that minimizes waste.)

(e) will provide multipurpose facilities to the extent practicable;

(f) will comply with statutory and regulatory standards protecting the quality of resources such as air, water, land, fish, wildlife, and recreational opportunities;

(g) will provide associated public benefits in addition to any private benefits the project may provide; and

(h) is needed to accomplish the purpose for which the project is proposed;

(2) the applicant has adequate financial resources to construct, operate, and maintain the project. The department shall consider financial resources from any source for which the applicant has qualified, including a renewable resource grant or loan.

(3) the applicant holds or can acquire all necessary lands, other than public lands, and interests in the lands and water rights necessary for the construction, operation, and maintenance of the proposed project;

(4) if the application is for a loan, the applicant is creditworthy and able and willing to enter into a contract with the department for loan repayment and construction or development of the proposed project; and

(5) if the application is for a grant, the applicant is able and willing to enter into a contract with the department for construction or development of the proposed project.

History: **En. Sec. 10, Ch. 505, L. 1981; amd. Sec. 16, Ch. 478, L. 1993.**

85-1-610. Evaluation of grants and loans to private persons. The department shall consider the following criteria and preferences in evaluating applications and selecting the recipients of grants and loans for water-related projects that are eligible for funding under 85-1-609:

(1) The extent and desirability of the public benefits that will be provided must be considered.

(2) A water-related project that will be used as part of a family farm must be given preference. A family farm is one devoted primarily to agriculture under the ownership and operation of a resident Montana family.

(3) A water-related project that will utilize or develop water reserved under 85-2-316 must be given preference.

(4) The department, to the extent practicable, shall attempt to achieve geographic balance in the promotion of renewable resource grant and loan projects through the awarding of loans and grants to private persons.

(5) The extent to which the project will effectively utilize water resources and promote the conservation and efficient use of the water resource must be evaluated and considered.

(6) Projects that could not be accomplished without the assistance of a loan or grant must be given preference.

(7) The department shall give due consideration to any other factor that, in the department's judgment, is important to the evaluation of the project in light of the purposes, policies, and objectives of the renewable resource grant and loan program.

History: **En. Sec. 11, Ch. 505, L. 1981; amd. Sec. 12, Ch. 512, L. 1985; amd. Sec. 17, Ch. 478, L. 1993.**

Cross-References

State water plan, 85-1-203.

85-1-611. Department to solicit views. The department shall solicit and consider in its evaluation of proposed projects the views of interested and affected departments, boards, agencies, commissions, and other subdivisions of the state, including local political subdivisions, of a tribal government, of the federal government, and of other interested and affected persons.

History: **En. Sec. 12, Ch. 505, L. 1981; amd. Sec. 18, Ch. 478, L. 1993; amd. Sec. 5, Ch. 436, L. 1997.**

85-1-612. Rulemaking authority. The department shall adopt rules:

(1) prescribing a reasonable application fee and the form and content of applications for grants and loans;

(2) governing the application of the criteria for awarding loans and grants to private persons;

(3) providing for the servicing of loans including arrangements for obtaining security interests and the establishment of reasonable fees or charges to be made;

(4) describing the terms and conditions for making grants and loans, the security instruments, and the agreements necessary;

(5) describing the ranking criteria used to evaluate and prioritize grants to governmental entities, which must include a ratio calculated by dividing the amount of the locally provided match, which includes cash or capital improvement funds, by the annual operating budget for the system. Projects with a higher ratio of match may be given priority over other projects with a lower ratio, and consideration must be given to the size and cost of the proposed project, the number of users the project serves, and the ability of the applicant to fund the fund dedicated to capital improvements.

(6) specifying any other procedures necessary to accomplish the objectives of the renewable resource grant and loan program.

History: En. Sec. 13, Ch. 505, L. 1981; amd. Sec. 19, Ch. 478, L. 1993; amd. Sec. 6, Ch. 629, L. 2025.

Adoption and publication of rules, Title 2, ch. 4, part 3.

85-1-613. Limits on loans. (1) A loan to a private person that is not a water users' association or ditch company organized and incorporated pursuant to Title 35, chapter 14, or Title 85, chapter 6, part 1, for a renewable resource grant and loan program project may not be made from the natural resources projects state special revenue account established in 15-38-302 or the renewable resource loan proceeds account if the loan exceeds the lesser of $400,000 or 80% of the fair market value of the security given for the project. In determining the fair market value for the security given for a loan, the department shall consider appraisals made by qualified appraisers and other factors that it considers important.

(2) A loan to a private person that is a water users' association or ditch company organized and incorporated pursuant to Title 35, chapter 14, or Title 85, chapter 6, part 1, may not be made from the natural resources projects state special revenue account established in 15-38-302 or the renewable resource loan proceeds account if the loan would exceed the lesser of $3 million or an amount representing the annual debt service on the loan that would exceed 80% of the annual net revenue of the system that would be pledged for payment of the loan. In determining the amount of annual net revenue that may be pledged for payment of the loan, annual expenses for operation and maintenance must be subtracted from the gross revenue of the system.

(3) A loan to the state, a local government, or a tribal government for a renewable resource grant and loan program project may not be made by the department from the natural resources projects state special revenue account established in 15-38-302 or renewable resource loan proceeds account if the loan exceeds the project sponsor's remaining debt capacity.

(4) The period for repayment of loans may not exceed 30 years.

(5) The interest rate at which loans may be made under this part must be sufficient to:

(a) cover the bond debt service for a loan; and

(b) establish and maintain a loan loss reserve fund to be used for bond debt service if a loan loss occurs.

(6) A loan made under this part may not be used for the cost of operation and maintenance of a project.

History: En. Sec. 14, Ch. 505, L. 1981; amd. Sec. 4, Ch. 149, L. 1983; amd. Sec. 39, Ch. 298, L. 1983; amd. Sec. 4, Ch. 491, L. 1989; amd. Sec. 20, Ch. 478, L. 1993; amd. Sec. 2, Ch. 332, L. 1997; amd. Sec. 6, Ch. 436, L. 1997; amd. Sec. 1, Ch. 418, L. 2005; amd. Sec. 18, Ch. 432, L. 2007; amd. Sec. 268, Ch. 271, L. 2019; amd. Sec. 2, Ch. 541, L. 2023.

Cross-References

Fund structure, 17-2-102.

Renewable resource loan proceeds account, 85-1-617.

85-1-614. Limits on grants from natural resources projects state special revenue account. (1) The maximum grant awarded to a private person may not exceed the lesser of:

(a) 5% of the estimated total funds potentially available in the natural resources projects state special revenue account established in 15-38-302 for public and private grants in the biennium in which the grant will be made; or

(b) 50% of the total project cost.

(2) This part does not limit the amount of grant funds that may be appropriated by the legislature to fund a state or local government project.

History: En. Sec. 15, Ch. 505, L. 1981; amd. Sec. 40, Ch. 298, L. 1983; amd. Sec. 21, Ch. 478, L. 1993; amd. Sec. 19, Ch. 432, L. 2007; amd. Sec. 3, Ch. 341, L. 2017.

85-1-615. Security interests — purchase, operation, and resale of encumbered property. (1) The state has a lien upon a project constructed with money from the natural resources projects state special revenue account established in 15-38-302 or the renewable resource loan proceeds account for the amount of the loan and interest due the state. This lien may attach to any project facilities, equipment, easements, real property, shares of stock in a water users' association, revenue of a water users' association, accounts receivable of a water users' association, water purchase agreements, and property of any kind or nature owned by the debtor, including all water rights. The department shall file with the county clerk and recorder of each county in which a part of the project is located either a financing statement or a real estate mortgage covering the loan, its amount, terms, and a description of the security. The county clerk and recorder shall record and index the lien as other liens are required by law to be recorded and indexed. The lien is valid until paid in full or otherwise discharged. The lien must be foreclosed in accordance with applicable state law governing foreclosure of mortgages and liens.

(2) From the funds available under 15-38-301, 85-1-603, or 85-1-617, the state may:

(a) purchase a lien that is prior to the state's lien if:

(i) the director of the department determines that the loan is in default and the prospects for collecting the loan may be materially increased by purchasing the prior lien; and

(ii) the amount to be paid for the prior lien does not exceed the appraised value of the property;

(b) operate property that is subject to the state's lien if the director of the department determines that the loan is in default and that the prospects for collecting the loan may be materially increased by operating the property that is subject to the state's lien; or

(c) purchase a prior lien as provided in subsection (2)(a) and operate property as provided in subsection (2)(b).

(3) Any property acquired under the provisions of this section must be resold as expeditiously as possible to recover funds used under this section and funds loaned to the borrower.

History: **En. Sec. 16, Ch. 505, L. 1981; amd. Sec. 41, Ch. 298, L. 1983; amd. Sec. 5, Ch. 491, L. 1989; amd. Sec. 22, Ch. 478, L. 1993; amd. Sec. 3, Ch. 332, L. 1997; amd. Sec. 76, Ch. 7, L. 2001; amd. Sec. 20, Ch. 432, L. 2007; amd. Sec. 13, Ch. 351, L. 2017.**

Cross-References

Liens, Title 71, ch. 3.

Renewable resource loan proceeds account, 85-1-617.

85-1-616. Administration of loans and grants. The department shall:

(1) administer the loan and grant program established by this part;

(2) service loans made or contract and pay for the servicing of loans, including arrangements for obtaining security interests; and

(3) collect reasonable fees or charges for the servicing of loans, including arrangements for obtaining security interests. The fees and charges must be deposited in the natural resources projects state special revenue account established in 15-38-302.

History: **En. Sec. 17, Ch. 505, L. 1981; amd. Sec. 5, Ch. 149, L. 1983; amd. Sec. 48, Ch. 281, L. 1983; amd. Sec. 23, Ch. 478, L. 1993; amd. Sec. 21, Ch. 432, L. 2007.**

85-1-617. Issuing renewable resource bonds — renewable resource loan proceeds account. (1) When authorized by the legislature or requested by the department pursuant to 85-1-605(2) and within the limits of the authorization on the request and the further limitations established in this section, the board of examiners may issue and sell renewable resource bonds of the state in the amount and manner it considers necessary and proper to finance the renewable resource grant and loan program. The full faith and credit and taxing powers of the state are pledged for the prompt and full payment of all bonds issued and interest and redemption premiums payable on the bonds according to their terms.

(2) Each series of renewable resource bonds may be issued by the board of examiners, upon request of the department, at public or private sale, in denominations and forms, whether payable to bearer with attached interest coupons or registered as to principal or as to both principal and interest, with provisions for conversion or exchange and for the issuance of notes in anticipation of the issuance of definitive bonds, bearing interest at a rate or rates, maturing at

a rate or rates, maturing at a time or times not exceeding 30 years from date of issue, subject to optional or mandatory redemption at earlier times and prices and upon notice, with provisions for payment and discharge by the deposit of funds or securities in escrow for that purpose, and payable at the office of a banking institution or institutions within or outside the state that the board of examiners shall determine subject to the limitations contained in this section and 17-5-731.

(3) In the issuance of each series of renewable resource bonds, the interest rates and the maturities and mandatory redemption provisions contained in the bonds must be established in a manner that the funds then specifically pledged and appropriated by law to the renewable resource loan debt service fund will, in the judgment of the board of examiners, be received in an amount sufficient in each year to pay all principal, redemption premiums, and interest due and payable in that year with respect to that and all prior series of bonds, except outstanding bonds as to which the obligation of the state has been discharged by the deposit of funds or securities sufficient for their payment in accordance with the terms of the resolutions by which they are authorized to be issued.

(4) In all other respects, the board of examiners is authorized to prescribe the form and terms of the bonds and notes and shall do whatever is lawful and necessary for their issuance and payment. The bonds, notes, and interest coupons appurtenant to the bonds or notes must be signed by the members of the board of examiners, and the bonds and notes must be issued under the great seal of the state of Montana. The bonds, notes, and coupons may be executed with facsimile signatures and seal in the manner and subject to the limitations prescribed by law. The state treasurer shall keep a record of all bonds and notes issued and sold.

(5) There is created a renewable resource loan proceeds account within the state special revenue fund established in 17-2-102.

(6) All proceeds of bonds or notes issued under this section, other than refunding bonds, must be deposited in the renewable resource loan proceeds account established in subsection (5), except that any principal and accrued interest received in repayment of a loan made from the proceeds of bonds issued under this section must be deposited in the renewable resource loan debt service fund and the renewable resource loan loss reserve fund pursuant to 85-1-603. All proceeds of refunding bonds must be deposited in the renewable resource loan debt service fund and applied to the payment and redemption of outstanding bonds issued under this section as directed by the board of examiners, whether at maturity or on any earlier date on which they may be prepaid according to their terms.

(7) All actions taken by the board of examiners under this section or 85-1-619 must be authorized by a vote of a majority of the members of the board of examiners.

History: **En. Sec. 18, Ch. 505, L. 1981; amd. Sec. 6, Ch. 149, L. 1983; amd. Secs. 42, 55, Ch. 298, L. 1983; amd. Sec. 13, Ch. 512, L. 1985; amd. Sec. 3, Ch. 6, Sp. L. March 1986; amd. Sec. 6, Ch. 491, L. 1989; amd. Sec. 24, Ch. 478, L. 1993; amd. Sec. 3, Ch. 541, L. 2023.**

Bond issues, Title 17, ch. 5.

85-1-618. Restrictions on use of bond proceeds. Renewable resource bond proceeds may be used only for the purpose of making loans as provided in the renewable resource grant and loan program or for purchasing liens and operating property as provided in 85-1-615.

History: **En. Sec. 19, Ch. 505, L. 1981; amd. Sec. 7, Ch. 491, L. 1989; amd. Sec. 25, Ch. 478, L. 1993.**

85-1-619. Debt service fund — pledge and administration of sufficient balance. (1) The legislature may levy, impose, assess, and pledge and appropriate to the renewable resource loan debt service fund any tax, charge, fee, rental, or other income from any designated source. The state reserves the right to modify from time to time the nature and amount of special taxes and other revenue pledged and appropriated to the renewable resource loan debt service fund, provided that the aggregate resources so pledged and appropriated are determined by the legislature to be sufficient for the prompt and full payment of the principal of and interest and redemption premiums when due on all bonds payable from that fund and provided that the pledge of the full faith and credit and taxing powers of the state for the security of all bonds is and remains irrevocable until they are fully paid.

(2) Money in the renewable resource loan debt service fund must be used to pay interest, principal, and redemption premiums when due and payable with respect to renewable resource bonds, and for bonds issued prior to 1985, to accumulate a reserve for the further security of the payments.

(3) After the reserve provided for in subsection (2) for bonds issued prior to 1985 has been accumulated in the renewable resource loan debt service fund, money at any time received in the renewable resource loan debt service fund in excess of that amount must be transferred by the treasurer to the natural resources projects state special revenue account.

History: En. Sec. 20, Ch. 505, L. 1981; amd. Sec. 43, Ch. 298, L. 1983; amd. Sec. 14, Ch. 512, L. 1985; amd. Sec. 26, Ch. 478, L. 1993; amd. Sec. 116, Ch. 2, L. 2009.

85-1-620. Renewable resource refunding bonds. (1) The board of examiners may issue refunding bonds at times and in amounts, if any, as may be necessary to pay principal or interest due that cannot be paid from funds then on hand in the renewable resource loan debt service fund. The board of examiners may also issue refunding bonds to refund outstanding bonds before maturity for the purpose of extending the maturities of the outstanding bonds determined by the board of examiners to be necessary to assure that the funds then pledged to the renewable resource loan debt service fund will be sufficient for payment of principal and interest due in subsequent years. The board of examiners may also issue refunding bonds to refund outstanding bonds before maturity for the purpose of reducing the interest cost or the total amount of principal and interest payable on the outstanding bonds.

(2) Refunding bonds may not be issued and sold more than 3 months before all of the bonds refunded mature or are called for redemption unless the proceeds of the refunded bonds, with any other funds in the renewable resource loan debt service fund that are needed and available for the purpose or securities purchased from proceeds and other funds, are deposited with a suitable banking institution within or outside the state, in escrow, for the retirement of the refunded bonds at maturity or at a prior date or dates on which they have been called for redemption in accordance with their terms, in an amount and in a manner sufficient under the provisions securing the refunded bonds, so that the state's obligation to pay the same, from sources other than the escrow fund, is discharged.

(3) New debt may not be created by the issuance of refunding bonds in accordance with this section, but the refunding bonds must evidence the debt previously created and must be secured by the pledge of the full faith and credit and taxing powers of the state and secured in the same manner as the bonds refunded by other provisions of this part.

History: En. Sec. 21, Ch. 505, L. 1981; amd. Sec. 44, Ch. 298, L. 1983; amd. Sec. 27, Ch. 478, L. 1993.

85-1-623. Repealed. Sec. 3, Ch. 437, L. 1995.

History: En. Sec. 1, Ch. 507, L. 1981; amd. Sec. 45, Ch. 298, L. 1983; amd. Sec. 15, Ch. 512, L. 1985; amd. Sec. 8, Ch. 491, L. 1989; amd. Sec. 29, Ch. 478, L. 1993.

85-1-624. Authorization of bonds. The board of examiners is authorized to issue and sell general obligation renewable resource bonds for the renewable resource grant and loan program created under Title 85, chapter 1, part 6, in accordance with the terms and conditions and in the manner provided in 85-1-617 from time to time and in amounts that, taking into consideration the principal amount of any renewable resource bonds then outstanding, will not cause the total aggregate principal amount of renewable resource bonds outstanding at any time to exceed $30 million.

History: En. Sec. 1, Ch. 437, L. 1995; amd. Sec. 1, Ch. 14, L. 1999; amd. Sec. 1, Ch. 113, L. 2003.

85-1-625 through 85-1-630 reserved.

85-1-631. Water storage state special revenue account created — revenues allocated — appropriations from account. (1) There is a water storage state special revenue account within the state special revenue fund established in 17-2-102.

(2) There must be paid into the water storage state special revenue account:

(a) for the biennium beginning July 1, 2007, the proceeds of the resource indemnity and ground water assessment tax as provided in 15-38-106;

(b) money allocated from the resource indemnity trust fund interest earnings pursuant to 15-38-202 and all revenue of the works and other money as provided in 85-1-332; and

(c) 90% of the interest earned from the Montana water development state special revenue account established in 85-1-320.

(3) All revenue provided from 85-1-332(1)(e) and (1)(f) deposited in the water storage state special revenue account must be appropriated solely for the construction, operation, rehabilitation, expansion, maintenance, and modification of state-owned water storage projects.

(4) Money that was not encumbered or expended from the water storage state special revenue account during the previous biennium must remain in the account.

(5) Deposits to the water storage state special revenue account must be placed in short-term investments and accrue interest, which must be deposited in the water storage state special revenue account.

(6) The purpose of the water storage state special revenue account is to provide money exclusively for construction, operation, rehabilitation, expansion, maintenance, and modification of state-owned water storage projects.

History: En. Sec. 8, Ch. 659, L. 1991; amd. Sec. 30, Ch. 478, L. 1993; amd. Sec. 9, Ch. 144, L. 1999; amd. Sec. 22, Ch. 432, L. 2007; amd. Sec. 31, Ch. 775, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 31, Ch. 775, L. 2025. Amendment effective June 19, 2025.

Cross-References

Water storage policy, Title 85, ch. 1, part 7.

85-1-632. Exemption from environmental review. The department is exempt from the provisions of Title 75, chapter 1, parts 1 and 2, when authorizing grants, loans, or bonds related to conservation, reclamation, and renewable resource activities pursuant to this part.

History: En. Sec. 3, Ch. 116, L. 2023.

Part 7
Water Storage Policy

85-1-701. Short title. This part may be cited as the "Water Storage Policy Act".

History: En. Sec. 1, Ch. 659, L. 1991.

85-1-702. Purpose. The purpose of this part is to define the role of water storage in solving water management problems and, if water storage projects provide the best solutions to those problems, to facilitate the development of the projects.

History: En. Sec. 2, Ch. 659, L. 1991.

85-1-703. Water storage policy. (1) The legislature recognizes that water resource needs are growing, existing water facilities are aging and in need of repair, and new water storage projects have become more difficult to complete. Other types of action will be needed to solve many emerging problems, but if water storage is the best way to meet growing water needs and solve problems, then it should be actively pursued.

(2) In determining the best solution for a particular water management problem, the state shall:

(a) carefully define the problem;
(b) identify all options to solve the problem, including water storage;
(c) determine whether water is physically and legally available to solve the problem; and
(d) select the option that best meets the following criteria:
(i) technical feasibility;
(ii) financial feasibility;
(iii) economic feasibility;
(iv) political feasibility;
(v) legal feasibility; and
(vi) environmental feasibility.

History: En. Sec. 3, Ch. 659, L. 1991.

85-1-704. Prioritization of water storage projects — governor's report. (1) The governor shall submit to the legislature a report in accordance with 5-11-210 identifying specific water storage projects proposed for development, including the rehabilitation of existing projects and new project proposals. The report must contain:

(a) a list of water storage project priorities;

(b) an implementation strategy for each priority project that identifies the resources (including specific budget requests), government actions, and other actions needed to accomplish the project; and

(c) a progress report on the development of water storage projects during the previous 2 years.

(2) In setting priorities among new water storage projects, the governor shall consider whether a project:

(a) solves a severe water problem;
(b) provides multiple uses and benefits;
(c) provides for public uses;
(d) shows strong evidence of broad citizen support;
(e) is able to obtain nonstate sources of funding;
(f) protects and seeks to enhance social, ecological, cultural, and aesthetic values;
(g) improves local and state economic development;
(h) could resolve Indian and federal reserved water rights issues;
(i) supports water conservation activities; and
(j) promotes the use of water reserved under Montana law.

(3) In setting priorities among water storage rehabilitation projects, the governor shall consider whether the project:

(a) is needed to protect public safety;
(b) has impacts if not repaired or rehabilitated; and
(c) accomplishes the goals listed in subsections (2)(a) through (2)(j).

(4) In establishing budget priorities for the allocation of state water storage development funds:

(a) first preference must be given to projects that resolve threats to life and property posed by high-hazard facilities that are in an unsafe condition;

(b) second preference must be given to projects that improve or expand existing water storage facilities; and

(c) third preference must be given to the planning and construction of new water storage facilities.

History: En. Sec. 4, Ch. 659, L. 1991; amd. Sec. 117, Ch. 261, L. 2021.

Water storage state special revenue account — allocation, 85-1-631.

Part 8
Lease Management Program

Part Cross-References

State lands — agricultural, grazing, and other surface leases, Title 77, ch. 6.

85-1-801. Statement of policy. It is the policy of the state that in the interest of accomplishing a self-supporting program from the leasing of project lands, the project lands must be appraised by the department at least once during the term of each lease. The purpose of the appraisals is to determine the lease value of project lands and the general condition of the lands.

History: En. Sec. 1, Ch. 301, L. 1995.

85-1-802. Leases authorized. (1) The department may lease all project lands appurtenant to a state-owned water project for purposes that the department considers appropriate.

(2) A lease of project lands to the department of fish, wildlife, and parks for public recreational use may not exceed 30 years. Other leases of project lands may not exceed 10 years.

History: En. Sec. 2, Ch. 301, L. 1995; amd. Sec. 1, Ch. 121, L. 1999.

85-1-803. Rulemaking. The department may adopt rules necessary to implement and administer the leasing of project lands. These rules may include but are not limited to rules governing the:

(1) growing of crops or grazing of livestock;

(2) establishment of responsibility for a lessee to pay the assessment of taxes for weed control;

(3) acquisition and use of water on project lands;

(4) leasing of project lands, except for lease renewals and transfers, by competitive bidding and the establishment of bid procedures and bid deposits;

(5) process for giving notice and for cancellation, termination, and renewal of leases, including existing leases on project lands;

(6) general form of the lease and the form and conditions of a bond when the department considers a bond necessary;

(7) changes or modifications in lease conditions or lease use; and

(8) placement and removal of improvements directly related to the necessary use of the project lands.

History: En. Sec. 3, Ch. 301, L. 1995.

Cross-References

Adoption and publication of rules, Title 2, ch. 4, part 3.

85-1-804. Appraisal of project lands — adjustment of lease fee. The department shall appraise project lands owned by the department and shall maintain records of the appraisals. Not less than once during the term of a lease, the department shall reappraise the project lands and adjust the lease fee accordingly. The department may not increase a lease fee for a current lessee more than 2% a year during any period of 10 consecutive years.

History: En. Sec. 4, Ch. 301, L. 1995.

85-1-805. Full market value required. The department shall determine the full market value of project lands. The department may not accept a bid that is below full market value.

History: En. Sec. 5, Ch. 301, L. 1995.

85-1-806. Withdrawal of lands from leasing. The department may withdraw project lands from leasing for a period of time as the department determines to be in the best interest of the state.

History: En. Sec. 6, Ch. 301, L. 1995.

85-1-807. Assignment of leases — subleasing not allowed. (1) A lease of project lands may be assigned on forms prescribed by the department. An assignment is not binding on the department unless the assignment is filed with and approved by the department. An assignment fee must be paid to the department at the time of filing the assignment.

(2) The department may not approve a contingent or collateral assignment of a lease.

(3) A lease may not be subleased.

History: En. Sec. 7, Ch. 301, L. 1995.

85-1-808. Changes in lease use not authorized — cancellation. (1) During the term of a lease, the use of the project lands may not be changed. A change in the use of the lands automatically voids the lease.

(2) The department may cancel a lease for any of the following causes:

(a) fraud, misrepresentation, or concealment of facts relating to issuance of the lease, which if known would have prevented its issuance in the form or to the party issued;

(b) subleasing project lands;

(c) placing of unauthorized improvements on project lands;

(d) using the lands for purposes other than those authorized by the lease;

(e) conviction of the lessee for a felony offense involving a dangerous drug, as defined in Title 50, chapter 32, and involving the planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or concealing of a dangerous drug on any portion of the lands;

(f) nonpayment of rental fees;

(g) violation of a lease condition;

(h) other causes that in the judgment of the department make the cancellation of the lease necessary in order to do justice to all parties concerned or to protect the interests of the state.

(3) Cancellation of a lease under this section does not entitle the lessee to a refund of rentals paid or exempt the lessee from the payment of rentals, penalties, or other compensation due the state.

History: **En. Sec. 8, Ch. 301, L. 1995.**

85-1-809. Improvements authorized — no compensation — removal. (1) A lessee of project lands may place on the lands a reasonable amount of improvements directly related to the necessary use of the lands as provided in the lease.

(2) The department is not liable to pay compensation to a lessee or a former lessee for improvements made to project lands.

(3) A former lessee is responsible to reclaim project lands to the condition existing prior to the placement of the improvements. If the former lessee fails to remove the improvements from the land within 60 days from the date of the expiration of the lease, all of the improvements become the property of the department unless the department for good cause extends the time for removal of the improvements. The department may require a former lessee to remove improvements made by the former lessee from project lands at the former lessee's expense.

History: **En. Sec. 9, Ch. 301, L. 1995.**

85-1-810. No pledge or mortgage of leasehold interest. A lessee of project lands may not pledge the lease or mortgage a leasehold interest in the project lands.

History: **En. Sec. 10, Ch. 301, L. 1995.**

85-1-811. Project lands lease and sales account. There is established a project lands lease and sales account within the state special revenue fund of the state treasury. All sale proceeds and lease fees collected under this part must be deposited in the account to pay the department's costs and expenses in administering this part.

History: **En. Sec. 11, Ch. 301, L. 1995; amd. Sec. 3, Ch. 378, L. 2021.**

85-1-812. Sale of leased cabin or home sites — rulemaking. (1) (a) Subject to subsection (7), the department shall make available for sale within a reasonable period of time project lands that are state land cabin or home sites on October 1, 2021, at the request of a lessee or an improvement owner and with the consent of any mortgagee or other owner of an interest in the cabin or home site improvements. The sale must attain full market value.

(b) The proceeds of any sale of cabin site improvements pursuant to this part must go to the owner of record of the improvements.

(2) The sale of a cabin or home site is exempt from the subdivision laws, except that the development of any new or additional water supply or sewage disposal system on the property must be approved pursuant to the review procedure, fee, and other requirements of Title 76, chapter 4, part 1.

(3) The department may adopt rules to ensure the sales process authorized pursuant to 85-1-812 and 85-1-813 is orderly and attains full market value for the sale of a cabin or home site.

(4) On a sale of a cabin or home site, the department may:

(a) grant a permanent easement across state lands to secure access using current routes; or

(b) convey an appurtenant, nonexclusive easement to the property from the nearest public road if:

(i) the department has authority to grant the easement; and

(ii) the conveyance of the easement does not overburden a right-of-way held by the state.

(5) The appraised value and minimum bid for a cabin or home site must include the value of the easement granted pursuant to subsection (4).

(6) (a) The lessee of the cabin or home site nominated for sale has the preference to match the high bid. If the lessee matches the high bid, bidding is reopened to all bidders, with the lessee retaining the right of preference to match the ultimate high bid and be awarded the sale.

(b) The current lessee of the cabin or home site who initiated the sale may cancel the sale by giving notice to the department at least 10 days prior to the day of the auction. When the sale is cancelled by the lessee, the lessee shall pay the costs incurred by the department for the preparation of the sale.

(c) For the sale of a cabin or home site, the department shall prepare and assume the cost of the land survey. The department may allow the survey to be paid for in advance by the lessee or the owner of any improvements if the survey is contracted through the department according to department specifications. If the parcel is sold but the purchaser is other than the lessee or the owner of the improvements, the cost of the survey must be included in the actual costs at closing, and the department shall refund the cost of the survey to the former lessee or the owner of the improvements.

(d) The department shall transfer water rights that are appurtenant to the cabin or home site to the purchaser on completion of the sale.

(e) The sale of a cabin or home site is exempt from the provisions of Title 75, chapter 1, parts 1 through 3.

(f) For purposes of this section, "cabin site improvements" has the meaning provided in 85-1-813.

(7) Before January 1, 2022, the department shall determine what cabin sites would be adversely affected by an expansion of a state water project. Lessees of those lots may not request them to be sold pursuant to this section.

History: En. Sec. 1, Ch. 378, L. 2021.

85-1-813. Valuation of cabin or home sites and improvements. (1) (a) Prior to the sale of project lands pursuant to 85-1-812, the department shall separately determine the full market value of the land and the value of the cabin site improvements existing on the land and the value of any necessary access easement across existing state lands from the nearest public road. The appraisal must be based on comparable sales of nearby existing properties with the hypothetical condition that the state parcel to be sold is accessible for all lawful purposes. The appraisal must determine the raw undeveloped value of the parcel and the value of the cabin site improvements.

(b) (i) In determining the values required by subsection (1)(a), the department shall establish a list of at least two third-party independent appraisers available to conduct the appraisal of the land and the cabin site improvements. The department shall provide a copy of the list to the cabin or home site lessee. The lessee shall provide the department with a list of at least 50% of the appraisers from the department's list. The department shall select the appraiser to conduct the appraisal from the list provided by the lessee.

(ii) The department shall assume the proportionate cost of the appraisal of the state land valuation. The lessee shall assume the proportionate cost of the appraisal of the valuation of the cabin site improvements.

(c) The department shall disclose the results of the appraisal to the cabin or home site lessee of the land for sale and shall give that lessee notice and opportunity for an administrative hearing before the department to contest those valuations. The department shall review the arguments and evidence received at the hearing. The department shall make a final determination on the values of the land and cabin site improvements.

(2) (a) If the lessee consents to the terms and conditions of the proposed sale and the valuation of cabin site improvements, the sale must proceed utilizing the department's final determination of the values, and the lessee is obligated to transfer its interest in the cabin site improvements existing on the cabin or home site lease according to the board's final determination of their value.

(b) Nothing in this section prohibits the lessee from accepting a price for the cabin site improvements existing on the cabin or home site that is less than the department's final determination of value.

(3) For purposes of 85-1-812 and 85-1-813, "cabin site improvements" includes but is not limited to:

(a) a home or residence;
(b) outbuildings and structures;
(c) sleeping cabins;
(d) utilities;
(e) water systems;
(f) septic systems;
(g) docks; and
(h) landscaping.

History: En. Sec. 2, Ch. 378, L. 2021.

Part 9
Western Montana Conservation Commission Act

Part Cross-References

Western Montana Conservation Commission, 2-15-3311.

85-1-901. *(Temporary)* **Short title.** This part may be cited as the "Western Montana Conservation Commission Act". *(Terminates June 30, 2029—sec. 12, Ch. 428, L. 2023.)*

History: En. Sec. 2, Ch. 428, L. 2023.

85-1-902. *(Temporary)* **Purpose.** The purpose of the western Montana conservation commission is to protect the existing high quality of western Montana's aquatic resources. *(Terminates June 30, 2029—sec. 12, Ch. 428, L. 2023.)*

History: En. Sec. 3, Ch. 428, L. 2023.

85-1-903. *(Temporary)* **Definitions.** As used in this part, the following definitions apply:

(1) "Aquatic resources" means all beneficial uses of water, including but not limited to water quality and water supply; recreational, scenic, and aesthetic values; and fish, wildlife, and other organisms, including the prevention and management of aquatic invasive species.

(2) "Commission" means the western Montana conservation commission established in 2-15-3311.

(3) "Department" means the department of natural resources and conservation.

(4) "Western Montana" means all land and water areas west of the continental divide and within the Montana portion of the headwaters of the Columbia River basin. *(Terminates June 30, 2029—sec. 12, Ch. 428, L. 2023.)*

History: En. Sec. 4, Ch. 428, L. 2023.

85-1-904. *(Temporary)* **Duties of the commission.** Duties of the commission are to:

(1) monitor the existing condition of natural resources in western Montana and coordinate development of a 5-year monitoring strategy. This strategy must be developed with input from all land and water management agencies within western Montana and identify proposed and needed monitoring that emphasizes but is not limited to the aquatic resources of western Montana.

(2) support, promote, and ensure the continuation of a comprehensive aquatic invasive species prevention program in western Montana to assure it is implemented effectively and efficiently to protect aquatic resources, local economies, and native species;

(3) encourage close cooperation and coordination between federal, state, provincial, tribal, and local resource managers for the establishment of consistent natural resource conservation practices, comprehensive monitoring, data collection, and interpretation;

(4) encourage and work for international coordination between the state of Montana and the province of British Columbia concerning the undertaking of natural resource monitoring and use of consistent standards for management of natural resources throughout the region that may have influences on aquatic resources within western Montana;

(5) provide focused support and programming to the aquatic and natural resources of the Flathead River basin given its economic, cultural, and natural resource importance to the state of Montana;

(6) support economic development and use of western Montana's resources to their fullest extent without compromising the aquatic resources of western Montana;

(7) undertake, with the commission's discretion, investigations of resource utilization and hold public hearings concerning the condition of aquatic resources and other natural resources in western Montana;

(8) use the result of the duties performed pursuant to subsections (1) through (7) to create public-private partnerships that:

(a) result in projects to reduce point source water pollution and nonpoint source water pollutions, as those terms are defined in 75-5-103;

(b) prevent the spread of invasive species; and

(c) maintain, enhance, restore, expand, or benefit the aquatic resources of western Montana;

(9) implement in collaboration with the department policies pursuant to 85-1-101, through the administration of portions of the renewable resource grant and loan program under 85-1-601, within western Montana;

(10) implement in collaboration with the department the portion of state policy expressed in the reclamation and development grants program act under 90-2-1102 through administration of grants and loans within western Montana;

(11) submit to the governor, the environmental quality council, and the water policy interim committee, in accordance with 5-11-210, a biennial report that includes:

(a) a summary of information gathered in fulfillment of its duties under this section;

(b) information on monitoring activities within western Montana concerning the condition of the region's natural resources with particular emphasis on aquatic resources;

(c) the identification of land use, land development, and economic trends in western Montana;

(d) recommendations the commission considers appropriate for fulfillment of its duties and for the continued preservation of aquatic resources in western Montana; and

(e) an accounting of all money received and disbursed, by source and purpose, for the period since the last biennial report; and

(12) meet at least semiannually within western Montana at locations selected by the commission. *(Terminates June 30, 2029—sec. 12, Ch. 428, L. 2023.)*

History: **En. Sec. 5, Ch. 428, L. 2023.**

85-1-905. *(Temporary)* **Commission authority.** (1) The commission may request the governor petition a state natural resource agency or that agency's rulemaking body to promulgate, amend, or repeal a rule addressing natural resource issues identified by the commission.

(2) The commission may petition a county, conservation district, or tribal council to promulgate, amend, or repeal local ordinances to resolve natural resource issues identified by the commission.

(3) The commission shall participate with the department in preparation of a state budget pursuant to Title 17, chapter 7, part 1, in order to identify disbursements necessary to complete the commission's purpose and duties.

(4) Subject to appropriation by the legislature, the commission may receive and expend disbursements, donations, gifts, grants, and other funds necessary to fulfill its purpose and duties. *(Terminates June 30, 2029—sec. 12, Ch. 428, L. 2023.)*

History: **En. Sec. 6, Ch. 428, L. 2023.**

85-1-906. *(Temporary)* **Special county government authority.** The governing body of a county within western Montana may allocate to the commission a portion of any funds available from coal severance tax allocations or other sources that is designated for project or planning activities. *(Terminates June 30, 2029—sec. 12, Ch. 428, L. 2023.)*

History: En. Sec. 7, Ch. 428, L. 2023.

85-1-907. *(Temporary)* **Cooperation with other agencies and organizations.** To fulfill its duties, the commission shall develop and maintain cooperative programs with federal, state, provincial, tribal, and local agencies or organizations that are responsible for natural resource management and monitoring in western Montana. *(Terminates June 30, 2029—sec. 12, Ch. 428, L. 2023.)*

History: En. Sec. 8, Ch. 428, L. 2023.

CHAPTER 2
SURFACE WATER AND GROUND WATER

Part 1 — General Provisions

85-2-101. Declaration of policy and purpose.
85-2-102. Definitions.
85-2-103. Measurement of water.
85-2-104. Repealed.
85-2-105. Water policy interim committee duties.
85-2-106 through 85-2-110 reserved.
85-2-111. Department powers.
85-2-112. Department duties.
85-2-113. Department powers and duties.
85-2-114. Judicial enforcement.
85-2-115. Entry on land.
85-2-116. Legal assistance.
85-2-117. Water right records for filing with local clerk and recorder.
85-2-118 through 85-2-120 reserved.
85-2-121. Administrative proceedings.
85-2-122. Penalties.
85-2-123. Deposit of fees and penalties.
85-2-124. Costs and fees for environmental impact statements.
85-2-125. Recovery of costs and attorney fees by prevailing party.
85-2-126 through 85-2-130 reserved.
85-2-131. Application for change of watercourse name.
85-2-132. Change of watercourse name — public notice.
85-2-133. Change of watercourse name — hearing.
85-2-134. Change of watercourse name — judgment to be filed with county clerk.
85-2-135 through 85-2-140 reserved.
85-2-141. Water leasing program.
85-2-142 through 85-2-144 reserved.
85-2-145. Removal of natural obstruction to exercise water right — consent or court ruling required
85-2-146 through 85-2-149 reserved.
85-2-150. Chronically dewatered watercourse — identification.
85-2-151 through 85-2-153 reserved.
85-2-154. Terminated.
85-2-155. Terminated.
85-2-156. Policy considerations.
85-2-157. Intent.

Part 2 — Adjudication of Water Rights

85-2-201. Repealed.
85-2-202. Repealed.
85-2-203. Repealed.
85-2-204. Repealed.
85-2-205. Repealed.
85-2-206. Repealed.
85-2-207. Repealed.
85-2-208. Repealed.
85-2-209. Repealed.
85-2-210. Repealed.
85-2-211. Repealed.
85-2-212. Order by supreme court.

85-2-213. Notice of order.
85-2-214. Commencement of action.
85-2-215. Consolidation of matters.
85-2-216. Venue for water rights determinations.
85-2-217. Suspension of adjudication.
85-2-218. Process and criteria for designating priority basins or subbasins.
85-2-219 and 85-2-220 reserved.
85-2-221. Filing of claim of existing water right — filing late claim.
85-2-222. Definition — filing process — notice.
85-2-223. Public recreational uses.
85-2-224. Statement of claim.
85-2-225. Filing fee — processing fee for remitted claims.
85-2-226. Abandonment by failure to file claim.
85-2-227. Claim to constitute prima facie evidence — relevant evidence — abandonment — criteria for presumption of municipal nonabandonment.
85-2-228. Federal reserved water rights with priority date of July 1, 1973, or later — process and adjudication — purpose.
85-2-229 and 85-2-230 reserved.
85-2-231. Temporary preliminary decree, preliminary decree, and supplemental preliminary decree.
85-2-232. Availability of temporary preliminary decree, preliminary decree, or supplemental preliminary decree.
85-2-233. Hearing on decrees or petition — procedure.
85-2-234. Final decree.
85-2-235. Appeals.
85-2-236. Certificate of water right.
85-2-237. Reopening and review of decrees.
85-2-238 through 85-2-240 reserved.
85-2-241. Repealed.
85-2-242. Repealed.
85-2-243. Department assistance to water judges.
85-2-244 through 85-2-246 reserved.
85-2-247. Purpose.
85-2-248. Resolution of issue remarks other than by objection.
85-2-249. Prioritization of workload.
85-2-250. Definition.
85-2-251 through 85-2-269 reserved.
85-2-270. Findings — purpose.
85-2-271. Benchmarks — action taken if not met — claims examination priority.
85-2-272. Repealed.
85-2-273. Repealed.
85-2-274 and 85-2-275 reserved.
85-2-276. Repealed.
85-2-277 and 85-2-278 reserved.
85-2-279. Repealed.
85-2-280. Water adjudication account.
85-2-281. Reporting requirements.
85-2-282. Examination of claims in verified basins.
85-2-283. Repealed.

Part 3 — Appropriations, Permits, and Certificates of Water Rights

85-2-301. Right to appropriate — recognition and confirmation of permits issued after July 1, 1973.
85-2-302. Application for permit or change in appropriation right.
85-2-303. Permit for conversion of nonproductive oil or gas well.
85-2-304. Appropriation by state board of land commissioners.
85-2-305. Appropriation permit for reservoir.
85-2-306. Exceptions to permit requirements.
85-2-307. Notice of receipt of application for permit or change in appropriation right — draft preliminary determination — extensions — updated draft preliminary determination — public comments — issuance of preliminary determination.
85-2-308. Objections.
85-2-309. Hearings on objections — jurisdiction.
85-2-310. Action on application for permit or change in appropriation right.
85-2-311. Criteria for issuance of permit.
85-2-312. Terms of permit.
85-2-313. Provisional permit.
85-2-314. Revocation or modification of permit or change in appropriation right.

85-2-350. Repealed.
85-2-351. Notice to permitholders — Clark Fork River basin.
85-2-352 through 85-2-354 reserved.
85-2-355. Definitions.
85-2-356 through 85-2-359 reserved.
85-2-360. Ground water appropriation right in closed basins.
85-2-361. Hydrogeologic report — minimum requirements.
85-2-362. Aquifer recharge or mitigation plans in closed basins — minimum requirements.
85-2-363. Repealed.
85-2-364. Department permit coordination — requirements for aquifer recharge or mitigation plans.
85-2-365 through 85-2-367 reserved.
85-2-368. Aquifer storage and recovery projects in closed basins.
85-2-369. Permit not required for testing.
85-2-370. Rulemaking.
85-2-371 through 85-2-379 reserved.
85-2-380. Stream depletion zones — establishment — rulemaking
85-2-381. Water right enforcement of ground water uses exempt from permitting — findings and purpose.
85-2-382. Fox Hills-Hell Creek aquifer — ground water study.

Part 4 — Utilization of Water

85-2-401. Priority — recognition and confirmation of changes in appropriations issued after July 1, 1973.
85-2-402. Changes in appropriation rights — definition.
85-2-403. Transfer of appropriation right.
85-2-404. Abandonment of appropriation right.
85-2-405. Procedure for declaring appropriation rights abandoned.
85-2-406. District court supervision of water distribution.
85-2-407. Temporary changes in appropriation right.
85-2-408. Temporary change authorization for instream flow — additional requirements.
85-2-409. Repealed.
85-2-410. Short-term lease of appropriation right.
85-2-411. Water turned into natural channels.
85-2-412. Return of surplus water to stream.
85-2-413. Diversion of natural flow of waters — when permitted.
85-2-414. Conduction of water.
85-2-415. Owners of water to sell surplus.
85-2-416. Duty of purchaser to dig ditches.
85-2-417. Enforcement of right to surplus.
85-2-418. Purchaser not to sell surplus water.
85-2-419. Salvaged water.
85-2-420. Change in appropriation right for aquifer recharge or mitigation — marketing.
85-2-421. Purpose.
85-2-422. Repealed.
85-2-423. Water right ownership update form.
85-2-424. Filing.

85-2-425. Repealed.
85-2-426. Fee.
85-2-427. Terminated.
85-2-428. Temporary lease of appropriation right — notice.
85-2-429. Changes in appropriation rights — exceptions.
85-2-430 reserved.
85-2-431. Penalty.
85-2-432 through 85-2-435 reserved.
85-2-436. Instream flow to protect, maintain, or enhance streamflows to benefit fishery resource — change in appropriation rights.
85-2-437. Repealed.
85-2-438. Repealed.
85-2-439. Repealed.
85-2-440. Repealed.
85-2-441. Temporary use of a water right on state trust land — restrictions on state ownership — rescinding of noncompliant ownership interests required.

Part 5 — Ground Water

85-2-501. Definitions.

85-2-504. Standards for determining fresh water.
85-2-505. Waste and contamination of ground water prohibited.
85-2-506. Controlled ground water areas — designation or modification.
85-2-507. Repealed.
85-2-508. Controlled ground water areas — permits to appropriate.
85-2-509. Repealed.
85-2-510. Production of water from oil and gas wells — hearings — jurisdiction of board of oil and gas conservation.
85-2-511. Repealed.
85-2-512. Investigations.
85-2-513. Repealed.
85-2-514. Inspection of wells.
85-2-515. Information available to public.
85-2-516. Well logs.
85-2-517. Reports by water well drillers.
85-2-518. Repealed.
85-2-519. Repealed.
85-2-520. Repealed.
85-2-521. Renumbered 82-11-175.
85-2-522. Aquifer tests.
85-2-523. Rulemaking.
85-2-524. Criteria for petition applications.
85-2-525. Ground water investigation program — advisory committee.
85-2-526. Terminated.
85-2-527. Terminated.

Part 6 — Yellowstone River Basin

85-2-601. Statement of legislative findings and policy.
85-2-602. Definitions.
85-2-603. Suspension of action.
85-2-604. When department may suspend action.
85-2-605. Reservations.
85-2-606. Application of part.
85-2-607. Utility facilities.
85-2-608. Certain changes of use allowed.

Part 7 — Indian and Federal Water Rights — Water Rights Within Indian Reservations

85-2-701. Legislative intent.
85-2-702. Negotiation with Indian tribes.
85-2-703. Negotiation with federal government.
85-2-704. Termination of negotiations.
85-2-705. Status reports to chief water judge.
85-2-706. Renumbered 85-20-401.
85-2-707. Renumbered 85-20-402.
85-2-708. Water administration interim agreements within Indian reservations.

Part 8 — Diversions From the Yellowstone River Basin

85-2-801. Definitions.
85-2-802. Authority to approve diversions.

85-2-803. Legislative review.
85-2-804. Application — notice — objections — hearing.
85-2-805. Criteria for approval — terms.
85-2-806. Combined proceeding.
85-2-807. Department authorized to appear in administrative and legal proceedings.

Part 9 — Ground Water Assessment

85-2-901. Short title.
85-2-902. Findings and purpose.
85-2-903. Definitions.
85-2-904 reserved.
85-2-905. Ground water assessment account.
85-2-906. Ground water characterization program — ground water monitoring program.
85-2-907. Ground water information collection by local governments.

Part 10 — Surface Water Assessment and Monitoring Program

85-2-1001. Surface water assessment and monitoring program — steering committee.

Smith River Management Act, Title 23, ch. 2, part 4.

Part 1
General Provisions

85-2-101. Declaration of policy and purpose. (1) Pursuant to Article IX of the Montana constitution, the legislature declares that any use of water is a public use and that the waters within the state are the property of the state for the use of its people and are subject to appropriation for beneficial uses as provided in this chapter.

(2) A purpose of this chapter is to implement Article IX, section 3(4), of the Montana constitution, which requires that the legislature provide for the administration, control, and regulation of water rights and establish a system of centralized records of all water rights. The legislature declares that this system of centralized records recognizing and establishing all water rights is essential for the documentation, protection, preservation, and future beneficial use and development of Montana's water for the state and its citizens and for the continued development and completion of the comprehensive state water plan.

(3) It is the policy of this state and a purpose of this chapter to encourage the wise use of the state's water resources by making them available for appropriation consistent with this chapter and to provide for the wise utilization, development, and conservation of the waters of the state for the maximum benefit of its people with the least possible degradation of the natural aquatic ecosystems. In pursuit of this policy, the state encourages the development of facilities that store and conserve waters for beneficial use, for the maximization of the use of those waters in Montana, for the stabilization of streamflows, and for ground water recharge.

(4) Pursuant to Article IX, section 3(1), of the Montana constitution, it is further the policy of this state and a purpose of this chapter to recognize and confirm all existing rights to the use of any waters for any useful or beneficial purpose.

(5) It is the intent of the legislature that the statutory determinations for issuing new water use permits and authorizing changes do not require the adjudication of all water rights in the source of supply. The legislature recognizes the unique character and nature of water resources of the state. Because water is a resource that is subject to use and reuse, such as through return flows, and because at most times all water rights on a source will not be exercised to their full extent simultaneously, it is recognized that an adjudication is not a water availability study. Consequently, the legislature has provided an administrative forum for the factual investigation into whether water is available for new uses and changes both before and after the completion of an adjudication in the source of supply. To allow for orderly permitting in the absence of a complete adjudication in the source of supply, permits issued under this chapter are provisional. A provisional permit is subject to reduction, modification, or revocation by the department as provided in 85-2-313 upon completion of the general adjudication.

(6) It is the intent of the legislature that the state, to fulfill its constitutional duties and to exercise its historic powers and responsibilities to its citizens living on and off reservations,

comprehensively adjudicate existing water rights and regulate water use within the state. It is further the legislature's intent that the state, to the fullest extent possible, retain and exercise its authority to regulate water use and provide forums for the protection of water rights, including federal non-Indian and Indian water rights, and resolve issues concerning its authority over water rights and permits, both prior to and after the final adjudication of water rights. In furtherance of this legislative intent:

(a) all permits issued are provisional, and it is the intent of the legislature that this status provide enforceable legal protection for existing rights; and

(b) any judicial determination of the state's authority to issue provisional permits on or off reservations should be decided in the appropriate state forum.

History: En. Sec. 2, Ch. 452, L. 1973; R.C.M. 1947, 89-866; amd. Sec. 1, Ch. 497, L. 1997.

85-2-102. Definitions. Unless the context requires otherwise, in this chapter, the following definitions apply:

(1) "Appropriate" or "appropriation" means:

(a) to divert, impound, or withdraw, including by stock for stock water, a quantity of water for a beneficial use;

(b) in the case of a public agency, to reserve water in accordance with 85-2-316;

(c) in the case of the department of fish, wildlife, and parks, to change an appropriation right to instream flow to protect, maintain, or enhance streamflows to benefit the fishery resource in accordance with 85-2-436;

(d) in the case of the United States department of agriculture, forest service:

(i) instream flows and in situ use of water created in 85-20-1401, Article V; or

(ii) to change an appropriation right to divert or withdraw water under subsection (1)(a) to instream flow to protect, maintain, or enhance streamflows in accordance with 85-2-320;

(e) temporary changes or leases for instream flow to maintain or enhance instream flow to benefit the fishery resource in accordance with 85-2-408;

(f) a use of water for aquifer recharge or mitigation; or

(g) a use of water for an aquifer storage and recovery project as provided in 85-2-368.

(2) "Appropriation right" has the same meaning as "water right" as defined in this section.

(3) "Aquifer recharge" means either the controlled subsurface addition of water directly to the aquifer or controlled application of water to the ground surface for the purpose of replenishing the aquifer to offset adverse effects resulting from net depletion of surface water.

(4) "Aquifer storage and recovery project" means a project involving the use of an aquifer to temporarily store water through various means, including but not limited to injection, surface spreading and infiltration, drain fields, or another department-approved method. The stored water may be either pumped from the injection well or other wells for beneficial use or allowed to naturally drain away for a beneficial use.

(5) "Beneficial use", unless otherwise provided, means:

(a) a use of water for the benefit of the appropriator, other persons, or the public, including but not limited to agricultural, stock water, domestic, fish and wildlife, industrial, irrigation, mining, municipal, power, and recreational uses;

(b) a use of water appropriated by the department for the state water leasing program under 85-2-141 and of water leased under a valid lease issued by the department under 85-2-141;

(c) a use of water by the department of fish, wildlife, and parks through a change in an appropriation right for instream flow to protect, maintain, or enhance streamflows to benefit the fishery resource authorized under 85-2-436;

(d) a use of water through a temporary change in appropriation right or lease to enhance instream flow to benefit the fishery resource in accordance with 85-2-408;

(e) a use of water through a temporary lease of an appropriation right approved by the department pursuant to 85-2-428;

(f) a use of water for aquifer recharge or mitigation; or

(g) a use of water for an aquifer storage and recovery project as provided in 85-2-368.

(6) "Certificate" means a certificate of water right issued by the department.

(7) (a) "Change in appropriation right" means a change in the place of diversion, the place of use, the purpose of use, or the place of storage.

(b) The term does not include a change in water use related to the method of irrigation.

(8) "Commission" means the fish and wildlife commission provided for in 2-15-3402.

(9) "Correct and complete" means that the information required to be submitted conforms to the standard of substantial credible information and that all of the necessary parts of the form requiring the information have been filled in with the required information for the department to begin evaluating the information.

(10) "Declaration" means the declaration of an existing right filed with the department under section 8, Chapter 452, Laws of 1973.

(11) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(12) "Developed spring" means any point where ground water emerges naturally, that has subsequently been physically altered, and from which ground water flows under natural pressures or is artificially withdrawn.

(13) "Existing right" or "existing water right" means a right to the use of water that would be protected under the law as it existed prior to July 1, 1973. The term includes federal non-Indian and Indian reserved water rights created under federal law and water rights created under state law.

(14) "Ground water" means any water that is beneath the ground surface.

(15) "Late claim" means a claim to an existing right forfeited pursuant to the conclusive presumption of abandonment under 85-2-226.

(16) "Mitigation" means the reallocation of surface water or ground water through a change in appropriation right or other means that does not result in surface water being introduced into an aquifer through aquifer recharge to offset adverse effects resulting from net depletion of surface water.

(17) "Municipality" means an incorporated city or town organized and incorporated under Title 7, chapter 2.

(18) (a) "National forest system lands" means all lands within Montana that are owned by the United States and administered by the secretary of agriculture through the forest service.

(b) The term does not include any lands within the exterior boundaries of national forest system units that are not owned by the United States and administered by the secretary of agriculture through the forest service.

(19) "Nonconsumptive use" means a beneficial use of water that does not cause a reduction in the source of supply and in which substantially all of the water returns without delay to the source of supply, causing little or no disruption in stream conditions.

(20) "Permit" means the permit to appropriate issued by the department under 85-2-301 through 85-2-303 and 85-2-306 through 85-2-314.

(21) "Person" means an individual, association, partnership, corporation, state agency, political subdivision, the United States or any agency of the United States, or any other entity.

(22) (a) "Political subdivision" means any county, incorporated city or town, public corporation, or district created pursuant to state law or other public body of the state empowered to appropriate water.

(b) The term does not mean a private corporation, association, or group.

(23) "Salvage" means to make water available for beneficial use from an existing valid appropriation through application of water-saving methods.

(24) "State water reservation" means a water right created under state law after July 1, 1973, that reserves water for existing or future beneficial uses or that maintains a minimum flow, level, or quality of water throughout the year or at periods or for defined lengths of time.

(25) "Stream depletion zone" means an area where hydrogeologic modeling concludes that as a result of a ground water withdrawal, the surface water would be depleted by a rate equal to at least 30% of the ground water withdrawn within 30 days after the first day a well or developed spring is pumped at a rate of 35 gallons a minute.

(26) "Substantial credible information" means probable, believable facts sufficient to support a reasonable legal theory upon which the department should proceed with the action requested by the person providing the information.

(27) "Waste" means the unreasonable loss of water through the design or negligent operation of an appropriation or water distribution facility or the application of water to anything but a beneficial use.

(28) "Water" means all water of the state, surface and subsurface, regardless of its character or manner of occurrence, including but not limited to geothermal water, diffuse surface water, and sewage effluent.

(29) "Water division" means a drainage basin as defined in 3-7-102.

(30) "Water judge" means a judge as provided for in Title 3, chapter 7.

(31) "Water master" means a master as provided for in Title 3, chapter 7.

(32) (a) "Water right" means the right to appropriate water pursuant to an existing right, a permit, a certificate of water right, a state water reservation, or a compact.

(b) The term does not include an authorized notice of intent to appropriate groundwater pursuant to 85-2-306.

(33) "Watercourse" means any naturally occurring stream or river from which water is diverted for beneficial uses. It does not include ditches, culverts, or other constructed waterways.

(34) "Well" means any artificial opening or excavation in the ground, however made, by which ground water is sought or can be obtained or through which it flows under natural pressures or is artificially withdrawn.

Compiler's Comments

2025 Amendments — Composite Section: See 2025 Session Law for amendment made by sec. 2, Ch. 347, L. 2025. Amendment effective October 1, 2025.

See 2025 Session Law for amendment made by sec. 6, Ch. 708, L. 2025. Amendment effective January 1, 2026.

Applicability: Section 9, Ch. 708, L. 2025, provided: "[This act] applies to subdivisions that are reviewed pursuant to Title 76, chapter 3, on or after [the effective date of this act]." Effective January 1, 2026.

85-2-103. Measurement of water. (1) After July 1, 1899, a cubic foot of water (7.48 gallons) per second of time shall be the legal standard for the measurement of water in this state.

(2) Where water rights expressed in statutory or miner's inches have been granted, 100 statutory or miner's inches shall be considered equivalent to a flow of 2.5 cubic feet (18.7 gallons) per second, 200 statutory or miner's inches shall be considered equivalent to a flow of 5 cubic feet (37.4 gallons) per second, and this proportion shall be observed in determining the equivalent flow represented by any number of statutory or miner's inches.

(3) The provisions of this section shall not affect or change the measurement of water decreed by a court prior to July 1, 1899, but such decreed water shall be measured according to the law in force at the time such decree was made and entered.

85-2-105. Water policy interim committee duties. (1) The water policy interim committee established in 5-5-231 shall meet as often as necessary, including during the interim between sessions, to perform the duties specified within this section.

(2) On a continuing basis, the water policy interim committee may:

(a) advise the legislature on the adequacy of the state's water policy and on important state, regional, national, and international developments that affect Montana's water resources;

(b) oversee the policies and activities of the department, other state executive agencies, and other state institutions as those policies and activities affect the water resources of the state;

(c) assist with interagency coordination related to Montana's water resources; and

(d) communicate with the public on matters of water policy as well as the water resources of the state.

(3) On a regular basis, the water policy interim committee shall:

(a) analyze and comment on the state water plan required by 85-1-203, when filed by the department;

(b) analyze and comment on the report of the status of the state's renewable resource grant and loan program required by 85-1-621, when filed by the department;

(c) analyze and comment on water-related research undertaken by any state agency, institution, college, or university;

(d) analyze, verify, and comment on the adequacy of and information contained in the water information system maintained by the natural resource information system under 90-15-305; and

(e) provide recommendations and a report, if one is written, in accordance with 5-5-216 for studies completed by the committee.

85-2-106 through 85-2-110 reserved.

85-2-111. Department powers. (1) The department may:

(a) enter into agreements with federal, state, or local agencies necessary to carry out this chapter;

(b) apply for, accept, administer, and expend funds, grants, gifts, and loans from the federal government or any other public or private source for the purposes of this chapter.

(2) The department shall, pursuant to 85-20-1901 and 85-20-1902, recognize the jurisdiction of the Flathead reservation water management board over water rights, including permitting of new uses, changes of existing uses, enforcement of water right calls, and all aspects of enforcement within the exterior boundaries of the Flathead Indian reservation.

85-2-112. Department duties. The department shall:

(1) enforce and administer this chapter and rules adopted under 85-2-113, subject to the powers and duties of the supreme court under 3-7-204;

(2) prescribe procedures, forms, and requirements for applications, permits, certificates, claims of existing rights, and proceedings under this chapter and prescribe the information to

be contained in any application, claim of existing right, or other document to be filed with the department under this chapter not inconsistent with the requirements of this chapter;

(3) establish and keep in its Helena office a centralized record system of all existing rights and a public record of permits, certificates, claims of existing rights, applications, and other documents filed in its office under this chapter;

(4) cooperate with, assist, advise, and coordinate plans and activities with the federal, state, and local agencies in matters relating to this chapter;

(5) upon request by any person, cooperate with, assist, and advise that person in matters pertaining to measuring water or filing claims of existing rights with a district court under this chapter;

(6) adopt rules necessary to reject, modify, or condition permit applications in highly appropriated basins or subbasins as provided in 85-2-319.

Appropriations, permits, and certificates of water rights, Title 85, ch. 2, part 3.

85-2-113. Department powers and duties. (1) The department may prescribe fees or service charges for any public service rendered by the department under this chapter, including fees for the filing of applications or for the issuance of permits and certificates, for rulemaking hearings under 85-2-319, for administrative hearings conducted under this chapter, for investigations concerning permit revocation, for field verification of issued and completed permits, and for all change approvals. There may not be fees for any action taken by the department at the request of the water judge or for the issuance of certificates of existing rights.

(2) The department may adopt rules necessary to implement and carry out the purposes and provisions of this chapter. These rules may include but are not limited to rules to:

(a) govern the issuance and terms of interim permits authorizing an applicant for a regular permit under this chapter to begin appropriating water immediately, pending final approval or denial by the department of the application for a regular permit;

(b) require the owner or operator of appropriation facilities to install and maintain suitable controlling and measuring devices, except that the department may not require a meter on a water well outside of a controlled ground water area or proposed controlled ground water area unless the maximum appropriation of the well is in excess of the limitation contained in 85-2-306;

(c) require the owner or operator of appropriation facilities to report to the department the readings of measuring devices at reasonable intervals and to file reports on appropriations; and

(d) regulate the construction, use, and sealing of wells to prevent the waste, contamination, or pollution of ground water.

(3) The department shall adopt rules providing for and governing temporary emergency appropriations, including for emergency fire training and emergency fire-related operations, without prior application for a permit, necessary to protect lives or property.

(4) (a) The department shall adopt rules to require the owner or operator of an appropriation facility on a watercourse or portions of a watercourse identified as chronically dewatered by the department under 85-2-150 to acquire, install, and maintain a suitable controlling and measuring device no later than 2 years after designation of the watercourse or portions of the watercourse as chronically dewatered, except that when the department specifically finds that the installation of measuring devices along the entire watercourse or portions of the watercourse is not practicable within the 2-year deadline, it may establish a later deadline.

(b) For the purposes of subsection (4), an appropriation facility includes but is not limited to any method used to divert, impound, or withdraw water from a watercourse. Hydroelectric facilities that are using recognized methods of flow measurement, as determined by the department, are in compliance with subsection (4).

85-2-114. Judicial enforcement. (1) If the department ascertains, by a means reasonably considered sufficient by it, that a person is wasting water, using water unlawfully, preventing water from moving to another person having a prior right to use the water, or violating a provision of this chapter, it may petition the district court supervising the distribution of water among appropriators from the source to:

(a) regulate the controlling works of an appropriation as may be necessary to prevent the wasting or unlawful use of water or to secure water to a person having a prior right to its use;

(b) order the person wasting, unlawfully using, or interfering with another's rightful use of the water to cease and desist from doing so and to take steps that may be necessary to remedy the waste, unlawful use, or interference; or

(c) issue a temporary, preliminary, or permanent injunction to prevent a violation of this chapter. Notwithstanding the provisions of Title 27, chapter 19, part 3, a temporary restraining order must be granted if it clearly appears from the specific facts shown by affidavit or by the verified complaint that a provision of this chapter is being violated.

(2) Upon the issuance of an order or injunction, the department may attach to the controlling works a written notice, properly dated and signed, setting forth the fact that the controlling works have been properly regulated by it. The notice constitutes legal notice to all persons interested in the appropriation or distribution of the water.

(3) The department may also direct its own attorney or request the attorney general or county attorney to bring suit to enjoin the waste, unlawful use, interference, or violation.

(4) The county attorney or the attorney general may bring suit to enjoin the waste, unlawful use, interference, or violation or bring an action under 85-2-122(1) without being requested to do so by the department.

(5) A county attorney who takes action pursuant to subsection (3) or (4) may request assistance from the attorney general.

(6) When enforcing the provisions of this section, the department, the county attorney, and the attorney general shall give priority to protecting the water rights of a prior appropriator under an existing water right, a certificate, a permit, or a state water reservation.

(7) After considering the provisions of subsection (6), the department may attempt to obtain voluntary compliance through warning, conference, or any other appropriate means before petitioning the district court under subsection (1). An attempt to obtain voluntary compliance under this subsection must extend over a period of at least 7 days and may not exceed 30 working days.

(8) Pursuant to 85-20-1902, the provisions of this section do not apply within the exterior boundaries of the Flathead Indian reservation.

(9) The provisions of this section do not limit a water right owner from seeking relief, including injunctive relief, in district court under Title 27, chapter 19, or this chapter.

85-2-116. Legal assistance. (1) When requested by the department, the attorney general and the county attorneys within their respective counties shall perform legal services and conduct legal proceedings necessary to carry out the purposes of this chapter. The department may also employ legal counsel to enforce this chapter and to conduct proceedings under it.

(2) If an appropriator who is a citizen of Montana becomes involved in a controversy to which any agency of the federal government or another state is a party, the department may in its discretion intervene as a party or provide necessary legal assistance to the citizen of Montana.

History: **En. Sec. 35, Ch. 452, L. 1973; amd. Sec. 9, Ch. 460, L. 1977; R.C.M. 1947, 89-899.**

85-2-122. Penalties. (1) Except as provided in 85-2-410(6), a person who violates or refuses or neglects to comply with the provisions of 85-2-114, any order of the department, or any rule of the department is subject to a civil penalty not to exceed $1,000 per violation. Each day of violation constitutes a separate violation.

(2) Except as provided in subsection (3), fines collected by the department or a district court under subsection (1) must be deposited in the account established in 85-2-318 for use by the department in the enforcement of 85-2-114.

(3) If a fine is collected by an independent action brought by:

(a) the county attorney, the fine must be deposited in the general fund of the county; or

(b) the county attorney with assistance from the attorney general or by the attorney general, the fine must be deposited in the water right enforcement account created in 44-4-1101 and must be used to enforce the provisions of 85-2-114.

85-2-124. Costs and fees for environmental impact statements. (1) Whenever the department determines that the filing of an application or a combination of applications for a permit or approval under this chapter requires the preparation of an environmental impact statement as prescribed by the Montana Environmental Policy Act and the application or combination of applications involves the use of 4,000 or more acre-feet per year and 5.5 or more cubic feet per second of water, the applicant shall follow the process and shall pay to the department the costs or fees for the environmental impact statement as provided in Title 75, chapter 1, parts 1 and 2. The payment of costs and fees for the environmental impact statement must be deposited in the state special revenue fund to be used by the department only to comply with the Montana Environmental Policy Act in connection with the application or applications.

(2) Costs or fees as prescribed by this section may not be assessed against an applicant for a permit or approval if the applicant has also filed an application for a certificate of compliance pursuant to the Montana Major Facility Siting Act and the appropriation or use of water involved in the application or applications for permit or approval has been or will be studied by the department pursuant to that act.

(3) Failure to submit the costs or fees as required by this section voids the application or applications.

(4) The department may in its discretion rely upon the environmental studies, investigations, reports, and assessments made by any other state agency or any person, including any applicant, in the preparation of its environmental impact statement.

History: **En. 89-8-102.2 by Sec. 1, Ch. 356, L. 1975; amd. Sec. 1, Ch. 117, L. 1977; R.C.M. 1947, 89-8-102.2; amd. Sec. 1, Ch. 277, L. 1983; amd. Sec. 4, Ch. 448, L. 1983; amd. Sec. 6, Ch. 573, L. 1985; amd. Sec. 15, Ch. 217, L. 2003; amd. Sec. 19, Ch. 337, L. 2005.**

85-2-125. Recovery of costs and attorney fees by prevailing party. (1) If a final decision of the department on an application for a permit or a change in appropriation right is appealed to district court, the district court may award the prevailing party reasonable costs and attorney fees.

(2) The party obtaining injunctive relief in an action to enforce a water right must be awarded reasonable costs and attorney fees. For the purposes of this section, "enforce a water right" means an action by a party with a water right to enjoin the use of water by a person that does not have a water right.

85-2-131. Application for change of watercourse name. (1) All applications for the change of name of any watercourse or natural source of water supply, including natural streams, dry coulees, springs, lakes, rivers, or creeks which lie wholly within the limits of one county must be made to the district court of the county where the watercourse or other natural source of water supply, the name of which is proposed to be changed, or some part thereof is situated. The petition must state in ordinary and concise language:

(a) a description of the watercourse or other natural source of water supply, the name of which is proposed to be changed, identifying the same as near as may be by natural monuments;

(b) the present name of the stream or other natural source of water supply and the name to which the petitioners desire the same to be changed, together with the reasons for the desired change of name;

(c) the names of all persons or corporations owning real estate abutting upon or water rights upon the same whose titles appear of record in the office of the county clerk and recorder in the county in which the watercourse or other natural source of water supply, or some part thereof, is situated.

(2) The petition must be signed by not less than 10 owners of real property abutting upon said watercourse or other natural source of water supply or owning water rights upon the same.

(3) The insufficiency of the petition in any of the above respects shall not be held to defeat the jurisdiction of the court.

History: En. Sec. 1, Ch. 101, L. 1911; re-en. Sec. 9968, R.C.M. 1921; re-en. Sec. 9968, R.C.M. 1935; R.C.M. 1947, 93-100-6.

85-2-132. Change of watercourse name — public notice. When a petition under 85-2-131 is filed in the district court, the court or the judge shall designate some newspaper of general circulation in the county that is most likely to give all interested parties notice of the proceedings and shall order that notice be published in that newspaper as provided in this section. The judge may require any other notice that seems reasonable and shall fix a time at which objections to the granting of the petition for the change of name must be heard. A copy of the petition, together with a notice of the time set for hearing objections, must be published in the newspaper designated by the court or judge for that purpose at least once a week for 4 successive weeks, and other notice of the proceedings must be given that the court or judge may require.

History: En. Sec. 2, Ch. 101, L. 1911; re-en. Sec. 9969, R.C.M. 1921; re-en. Sec. 9969, R.C.M. 1935; R.C.M. 1947, 93-100-7; amd. Sec. 2755, Ch. 56, L. 2009.

Cross-References

Publication of legal notices, Title 18, ch. 7, part 2.

85-2-133. Change of watercourse name — hearing. At the time set for hearing or at any time prior thereto, objections may be filed by any person who can, in such objections, show to the court or judge good reason against such change of name. The application and the objections must be heard at such time as the court or judge may appoint. On hearing, the court or judge may examine on oath any of the petitioners, remonstrants, objectors, or other persons touching the application and may make an order changing the name or dismissing the application as to the court or judge may seem right and proper.

History: En. Sec. 3, Ch. 101, L. 1911; re-en. Sec. 9970, R.C.M. 1921; re-en. Sec. 9970, R.C.M. 1935; R.C.M. 1947, 93-100-8.

85-2-135 through 85-2-140 reserved.

85-2-141. Water leasing program. (1) There is a water leasing program administered by the department on behalf of the state of Montana.

(2) The department may acquire rights to water needed for leasing under this program:

(a) through appropriation of water in its own name;

(b) by agreement with or purchase from another holder of water rights; or

(c) by contract with the United States for water held in federal reservoirs as a means of protecting the state's interest in those waters.

(3) Water for leasing under the water leasing program must be obtained from the following sources:

(a) any existing or future reservoir in a basin concerning which a temporary preliminary decree, a preliminary decree under 85-2-231, or a final decree under 85-2-234 has been entered;

(b) Fort Peck, Tiber, Canyon Ferry, Hungry Horse, Koocanusa, or Yellowtail reservoir if a contract between the department and the federal government concerning the acquisition of water is in effect; and

(c) any other existing or future federal reservoir:

(i) located in a basin concerning which a temporary preliminary decree, a preliminary decree under 85-2-231, or a final decree under 85-2-234 has been entered; and

(ii) for which and for so long as there is a contract between the department and the federal government concerning the acquisition of water.

(4) (a) Subject to subsections (4)(b) and (4)(c), the department may lease up to 1 million acre-feet of water from the reservoirs identified in subsection (3)(b) to water users for beneficial uses in Montana.

(b) The department may lease up to 50,000 acre-feet of water from the reservoirs identified in subsection (3)(b) to water users for beneficial uses outside Montana.

(c) The total amount of water leased under this subsection (4) may not exceed 1 million acre-feet.

(5) The term of any lease may not exceed 50 years. A term may be extended up to another 50 years if the department again determines the desirability of leasing by applying the considerations in subsection (7). In making a redetermination, the department may require the completion of an environmental impact statement in accordance with subsection (6).

(6) The department shall require the completion of an environmental impact statement under the provisions of Title 75, chapter 1, for lease applications that would result in the consumption of 4,000 acre-feet a year or more and 5.5 cubic feet per second or more of water and for any other application for which an environmental impact statement is required by law. The department shall require the completion of an environmental impact statement whenever the cumulative effect of more than one application for a lease would constitute a probable significant environmental impact.

(7) Upon application by a person to lease water, the department shall make an initial determination of whether it is desirable for the department to lease water to the applicant. The determination of desirability must be made solely on the following considerations:

(a) the content of the environmental impact statement, if required;

(b) whether there is sufficient water available under the water leasing program; and

(c) whether the criteria, except as to legislative approval, set forth in 85-2-311 have been satisfied.

(8) The department shall for any lease agreement require commercially reasonable terms and conditions, which may include the requirement that up to 25% of the water to be leased be made available to a potential user for any beneficial use upon payment by the user of the costs of tapping into and removing water from the applicant's project. The department may differentiate in pricing, depending on the proposed beneficial use of the water.

(9) The lease of water or the use of water under a lease does not constitute a permit, as provided in 85-2-102, and does not establish a right to appropriate water within the meaning of Title 85, chapter 2, part 3.

(10) For purposes of the water leasing program established in this section, it is the intent of the legislature that the state act as a proprietor.

History: En. Sec. 13, Ch. 573, L. 1985; amd. Sec. 445, Ch. 418, L. 1995; amd. Sec. 1, Ch. 416, L. 2007.

Cross-References

Department powers over state waters, 85-1-204.

Department powers and duties, 85-2-113.

Restrictions on right to appropriate waters, 85-2-301.

Reserved water not subject to leasing program, 85-2-316.

85-2-142 through 85-2-144 reserved.

85-2-145. Removal of natural obstruction to exercise water right — consent or court ruling required. (1) A person who owns a water right but cannot exercise the right because a natural obstruction on another person's property prevents the flow of the water shall, in writing, seek consent from the landowner to remove the natural obstruction.

(2) The water right owner may remove the natural obstruction if the landowner consents in writing and the water right owner complies with applicable laws and regulations.

(3) If the landowner does not consent in writing to the removal of the natural obstruction, the water right owner may seek a declaration from district court that the removal of the natural obstruction would not harm the landowner and is necessary for the water right owner to exercise the water right.

(4) In seeking a district court declaration, the water right owner shall:

(a) agree to pay all costs of the removal;

(b) show that the utility of the landowner's property would not be lessened;

(c) show that the landowner would not incur additional, uncompensated burdens from the removal of the natural obstruction; and

(d) agree to comply with applicable laws and regulations.

(5) The landowner may present evidence showing that the removal is not necessary for the water right owner to exercise the right or that the provisions of subsection (4) could not be met if the removal is permitted.

(6) The court shall determine if the removal of the natural obstruction:

(a) is necessary for the water right owner to exercise the right; and

(b) would meet the provisions of subsection (4).

(7) If the court permits the removal, the court may require any conditions to ensure that the provisions of subsection (4) are met.

(8) The court may award court costs and attorney fees.

(9) Removal of a natural obstruction under this section does not impair any existing right of the landowner.

History: En. Sec. 1, Ch. 408, L. 2013.

85-2-146 through 85-2-149 reserved.

85-2-150. Chronically dewatered watercourse — identification. (1) Using the factors in subsection (2) as guidelines, the department, in consultation with other agencies and groups, shall identify chronically dewatered watercourses or portions of watercourses.

(2) The factors the department shall consider when identifying chronically dewatered watercourses or portions of watercourses include but are not limited to the:

(a) extent, duration, and frequency of the dewatering;

(b) impact of the dewatering on fish, wildlife, or other natural resources;

(c) particular species of fish and wildlife impacted;

(d) impact of dewatering on other off-stream uses, including but not limited to agricultural, industrial, municipal, and recreational uses;

(e) probable cause of the dewatering;

(f) existence of temporary or final decrees;

(g) history, if any, of conflict among water rights holders on the watercourse;

(h) practicality and reasonableness of installing measuring devices on diversions along the watercourse; and

(i) likelihood that the installation of measuring devices will significantly help to:

(i) solve the chronically dewatered condition of the watercourse; or

(ii) resolve conflicts among water rights holders on the watercourse.

History: En. Sec. 3, Ch. 543, L. 1991.

Cross-References

Department powers and duties, 85-2-113.

85-2-151 through 85-2-153 reserved.

85-2-154. Terminated. Sec. 7, Ch. 298, L. 2019.

History: En. Sec. 2, Ch. 298, L. 2019.

85-2-156. Policy considerations. (1) Article IX, section 3(3), of the Montana constitution declares that all surface, underground, flood, and atmospheric waters within the boundaries of the state are the property of the state for the use of its people and are subject to appropriation for beneficial uses as provided by law.

(2) The legal appropriation of water requires that the water be legally and physically available for appropriation.

(3) The measurement and monitoring of streamflow supports the state's ability to determine when water is physically and legally available to meet new demands while protecting existing water rights.

(4) The effective management and distribution of water depends on an accurate, real-time measurement of streamflow.

History: En. Sec. 1, Ch. 12, L. 2025.

Compiler's Comments

Effective Date: This section is effective October 1, 2025.

85-2-157. Intent. (1) The 2015 state water plan recognizes that improving Montana's water supply and distribution monitoring network improves the ability of water managers and water users to adjust to seasonal supply and demand imbalances as well as plan for longer-term imbalances associated with climate variability.

(2) It is the intent of the legislature to support local, state, and federal efforts and programs to collect and distribute timely and accurate information on Montana streamflows.

(3) The legislature recognizes that streamflow information is collected by numerous state and federal agencies and tribes to meet their statutory responsibilities.

(4) The legislature recognizes that streamflow information collected by state, tribal, and federal entities is critical to the administration of the Montana Water Use Act, distribution of water by decree, water supply planning for municipalities, and implementation of plans and agreements that address irrigation and agricultural uses and locally developed drought, fish habitat, or water supply objectives.

(5) The legislature recognizes it is in the public interest to support and encourage coordination in the collection and distribution of streamflow information.

85-2-212. Order by supreme court. (1) The Montana supreme court shall within 10 days of the filing of the petition by the attorney general issue an order to file a statement of a claim of an existing water right in substantially the following form:

"WATER RIGHTS ORDER

FAILURE TO FILE A CLAIM AS REQUIRED BY LAW WILL RESULT IN A CONCLUSIVE PRESUMPTION THAT THE WATER RIGHT OR CLAIMED WATER RIGHT HAS BEEN ABANDONED. (This introductory sentence shall be printed in not less than 12-point boldface type.) This order is notice of commencement of procedures for the general adjudication of existing rights to the use of water and of the requirement to file a claim for certain existing rights to the use of water. Every person, including but not limited to an individual, partnership, association, public or private corporation, city or other municipality, county, state agency or the state of Montana, and federal agency of the United States of America on its own behalf or as trustee for any Indian or Indian tribe, asserting a claim to an existing right to the use of water arising prior to July 1, 1973, is ordered to file a statement of claim to that right with the department no later than June 30, 1983. Claims for stock and individual as opposed to municipal domestic uses based upon instream flow or ground water sources are exempt from this requirement; however, claims for such uses may be voluntarily filed. Claims filed with the department in the Powder River basin in a declaration filed pursuant to the order of the department of natural resources and conservation or a district court issued pursuant to sections 8 and 9 of Chapter 452, Laws of 1973, or under sections 3 and 4 of Chapter 485, Laws of 1975, are also exempt.

For further information, contact the department of natural resources and conservation, Helena, Montana, for a copy of the law and an explanation of it."

(2) Upon petition of the attorney general, the Montana supreme court shall issue the order called for in subsection (1) with a shorter claim filing period of not less than 1 year, subject to extension not beyond June 30, 1983, by the Montana supreme court upon petition of the attorney general, in those basins or subbasins where state adjudication jurisdiction is being or is likely to be challenged.

History: En. Sec. 16, Ch. 697, L. 1979.

Cross-References

Water rights, Art. IX, sec. 3, Mont. Const.
Indian and federal water rights, Title 85, ch. 2, part 7.

85-2-213. Notice of order. To ensure that all persons who may claim an existing water right are notified of the requirement to file a claim of that right, the Montana supreme court shall give notice of the order as follows:

(1) It shall cause the order, printed in not less than 10-point type, to be placed in a prominent and conspicuous place in all daily newspapers of the state and in at least one newspaper published in each county of the state within 30 days after the Montana supreme court order as provided in 85-2-212.

(2) It shall cause the order, in writing, to be placed in a prominent and conspicuous location in each county courthouse in the state within 30 days after the Montana supreme court order as provided in 85-2-212.

(3) It shall provide copies of the order, in writing, to the press services with offices located in Helena within 30 days after the Montana supreme court order as provided in 85-2-212.

(4) It shall, under authority granted to the states by 43 U.S.C. 666, provide for service of the petition and order upon the United States attorney general or the attorney general's designated representative.

(5) It may also in its discretion give notice of the order in any other manner that will carry out the purposes of this section.

(6) It may also in its discretion order that the department or the water judge assist the Montana supreme court in carrying out this section.

History: En. Sec. 17, Ch. 697, L. 1979; amd. Sec. 3, Ch. 629, L. 1993; amd. Sec. 27, Ch. 389, L. 1999.

85-2-214. Commencement of action. (1) The action for the adjudication of all existing water rights under Title 3, chapter 7, Title 85, chapter 2, part 7, and this part is commenced with the issuing of the order by the Montana supreme court to file a statement of a claim of an existing water right as provided in 85-2-212. For each claim, the action is considered filed in the judicial district of the county in which the diversion is made or, if there is a claimed right with no diversion, in the judicial district of the county in which the use occurs.

(2) The water judge shall monitor the claim filing procedure for claims within the judge's water division and make orders necessary to ensure timely and accurate compliance with the claim filing procedure.

History: En. Secs. 6, 20, Ch. 697, L. 1979; amd. Sec. 2757, Ch. 56, L. 2009.

Cross-References

Water rights, Art. IX, sec. 3, Mont. Const.
Water Judges, Title 3, ch. 7, part 2.

85-2-215. Consolidation of matters. The water judge may consolidate all matters concerning the determination and interpretation of existing water rights within the water judge's division in any combination or groups of claims or matters for joint hearings or proceedings conducted by the water judge or water master in any location within the division. The water judge may make such consolidations as are necessary to administer the requirements of this part and part 7 in adjudicating claims of existing water rights.

History: En. Sec. 6, Ch. 697, L. 1979.

Cross-References

Water Courts, Title 3, ch. 7.

85-2-216. Venue for water rights determinations. All matters concerning the determination and interpretation of existing water rights shall be brought before or immediately transferred to the water judge in the proper water division unless witnesses have been sworn and testimony has been taken by a district court prior to the date of the Montana supreme court order as provided in 85-2-212.

History: En. Sec. 6, Ch. 697, L. 1979.

85-2-217. Suspension of adjudication. While negotiations for the conclusion of a compact under part 7 are being pursued, all proceedings to generally adjudicate reserved Indian water rights and federal reserved water rights of those tribes and federal agencies that are negotiating are suspended. The obligation to file water rights claims for those federal non-Indian and Indian reserved rights is also suspended. This suspension is effective until July 1, 2013, as long as negotiations are continuing or ratification of a completed compact is being sought. If approval by the state legislature and tribes or federal agencies has not been accomplished by July 1, 2013, the suspension must terminate on that date. Upon termination of the suspension of this part, the tribes and the federal agencies are subject to the special filing requirements of 85-2-702(3) and all other requirements of the state water adjudication system provided for in Title 85, chapter 2. Those tribes and federal agencies that choose not to negotiate their federal non-Indian and

Indian reserved water rights are subject to the full operation of the state adjudication system and may not benefit from the suspension provisions of this section.

Reserved Water Rights Compact Commission, 2-15-212.

85-2-218. Process and criteria for designating priority basins or subbasins. (1) The water judges and the department, in performing their functions in the adjudication process, shall give priority to basins or subbasins designated each biennium by the legislature. Basins or subbasins must be designated according to the following criteria:

(a) recurring water shortages within the basin or subbasin have resulted in urgent water rights controversies that require adjudication to determine relative rights;

(b) federal or Indian reserved rights are nearing determination, either by compact or adjudication, thus making adjudication of other rights in the basin or subbasin important for timely issuance of preliminary or final decrees;

(c) the basin or subbasin's location would help ensure efficient use of department and water court resources; and

(d) the adjudication process in the basin or subbasin is nearing the issuance of a decree.

(2) The water judge may designate a basin for priority adjudication upon petition of 100 or more persons who have filed claims within the basin or may designate a subbasin for priority adjudication upon petition of a majority of persons who have filed claims within the subbasin. However, the basin or subbasin may receive priority only if it meets one or more of the criteria in subsection (1).

(3) If adjudication work in one or more of the priority basins or subbasins has been completed or has been suspended for good cause, the water judge may select other basins or subbasins for priority adjudication based on the criteria in subsection (1).

History: En. Sec. 10, Ch. 651, L. 1987; amd. Sec. 2758, Ch. 56, L. 2009.

85-2-219 and 85-2-220 reserved.

85-2-221. Filing of claim of existing water right — filing late claim. (1) A person claiming an existing right, unless provided for under 85-2-222 or unless an earlier filing date is ordered as provided in 85-2-212, shall file with the department no later than June 30, 1983, a statement of claim for each water right asserted on a form provided by the department.

(2) The department shall file a copy of each statement of claim with the clerk of the district court for the judicial district in which the diversion is made or, if there is a claimed right with no diversion, the department shall file a copy of the statement of claim with the clerk of the district court of the judicial district in which the use occurs.

(3) Subject to certain terms and conditions, the legislature intends to provide for the remission of the forfeiture of existing rights to the use of water caused by the failure to comply with subsection (1). Accordingly, with respect only to a basin that has not been closed to further appropriation pursuant to a compact ratified by the legislature under part 7 of this chapter prior to July 1, 1993, a claim of an existing water right not filed with the department on or before April 30, 1982, may be filed with the department on or before July 1, 1996, on forms provided by the department. This section is not intended to prevent the filing of a late claim in addition to a claim of an existing water right filed on or before April 30, 1982, if and to the extent that the additional right claimed is not the same as the right that was the subject of a previous claim and is not an abandoned right. Claims must be physically submitted to the department or sent by United States mail, postmarked on or before the deadline set forth in this subsection, in order to be considered timely. The claims are then subject to adjudication by the district courts as any other claim of existing right. The claimant is then subject to all rights and obligations of any other party, except that:

(a) a late claim must be incorporated into the adjudication, subject to all proceedings that have taken place prior to the date of filing;

(b) the person filing a late claim may request that a decree previously entered be reopened or may object to matters previously determined on the merits by the water court only to the extent that the request or objection is otherwise authorized by law and is based on a claim of water right filed on or before April 30, 1982;

(c) a person filing a late claim does not have the right or standing to object to any water rights compact reached in accordance with part 7 of this chapter that is ratified by the legislature prior to July 1, 1993, except to the extent that right or standing to object exists based on a claim of water right filed on or before April 30, 1982, or to claim protection for the right represented in the late claim under any provision of such a compact that subordinates the use of a water right recognized in the compact to a right recognized under state law;

(d) if the water judge, following objection under 85-2-233, finds that the right represented in the late claim was the subject of a prior order or decree by the water judge or is otherwise without merit, the water judge shall award costs and reasonable attorney fees to the person or persons filing the objection;

(e) a right represented in a late claim is subordinate to all federal and Indian reserved water rights established by compact or decree under this chapter;

(f) unless a late claim either was placed in the United States mail and postmarked on or before April 30, 1982, or, if there is no evidence of the date of mailing, there is evidence of execution on or before April 30, 1982, and actual receipt by the department on or before May 7, 1982, the right represented in the claim is, in addition, subordinate to:

(i) rights represented in all valid, timely filed claims; and

(ii) rights represented in a permit or reservation of water issued under this chapter if and to the extent that the person holding the permit or reservation files an objection under this part and proves that the person holding the permit or reservation reasonably relied to the detriment of the person holding the permit or reservation upon the failure of the claimant to file a claim on or before April 30, 1982.

(4) The department and the district courts may not accept any statements of claim physically submitted or postmarked after July 1, 1996, and shall notify a person who files a claim after July 1, 1996, that the claim will not be accepted.

History: En. Sec. 11, Ch. 697, L. 1979; amd. Sec. 4, Ch. 629, L. 1993; amd. Sec. 2, Ch. 338, L. 2017.

Existing water rights, Art. IX, sec. 3, Mont. Const.
General duties of Clerk of District Court, 3-5-501.
Department duties, 85-2-112.

85-2-222. Definition — filing process — notice. (1) As used in this section, "exempt right" means those claims for existing rights for livestock and individual uses as opposed to municipal domestic uses based upon instream flow or ground water sources and claims for rights in the Powder River basin included in a declaration filed pursuant to the order of the department or a district court issued under sections 8 and 9 of Chapter 452, Laws of 1973, or under sections 3 and 4 of Chapter 485, Laws of 1975. An exempt right is exempt from the filing requirements of 85-2-221(1).

(2) A person claiming an exempt right:

(a) may file with the department no later than June 30, 2019, a statement of claim for each water right asserted;

(b) shall submit information required by 85-2-224(1) and (2) on a form provided by the department; and

(c) shall pay the fees pursuant to 85-2-225.

(3) A claim of an exempt right constitutes prima facie proof of its content.

(4) The provisions of 85-2-233, 85-2-243, and 85-2-248, as well as supreme court examination rules, apply to any statement of claim of an exempt right filed under this section.

(5) Failure to file a claim for an exempt right under this section:

(a) does not result in the forfeiture of an existing water right; and

(b) subordinates the existing right to all other water rights except those exempt rights for which a claim has not been filed.

(6) Notice of the filing deadline provided in subsection (2) must be published by the department once a week for 2 consecutive weeks in a daily newspaper of general county circulation. The notice must be clearly posted in each county courthouse. The department shall

send to the last-known address of each unique property owner a written notice of the filing deadline and a claim form at least once by July 1, 2017.

(7) The department may not accept any statements of claim submitted or postmarked after June 30, 2019. The department shall notify a person who files a claim after June 30, 2019, that the person's claim will not be accepted.

(8) All fees collected under this section must be deposited in the account established under 85-2-280.

History: En. Sec. 11, Ch. 697, L. 1979; amd. Sec. 1, Ch. 323, L. 2013; amd. Sec. 3, Ch. 338, L. 2017.

85-2-223. Public recreational uses. The department of fish, wildlife, and parks shall exclusively represent the public for purposes of establishing any prior and existing public recreational use in existing right determinations under this part, provided that the foregoing shall not exclude a federal governmental entity from representing the public for the purpose of establishing any prior and existing public recreational use in existing right determinations under this part. The foregoing shall not be construed in any manner as a legislative determination of whether or not a recreational use sought to be established prior to July 1, 1973, is or was a beneficial use.

History: En. Sec. 12, Ch. 697, L. 1979.

85-2-224. Statement of claim. (1) The statement of claim for each right arising under the laws of the state and for each right reserved under the laws of the United States that has been actually put to use must include substantially the following:

(a) the name and mailing address of the claimant;

(b) the name of the watercourse or water source from which the right to divert or make use of water is claimed, if available;

(c) the quantities of water and times of use claimed;

(d) the legal description, with reasonable certainty, of the point or points of diversion and places of use of waters;

(e) the purpose of use, including, if for irrigation, the number of acres irrigated;

(f) the approximate dates of first putting water to beneficial use for the various amounts and times claimed in subsection (1)(c); and

(g) the sworn statement that the claim set forth is true and correct to the best of claimant's knowledge and belief.

(2) A claimant filing a statement of claim under subsection (1) shall submit maps, plats, aerial photographs, decrees, pertinent portions of those documents, or other evidence in support of the claim. All maps, plats, or aerial photographs should show as nearly as possible to scale the point of diversion, place of use, place of storage, and other pertinent conveyance facilities.

(3) Any statement of claim for rights reserved under the laws of the United States that have not yet been put to use must include substantially the following:

(a) the name and mailing address of the claimant;

(b) the name of the watercourse or water source from which the right to divert or make use of water is claimed, if available;

(c) the quantities of water claimed;

(d) the priority date claimed;

(e) the laws of the United States on which the claim is based; and

(f) the sworn statement that the claim set forth is true and correct to the best of the claimant's knowledge and belief.

History: En. Sec. 13, Ch. 697, L. 1979; amd. Sec. 2, Ch. 667, L. 1985; amd. Sec. 2759, Ch. 56, L. 2009.

85-2-225. Filing fee — processing fee for remitted claims. (1) Each claim filed under 85-2-221 must be accompanied by a filing fee in the amount of $40, subject to the following exceptions:

(a) the total filing fees for all claims filed by one person in any one water court division may not exceed $480; and

(b) a filing fee is not required to accompany a claim of an existing right that is included in a decree of a court in the state of Montana and that is accompanied by a copy of that decree or pertinent portion of the decree.

(2) A claim that is exempt from the filing requirements of 85-2-221(1) but that is voluntarily filed must be accompanied by a filing fee in the amount of $40. Exempt claims for a single development with several uses if filed simultaneously may be accompanied by a filing fee in the amount of $40.

(3) (a) In addition to the filing fee set forth in subsection (1), each statement of claim filed under 85-2-221(3) must be accompanied by a processing fee in the amount of $150, which must be deposited in the general fund.

(b) The water judge shall assess against the late claimant all reasonable administrative costs and expenses that may be incurred by the court due to the filing of the late claim and the consideration of the objection, and the assessment must be deposited in the general fund.

(4) Each claim filed under 85-2-222 must be accompanied by a filing fee in the amount of $130, except that:

(a) the total filing fees for all claims under 85-2-222 filed by one person in any one water court division may not exceed $1,560; and

(b) a filing fee is not required to accompany a claim of an existing right that is included in a decree of a court in the state of Montana and that is accompanied by a copy of that decree or pertinent portion of the decree.

85-2-227. Claim to constitute prima facie evidence — relevant evidence — abandonment — criteria for presumption of municipal nonabandonment. (1) For purposes of adjudicating rights pursuant to this part, a claim of an existing right filed in accordance with 85-2-221 or an amended claim of existing right constitutes prima facie proof of its content until the issuance of a final decree. For purposes of administering water rights, the provisions of a temporary preliminary decree or a preliminary decree, as modified after objections and hearings, supersede a claim of existing right until a final decree is issued.

(2) A water judge may consider all relevant evidence in the determination and interpretation of existing water rights. Relevant evidence under this part may include admissible evidence arising before or after July 1, 1973.

(3) Subject to the provisions of subsection (4), a water judge may determine all or part of an existing water right to be abandoned based on a consideration of all admissible evidence that is relevant, including, without limitation, evidence relating to acts or intent occurring in whole or in part after July 1, 1973.

(4) In a determination of abandonment made under subsection (3), the legislature finds that a water right that is claimed for municipal use by a city, town, or other public or private entity that operates a public water supply system, as defined in 75-6-102, is presumed to not be abandoned if the city, town, or other private or public entity has used any part of the water right or municipal water supply and there is admissible evidence that the city, town, or other public or private entity also has:

(a) obtained a filtration waiver under the federal Safe Drinking Water Act, 42 U.S.C. 300(f), et seq.;

(b) acquired, constructed, or regularly maintained diversion or conveyance structures for the future municipal use of the water right;

(c) conducted a formal study, prepared by a registered professional engineer or qualified consulting firm, that includes a specific assessment that using the water right for municipal supply is feasible and that the amount of the water right is reasonable for foreseeable future needs; or

(d) maintained facilities connected to the municipal water supply system to apply the water right to:

(i) an emergency municipal water supply;

(ii) a supplemental municipal water supply; or

(iii) any other use approved by the department under Title 85, chapter 2, part 4.

Cross-References

Evidence, Title 26.

85-2-228. Federal reserved water rights with priority date of July 1, 1973, or later — process and adjudication — purpose. (1) The purpose of this section is to ensure that a federal reserved water right with a priority date of July 1, 1973, or later is subject to the same process and adjudication as a federal reserved water right with a priority date before July 1, 1973.

(2) Under authority granted to the states by 43 U.S.C. 666, a federal reserved water right that has a priority date of July 1, 1973, or later and that is asserted by a federal agency is subject to the claim filing requirements and all other applicable requirements of the state water adjudication system provided for in Title 85, chapter 2, parts 2 and 7.

(3) At the request of a federal agency, the reserved water rights compact commission may negotiate to conclude a compact under Title 85, chapter 2, part 7, for a federal reserved water right with a priority date of July 1, 1973, or later.

(4) Whenever necessary, a water judge may reopen any decree issued pursuant to Title 85, chapter 2, to process the asserted or negotiated federal reserved water right.

History: (1)En. Sec. 1, Ch. 343, L. 1991; (2) through (4)En. Sec. 2, Ch. 343, L. 1991; amd. Sec. 4, Ch. 497, L. 1997.

85-2-231. Temporary preliminary decree, preliminary decree, and supplemental preliminary decree. (1) A water judge may issue a temporary preliminary decree prior to the issuance of a preliminary decree if the temporary preliminary decree is necessary for the orderly adjudication or administration of water rights.

(2) (a) The water judge shall issue a preliminary decree. The preliminary decree must be based on:

(i) the statements of claim before the water judge, including all claims filed pursuant to 85-2-222 for a preliminary decree issued after June 30, 2019;

(ii) the data submitted by the department;

(iii) the contents of compacts approved by the Montana legislature and the tribe or federal agency or, lacking an approved compact, the filings for federal and Indian reserved rights; and

(iv) any additional data obtained by the water judge.

(b) The preliminary decree must be issued within 90 days after the close of the special filing period set out in 85-2-702(3) or as soon after the close of that period as is reasonably feasible.

(c) In a basin in which a water judge has issued a preliminary decree prior to July 1, 2019, the water judge shall issue a supplemental preliminary decree that includes but is not limited to claims for exempt rights, as defined in 85-2-222, that were not included in a preliminary decree and for which notice has not been provided under 85-2-233(6).

(d) The water judge may issue an interlocutory decree if an interlocutory decree is otherwise necessary for the orderly administration of water rights.

(3) A temporary preliminary decree may be issued for any hydrologically interrelated portion of a water division, including but not limited to a basin, subbasin, drainage, subdrainage, stream, or single source of supply of water, or any claim or group of claims at a time different from the issuance of other temporary preliminary decrees.

(4) The temporary preliminary decree, preliminary decree, or supplemental preliminary decree must contain the information and make the determinations, findings, and conclusions required for the final decree under 85-2-234.

(5) If the water judge is satisfied that the report of the water master meets the requirements for the preliminary decree and is satisfied with the conclusions contained in the report, the water judge shall adopt the report as the preliminary decree. If the water judge is not satisfied, the water judge may recommit the report to the master with instructions or modify the report and issue the preliminary decree.

(6) The department shall examine claims in basins that were verified rather than examined as ordered by the water court. The objection and hearing provisions of Title 85, chapter 2, part 2, apply to these claims. *(Subsection (6) terminates June 30, 2028—sec. 10, Ch. 269, L. 2015.)*

85-2-232. Availability of temporary preliminary decree, preliminary decree, or supplemental preliminary decree. (1) (a) The water judge shall send to the department a copy of a temporary preliminary decree, preliminary decree, or supplemental preliminary decree issued for a basin.

(b) The water judge shall serve by mail a notice of availability of the temporary preliminary decree, preliminary decree, or supplemental preliminary decree to each person who has filed a claim of existing right within the decreed basin or to that person's successor as documented in the department's records.

(c) The water judge shall also serve by mail a notice of availability of the temporary preliminary decree, preliminary decree, or supplemental preliminary decree to the purchaser under contract for deed, as defined in 70-20-115, of property in connection with which a claim of existing right has been filed within the decreed basin.

(d) In the Powder River basin, the water judge shall serve by mail a notice of availability of the temporary preliminary decree, preliminary decree, or supplemental preliminary decree to each person or to that person's successor as documented in the department's records, who has filed a declaration of an existing right.

(e) The water judge shall enclose with a notice required under subsections (1)(b) through (1)(d) an abstract of the disposition of the claimed or declared existing right of a person identified in this section or that person's successor as documented in the department's records.

(f) The notice of availability required under this section must also be served upon:

(i) those issued or having applied for and not having been denied a permit to beneficially use water within the decreed basin pursuant to Title 85, chapter 2, part 3;

(ii) those granted a reservation within the decreed basin pursuant to 85-2-316; or

(iii) other interested persons who request service of the notice from the water judge.

(g) When the water court provides notice to claimants of the opportunity to object, it shall include information explaining the right to appeal a water court decision as provided in 85-2-235.

(2) The clerk or person designated by the water judge to mail the notice shall make a general certificate of mailing certifying that a copy of the notice has been placed in the United States mail, postage prepaid, addressed to each party required to be served notice of the

temporary preliminary decree or preliminary decree. The certificate is conclusive evidence of legal notice of entry of decree.

(3) Notice of the availability of a preliminary decree or a supplemental preliminary decree must also be published at least once each week for 3 consecutive weeks in at least three newspapers of general circulation that cover the water division or divisions in which the decreed basin is located. This notice must be provided before the final decree for the basin is issued.

(4) A person may obtain a copy of the temporary preliminary decree, preliminary decree, or supplemental preliminary decree upon payment of a fee of $20 or the cost of printing, whichever is greater, to the water judge. The fee must be deposited in the state general fund.

85-2-233. Hearing on decrees or petition — procedure. (1) (a) For good cause shown and subject to the provisions of subsection (9), a hearing must be held before the water judge on any objection to a temporary preliminary decree, a preliminary decree, or a supplemental preliminary decree by:

(i) the department;

(ii) a person named in the temporary preliminary decree, preliminary decree, or supplemental preliminary decree;

(iii) any person within the basin entitled to receive notice under 85-2-232(1); or

(iv) any other person who claims rights to the use of water from sources in other basins that are hydrologically connected to the sources within the decreed basin and who would be entitled to receive notice under 85-2-232 if the claim or claims were from sources within the decreed basin.

(b) For the purposes of this subsection (1), "good cause shown" means a written statement showing that a person has an ownership, leasehold, economic, or clearly demonstrated particularized interest in an existing water right, permit, certificate, state water reservation under 85-2-316, or right to receive water through an irrigation project and that the person's interest has been affected by the decree.

(c) A person does not waive the right to object to a preliminary decree by failing to object to a temporary preliminary decree issued before March 28, 1997. However, a person may not raise an objection to a matter in a preliminary decree if that person was a party to the matter when the matter was previously litigated and resolved as the result of an objection raised in a temporary preliminary decree unless the objection is allowed for any of the following reasons:

(i) mistake, inadvertence, surprise, or excusable neglect;

(ii) newly discovered evidence that by due diligence could not have been discovered in time to move for a new trial under Rule 59(b), Montana Rules of Civil Procedure;

(iii) fraud, misrepresentation, or other misconduct of an adverse party;

(iv) the judgment is void; or

(v) any other reason justifying relief from the operation of the judgment.

(d) After March 28, 1997, a person may not raise an objection or counterobjection to a matter contained in a subsequent decree issued under this part if the matter was contained in a prior decree issued under this part for which there was an objection and counterobjection period unless the objection is allowed for any of the following reasons:

(i) mistake, inadvertence, surprise, or excusable neglect;

(ii) newly discovered evidence that by due diligence could not have been discovered at the close of the objection period set forth in subsection (2);

(iii) fraud, misrepresentation, or other misconduct of an adverse party;

(iv) the temporary preliminary decree is void; or

(v) any other reason justifying relief from the operation of the prior decree issued under this part. The fact that a prior owner of a water right did not object or counterobject at a prior decree stage may not be a basis for a subsequent owner of the water right to object or counterobject absent a finding that one of the provisions in this subsection (1)(d) applies.

(2) Objections must be filed with the water judge within 180 days after entry of the temporary preliminary decree, preliminary decree, or supplemental preliminary decree. The water judge may, for good cause shown, extend this time limit up to two additional 90-day periods if application for an extension is made prior to expiration of the original 180-day period or any extension of it.

(3) Upon expiration of the time for filing objections under subsection (2), the water judge shall notify each party whose claim received an objection that an objection was filed. The notice must set forth the name of each objector and must allow an additional 60 days for the party whose claim received an objection to file a counterobjection to the claim or claims of the objector. Counterobjections must be limited to those claims that are included within the particular decree issued by the court.

(4) Objections and counterobjections must specify the paragraphs and pages containing the findings and conclusions to which objection is made. The request must state the specific grounds and evidence on which the objections are based.

(5) (a) Upon expiration of the time for filing counterobjections under subsection (3), the water judge shall notify each party named in the temporary preliminary decree, preliminary decree, or supplemental preliminary decree or that person's successor as documented in the department records and shall notify the attorney general that objections and counterobjections have been filed. The water judge shall fix a day when all parties who wish to participate in future proceedings are required to appear or file a statement. The water judge shall then set a date for a hearing. The water judge may conduct individual or consolidated hearings. A hearing must be conducted in the same manner as for other civil actions. At the order of the water judge, a hearing may be conducted by the water master, who shall prepare a report of the hearing as provided in Rule 53(e), Montana Rules of Civil Procedure.

(b) In conducting hearings pursuant to this chapter, a water judge may require the parties to participate in settlement conferences or may assign the matter to a mediator. Any settlement reached by the parties is subject to review and approval by a water judge.

(6) (a) After the issuance of a temporary preliminary decree or preliminary decree, notice must be published once a week for 3 consecutive weeks in two newspapers of general circulation in the basin where the decree was issued for:

(i) a motion to amend a statement of claim that may adversely affect other water rights; or

(ii) a motion to amend a timely objection that may adversely affect other water rights.

(b) The notice must specify that any response or objection to the proposed amendment must be filed within 45 days of the date of the last notice.

(c) The water judge may order any additional notice of the motion as the water judge considers necessary.

(d) The costs of the notice required pursuant to this subsection must be borne by the moving party.

(7) Failure to object under subsection (1) to a compact negotiated and ratified under 85-2-702 or 85-2-703 bars any subsequent cause of action in the water court.

(8) If the court sustains an objection to a compact, it may declare the compact void. The agency of the United States, the tribe, or the United States on behalf of the tribe party to the compact is permitted 6 months after the court's determination to file a statement of claim, as provided in 85-2-224, and the court shall issue a new preliminary decree in accordance with 85-2-231. However, any party to a compact declared void may appeal from that determination in accordance with those procedures applicable to 85-2-235, and the filing of a notice of appeal stays the period for filing a statement of claim as required under this subsection.

(9) Upon petition by a claimant, the water court may grant a motion for dismissal to an objection to a temporary preliminary or preliminary decree if the objection pertains to an element of a water right that was previously decreed and if dismissal is consistent with common-law principles of issue and claim preclusion.

(10) The provisions of subsection (9) do not apply to issues arising after entry of the previous decree, including but not limited to the issues of abandonment, expansion of the water right, and reasonable diligence.

(11) All issue remarks, as defined in 85-2-250, must be finally resolved before the issuance of a final decree.

History: En. Sec. 23, Ch. 697, L. 1979; amd. Sec. 7, Ch. 268, L. 1981; amd. Sec. 4, Ch. 667, L. 1985; amd. Sec. 3, Ch. 605, L. 1989; amd. Sec. 2, Ch. 421, L. 1995; amd. Sec. 4, Ch. 174, L. 1997; amd. Sec. 6, Ch. 526, L. 2005; amd. Sec. 2, Ch. 323, L. 2013; amd. Sec. 1, Ch. 283, L. 2015; amd. Sec. 7, Ch. 338, L. 2017.

Duties of water masters, 3-7-311.
Administrative proceedings, 85-2-121.

85-2-234. Final decree. (1) The water judge shall, on the basis of the preliminary decree and any supplemental preliminary decree, on the basis of any hearing that may have been held, and on final resolution of all issue remarks, as defined in 85-2-250, enter a final decree affirming or modifying the preliminary decree.

(2) The terms of a compact negotiated and ratified under 85-2-702 must be included in the final decree without alteration unless an objection is sustained pursuant to 85-2-233. However, the court may not alter or amend any of the terms of a compact except with the prior written consent of the parties in accordance with applicable law.

(3) The final decree must establish the existing rights and priorities within the water judge's jurisdiction of persons who have filed a claim in accordance with 85-2-221 and 85-2-222, of persons required to file a declaration of existing rights in the Powder River basin pursuant to an order of the department or a district court issued under sections 8 and 9 of Chapter 452, Laws of 1973, and of any federal agency or Indian tribe possessing water rights arising under federal law, required by 85-2-702 to file claims.

(4) The final decree must establish, in a form determined to be appropriate by the water judge, one or more tabulations or lists of all water rights and their relative priorities.

(5) The final decree must state the findings of fact, along with any conclusions of law, upon which the existing rights and priorities of each person, federal agency, and Indian tribe named in the decree are based.

(6) For each person who is found to have an existing right arising under the laws of the state of Montana, the final decree must state:

(a) the name and post-office address of the owner of the right;

(b) the amount of water included in the right, as follows:

(i) by flow rate for direct flow rights, such as irrigation rights;

(ii) by volume for rights, such as stockpond and reservoir storage rights, and for rights that are not susceptible to measurement by flow rate; or

(iii) by flow rate and volume for rights that a water judge determines require both volume and flow rate to adequately administer the right;

(c) the date of priority of the right;

(d) the purpose for which the water included in the right is used;

(e) the place of use and a description of the land, if any, to which the right is appurtenant;

(f) the source of the water included in the right;

(g) the place and means of diversion;

(h) the inclusive dates during which the water is used each year;

(i) any other information necessary to fully define the nature and extent of the right.

(7) For each person, tribe, or federal agency possessing water rights arising under the laws of the United States, the final decree must state:

(a) the name and mailing address of the holder of the right;

(b) the source or sources of water included in the right;

(c) the quantity of water included in the right;

(d) the date of priority of the right;

(e) the purpose for which the water included in the right is currently used, if at all;

(f) the place of use and a description of the land, if any, to which the right is appurtenant;

(g) the place and means of diversion, if any; and

(h) any other information necessary to fully define the nature and extent of the right, including the terms of any compacts negotiated and ratified under 85-2-702.

(8) Clerical mistakes in a final decree may be corrected at any time on the initiative of the water judge or on the petition of any person who possesses a water right. The water judge

shall order the notice of a correction proceeding that the judge determines to be appropriate to advise all persons who may be affected by the correction. An order of the water judge making or denying a clerical correction is subject to appellate review.

85-2-237. *(Temporary)* **Reopening and review of decrees.** (1) After July 1, 1996, the water judges shall by order reopen and review, within the limits set forth by the procedures described in this section, all preliminary or final decrees:

(a) that have been issued but have not been noticed throughout the water divisions;

(b) for basins for which claims have been filed under 85-2-221(3); or

(c) for basins that were verified and not examined for which the water court has received a petition and has determined that examination is necessary as provided in 85-2-282 or the water court has issued an order for reexamination on its own initiative.

(2) (a) Each order must state that the water judge will reopen the decree or decrees and, upon a hearing, review the water court's determination of any claim in the decree or decrees if an objection to the claim has been filed for the purpose of protecting rights to the use of water from sources:

(i) within the basin for which the decree was entered; or

(ii) in other basins that are hydrologically connected to sources within the basin for which the decree was entered.

(b) A person may not raise an objection to a matter in a reopened decree if the person was a party to the matter when the matter was previously litigated and resolved as the result of the previous objection process, unless the objection is allowed for any of the following reasons:

(i) mistake, inadvertence, surprise, or excusable neglect;

(ii) newly discovered evidence that by due diligence could not have been discovered in time to move for a new trial under Rule 59(b), Montana Rules of Civil Procedure;

(iii) fraud, misrepresentation, or other misconduct of an adverse party;

(iv) the judgment is void;

(v) any other reason justifying relief from the operation of the judgment.

(c) The objection must be made in accordance with the procedure for filing objections under 85-2-233.

(3) The water judges shall serve notice by mail of the entry of the order providing for the reopening and review of a decree or decrees to the department and to the persons entitled to receive service of notice under 85-2-232(1).

(4) Notice of the reopening and review of a preliminary or final decree must also be published at least once each week for 3 consecutive weeks in at least three newspapers of general circulation that cover the water division or divisions in which the decreed basin is located.

(5) An objection may not cause a reopening and review of a claim unless the objection is filed with the appropriate water court within 180 days after the issuance of the order under subsection (1). This period of time may, for good cause shown, be extended by the water judge for up to two 90-day periods if an application for extension is made within the original 180-day period or any extension of it.

(6) The water judge shall provide notice to the claimant of any timely objection to the claim and, after further reasonable notice to the claimant, the objector or objectors, and other interested persons, set the matter for hearing. The water judge may conduct individual or consolidated hearings, and any hearing must be conducted according to the Montana Rules of Civil Procedure. On an order of the water judge, a hearing may be conducted by a water master, who shall prepare a report of the hearing as provided in Rule 53(e), Montana Rules of Civil Procedure.

(7) The water judge shall, on the basis of any hearing held on the matter, take action as warranted from the evidence, including dismissal of the objection or modification of the portion of the decree describing the contested claim.

(8) An order or decree modifying a previously issued final decree as a result of procedures described in this section may be appealed in the same manner as provided for an appeal taken from a final order of a district court.

(9) An order or decree modifying a previously issued preliminary decree as a result of procedures described in this section may be appealed under 85-2-235 when the preliminary decree has been made a final decree.

(10) An order requiring the department to examine a basin that was initially verified is limited to the types of claims in the basin that were identified in the petition as provided in 85-2-282 or the types of claims identified in an order that the water court issued on its own initiative. *(Terminates June 30, 2028—sec. 10, Ch. 269, L. 2015.)*

85-2-237. *(Effective July 1, 2028)* **Reopening and review of decrees.** (1) After July 1, 1996, the water judges shall by order reopen and review, within the limits set forth by the procedures described in this section, all preliminary or final decrees:

(a) that have been issued but have not been noticed throughout the water divisions; or

(b) for basins for which claims have been filed under 85-2-221(3).

(2) (a) Each order must state that the water judge will reopen the decree or decrees and, upon a hearing, review the water court's determination of any claim in the decree or decrees if an objection to the claim has been filed for the purpose of protecting rights to the use of water from sources:

(i) within the basin for which the decree was entered; or

(ii) in other basins that are hydrologically connected to sources within the basin for which the decree was entered.

(b) A person may not raise an objection to a matter in a reopened decree if the person was a party to the matter when the matter was previously litigated and resolved as the result of the previous objection process, unless the objection is allowed for any of the following reasons:

(i) mistake, inadvertence, surprise, or excusable neglect;

(ii) newly discovered evidence that by due diligence could not have been discovered in time to move for a new trial under Rule 59(b), Montana Rules of Civil Procedure;

(iii) fraud, misrepresentation, or other misconduct of an adverse party;

(iv) the judgment is void;

(v) any other reason justifying relief from the operation of the judgment.

(c) The objection must be made in accordance with the procedure for filing objections under 85-2-233.

(3) The water judges shall serve notice by mail of the entry of the order providing for the reopening and review of a decree or decrees to the department and to the persons entitled to receive service of notice under 85-2-232(1).

(4) Notice of the reopening and review of a preliminary or final decree must also be published at least once each week for 3 consecutive weeks in at least three newspapers of general circulation that cover the water division or divisions in which the decreed basin is located.

(5) No objection may cause a reopening and review of a claim unless the objection is filed with the appropriate water court within 180 days after the issuance of the order under subsection (1). This period of time may, for good cause shown, be extended by the water judge for up to two 90-day periods if an application for extension is made within the original 180-day period or any extension of it.

(6) The water judge shall provide notice to the claimant of any timely objection to the claim and, after further reasonable notice to the claimant, the objector or objectors, and other interested persons, set the matter for hearing. The water judge may conduct individual or consolidated hearings, and any hearing must be conducted according to the Montana Rules of Civil Procedure. On an order of the water judge, a hearing may be conducted by a water master, who shall prepare a report of the hearing as provided in Rule 53(e), Montana Rules of Civil Procedure.

(7) The water judge shall, on the basis of any hearing held on the matter, take action as warranted from the evidence, including dismissal of the objection or modification of the portion of the decree describing the contested claim.

(8) An order or decree modifying a previously issued final decree as a result of procedures described in this section may be appealed in the same manner as provided for an appeal taken from a final order of a district court.

(9) An order or decree modifying a previously issued preliminary decree as a result of procedures described in this section may be appealed under 85-2-235 when the preliminary decree has been made a final decree.

History: En. Sec. 1, Ch. 586, L. 1989; amd. Sec. 8, Ch. 629, L. 1993; amd. Sec. 13, Ch. 288, L. 2005; amd. Sec. 3, Ch. 269, L. 2015.

85-2-238 through 85-2-240 reserved.

85-2-241. Repealed. Sec. 38, Ch. 389, L. 1999.

History: En. Sec. 18, Ch. 697, L. 1979; amd. Sec. 1, Ch. 277, L. 1983.

85-2-242. Repealed. Sec. 12, Ch. 651, L. 1987.

History: En. Sec. 19, Ch. 697, L. 1979; amd. Sec. 1, Ch. 277, L. 1983.

85-2-243. Department assistance to water judges. (1) The department, subject to the direction of the water judge, shall:

(a) provide such information and assistance as may be required by the water judge to adjudicate claims of existing rights;

(b) establish information and assistance programs to aid claimants in the filing of claims for existing rights required by 85-2-221;

(c) conduct field investigations of claims that the water judge in consultation with the department determines warrant investigation; and

(d) provide the water judge with all information in its possession bearing upon existing rights, including all declarations filed with and all information gathered by the department with respect to existing rights in the Powder River basin.

(2) Department assistance to a water judge must be without cost to the judicial districts wholly or partly within the affected water division. Expenses incurred by the department under subsection (1) must be paid from the money appropriated to it for the adjudication program by the legislature to carry out its function under subsection (1) and when that appropriation is expended then the department is no longer required to provide further assistance.

History: **En. Sec. 21, Ch. 697, L. 1979; amd. Sec. 8, Ch. 651, L. 1987.**

Cross-References

Department duties, 85-2-112.

85-2-244 through 85-2-246 reserved.

85-2-247. Purpose. (1) Because the state of Montana is the owner of all water in the state, pursuant to Article IX, section 3, of the Montana constitution, the legislature recognizes that it is in the state's best interest to ensure that valid issues raised as a result of claims examination in the statewide adjudication of pre-July 1, 1973, water rights are resolved before a final decree is issued.

(2) If as a result of the examination or the prior verification conducted by the department an issue remark is attached to a claim, the information resulting in the issue remark and the issue remark must be weighed against the claimed water right.

History: **En. Sec. 1, Ch. 526, L. 2005.**

85-2-248. Resolution of issue remarks other than by objection. (1) In resolving issue remarks other than through the objection process provided for in 85-2-233, the water court shall proceed as provided in this section.

(2) All issue remarks to claims that are not resolved through the filing of an objection as provided in 85-2-233 must be resolved as provided in this section.

(3) The water court shall review each factual or legal issue remark not resolved as a result of the filing of an objection to determine if information in the claim file or information obtained by the court provides a sufficient basis to resolve the identified issue remark or to determine if the issue remark can be corrected as a clerical error.

(4) If an issue remark cannot be resolved pursuant to subsection (3), the water court shall notify the claimant in writing that each factual or legal issue remark must be resolved as provided in this section.

(5) (a) The water court shall require the claimant to confer with the department in an informal effort to resolve any identified issue remarks.

(b) If an issue remark is resolved to the satisfaction of the department and the claimant, the claimant, with the assistance of the department, shall prepare and file any documents that are needed to support the resolution. The department shall file a separate memorandum with its recommendation regarding the disposition of any issue remarks involved in the proposed resolution.

(c) If an issue remark is not resolved, the department shall file a notice with the water court informing the water court that the issue remark was not resolved.

(6) The water court shall schedule proceedings to resolve all issue remarks that remain unresolved pursuant to subsections (2) through (5). All proceedings must include the department pursuant to 85-2-243 and any parties appearing in opposition to the claim, including the attorney general if the attorney general has intervened.

(7) (a) If an unresolved issue remark involves nonperfection or abandonment, the water court shall join the state of Montana through the attorney general as a necessary party to resolve the issue remark. The water court shall notify the attorney general of the joinder.

(b) Except as provided in subsection (7)(a), for any claim containing an issue remark that has not been resolved pursuant to subsections (2) through (5), the attorney general may intervene as a matter of right.

(c) The attorney general may adopt rules to implement the responsibilities and duties of the attorney general imposed by this section.

(8) The water court shall hold an evidentiary hearing on any issue remark that remains unresolved pursuant to subsections (2) through (7).

(9) If a claimant fails to appear at a scheduled evidentiary hearing or fails to comply with an order issued by the water court in its review of issue remarks, the water court, upon motion or its own initiative, may, in its ruling:

(a) amend the elements of the claim to conform with the information in the claim file;

(b) amend the elements in the claim to conform with information obtained by the court;

(c) remove the issue remark; or

(d) terminate the claim.

(10) Following the conclusion of the evidentiary hearing and the expiration of any posthearing briefing schedule, the water court shall render its written decision.

(11) Any proposal by the claimant to resolve an issue remark without an evidentiary hearing must be in writing, signed by each owner of the claim at issue, and filed with the water court with any supporting documentation.

(12) The water court's decision on each issue remark that it reviews pursuant to this section must be documented in a master's report or water judge's order. The water court shall modify the abstract of each claim in accordance with its written decision and remove any applicable issue remark.

85-2-250. Definition. For the purposes of 85-2-247 through 85-2-249, "issue remark" means a statement added to an abstract of water right in a water court decree by the department or the water court to identify potential factual or legal issues associated with the claim. The term also includes "gray area remarks" that were the result of the verification process.

History: **En. Sec. 4, Ch. 526, L. 2005.**

85-2-251 through 85-2-269 reserved.

85-2-270. *(Temporary)* **Findings — purpose.** (1) The purpose of 85-2-271, 85-2-280 through 85-2-282, and this section is to:

(a) complete claims examination and the initial decree phase;

(b) reexamine claims in basins that were verified and were not subject to the supreme court examination rules when the water court has received a petition and issued an order pursuant to 85-2-282 or the water court has issued an order on its own initiative; and

(c) ensure that the product of the adjudication is enforceable decrees.

(2) With adequate funding, it is realistic and feasible for the department to complete claims examination and reexamination of verified basins for which the water court has received a petition and issued an order pursuant to 85-2-282 or the water court has issued an order on its own initiative by June 30, 2015. It is also realistic and feasible for the water court to issue a preliminary or temporary preliminary decree by June 30, 2024, for all basins in Montana. *(Terminates June 30, 2028—secs. 10, 11, Ch. 269, L. 2015.)*

Temporary preliminary, preliminary, and supplemental preliminary decrees, 85-2-231.

85-2-271. *(Temporary)* **Benchmarks — action taken if not met — claims examination priority.** (1) (a) The water court shall prioritize basins for the purpose of claims examination and reexamination by the department.

(b) The chief water judge has the authority to order that reexamination be completed for a certain basin in a higher priority than claims examination. If the chief water judge issues an order requiring the department to reexamine claims rather than examining claims, the number of claims that were reexamined must be counted against the amount of claims that the department is required to examine for that period.

(2) (a) The benchmarks that are provided in subsection (2)(b) must be met. If the benchmarks are not met, money for water adjudication may not be included in the department's base budget.

(b) The benchmarks are as follows:

(i) the department shall reexamine 10,000 verified claims by June 30, 2017;

(ii) the department shall reexamine 30,000 verified claims by June 30, 2019;

(iii) the department shall examine or reexamine 65,000 claims by June 30, 2022;

(iv) the department shall examine or reexamine 85,000 claims by June 30, 2023;

(v) the department shall examine or reexamine 95,000 claims by June 30, 2024; and

(vi) the department shall examine or reexamine all timely filed claims by June 30, 2025. *(Terminates June 30, 2028—secs. 10, 11, Ch. 269, L. 2015.)*

History: En. Sec. 2, Ch. 288, L. 2005; amd. Sec. 4, Ch. 319, L. 2007; amd. Sec. 5, Ch. 269, L. 2015; amd. Sec. 2, Ch. 154, L. 2021.

History: En. Sec. 6, Ch. 288, L. 2005.

85-2-280. *(Temporary)* **Water adjudication account.** (1) There is a water adjudication account within the state special revenue fund created in 17-2-102.

(2) By August 15 of each fiscal year, the state treasurer shall transfer the amount necessary when combined with available and unencumbered fund balance, to fund the amount appropriated by the legislature in the general appropriation act from the state general fund to the water adjudication account for the sole purpose of funding the water adjudication program within the department and the water court.

(3) Interest and income earnings on the water adjudication account must be deposited in the account and may not be transferred to any other account prior to June 30, 2028.

(4) Money remaining in the water adjudication account on June 30, 2028, must be transferred to the water right appropriation account provided for in 85-2-318.

(5) If the accountability benchmarks contained in 85-2-271 are not met, expenditures from the account in the previous biennium may not be included in the department's base budget, as defined in 17-7-102, for the current biennium. *(Terminates June 30, 2028—secs. 10, 11, Ch. 269, L. 2015.)*

History: En. Sec. 7, Ch. 288, L. 2005; amd. Sec. 5, Ch. 319, L. 2007; amd. Sec. 24, Ch. 486, L. 2009; amd. Sec. 6, Ch. 269, L. 2015; amd. Sec. 4, Ch. 119, L. 2023.

85-2-281. *(Temporary)* **Reporting requirements.** The department and the water court shall:

(1) provide quarterly reports to the water policy interim committee in accordance with 5-11-210 on:

(a) the progress of the adjudication on a basin-by-basin basis;

(b) the number of basins for which examination was completed during the reporting period;

(c) the number and type of decrees issued in the preceding year and in each quarter of the current year and an update on summary reports in review;

(d) the number of claims resolved each month in the preceding year;

(e) the percentage of claims resolved by basin, limited to basins under active review by the water court, after issuance of a decree and passage of the deadline of the notices of intent to appear; and

(f) compact status describing compacts approved by the water court and pending compacts;

(2) include a status report on the adjudication in their presentation to the applicable appropriation subcommittees during each legislative session including the number of basins for which examination was completed during the reporting period; and

(3) provide a budget that outlines how each of the entities will be funded in the next biennium, including general fund money and state special revenue funds. *(Terminates June 30, 2028—secs. 10, 11, Ch. 269, L. 2015.)*

History: En. Sec. 8, Ch. 288, L. 2005; amd. Sec. 7, Ch. 319, L. 2007; amd. Sec. 10, Ch. 122, L. 2015; amd. Secs. 7, 9, Ch. 269, L. 2015; amd. Sec. 119, Ch. 261, L. 2021.

85-2-282. *(Temporary)* **Examination of claims in verified basins.** (1) At any time prior to the issuance of a final decree, in basins that were evaluated using the verification process rather than the examination process, the owners of water rights in the basin or a specified area in the basin may petition the water court to examine claims in the basin or an area in the basin pursuant to the supreme court rules.

(2) The owners of at least 15% of the number of water rights affected by the proposed reexamination shall sign the petition.

(3) At a minimum, the petition must provide:

(a) the specific water right purpose or water right purposes to be examined; and

(b) the elements to be examined.

(4) (a) The water judge shall evaluate each petition and determine if reexamination is necessary to provide greater accuracy to the adjudication.

(b) The water judge may request public comment on the petition.

(5) If the water judge determines reexamination should be conducted, the water judge shall issue an order that provides:

(a) what water right purpose or water right purposes must be examined by the department;

(b) the elements to be examined;

(c) final disposition of the reexamination information developed by the department; and

(d) the timeframe in which the reexamination must be completed.

(6) The water court may issue an order requiring reexamination on its own initiative. The order must provide the information contained in subsection (5).

(7) Upon receipt of the reexamination information from the department, the water court shall notify the users in the basin or the specified area in the basin identified in the petition of the final results of the reexamination and shall notify them regarding further steps or actions being taken as a result of the reexamination.

(8) Any actions taken as a result of the reexamination must be conducted in accordance with this part. *(Terminates June 30, 2028—sec. 10, Ch. 269, L. 2015.)*

History: En. Sec. 9, Ch. 288, L. 2005; amd. Sec. 8, Ch. 269, L. 2015.

Part 3
Appropriations, Permits, and Certificates of Water Rights

Part Cross-References

Recreational use of streams, Title 23, ch. 2, part 3.

85-2-301. Right to appropriate — recognition and confirmation of permits issued after July 1, 1973. (1) After July 1, 1973, a person may not appropriate water except as provided in this chapter. A person may appropriate water only for a beneficial use.

(2) (a) Only the department may appropriate water by permit for transport outside the following river basins:

(i) the Clark Fork River and its tributaries to its confluence with Lake Pend Oreille in Idaho;

(ii) the Kootenai River and its tributaries to its confluence with Kootenay Lake in British Columbia;

(iii) the St. Mary River and its tributaries to its confluence with the Oldman River in Alberta;

(iv) the Little Missouri River and its tributaries to its confluence with Lake Sakakawea in North Dakota;

(v) the Missouri River and its tributaries to its confluence with the Yellowstone River in North Dakota; and

(vi) the Yellowstone River and its tributaries to its confluence with the Missouri River in North Dakota.

(b) The department may lease water subject to this subsection (2) under the provisions of 85-2-141.

(3) A right to appropriate water may not be acquired by any other method, including by adverse use, adverse possession, prescription, or estoppel. The method prescribed by this chapter is exclusive.

(4) All permit actions of the department after July 1, 1973, are recognized and confirmed subject to this part and any terms, conditions, and limitations placed on a permit by the department.

(5) Pursuant to 85-20-1902, the provisions of this section do not apply within the exterior boundaries of the Flathead Indian reservation.

History: En. Sec. 16, Ch. 452, L. 1973; amd. Sec. 2, Ch. 238, L. 1974; amd. Sec. 8, Ch. 485, L. 1975; amd. Sec. 4, Ch. 416, L. 1977; amd. Sec. 1, Ch. 470, L. 1977; R.C.M. 1947, 89-880(1); amd. Beneficial use defined, 85-2-102.
Penalties, 85-2-122.
Priority, 85-2-401.

85-2-302. *(Temporary)* **Application for permit or change in appropriation right.** (1) Except as provided in 85-2-306 and 85-2-369, a person may not appropriate water or commence construction of diversion, impoundment, withdrawal, or related distribution works unless the person applies for and receives a permit or an authorization for a change in appropriation right from the department.

(2) The department shall adopt rules:

(a) for the preapplication meeting process pursuant to subsection (3)(b);

(b) that are necessary to determine whether or not an application is correct and complete, based on the provisions applicable to issuance of a permit under this part or a change in appropriation right pursuant to Title 85, chapter 2, part 4; and

(c) in compliance with Title 2, chapter 4.

(3) (a) The application must be made on a form prescribed by the department. The department shall make the forms available through its offices.

(b) Prior to filing the application, an applicant may participate in a preapplication meeting with the department to discuss the application process. During this meeting, the applicant and the department will discuss the technical analyses to be completed for the application and if the applicant or the department will complete the technical analyses. A preapplication meeting must be documented on a form provided by the department and included with the application.

(4) (a) Subject to subsection (4)(b), the applicant shall submit a correct and complete application. The determination of whether an application is correct and complete must be based on rules adopted under subsection (2) that are in effect at the time the application is submitted.

(b) If an application is for a permit to appropriate water with a point of diversion, conveyance, or place of use on national forest system lands, the application is not correct and complete under this section until the applicant has submitted proof of any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water under the permit.

(c) If an application is for a permit or change in appropriation right from a shared point of a diversion or through a shared means of conveyance, the application is not correct and complete until the applicant submits proof to the department that a written notice of the application was provided to each owner of an appropriation right sharing the point of diversion or means of conveyance. For purposes of this subsection (4), "conveyance" means a canal, ditch, flume, pipeline, or other constructed waterway.

(5) (a) The department shall notify the applicant of any defects in an application within:

(i) 15 business days of receipt of the application if the applicant has participated in a preapplication meeting; or

(ii) 30 business days of receipt of the application if the applicant has not participated in a preapplication meeting.

(b) The defects in an application must be identified by reference to the rules adopted under subsection (2).

(c) If the department does not notify the applicant of any defects within the time allowed in subsection (5)(a), the application must be treated as a correct and complete application.

(6) (a) An applicant shall submit a deficiency response to the defects identified in subsection (5)(a) within 120 days of the date of initial notification of the defects. If the applicant does not provide a deficiency response within 120 days, the application must be terminated.

(b) The department shall determine if the application is correct and complete or terminate the application within 30 days of receipt of a deficiency response. An application not terminated within 30 days of the deficiency response is considered correct and complete.

(7) Pursuant to 85-20-1902, the provisions of this section do not apply within the exterior boundaries of the Flathead Indian reservation. *(Terminates June 30, 2031—sec. 9, Ch. 244, L. 2023.)*

85-2-302. *(Effective July 1, 2031)* **Application for permit or change in appropriation right.** (1) Except as provided in 85-2-306 and 85-2-369, a person may not appropriate water or commence construction of diversion, impoundment, withdrawal, or related distribution works unless the person applies for and receives a permit or an authorization for a change in appropriation right from the department.

(2) The department shall adopt rules that are necessary to determine whether or not an application is correct and complete, based on the provisions applicable to issuance of a permit under this part or a change in appropriation right pursuant to Title 85, chapter 2, part 4. The rules must be adopted in compliance with Title 2, chapter 4.

(3) The application must be made on a form prescribed by the department. The department shall make the forms available through its offices.

(4) (a) Subject to subsection (4)(b), the applicant shall submit a correct and complete application. The determination of whether an application is correct and complete must be based on rules adopted under subsection (2) that are in effect at the time the application is submitted.

(b) If an application is for a permit to appropriate water with a point of diversion, conveyance, or place of use on national forest system lands, the application is not correct and complete under this section until the applicant has submitted proof of any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water under the permit.

(c) If an application is for a permit or change in appropriation right from a shared point of a diversion or through a shared means of conveyance, the application is not correct and complete until the applicant submits proof to the department that a written notice of the application was provided to each owner of an appropriation right sharing the point of diversion or means of conveyance. For purposes of this subsection (4), "conveyance" means a canal, ditch, flume, pipeline, or other constructed waterway.

(5) The department shall notify the applicant of any defects in an application within 180 days. The defects must be identified by reference to the rules adopted under subsection (2). If the department does not notify the applicant of any defects within 180 days, the application must be treated as a correct and complete application.

(6) An application does not lose priority of filing because of defects if the application is corrected or completed within 120 days of the date of initial notification of the defects.

(7) An application not corrected or completed within 120 days of the date of initial notification of the defects is terminated.

(8) Pursuant to 85-20-1902, the provisions of this section do not apply within the exterior boundaries of the Flathead Indian reservation.

85-2-305. Appropriation permit for reservoir. A person intending to appropriate water by means of a reservoir shall apply for a permit as prescribed in this chapter.

History: En. Sec. 25, Ch. 452, L. 1973; R.C.M. 1947, 89-889.

85-2-306. Exceptions to permit requirements. (1) (a) Except as provided in subsection (1)(b), ground water may be appropriated only by a person who has a possessory interest in the property where the water is to be put to beneficial use and exclusive property rights in the ground water development works.

(b) If another person has rights in the ground water development works, water may be appropriated with the written consent of the person with those property rights or, if the ground water development works are on national forest system lands, with any prior written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water under the certificate.

(c) If the person does not have a possessory interest in the real property from which the ground water may be appropriated, the person shall provide to the owner of the real property written notification of the works and the person's intent to appropriate ground water from the works. The written notification must be provided to the landowner at least 30 days prior to constructing any associated works or, if no new or expanded works are proposed, 30 days prior to appropriating the water. The written notification under this subsection is a notice requirement only and does not create an easement in or over the real property where the ground water development works are located.

(2) Inside the boundaries of a controlled ground water area, ground water may be appropriated only:

(a) according to a permit received pursuant to 85-2-508; or

(b) according to the requirements of a rule promulgated pursuant to 85-2-506.

(3) (a) Outside the boundaries of a controlled ground water area, a permit is not required before appropriating ground water by means of a well or developed spring:

(i) when the appropriation is made by a local governmental fire agency organized under Title 7, chapter 33, and the appropriation is used only for emergency fire protection, emergency fire training, and emergency fire-related operations, which may include enclosed storage;

(ii) when a maximum appropriation of 350 gallons a minute or less is used in nonconsumptive geothermal heating or cooling exchange applications, all of the water extracted is returned without delay to the same source aquifer, and the distance between the extraction well and both the nearest existing well and the hydraulically connected surface waters is more than twice the distance between the extraction well and the injection well;

(iii) when the appropriation is outside a stream depletion zone, is 35 gallons a minute or less, and does not exceed 10 acre-feet a year, except that a combined appropriation from the same source by two or more wells or developed springs exceeding 10 acre-feet, regardless of the flow rate, requires a permit; or

(iv) when the appropriation is within a stream depletion zone, is 20 gallons a minute or less, and does not exceed 2 acre-feet a year, except that a combined appropriation from the same source by two or more wells or developed springs exceeding this limitation requires a permit.

(b) (i) Before appropriating groundwater by means of a well or developed spring pursuant to subsection (3)(a)(iii) or (3)(a)(iv), a person shall file with the department, on a form provided by the department, a correct and complete notice of intent to appropriate groundwater.

(ii) The department shall notify the person of any defects in the notice of intent to appropriate groundwater within 10 business days.

(iii) A notice of intent to appropriate groundwater that is not corrected and completed within 60 days of a notice of defects is terminated.

(iv) Within 10 business days of determining that a notice of intent to appropriate groundwater is correct and complete, the department shall review the notice for compliance with subsection (3)(a) and shall authorize or deny the notice of intent to appropriate groundwater. If the department denies the notice of intent to appropriate groundwater, the department shall include the reasons for the denial.

(v) Unless extended by the department, an appropriation under subsection (3) must be completed within 5 years from the date the notice of intent to appropriate groundwater is authorized. One extension may be granted by the department for up to 5 additional years. The request for an extension must be filed on a form provided by the department and must demonstrate that progress has been made toward putting the water to beneficial use.

(c) (i) Within 60 days of completion of the well or developed spring and appropriation of the ground water for beneficial use, the appropriator shall file a notice of completion with the department on a form provided by the department through its offices.

(ii) Water use by a public water supply system subject to Title 75, chapter 6, part 1, is considered perfected and the appropriation of water for beneficial use complete when construction of the public water supply system is finished, at which time a notice of completion may be filed and must include a copy of the approval of the public water supply system by the department of environmental quality. All water use by a public water supply system pursuant to subsection (3)(a)(iii) or (3)(a)(iv) must be measured using a totalizing metering device, and measurements must be reported annually on a form prescribed by the department. Noncompliance with metering and reporting requirements may result in a fine determined by the department.

(iii) On receipt of the notice of completion, the department shall review the notice and may, before issuing a certificate of water right, return a defective notice for correction or completion, together with the reasons for returning it. A correct and complete notice of completion for an appropriation under subsection (3)(a)(iii) or (3)(a)(iv) must establish that the appropriation was completed in substantial accordance with the notice of intent to appropriate groundwater authorized by the department under subsection (3)(b). A notice does not lose priority of filing because of defects if the notice is corrected, completed, and refiled with the department within 60 days of notification of defects.

(iv) If a notice is not corrected and completed within the time allowed, the department authorization expires and a new notice of intent to appropriate groundwater is required to use water under subsection (3)(a)(iii) or (3)(a)(iv).

(d) A certificate of water right may not be issued until a correct and complete notice has been filed with the department, including proof of landowner notification or a written federal special use authorization as necessary under subsection (1). The original of the certificate must be sent to the appropriator and a duplicate must be maintained in the department's centralized database. The date of filing of the notice of completion is the date of priority of the right.

(4) An appropriator of ground water by means of a well or developed spring first put to beneficial use between January 1, 1962, and July 1, 1973, who did not file a notice of completion, as required by laws in force prior to April 14, 1981, with the county clerk and recorder shall file a notice of completion, as provided in subsection (3), with the department to perfect the water right. The filing of a claim pursuant to 85-2-221 is sufficient notice of completion under this subsection. The priority date of the appropriation is the date of the filing of a notice, as provided in subsection (3), or the date of the filing of the claim of existing water right.

(5) An appropriation under subsection (4) is an existing right, and a permit is not required. However, the department shall acknowledge the receipt of a correct and complete filing of a notice of completion, except that for an appropriation of 35 gallons a minute or less, not to exceed 10 acre-feet a year, the department shall issue a certificate of water right. If a certificate is issued under this section, a certificate need not be issued under the adjudication proceedings provided for in 85-2-236.

(6) A permit is not required before constructing an impoundment or pit and appropriating water for use by livestock if:

(a) the maximum capacity of the impoundment or pit is less than 15 acre-feet;

(b) the appropriation is less than 30 acre-feet a year;

(c) the appropriation is from an ephemeral stream, an intermittent stream, or another source other than a perennial flowing stream; and

(d) the impoundment or pit is to be constructed on and will be accessible to a parcel of land that is owned or under the control of the applicant and that is 40 acres or larger.

(7) (a) Within 60 days after constructing an impoundment or pit, the appropriator shall apply for a permit as prescribed by this part. Subject to subsection (7)(b), upon receipt of a correct and complete application for a stock water provisional permit, the department shall automatically issue a provisional permit. If the department determines after a hearing that the rights of other appropriators have been or will be adversely affected, it may revoke the permit or require the permittee to modify the impoundment or pit and may then make the permit subject to terms, conditions, restrictions, or limitations that it considers necessary to protect the rights of other appropriators.

(b) If the impoundment or pit is on national forest system lands, an application is not correct and complete under this section until the applicant has submitted proof of any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water under the permit.

(8) A person may also appropriate water without applying for or prior to receiving a permit under rules adopted by the department under 85-2-113.

(9) Pursuant to 85-20-1902, the provisions of this section do not apply within the exterior boundaries of the Flathead Indian reservation.

Ground water, Title 85, ch. 2, part 5.

85-2-307. *(Temporary)* **Notice of receipt of application for permit or change in appropriation right — draft preliminary determination — extensions — updated draft preliminary determination — public comments — issuance of preliminary determination.** (1) On receipt of an application for a permit or a change in appropriation right, the department shall publish notice of receipt of the application on the department's website. The notice must be updated on the website when an application is determined to be correct and complete.

(2) Within 60 days of receiving a correct and complete application if the applicant has completed a preapplication meeting or within 120 days of receiving a correct and complete application if the applicant has not completed a preapplication meeting, the department:

(a) may meet with the applicant, the persons listed in subsection (4)(f), and persons who may claim standing pursuant to 85-2-308 to discuss the application;

(b) shall make a written draft preliminary determination as to whether or not the application satisfies the applicable criteria for issuance of a permit or change in appropriation right; and

(c) may include conditions in the written draft preliminary determination to satisfy applicable criteria for issuance of a permit or change in appropriation right.

(3) (a) An applicant has 15 business days from issuance of a draft preliminary determination to request an extension of time to submit additional information. The department may grant an extension of up to 180 days for the applicant to submit additional evidence. The department shall provide the applicant with written notice of the extension deadline.

(b) The department may revise its draft preliminary determination based on information received under subsection (3)(a). The department shall issue an updated draft preliminary determination within 60 days after the earliest date of:

(i) the extension deadline set pursuant to subsection (3)(a); or

(ii) the department's receipt of written notice from the applicant stating submittal of all additional information to the department is considered correct and complete.

(c) If the department's updated draft preliminary determination:

(i) is to deny the application, the department shall hold a hearing as provided in 85-2-310; or

(ii) is to grant the application or grant the application in modified form, the department shall provide notice of the opportunity to provide public comment pursuant to subsection (4).

(d) If the applicant does not request an extension of time, the department shall:

(i) provide notice of the draft preliminary determination to grant the application or grant the application in modified form and also provide notice of the opportunity to provide public comment pursuant to subsection (4); or

(ii) issue a preliminary determination to deny the application and hold a hearing as provided in 85-2-310.

(4) (a) The department shall prepare a notice of the opportunity to provide public comment on a draft preliminary determination or an updated draft preliminary determination issued for an application.

(b) The notice of the opportunity to provide public comment must:

(i) state that no more than 30 days after the date of publication, a person may file a public comment about the application with the department on a form provided by the department; and

(ii) contain facts pertinent to the application, including a summary of the draft preliminary determination and any conditions.

(c) The department shall publish the notice once in a newspaper of general circulation in the area of the source of the appropriation right and post the notice on the department website.

(d) A public comment must identify how one or more criteria for the issuance of a permit or a change in appropriation right is not adequately addressed in a draft preliminary determination issued for the application. The department may adopt additional rules for public comments.

(e) A person has standing to file a public comment pursuant to this section if the property, water rights, or interests of the person would be adversely affected by the proposed appropriation.

(f) Before the date of publication of the notice of the opportunity to provide public comment, the department shall also serve the notice by first-class mail on:

(i) an appropriator of water or applicant for or holder of a permit who, according to the records of the department, may be affected by the proposed appropriation;

(ii) any purchaser under contract for deed, as defined in 70-20-115, of property that, according to the records of the department, may be affected by the proposed appropriation; and

(iii) any public agency that has reserved waters in the source under 85-2-316.

(g) The department may, in its discretion, also serve notice on any state agency or other person the department feels may be interested in or affected by the proposed appropriation.

(h) The department shall file in its records proof of service by affidavit of the publisher in the case of notice by publication and by its own affidavit in the case of service by mail.

(5) (a) Within 30 days after the close of the period to provide public comment, the department shall consider the public comments, respond to the public comments, and issue a preliminary determination to grant the application, grant the application in modified form, or deny the application.

(b) If, after considering the public comments subject to subsection (5)(a), the department's preliminary determination is to:

(i) deny the application, the department shall hold a hearing as provided in 85-2-310; or

(ii) grant the application or grant the application in a modified form, a person may file an objection to an application pursuant to 85-2-308.

(c) If no public comments are received pursuant to subsection (4), the department's preliminary determination is adopted as the final determination. *(Terminates June 30, 2031—sec. 9, Ch. 244, L. 2023.)*

85-2-307. *(Effective July 1, 2031)* **Notice of application for permit or change in appropriation right.** (1) Upon receipt of an application for a permit or a change in appropriation right, the department shall publish notice of receipt of the application on the department's website.

(2) (a) Within 120 days of the receipt of a correct and complete application for a permit or change in appropriation right, the department:

(i) may meet informally with the applicant, the persons listed in subsection (2)(d), and persons who may claim standing pursuant to 85-2-308 to discuss the application;

(ii) shall make a written preliminary determination as to whether or not the application satisfies the applicable criteria for issuance of a permit or change in appropriation right; and

(iii) may include conditions in the written preliminary determination to satisfy applicable criteria for issuance of a permit or change in appropriation right.

(b) If the preliminary determination proposes to grant an application, the department shall prepare a notice containing the facts pertinent to the application, including the summary of the preliminary determination and any conditions, and shall publish the notice once in a newspaper of general circulation in the area of the source.

(c) If the preliminary determination proposes to deny an application, the process provided in 85-2-310 must be followed.

(d) Before the date of publication, the department shall also serve the notice by first-class mail upon:

(i) an appropriator of water or applicant for or holder of a permit who, according to the records of the department, may be affected by the proposed appropriation;

(ii) any purchaser under contract for deed, as defined in 70-20-115, of property that, according to the records of the department, may be affected by the proposed appropriation; and

(iii) any public agency that has reserved waters in the source under 85-2-316.

(e) The department may, in its discretion, also serve notice upon any state agency or other person the department feels may be interested in or affected by the proposed appropriation.

(f) The department shall file in its records proof of service by affidavit of the publisher in the case of notice by publication and by its own affidavit in the case of service by mail.

(3) The notice must state that by a date set by the department, not less than 15 days or more than 60 days after the date of publication, persons may file with the department written objections to the application.

History: En. Sec. 17, Ch. 452, L. 1973; amd. Sec. 9, Ch. 485, L. 1975; R.C.M. 1947, 89-881; amd. Sec. 2, Ch. 357, L. 1981; amd. Sec. 9, Ch. 448, L. 1983; amd. Sec. 29, Ch. 526, L. 1983; amd. Sec. 3, Ch. 535, L. 1987; amd. Sec. 3, Ch. 370, L. 1993; amd. Sec. 5, Ch. 70, L. 2005; amd. Sec. 2, Ch. 251, L. 2009; amd. Sec. 1, Ch. 52, L. 2015; amd. Sec. 2, Ch. 244, L. 2023; amd. Sec. 1, Ch. 13, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 13, L. 2025. Amendment effective February 27, 2025.

Cross-References

Publication of legal notices, Title 18, ch. 7, part 2.
Changes in appropriation rights, 85-2-402.
Transfer of appropriation rights, 85-2-403.

85-2-308. *(Temporary)* **Objections.** (1) (a) The department shall provide notice of the opportunity to object to a preliminary determination issued pursuant to 85-2-307(5). The notice must state that no more than 30 days after the date of publication of the notice, a person may file a written objection to the application with the department.

(b) A person who has standing pursuant to this section, including the applicant, may object only to issues already identified in a public comment properly filed with the department pursuant to 85-2-307(4) or raised in a hearing pursuant to 85-2-310.

(2) (a) An objection to an application under this chapter must be filed by the date specified by the department under subsection (1).

(b) The objection to an application for a permit must state the name and address of the objector and facts indicating that one or more of the criteria in 85-2-311 are not met.

(3) For an application for a change in appropriation rights, the objection must state the name and address of the objector and facts indicating that one or more of the criteria in 85-2-320, if applicable, 85-2-402, 85-2-407, 85-2-408, and 85-2-436, if applicable, are not met.

(4) A person has standing to file an objection under this section if the property, water rights, or interests of the objector would be adversely affected by the proposed appropriation.

(5) For an application for a reservation of water, the objection must state the name and address of the objector and facts indicating that one or more of the criteria in 85-2-316 are not met.

(6) An objector to an application under this chapter shall file a correct and complete objection on a form prescribed by the department within the time period stated on the public notice associated with the application. In order to assist both applicants and objectors, the department shall adopt rules in accordance with this chapter delineating the components of a correct and complete objection. For instream flow water rights for fish, wildlife, and recreation, the rules must require the objector to describe the reach or portion of the reach of the stream or river subject to the instream flow water right and the beneficial use that is adversely affected and to identify the point or points where the instream flow water right is measured and monitored. The department shall notify the objector of any defects in an objection. An objection not corrected or completed within 15 business days from the date of notification of the defects is terminated.

(7) An objection is valid if the objector has standing pursuant to subsection (4), has filed a correct and complete objection within the prescribed time period, and has stated the applicable information required under this section and rules of the department. *(Terminates June 30, 2031—sec. 9, Ch. 244, L. 2023.)*

85-2-308. *(Effective July 1, 2031)* **Objections.** (1) (a) An objection to an application under this chapter must be filed by the date specified by the department under 85-2-307(3).

(b) The objection to an application for a permit must state the name and address of the objector and facts indicating that one or more of the criteria in 85-2-311 are not met.

(2) For an application for a change in appropriation rights, the objection must state the name and address of the objector and facts indicating that one or more of the criteria in 85-2-320, if applicable, 85-2-402, 85-2-407, 85-2-408, and 85-2-436, if applicable, are not met.

(3) A person has standing to file an objection under this section if the property, water rights, or interests of the objector would be adversely affected by the proposed appropriation.

(4) For an application for a reservation of water, the objection must state the name and address of the objector and facts indicating that one or more of the criteria in 85-2-316 are not met.

(5) An objector to an application under this chapter shall file a correct and complete objection on a form prescribed by the department within the time period stated on the public notice associated with the application. In order to assist both applicants and objectors, the department shall adopt rules in accordance with this chapter delineating the components of a correct and complete objection. For instream flow water rights for fish, wildlife, and recreation, the rules must require the objector to describe the reach or portion of the reach of the stream or river subject to the instream flow water right and the beneficial use that is adversely affected and to identify the point or points where the instream flow water right is measured and monitored. The department shall notify the objector of any defects in an objection. An objection not corrected or completed within 15 days from the date of notification of the defects is terminated.

(6) An objection is valid if the objector has standing pursuant to subsection (3), has filed a correct and complete objection within the prescribed time period, and has stated the applicable information required under this section and rules of the department.

History: En. Sec. 18, Ch. 452, L. 1973; R.C.M. 1947, 89-882; amd. Sec. 10, Ch. 448, L. 1983; amd. Sec. 5, Ch. 805, L. 1991; amd. Sec. 4, Ch. 370, L. 1993; amd. Sec. 2, Ch. 422, L. 1999; amd. Sec. 2, Ch. 574, L. 2003; amd. Sec. 6, Ch. 70, L. 2005; amd. Sec. 6, Ch. 213, L. 2007; amd. Sec. 2, Ch. 448, L. 2007; amd. Sec. 3, Ch. 251, L. 2009; amd. Sec. 3, Ch. 244, L. 2023.

Changes in appropriation rights, 85-2-402.
Transfer of appropriation rights, 85-2-403.

85-2-309. Hearings on objections — jurisdiction. (1) If the department determines that an objection to an application for a permit under 85-2-311, an application for a change in appropriation right under 85-2-402, or a notice of change in appropriation right under 85-2-429 states a valid objection, it shall hold a contested case hearing, pursuant to Title 2, chapter 4, part 6, on the objection within 90 days from the date set by the department for the filing of objections after serving notice of the hearing by first-class mail upon the applicant and the objector, unless the department certifies an issue to the district court for determination by a water judge under subsection (2). The department may consolidate hearings if more than one objection is filed to an application. The department may extend the 90-day deadline for good cause shown or upon request of the applicant and all objectors. The department shall file in its records proof of the service by affidavit of the department.

(2) (a) At any time prior to commencement or before the conclusion of a hearing as provided in subsection (1), the department may in its discretion certify to the district court all factual and legal issues involving the adjudication or determination of the water rights at issue in the hearing, including but not limited to issues of abandonment, quantification, or relative priority dates. Certified controversies must be given priority by a water judge over all other adjudication matters.

(b) If the department fails to certify an issue as provided in this section after a timely request by a party to the hearing, the department shall include its denial to certify as part of the record of the hearing.

(c) Upon determination of the issues certified to it by the department, the court shall remand the matter to the department for further processing of the application under this chapter.

(3) Subsection (2) does not apply in the case of a matter considered at a hearing under this section pursuant to 85-2-316 or 85-2-322.

Duties of Chief Water Judge, 3-7-223.
Water Courts — jurisdiction, 3-7-501.
Administrative proceedings, 85-2-121.

85-2-310. *(Temporary)* **Action on application for permit or change in appropriation right.** (1) (a) If the department issues an updated draft preliminary determination or a preliminary determination to deny an application for a permit or a change in appropriation right under 85-2-307, unless the applicant withdraws the application, the department shall hold a hearing pursuant to 2-4-604 after serving notice of the hearing by first-class mail on the applicant for the applicant to show cause by a preponderance of the evidence as to why the permit or change in appropriation right should not be denied.

(b) (i) On request from the applicant, the department shall appoint a hearing examiner who did not participate in the preliminary determination.

(ii) The applicant may make only one request pursuant to this subsection (1)(b) for a different hearing examiner.

(c) A decision to deny a permit or change in appropriation right following a hearing under this subsection (1) is final.

(2) (a) A hearing under subsection (1) is limited to the evidence presented in support of the application considered by the department pursuant to 85-2-302 and 85-2-307.

(b) If the department determines at a hearing held under subsection (1) that an application may proceed as a draft preliminary determination to grant or a draft preliminary determination to grant in a modified form, then the department shall modify the draft preliminary determination consistent with the determination of the hearing and proceed to provide notice of the opportunity to provide public comment pursuant to 85-2-307(4).

(c) The department shall issue its determination on a hearing held under subsection (1) within 90 days of the close of the administrative record.

(3) If valid objections filed pursuant to 85-2-308 are not received on an application or if valid objections are unconditionally withdrawn and the department preliminarily determined to grant the permit or change in appropriation right, the department shall grant the permit or change in appropriation right as proposed in the preliminary determination pursuant to 85-2-307.

(4) If valid objections filed pursuant to 85-2-308 to an application are received and withdrawn with conditions stipulated with the applicant and the department preliminarily determined to grant the permit or change in appropriation right under 85-2-307, the department shall grant the permit or change in appropriation right subject to conditions as necessary to satisfy applicable criteria.

(5) The department shall deny, grant in a modified form, or grant with or without conditions a permit under 85-2-311 or a change in appropriation right under 85-2-402 by issuing a final determination within 90 days after the administrative record is closed for a hearing held pursuant to 85-2-309.

(6) If an application is to appropriate water with a point of diversion, conveyance, or place of use on national forest system lands, any application approved by the department is subject to any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of the water applied for and any terms, conditions, and limitations related to the use of water contained in any special use authorization required by federal law.

(7) The department may cease action on an application for a permit or change in appropriation right and return it to the applicant when it finds that the application is not in good faith or does not show a bona fide intent to appropriate water for a beneficial use. An application returned for either of these reasons must be accompanied by a statement of the reasons for which it was returned, and for a permit application there is not a right to a priority date based on the filing of the application. Returning an application pursuant to this subsection is a final decision of the department.

(8) For all applications filed after July 1, 1973, the department shall find that an application is not in good faith or does not show a bona fide intent to appropriate water for a beneficial use if:

(a) an application is not corrected and completed as required by 85-2-302;

(b) the appropriate filing fee is not paid;

(c) the application does not document:

(i) a beneficial use of water;

(ii) the proposed place of use of all water applied for;

(iii) for an appropriation of 4,000 acre-feet a year or more and 5.5 cubic feet per second or more, a detailed project plan describing when and how much water will be put to a beneficial use. The project plan must include a reasonable timeline for the completion of the project and the actual application of the water to a beneficial use.

(iv) for appropriations not covered in subsection (8)(c)(iii), a general project plan stating when and how much water will be put to a beneficial use; and

(v) except as provided in subsection (9), if the water applied for is to be appropriated above that which will be used solely by the applicant or if it will be marketed by the applicant to other users, information detailing:

(A) each person who will use the water and the amount of water each person will use;

(B) the proposed place of use of all water by each person;

(C) the nature of the relationship between the applicant and each person using the water; and

(D) each firm contractual agreement for the specified amount of water for each person using the water; or

(d) the appropriate environmental impact statement costs or fees, if any, are not paid as required by 85-2-124.

(9) If water applied for is to be marketed by the applicant to other users for the purpose of aquifer recharge or mitigation, the applicant is exempt from the provisions of subsection (8)(c)(v). The applicant shall provide information detailing the proposed place of use. *(Terminates June 30, 2031—sec. 9, Ch. 244, L. 2023.)*

85-2-310. *(Effective July 1, 2031)* **Action on application for permit or change in appropriation right.** (1) (a) If the department proposes to deny an application for a permit or a change in appropriation right under 85-2-307, unless the applicant withdraws the application, the department shall hold a hearing pursuant to 2-4-604 after serving notice of the hearing by first-class mail upon the applicant for the applicant to show cause by a preponderance of the evidence as to why the permit or change in appropriation right should not be denied.

(b) (i) Upon request from the applicant, the department shall appoint a hearing examiner who did not participate in the preliminary determination.

(ii) The applicant may make only one request pursuant to this subsection (1)(b) for a different hearing examiner.

(2) A proposal to grant a permit or change in appropriation right with or without conditions following a hearing on a proposal to deny the application must proceed as if the department proposed to grant the permit or change in appropriation right in its preliminary determination pursuant to 85-2-307.

(3) If valid objections are not received on an application or if valid objections are unconditionally withdrawn and the department preliminarily determined to grant the permit or change in appropriation right, the department shall grant the permit or change in appropriation right as proposed in the preliminary determination pursuant to 85-2-307.

(4) If valid objections to an application are received and withdrawn with conditions stipulated with the applicant and the department preliminarily determined to grant the permit or change in appropriation right, the department shall grant the permit or change in appropriation right subject to conditions as necessary to satisfy applicable criteria.

(5) The department shall deny or grant with or without conditions a permit under 85-2-311 or a change in appropriation right under 85-2-402 within 90 days after the administrative record is closed.

(6) If an application is to appropriate water with a point of diversion, conveyance, or place of use on national forest system lands, any application approved by the department is subject to any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of the water applied for and any terms, conditions, and limitations related to the use of water contained in any special use authorization required by federal law.

(7) (a) Except as provided in subsection (6), if the department proposes to grant a permit or change in appropriation right in modified form, the applicant must be given an opportunity to be heard. The addition of conditions or changes to conditions required for approval does not constitute a modification of the application.

(b) The department shall serve notice of a preliminary determination to grant a permit or change in appropriation right in a modified form by first-class mail upon the applicant, with a notice that the applicant may obtain a hearing pursuant to 2-4-604 to show cause by a preponderance of the evidence as to why the permit or change in appropriation right should not be preliminarily determined to be granted in the modified form by filing a request within 30 days after the notice is mailed. The notice must state that the permit or change in appropriation right will be preliminarily determined to be granted as modified unless a hearing is requested.

(8) The department may cease action upon an application for a permit or change in appropriation right and return it to the applicant when it finds that the application is not in good faith or does not show a bona fide intent to appropriate water for a beneficial use. An application returned for either of these reasons must be accompanied by a statement of the reasons for which it was returned, and for a permit application there is not a right to a priority date based upon the filing of the application. Returning an application pursuant to this subsection is a final decision of the department.

(9) For all applications filed after July 1, 1973, the department shall find that an application is not in good faith or does not show a bona fide intent to appropriate water for a beneficial use if:

(a) an application is not corrected and completed as required by 85-2-302;

(b) the appropriate filing fee is not paid;

(c) the application does not document:

(i) a beneficial use of water;

(ii) the proposed place of use of all water applied for;

(iii) for an appropriation of 4,000 acre-feet a year or more and 5.5 cubic feet per second or more, a detailed project plan describing when and how much water will be put to a beneficial use. The project plan must include a reasonable timeline for the completion of the project and the actual application of the water to a beneficial use.

(iv) for appropriations not covered in subsection (9)(c)(iii), a general project plan stating when and how much water will be put to a beneficial use; and

(v) except as provided in subsection (10), if the water applied for is to be appropriated above that which will be used solely by the applicant or if it will be marketed by the applicant to other users, information detailing:

(A) each person who will use the water and the amount of water each person will use;

(B) the proposed place of use of all water by each person;

(C) the nature of the relationship between the applicant and each person using the water; and

(D) each firm contractual agreement for the specified amount of water for each person using the water; or

(d) the appropriate environmental impact statement costs or fees, if any, are not paid as required by 85-2-124.

(10) If water applied for is to be marketed by the applicant to other users for the purpose of aquifer recharge or mitigation, the applicant is exempt from the provisions of subsection (9)(c)(v). The applicant must provide information detailing the proposed place of use.

Cross-References

Fees for environmental impact statements, 85-2-124.
Priority, 85-2-401.

85-2-311. Criteria for issuance of permit. (1) A permit may be issued under this part prior to the adjudication of existing water rights in a source of supply. In a permit proceeding under this part, there is no presumption that an applicant for a permit cannot meet the statutory criteria of this section prior to the adjudication of existing water rights pursuant to this chapter. In making a determination under this section, the department may not alter the terms and conditions of an existing water right or an issued certificate, permit, or state water reservation. Except as provided in subsections (3) and (4), the department shall issue a permit if the applicant proves by a preponderance of evidence that the following criteria are met:

(a) (i) there is water physically available at the proposed point of diversion in the amount that the applicant seeks to appropriate; and

(ii) water can reasonably be considered legally available during the period in which the applicant seeks to appropriate, in the amount requested, based on the records of the department and other evidence provided to the department. Legal availability is determined using an analysis involving the following factors:

(A) identification of physical water availability;

(B) identification of existing legal demands of water rights on the source of supply throughout the area of potential impact by the proposed use; and

(C) analysis of the evidence on physical water availability and the existing legal demands of water rights, including but not limited to a comparison of the physical water supply at the proposed point of diversion with the existing legal demands of water rights on the supply of water.

(b) the water rights of a prior appropriator under an existing water right, a certificate, a permit, or a state water reservation will not be adversely affected. In this subsection (1)(b), adverse effect must be determined based on a consideration of an applicant's plan for the exercise of the permit that demonstrates that the applicant's use of the water will be controlled so the water right of a prior appropriator will be satisfied. An applicant is not required to prove a lack of adverse effect for any water right identified in a written consent to approval filed pursuant to subsection (9) in connection with a permit application.

(c) the proposed means of diversion, construction, and operation of the appropriation works are adequate;

(d) the proposed use of water is a beneficial use;

(e) the applicant has a possessory interest or the written consent of the person with the possessory interest in the property where the water is to be put to beneficial use, or if the proposed use has a point of diversion, conveyance, or place of use on national forest system lands, the applicant has any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water under the permit;

(f) the water quality of a prior appropriator will not be adversely affected;

(g) the proposed use will be substantially in accordance with the classification of water set for the source of supply pursuant to 75-5-301(1); and

(h) the ability of a discharge permitholder to satisfy effluent limitations of a permit issued in accordance with Title 75, chapter 5, part 4, will not be adversely affected.

(2) The applicant is required to prove that the criteria in subsections (1)(f) through (1)(h) have been met only if a valid objection is filed. A valid objection must contain substantial credible information establishing to the satisfaction of the department that the criteria in subsection (1)(f), (1)(g), or (1)(h), as applicable, may not be met. For the criteria set forth in subsection (1)(g), only the department of environmental quality or a local water quality district established under Title 7, chapter 13, part 45, may file a valid objection.

(3) The department may not issue a permit for an appropriation of 4,000 or more acre-feet of water a year and 5.5 or more cubic feet per second of water unless the applicant proves by clear and convincing evidence that:

(a) the criteria in subsection (1) are met;

(b) the proposed appropriation is a reasonable use. A finding must be based on a consideration of the following:

(i) the existing legal demands of water rights on the state water supply, as well as projected legal demands of water rights, such as reservations of water for future beneficial purposes, including municipal water supplies, irrigation systems, and minimum streamflows for the protection of existing water rights and aquatic life;

(ii) the benefits to the applicant and the state;

(iii) the effects on the quantity and quality of water for existing beneficial uses in the source of supply;

(iv) the availability and feasibility of using low-quality water for the purpose for which application has been made;

(v) the effects on private property rights by any creation of or contribution to saline seep; and

(vi) the probable significant adverse environmental impacts of the proposed use of water as determined by the department pursuant to Title 75, chapter 1, or Title 75, chapter 20.

(4) (a) The state of Montana has long recognized the importance of conserving its public waters and the necessity to maintain adequate water supplies for the state's water requirements, including requirements for federal non-Indian and Indian reserved water rights held by the United States for federal reserved lands and in trust for the various Indian tribes within the state's boundaries. Although the state of Montana also recognizes that, under appropriate conditions, the out-of-state transportation and use of its public waters are not in conflict with the public welfare of its citizens or the conservation of its waters, the criteria in this subsection (4) must be met before out-of-state use may occur.

(b) The department may not issue a permit for the appropriation of water for withdrawal and transportation for use outside the state unless the applicant proves by clear and convincing evidence that:

(i) depending on the volume of water diverted or consumed, the applicable criteria and procedures of subsection (1) or (3) are met;

(ii) the proposed out-of-state use of water is not contrary to water conservation in Montana; and

(iii) the proposed out-of-state use of water is not otherwise detrimental to the public welfare of the citizens of Montana.

(c) In determining whether the applicant has proved by clear and convincing evidence that the requirements of subsections (4)(b)(ii) and (4)(b)(iii) are met, the department shall consider the following factors:

(i) whether there are present or projected water shortages within the state of Montana;

(ii) whether the water that is the subject of the application could feasibly be transported to alleviate water shortages within the state of Montana;

(iii) the supply and sources of water available to the applicant in the state where the applicant intends to use the water; and

(iv) the existing legal demands of water rights placed on the applicant's supply in the state where the applicant intends to use the water.

(d) When applying for a permit or a lease to withdraw and transport water for use outside the state, the applicant shall submit to and comply with the laws of the state of Montana governing the appropriation, lease, and use of water.

(5) Subject to 85-2-360, to meet the preponderance of evidence standard in this section, the applicant, in addition to other evidence demonstrating that the criteria of subsection (1) have been met, shall submit hydrologic or other evidence, including but not limited to water supply data, field reports, and other information developed by the applicant, the department, the U.S. geological survey, or the U.S. natural resources conservation service and other specific field studies.

(6) An appropriation, diversion, impoundment, use, restraint, or attempted appropriation, diversion, impoundment, use, or restraint contrary to the provisions of this section is invalid. An officer, agent, agency, or employee of the state may not knowingly permit, aid, or assist in any manner an unauthorized appropriation, diversion, impoundment, use, or other restraint. A person or corporation may not, directly or indirectly, personally or through an agent, officer, or employee, attempt to appropriate, divert, impound, use, or otherwise restrain or control waters within the boundaries of this state except in accordance with this section.

(7) The department may adopt rules to implement the provisions of this section.

(8) For an application for ground water in a basin closed pursuant to 85-2-319, 85-2-321, 85-2-330, 85-2-336, 85-2-341, 85-2-343, or 85-2-344, the applicant shall comply with the provisions of 85-2-360 in addition to the requirements of this section.

(9) The department may not conduct an adverse effects analysis on a water right if the water right holder files a written consent to approval of an application for a permit.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 1, Ch. 171, L. 2025. Amendment effective October 1, 2025.

Cross-References

Declaration of policy and purpose, 85-2-101.
Definition of beneficial use, 85-2-102.
Controlled ground water areas — permits to appropriate, 85-2-508.

85-2-312. Terms of permit. (1) (a) The department may issue a permit for less than the amount of water requested, but may not issue a permit for more water than is requested or than can be beneficially used without waste for the purpose stated in the application. The department may require modification of plans and specifications for the appropriation or related diversion or construction. The department may issue a permit subject to terms, conditions, restrictions, and limitations it considers necessary to satisfy the criteria listed in 85-2-311 and subject to subsection (1)(b), and it may issue temporary or seasonal permits. A permit must be issued subject to existing rights and any final determination of those rights made under this chapter.

(b) If the permit is for use of water with a point of diversion, conveyance, or place of use on national forest system lands, the permit is subject to any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of the water under the permit and any terms, conditions, and limitations related to the use of water contained in any special use authorization required by federal law.

(2) The department shall specify in the permit or in any authorized extension of time provided in subsection (3), the time limits for commencement of the appropriation works, completion of construction, and actual application of the water to the proposed beneficial use. In fixing those time limits, the department shall consider the cost and magnitude of the project, the engineering and physical features to be encountered, and, on projects designed for gradual development and gradually increased use of water, the time reasonably necessary for that gradual development and increased use. The department shall issue the permit or authorized extension of time subject to the terms, conditions, restrictions, and limitations it considers necessary to ensure that the work on the appropriation is commenced, conducted, and completed and that the water is actually applied in a timely manner to the beneficial use specified in the permit.

(3) The department shall by rule or by condition to a permit establish a process allowing for the extension of the time limits specified in the permit for commencement of the appropriation works, completion of construction, and actual application of water to the proposed beneficial use.

(4) (a) If commencement of the appropriation works, completion of construction, or the actual application of water to the proposed beneficial use is not completed within the time limit specified or within an extension of that time limit, the permit expires.

(b) The department shall reinstate an expired permit if the permittee files a written reinstatement request and a project completion notice on forms provided by the department. The reinstatement request and project completion notice must establish the amount of water actually applied to the proposed beneficial use prior to expiration of the permit. Reinstatement of an expired permit under this subsection (4)(b) may not exceed the amount of water actually applied to the proposed beneficial use under the terms of the permit prior to expiration of the permit.

(c) The department shall reinstate the full amount of water authorized by the expired permit, including any portion that was not actually applied to the proposed beneficial use prior to expiration of the permit, if the permittee:

(i) files a written reinstatement request with the department on a form provided by the department;

(ii) proves by clear and convincing evidence that the failure to comply with the permit time limit was the result of excusable neglect; and

(iii) demonstrates that the requirements for an extension of the time limit as set forth by rule or permit condition are satisfied.

(d) A written reinstatement request for an expired permit must be filed within 2 years of the expiration of the permit time limit.

(e) A permit must be reinstated no more than once pursuant to this subsection (4) if the criteria in this subsection (4) have been met. A reinstated permit under subsection (4)(c) must establish time limits for commencement of the appropriation works, completion of construction, and actual application of the water to the proposed beneficial use.

(5) The original of the permit must be sent to the permittee, and a copy must be kept in the office of the department in Helena. The department shall retain an expired permit in the centralized record system for 2 years.

Role and duties of County Clerk and Election Administrator, 7-4-2611.

85-2-313. Provisional permit. (1) A permit authorized prior to the issuance of a final decree pursuant to 85-2-234 in the basin where the permit is located is provisional and is subject to that final decree. A person may not obtain any vested right to an appropriation obtained under a provisional permit by virtue of construction of diversion works, purchase of equipment to apply water, planting of crops, or other action in which the permit would have been denied or modified if the final decree had been available to the department.

(2) (a) Within 60 days after the issuance of a final decree pursuant to 85-2-234, the department shall serve, by first-class mail, owners of record of existing water rights and provisional permits within the decreed basin with a notice of final decree and opportunity to petition for the reduction, modification, or revocation of a provisional permit located in the decreed basin.

(b) The department shall also provide notice to other interested persons who request service of the notice of final decree from the department.

(c) For basins in which a final decree was issued prior to January 1, 2026, the department shall provide notice by January 31, 2026, in accordance with subsections (2)(a) and (2)(b).

(3) (a) An owner of an existing water right in the decreed basin may file a correct and complete petition to reduce, modify, or revoke a provisional permit issued prior to the final decree in the subject basin. Within 180 days of issuance of the notice required under subsection (2), the petition must be:

(i) made on a form prescribed by the department;

(ii) filed with the department; and

(iii) served by first-class mail on all owners of record of the provisional permit.

(b) The department shall notify the petitioner of any defects in a petition within 60 days of the close of the petition period described in subsection (3)(a). A petition that is not corrected and completed within 30 days of the notice of the defects is terminated. If the department does not notify the petitioner of any defects within 60 days, the petition must be treated as correct and complete.

(c) The department shall provide notice of a correct and complete petition to the petitioner and each owner of record of the provisional permit identified in the petition by first-class mail. Within 60 days of the notice, the owner of a provisional permit identified in a petition may file a response to the petition with the department and serve the response on the petitioner by first-class mail.

(d) The petitioner shall prove by a preponderance of the evidence that:

(i) reduction, modification, or revocation of the provisional permit is necessary to protect the petitioner's existing water right determined in the final decree;

(ii) the provisional permit would have been denied or modified if the final decree had been available to the department; and

(iii) based on the findings of the final decree, water could not be considered legally available at the time of issuance of the permit.

(e) Within 120 days of the close of the 60-day response period provided in subsection (3)(c), the department shall deny the petition or propose to reduce, modify, or revoke the provisional permit based on the information in the petition, the response, the final decree, the records of the department, and other evidence submitted to the department. The department shall consider whether, based on the final decree, unappropriated waters or legally available water existed at the time the provisional permit was issued.

(i) If the department proposes to reduce, modify, or revoke a provisional permit, the department shall provide the owner of the provisional permit with an opportunity to show cause why the department should not take the proposed action. If the owner of the provisional permit fails to show sufficient cause, the department shall reduce, modify, or revoke the provisional permit in accordance with the department's findings and conclusions.

(ii) A department determination to deny a petition is final.

(4) If no petition to reduce, modify, or revoke a provisional permit is filed pursuant to subsection (3), the department shall issue a certificate of water right in accordance with 85-2-315.

Cross-References

Priority, 85-2-401.

85-2-314. Revocation or modification of permit or change in appropriation right. (1) (a) If the work on an appropriation is not commenced, prosecuted, or completed within the time stated in the permit or an extension of the time stated in the permit, if the water is not being applied to the beneficial use contemplated in the permit or change in appropriation right, or if the permit or change in appropriation right is otherwise not being followed, the department may, after notice, require the permittee or the holder of the change in appropriation right to show cause why the permit or change in appropriation right should not be modified or revoked.

(b) If the permittee or holder of the change in appropriation right fails to show sufficient cause, the department may modify or revoke the permit or change in appropriation right.

(2) (a) A permittee or holder of a change in appropriation right may petition the department to modify or remove a condition of approval or reduce the amount of the permit or change authorization.

(b) The petition must be submitted on a form designated by the department, is subject to the criteria of 85-2-311 and 85-2-402, and must be processed in the same manner as an application made pursuant to 85-2-302, 85-2-307 through 85-2-309, and 85-2-310(1) through (5) except that:

(i) the department may waive the public notice of a preliminary determination to grant the petition if the department finds, on the basis of information reasonably available to it, that the petition as proposed in the application will not adversely affect the rights of other appropriators;

(ii) if the department issues a preliminary determination to grant the petition and waives public notice, the determination becomes final;

(iii) the department may condition a preliminary determination to grant the petition in order to meet the criteria under 85-2-311 and 85-2-402; and

(iv) a preliminary determination to deny a petition is final. Denial of a petition does not affect the permit or change authorization.

85-2-315. Certificate of water right. (1) (a) On actual application of water to the proposed beneficial use within the time allowed, the permittee shall notify the department that the appropriation has been completed. The notification must contain a certified statement by a person with experience in the design, construction, or operation of appropriation works describing how the appropriation was completed. The department shall review the certified statement and may inspect the appropriation to verify whether the appropriation was completed in substantial accordance with the terms of the permit, including any reduction or modification pursuant to 85-2-313.

(b) If the department determines that the appropriation has been completed in substantial accordance with the terms, conditions, restrictions, and limitations of the permit approval and any reduction or modification pursuant to 85-2-313, the department shall issue a certificate of water right for the permit.

(c) If the department determines that the appropriation was not completed in substantial accordance with the terms, conditions, restrictions, and limitations of the permit approval, including any reduction or modification pursuant to 85-2-313, the department may, after notice, require the permittee to show cause why the permit should not be modified or revoked pursuant to 85-2-314.

(2) After a final decree is issued in a basin pursuant to 85-2-234, the department shall issue a certificate of water right for a change in appropriation right that is verified or modified pursuant to 85-2-402(9) and (10).

(3) The original of a certificate of water right must be sent to the owner of the permit or change in appropriation right, and a duplicate must be maintained in the department's centralized database.

85-2-316. State reservation of waters. (1) The state, any political subdivision or agency of the state, or the United States or any agency of the United States may apply to the department to acquire a state water reservation for existing or future beneficial uses or to maintain a minimum flow, level, or quality of water throughout the year or at periods or for a length of time that the department designates.

(2) (a) Water may be reserved for existing or future beneficial uses in the basin where it is reserved, as described by the following basins:

(i) the Clark Fork River and its tributaries to its confluence with Lake Pend Oreille in Idaho;

(ii) the Kootenai River and its tributaries to its confluence with Kootenay Lake in British Columbia;

(iii) the St. Mary River and its tributaries to its confluence with the Oldman River in Alberta;

(iv) the Little Missouri River and its tributaries to its confluence with Lake Sakakawea in North Dakota;

(v) the Missouri River and its tributaries to its confluence with the Yellowstone River in North Dakota; and

(vi) the Yellowstone River and its tributaries to its confluence with the Missouri River in North Dakota.

(b) A state water reservation may be made for an existing or future beneficial use outside the basin where the diversion occurs only if stored water is not reasonably available for water leasing under 85-2-141 and the proposed use would occur in a basin designated in subsection (2)(a).

(3) (a) The department shall adopt rules that are necessary to determine whether or not an application is correct and complete based on the provisions applicable to issuance of a state water reservation. The rules must be adopted in compliance with Title 2, chapter 4.

(b) An applicant shall submit a correct and complete application. The determination of whether an application is correct and complete must be based on rules adopted under this subsection (3) that are in effect at the time the application is submitted. The department shall proceed in accordance with 85-2-302 with regard to any defects in the application.

(c) The application must be made on a form prescribed by the department. The department shall make the forms available through its offices.

(d) Upon receiving a correct and complete application, the department shall proceed in accordance with 85-2-307 through 85-2-309. After the hearing provided for in 85-2-309, the department shall decide whether to reserve the water for the applicant. The department's costs of giving notice, holding the hearing, conducting investigations, and making records incurred in acting upon the application to reserve water, except the cost of salaries of the department's personnel, must be paid by the applicant. In addition, a reasonable proportion of the department's cost of preparing an environmental analysis must be paid by the applicant unless waived by the department upon a showing of good cause by the applicant.

(4) (a) Except as provided in 85-20-1401, the department shall issue a state water reservation if the applicant establishes to the department by a preponderance of evidence:

(i) the purpose of the reservation;

(ii) the need for the reservation;

(iii) the amount of water necessary for the purpose of the reservation;

(iv) that the reservation is in the public interest.

(b) In determining the public interest under subsection (4)(a)(iv), the department shall issue a water reservation for withdrawal and transport for use outside the state if the applicant proves by clear and convincing evidence that:

(i) the proposed out-of-state use of water is not contrary to water conservation in Montana; and

(ii) the proposed out-of-state use of water is not otherwise detrimental to the public welfare of the citizens of Montana.

(c) In determining whether the applicant has proved by clear and convincing evidence that the requirements of subsections (4)(b)(i) and (4)(b)(ii) are met, the department shall consider the following factors:

(i) whether there are present or projected water shortages within the state of Montana;

(ii) whether the water that is the subject of the application could feasibly be transported to alleviate water shortages within the state of Montana;

(iii) the supply and sources of water available to the applicant in the state where the applicant intends to use the water; and

(iv) the demands placed on the applicant's supply in the state where the applicant intends to use the water.

(d) When applying for a state water reservation to withdraw and transport water for use outside the state, the applicant shall submit to and comply with the laws of the state of Montana governing the appropriation, lease, use, and reservation of water.

(5) If the purpose of the state water reservation requires construction of a storage or diversion facility, the applicant shall establish to the department by a preponderance of evidence that there will be progress toward completion of the facility and accomplishment of the purpose with reasonable diligence in accordance with an established plan.

(6) (a) Upon issuing a state water reservation for the purpose of maintaining a minimum flow, level, or quality of water, the appropriation of water is complete.

(b) The department shall limit any state water reservations after May 9, 1979, for maintenance of minimum flow, level, or quality of water that it awards at any point on a stream or river to a maximum of 50% of the average annual flow of record on gauged streams. Ungauged streams are not subject to the limit under this subsection (6)(b).

(7) A state water reservation issued under this section has a priority of appropriation dating from the filing of a correct and complete application with the department.

(8) (a) A person desiring to use water reserved to a conservation district for agricultural purposes shall make application for the use with the district, and the district, upon approval of the application, shall inform the department of the approved use and issue the applicant an authorization for the use. The department shall maintain records of all uses of water reserved to conservation districts and be responsible, when requested by the districts, for rendering technical and administrative assistance within the department's staffing and budgeting limitations in the preparation and processing of the applications for the conservation districts. The department shall, within its staffing and budgeting limitations, complete any feasibility study requested by the districts within 12 months of the time that the request was made. The department shall extend the time allowed to develop a plan identifying projects for using a district's reservation as long as the conservation district makes a good faith effort, within its staffing and budget limitations, to develop a plan.

(b) Upon actual application of water to the proposed beneficial use, the authorized user shall notify the conservation district. The notification must contain a certified statement by a person with experience in the design, construction, or operation of project works for agricultural purposes describing how the reserved water was put to use. The department or the district may then inspect the appropriation to determine if it has been completed in substantial accordance with the authorization.

(9) A state water reservation issued under this section may not adversely affect any rights in existence at that time. The department may issue a state water reservation subject to terms, conditions, restrictions, and limitations it considers necessary to satisfy the criteria of this section.

(10) (a) Except for a reservation provided in subsection (6) or a reservation provided in 85-20-1401, the department shall, at least once every 10 years, review existing state water reservations to ensure that the objectives of the reservations are being met.

(b) The department shall provide the water policy interim committee a summary of the reviews before September 15, 2026, in accordance with 5-11-210.

(c) Following a review pursuant to this subsection (10) and except as provided in 85-2-331, at the request of the entity holding a water reservation or when the objectives of a state water reservation are not being met, the department may:

(i) extend the time period to complete the appropriation of water;

(ii) modify the reservation; or

(iii) revoke the reservation.

(d) Any undeveloped water made available as a result of a revocation or modification under this subsection (10) is available for appropriation by others pursuant to this part.

(11) Except as provided in 85-20-1401, the department may modify an existing or future order originally adopted to reserve water for the purpose of maintaining minimum flow, level, or quality of water, so as to reallocate the state water reservation or portion of the reservation to an applicant who is a qualified reservant under this section. Reallocation of water reserved pursuant to a state water reservation may be made by the department following notice and hearing if the department finds that all or part of the reservation is not required for its purpose and that the need for the reallocation has been shown by the applicant to outweigh the need shown by the original reservant. Reallocation of reserved water may not adversely affect the priority date of the reservation, and the reservation retains its priority date despite reallocation to a different entity for a different use. The department may not reallocate water reserved under this section on any stream or river more frequently than once every 5 years.

(12) A reservant may not make a change in a state water reservation under this section, except as permitted under 85-2-402 and this subsection. If the department approves a change, the department shall give notice and require the reservant to establish that the criteria in subsection (4) will be met under the approved change.

(13) A state water reservation may be transferred to another entity qualified to hold a reservation under subsection (1). Only the entity holding the reservation may initiate a transfer. The transfer occurs upon the filing of a water right ownership update form with the department, together with an affidavit from the entity receiving the reservation establishing

that the entity is a qualified reservant under subsection (1), that the entity agrees to comply with the requirements of this section and the conditions of the reservation, and that the entity can meet the objectives of the reservation as granted. If the transfer of a state water reservation involves a change in an appropriation right, the necessary approvals must be acquired pursuant to subsection (12).

(14) This section does not vest the department with the authority to alter a water right that is not a state water reservation.

(15) The department shall undertake a program to educate the public, other state agencies, and political subdivisions of the state as to the benefits of the state water reservation process and the procedures to be followed to secure the reservation of water. The department shall provide technical assistance to other state agencies and political subdivisions in applying for reservations under this section.

(16) Water reserved under this section is not subject to the state water leasing program established under 85-2-141.

History: En. Sec. 26, Ch. 452, L. 1973; amd. Sec. 11, Ch. 485, L. 1975; amd. Sec. 7, Ch. 416, L. 1977; R.C.M. 1947, 89-890; amd. Sec. 1, Ch. 689, L. 1979; amd. Sec. 1, Ch. 186, L. 1981; amd. 85-2-317. Limitation on appropriation of ground water. (1) After July 1, 1991, the department may not approve a permit to appropriate ground water in excess of 3,000 acre-feet per year unless:

(a) the applicant proves and the department finds that the applicable criteria in 85-2-311 are met; and

(b) the department then petitions the legislature and the legislature affirms the decision of the department after one or more public hearings.

(2) Subsection (1) applies to any permit to appropriate ground water for which application has been made but which has not been granted as of May 7, 1979.

(3) This section does not apply to appropriations by municipalities for municipal use or to appropriations for public water supplies as defined in 75-6-102 or to appropriations for the irrigation of cropland owned and operated by the applicant.

(4) Any person, association, corporation, or other entity that applies for a permit to appropriate ground water, singularly or collectively, for the purpose of circumventing this section is punishable by a fine not exceeding $5,000.

History: En. Sec. 5, Ch. 357, L. 1981; amd. Sec. 1, Ch. 277, L. 1983; amd. Sec. 6, Ch. 535, L. 1987.

Cross-References

Fund structure, 17-2-102.

85-2-319. Permit action in highly appropriated basins or subbasins. (1) With regard to a highly appropriated basin or subbasin, except as provided in 85-20-1401, the legislature may by law preclude permit applications or the department may by rule reject permit applications or modify or condition permits already issued.

(2) A rule may be adopted under this section only upon a petition that is signed by at least 25% or 10, whichever is less, of the users of water in the source of supply within a basin or subbasin or upon petition of the department of environmental quality that alleges facts under subsection (2)(d). The petition must be in a form prescribed by the department and must allege facts showing that throughout or at certain times of the year or for certain beneficial uses:

(a) there are no unappropriated waters in the source of supply;

(b) the rights of prior appropriators will be adversely affected;

(c) further uses will interfere unreasonably with other planned uses or developments for which a permit has been issued or for which water has been reserved; or

(d) in the case of a petition filed by the department of environmental quality:

(i) the water quality of an appropriator will be adversely affected by the issuance of permits;

(ii) further use will not be substantially in accordance with the classification of water set for the source of supply pursuant to 75-5-301(1); or

(iii) the ability of a discharge permitholder to satisfy effluent limitations of a permit issued in accordance with Title 75, chapter 5, part 4, will be adversely affected by the issuance of permits.

(3) Within 60 days after submission of a petition, the department shall:

(a) deny the petition in writing, stating its reasons for denial;

(b) inform the petitioners that the department shall study the allegations further before denying or proceeding further with the petition; or

(c) initiate rulemaking proceedings in accordance with 2-4-302 through 2-4-305.

(4) Title 2, chapter 4, parts 1 through 4, govern rulemaking proceedings conducted under this section, except that in addition to the notice requirements of those parts, the department notice of the rulemaking hearing must be published at least once in each week for 3 successive weeks, not less than 30 days before the date of the hearing, in a newspaper of general circulation in the county or counties in which the source is located. The department shall serve by mail a copy of the notice, not less than 30 days before the hearing, upon each person or public agency known from the examination of the records of the department to be a claimant, appropriator, or permitholder of water in the source.

(5) The department may adopt rules to implement the provisions of this section.

History: En. Sec. 17, Ch. 448, L. 1983; amd. Sec. 2, Ch. 460, L. 1993; (5)En. Sec. 5, Ch. 460, L. 1993; amd. Sec. 450, Ch. 418, L. 1995; amd. Sec. 11, Ch. 213, L. 2007.

85-2-320. Change in appropriation right authorization for instream flow — United States department of agriculture, forest service. (1) (a) The department shall accept and process an application by the United States department of agriculture, forest service for a change in appropriation right under the provisions of 85-2-402 and this section to protect, maintain, or enhance streamflows to benefit the fishery or other resources on national forest system lands.

(b) To change an appropriation right, the United States department of agriculture, forest service must own the appropriation right that it seeks to change to an instream flow right, the diversion or withdrawal that is to be changed to instream flow must be located within or immediately adjacent to the exterior boundaries of national forest system lands on the date provided in 85-20-1401, Article IV.B.2., and the stream reach in which the streamflow is to be protected, maintained, or enhanced must be located within or immediately adjacent to the exterior boundaries of national forest system lands as of the date provided in 85-20-1401, Article IV.B.2. The application for a change in appropriation right must:

(i) include specific information on the length and location of the stream reach in which the streamflow is to be protected, maintained, or enhanced; and

(ii) provide a detailed streamflow measuring plan that describes the point where and the manner in which the streamflow must be measured.

(2) In addition to the requirements of 85-2-402, when applying for a change in appropriation right pursuant to this section, the United States department of agriculture, forest service, shall prove by a preponderance of the evidence that:

(a) the change in appropriation right authorization to protect, maintain, or enhance streamflows to benefit the fishery or other resources, as measured at a specific point, will not adversely affect the water rights of other persons, except for a water right identified in a written consent to approval filed pursuant to 85-2-402 in connection with the change in appropriation right; and

(b) the amount of water for the proposed instream flow use is needed to protect, maintain, or enhance streamflows to benefit the fishery or other resources.

(3) The proposed method of measurement of the water to protect, maintain, or enhance streamflows to benefit the fishery or other resources must be approved by the department before a change in appropriation right may be approved.

(4) The department is not responsible for costs associated with installing devices or providing personnel to measure streamflows according to the measurement plan submitted under this section.

(5) If an appropriation right is changed pursuant to this section, the priority of the appropriation right remains the same as the appropriation right that was changed.

(6) A change in appropriation right authorization under this section does not create a right of access across private property or allow any infringement of private property rights.

(7) The maximum quantity of water that may be subject to a change in appropriation right authorization to protect, maintain, or enhance streamflows to benefit the fishery or other resources is the amount historically diverted. However, only the amount historically consumed or a smaller amount if specified by the department in the change in appropriation right authorization may be used to protect, maintain, or enhance streamflows to benefit the fishery or other resources below the existing point of diversion.

(8) The department may modify or revoke the change in appropriation right up to 10 years after it is approved if an appropriator with a priority of appropriation that is earlier than the change in appropriation right that was granted submits new evidence that was not available at the time the change in appropriation right was approved that proves by a preponderance of evidence that the appropriator's water right is adversely affected, unless the prior appropriator has filed a written consent to approval pursuant to 85-2-402 in connection with the change.

History: En. Sec. 2, Ch. 213, L. 2007; amd. Sec. 6, Ch. 335, L. 2013; amd. Sec. 3, Ch. 243, L. 2017; amd. Sec. 2, Ch. 171, L. 2025.

85-2-321. Milk River basin — suspension of action on permits — proposal — priority in adjudication process. (1) (a) In order to balance the need for the continued development of Montana's water and for protection of existing rights in the Milk River basin, the department may suspend action on a class of applications or may close a source in the basin and refuse to accept a class of applications, or both, for a permit under this part to appropriate from that source in the basin.

(b) Suspension or closure, or both, may only be proposed by the department.

(c) The proposal must state the source in the basin and class of applications for which suspension or closure, or both, is being proposed and any of the following allegations:

(i) that the frequency of occurrence of unappropriated waters is such that:

(A) any new appropriation from the source for the class of applications will adversely affect the rights of a prior appropriation from the source; or

(B) any new appropriation from the source for the class of applications will interfere unreasonably with another planned use or development for which a permit has been given or for which water has been reserved pursuant to this part in the source; or

(ii) that significant disputes or enforcement problems regarding priority of rights or amounts or duration of water in use by appropriators are in progress or will arise.

(2) After April 8, 1985, the chief water judge shall make issuance of a temporary preliminary decree in the Milk River basin the highest priority in the adjudication of existing water rights pursuant to Title 85, chapter 2, part 2.

History: **En. Sec. 1, Ch. 524, L. 1981; amd. Sec. 2, Ch. 394, L. 1985; amd. Sec. 10, Ch. 497, L. 1997.**

85-2-322. Hearing — order. (1) The department shall conduct a hearing on the proposed suspension or closure, or both. Notice of the hearing must be published at least once in each week for 3 successive weeks, not less than 30 days before the date of the hearing, in a newspaper of general circulation in the county or counties in which the source is located. The department shall serve by mail a copy of the notice and proposal not less than 30 days before the hearing upon each person or public agency known from the examination of the records of the department to be a claimant, appropriator, or permitholder of water in the source.

(2) The department may by order suspend action on and shall close the source and refuse to accept a class of applications if it finds on the basis of the hearing that there is substantial evidence in support of the allegations required by 85-2-321 to be contained in the proposal.

(3) As part of fulfilling the requirements of 2-4-623, the order must define the source and must state the class of applications to which the suspension or closure, or both, applies.

(4) Upon adoption of the order, the department shall refuse to accept any application for a permit under this part for the class of application for which closure is ordered under 85-2-321 and this section. If the order suspends action on pending applications, the department shall notify the applicant that action on the applicant's application is suspended.

(5) Upon notice under 85-2-307 of intent to combine the hearings under 85-2-309 with the hearings under this section, the department may suspend action on pending applications of the class until the hearing is conducted under this section and, as part of its final order, may grant, deny, or condition the applications under 85-2-306, 85-2-310, and 85-2-311 or continue the suspension under this section.

History: **En. Sec. 2, Ch. 524, L. 1981; amd. Sec. 145, Ch. 370, L. 1987; amd. Sec. 4, Ch. 161, L. 2005.**

85-2-323. Request to modify suspension — order. (1) A person or public agency may request that an order be modified or revoked. The request must contain allegations supported by substantial evidence showing that the criteria in 85-2-311 can be met for an application or a class of applications from the source. If not so supported, the department may reject the request without a hearing.

(2) The department may by order after a hearing modify or revoke any order made as provided in 85-2-321 and 85-2-322 upon such notice and in such manner as is reasonable under the circumstances.

History: **En. Sec. 3, Ch. 524, L. 1981.**

85-2-324 through 85-2-326 reserved.

85-2-327. Terminated. Sec. 6, Ch. 352, L. 1991.

History: **En. Sec. 1, Ch. 352, L. 1991.**

85-2-328. Terminated. Sec. 6, Ch. 352, L. 1991.

History: **En. Sec. 2, Ch. 352, L. 1991.**

85-2-329. Definitions. Unless the context requires otherwise, in 85-2-330 and this section, the following definitions apply:

(1) "Application" means an application for a beneficial water use permit pursuant to 85-2-302 or a state water reservation pursuant to 85-2-316.

(2) "Teton River basin" means the drainage area of the Teton River and its tributaries above the confluence of the Teton and Marias Rivers.

History: **En. Sec. 1, Ch. 445, L. 1993; amd. Sec. 11, Ch. 497, L. 1997; amd. Sec. 4, Ch. 391, L. 2007; amd. Sec. 2, Ch. 59, L. 2019.**

85-2-330. Basin closure — exceptions. (1) As provided in 85-2-319 and subject to the provisions of subsection (2) of this section, the department may not grant an application for a permit to appropriate water or for a reservation to reserve water within the Teton River basin.

(2) The provisions of subsection (1) do not apply to:

(a) an application for a permit to appropriate ground water if the applicant complies with the provisions of 85-2-360;

(b) an application for a permit to appropriate water for a nonconsumptive use;

(c) an application for a permit to appropriate water for:

(i) domestic use from surface water or pursuant to 85-2-306;

(ii) stock use; or

(iii) use of surface water by or for a municipality;

(d) an application to store water during high spring flows;

(e) temporary emergency appropriations, including for emergency fire training and emergency fire-related operations, as provided for in 85-2-113(3); or

(f) an application for a permit to appropriate surface water to conduct response actions related to natural resource restoration required for:

(i) remedial actions pursuant to the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9601, et seq.;

(ii) aquatic resource activities carried out in compliance with and as required by the federal Clean Water Act of 1977, 33 U.S.C. 1251 through 1387; or

(iii) remedial actions taken pursuant to Title 75, chapter 10, part 7.

(3) A permit issued to conduct remedial actions or aquatic resource activities under subsection (2)(f) may not be used for dilution.

(4) A change of use authorization for changing the purpose of use may not be issued for any permit issued pursuant to subsection (2)(b), (2)(c), (2)(e), or (2)(f).

History: En. Sec. 2, Ch. 445, L. 1993; amd. Sec. 451, Ch. 418, L. 1995; amd. Sec. 5, Ch. 391, L. 2007; amd. Sec. 3, Ch. 264, L. 2017.

85-2-331. Reservations within Missouri River basin and Little Missouri River basin. (1) Except as provided in 85-20-1401, the state, an agency or political subdivision of the state, or the United States or an agency of the United States that desires to apply for a state water reservation in the Missouri River basin or in the Little Missouri River basin shall file an application pursuant to 85-2-316 no later than:

(a) July 1, 1989, for reservation of water above Fort Peck dam; or

(b) July 1, 1991, for reservation of water below Fort Peck dam and in the Little Missouri River basin.

(2) Subject to legislative appropriation, the department shall provide technical and financial assistance to other state agencies and political subdivisions in applying for state water reservations within the Missouri River basin and the Little Missouri River basin.

(3) Except as provided in 85-20-1401 and subsection (5), the department shall:

(a) make a final determination in accordance with 85-2-316 on all applications filed before July 1, 1989, for state water reservations in the Missouri River basin above Fort Peck dam.

(b) make a final determination in accordance with 85-2-316 on all applications filed before July 1, 1991, for state water reservations in the Missouri River basin below Fort Peck dam and in the Little Missouri River basin.

(c) determine which applications or portions of applications are considered to be above or below Fort Peck dam.

(4) Except as provided in 85-20-1401, state water reservations approved by the department under this section have a priority date of July 1, 1985, in the Missouri River basin and a priority date of July 1, 1989, in the Little Missouri River basin. If the department issued a permit under Title 85, chapter 2, part 3, prior to the granting of a state water reservation under this section, the department may subordinate the state water reservation to the permit if it finds that the subordination does not interfere substantially with the purpose of any state water reservation. If the department issued a certificate for ground water development under Title 85, chapter 2, part 3, prior to the granting of a reservation under this section, the department may subordinate the reservation to the certificate if it finds that the subordination does not interfere substantially with the purpose of any reservation and the reservant consents to the subordination. The department shall by order establish the relative priority of applications approved under this section.

(5) The duration of the reservations granted to the municipalities and conservation districts established by the final order of the board of natural resources and conservation establishing water reservations above Fort Peck dam issued July 1, 1992, is extended until those reservations are perfected or until those reservations are revoked pursuant to 85-2-316.

History: En. Sec. 16, Ch. 573, L. 1985; amd. Sec. 3, HB 952, L. 1985; amd. Sec. 7, Ch. 535, L. 1987; amd. Sec. 1, Ch. 134, L. 1989; amd. Sec. 1, Ch. 303, L. 1993; amd. Sec. 452, Ch. 418, L. 1995; amd. Sec. 2, Ch. 330, L. 1997; amd. Sec. 12, Ch. 497, L. 1997; amd. Sec. 12, Ch. 213, L. 2007; amd. Sec. 2, Ch. 204, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 2, Ch. 204, L. 2025. Amendment effective April 17, 2025.

85-2-332 through 85-2-334 reserved.

85-2-335. Definitions. Unless the context requires otherwise, in 85-2-335, 85-2-336, and 85-2-338, the following definitions apply:

(1) "Application" means an application for a beneficial water use permit pursuant to 85-2-302.

(2) "Upper Clark Fork River basin" means the drainage area of the Clark Fork River and the Blackfoot River and their tributaries above the confluence of the Clark Fork River and the Blackfoot River.

History: En. Sec. 1, Ch. 741, L. 1991; amd. Sec. 1, Ch. 487, L. 1995; amd. Sec. 1, Ch. 142, L. 2007; amd. Sec. 6, Ch. 391, L. 2007.

85-2-336. Basin closure — exception. (1) As provided in 85-2-319 and subject to the provisions of subsection (2) of this section, the department may not grant an application for a permit to appropriate water within the upper Clark Fork River basin.

(2) The provisions of subsection (1) do not apply to:

(a) an application for a permit to appropriate ground water if the applicant complies with the provisions of 85-2-360;

(b) an application for a permit to appropriate surface water to conduct aquatic resource activities carried out in compliance with and as required by the federal Clean Water Act of 1977, 33 U.S.C. 1251 through 1387. A permit issued to conduct aquatic resource actions may not be used for dilution.

(c) an application for a permit to appropriate water for stock use;

(d) an application to store water;

(e) an application submitted pursuant to 85-20-1401, Article VI; or

(f) an application for power generation at existing hydroelectric dams. The department may not approve a permit for power generation if approval results in additional consumption of water.

(3) A change of use authorization for changing the purpose of use may not be issued for any permit issued pursuant to subsection (2)(b) or (2)(c).

(4) Except as provided in 85-20-1401, applications for state water reservations in the upper Clark Fork River basin filed pursuant to 85-2-316 and pending as of May 1, 1991, have a priority date of May 1, 1991. The filing of a state water reservation application does not provide standing to object under 85-2-402.

(5) Except as provided in 85-20-1401, the department may not process or approve applications for state water reservations in the upper Clark Fork River basin filed pursuant to 85-2-316.

History: En. Sec. 2, Ch. 741, L. 1991; amd. Sec. 453, Ch. 418, L. 1995; amd. Sec. 2, Ch. 487, L. 1995; amd. Sec. 13, Ch. 497, L. 1997; amd. Sec. 13, Ch. 213, L. 2007; amd. Sec. 7, Ch. 391, L. 2007.

Cross-References

Permit action in highly appropriated basins or subbasins, 85-2-319.

85-2-337. Repealed. Sec. 27, Ch. 391, L. 2007.

History: En. Sec. 3, Ch. 741, L. 1991; amd. Sec. 1, Ch. 353, L. 1997.

85-2-338. Upper Clark Fork River basin steering committee — membership and duties — comprehensive management plan. (1) There is an upper Clark Fork River basin steering committee. The steering committee has 22 members, who must be appointed as follows:

(a) Each of the six conservation districts in the basin may appoint a member.

(b) Each of the six county commissions in the basin may appoint a member.

(c) The department director shall appoint the remaining 10 committee members and any additional committee members not appointed under subsections (1)(a) and (1)(b) and shall ensure that committee membership includes a balance of affected basin interests and is in conformance with subsection (2).

(2) Steering committee members must be selected on the basis of their knowledge of water use, water management, fish, wildlife, recreation, water quality, and water conservation. Representation on the committee must include but is not limited to representatives from affected:

(a) agriculture;
(b) conservation districts;
(c) departments of state government;
(d) environmental organizations;
(e) industries;
(f) local governments;
(g) reservation applicants;
(h) utilities; and
(i) water users not otherwise represented.

(3) Except as provided in subsection (4), steering committee members shall serve 4-year terms and may serve more than one term.

(4) Initial term lengths must be staggered in conformance with the following:

(a) conservation district appointees shall initially serve for 4 years;

(b) county commissioner appointees shall initially serve for 2 years; and

(c) as determined by the department, half of the department appointees shall initially serve for 2 years and the remainder shall initially serve for 4 years.

(5) The steering committee, consistent with the upper Clark Fork River basin comprehensive management plan, shall:

(a) review the upper Clark Fork River basin closure and exceptions as provided in 85-2-336 no less than every 5 years after April 14, 1995, and make recommendations to the legislature regarding necessary changes;

(b) prepare and submit a report concerning the relationship between surface water and ground water and the cumulative impacts of ground water withdrawals in each subbasin;

(c) provide a forum for all interests to communicate about water issues;

(d) provide education about water law and water management issues;

(e) identify short-term and long-term water management issues and problems and identify alternatives for resolving them;

(f) identify the potential beneficiaries of and a funding mechanism for new and expanded water storage sites;

(g) assist in facilitating the resolution of water-related disputes;

(h) provide coordination with other basin management and planning efforts;

(i) advise government agencies about water management and permitting activities;

(j) consult with local governments within the upper Clark Fork River basin; and

(k) report relevant recommendations as determined necessary to the legislature in accordance with 5-11-210.

History: En. Sec. 4, Ch. 741, L. 1991; amd. Sec. 3, Ch. 487, L. 1995; amd. Sec. 2, Ch. 353, L. 1997; amd. Sec. 2, Ch. 85, L. 2005; amd. Sec. 121, Ch. 261, L. 2021.

85-2-339. Terminated. Sec. 6, Ch. 281, L. 1999.

History: En. Sec. 1, Ch. 281, L. 1999.

85-2-340. Definitions. Unless the context requires otherwise, in 85-2-341 and this section, the following definitions apply:

(1) "Application" means an application for a beneficial water use permit pursuant to 85-2-302 or a state water reservation pursuant to 85-2-316.

(2) "Ground water" has the meaning provided in 85-2-102.

(3) "Jefferson River basin" means the drainage area of the Jefferson River and its tributaries above the confluence of the Jefferson and Missouri Rivers.

(4) "Madison River basin" means the drainage area of the Madison River and its tributaries above the confluence of the Madison and Jefferson Rivers.

History: En. Sec. 1, Ch. 244, L. 1993; amd. Sec. 14, Ch. 497, L. 1997; amd. Sec. 8, Ch. 391, L. 2007; amd. Sec. 3, Ch. 59, L. 2019.

85-2-341. Basin closure — exceptions. (1) As provided in 85-2-319 and subject to the provisions of subsection (2) of this section, the department may not grant an application for a permit to appropriate water or for a state water reservation to reserve water within the Jefferson River basin or Madison River basin.

(2) The provisions of subsection (1) do not apply to:

(a) an application for a permit to appropriate ground water if the applicant complies with the provisions of 85-2-360;

(b) an application for a permit to appropriate water for a nonconsumptive use;

(c) an application for a permit to appropriate water for:

(i) domestic use from surface water or pursuant to 85-2-306;

(ii) stock use; or

(iii) use of surface water by or for a municipality;

(d) an application to store water during high spring flows;

(e) an application submitted pursuant to 85-20-1401, Article VI;

(f) temporary emergency appropriations, including for emergency fire training and emergency fire-related operations, as provided for in 85-2-113(3);

(g) an application for a permit to appropriate surface water to conduct response actions related to natural resource restoration required for:

(i) remedial actions pursuant to the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9601, et seq.;

(ii) aquatic resource activities carried out in compliance with and as required by the federal Clean Water Act of 1977, 33 U.S.C. 1251 through 1387; or

(iii) remedial actions taken pursuant to Title 75, chapter 10, part 7.

(3) A permit issued to conduct remedial actions or aquatic resource activities under subsection (2)(g) may not be used for dilution.

(4) A change of use authorization for changing the purpose of use may not be issued for any permit issued pursuant to subsection (2)(b), (2)(c), (2)(f), or (2)(g).

History: En. Sec. 2, Ch. 244, L. 1993; amd. Sec. 454, Ch. 418, L. 1995; amd. Sec. 15, Ch. 497, L. 1997; amd. Sec. 14, Ch. 213, L. 2007; amd. Sec. 9, Ch. 391, L. 2007; amd. Sec. 4, Ch. 264, L. 2017.

85-2-342. Definitions. Unless the context requires otherwise, in 85-2-343 and this section, the following definitions apply:

(1) "Application" means an application for a beneficial water use permit pursuant to 85-2-302 or a state water reservation pursuant to 85-2-316.

(2) "Upper Missouri River basin" means the drainage area of the Missouri River and its tributaries above Morony dam.

History: En. Sec. 1, Ch. 385, L. 1993; amd. Sec. 16, Ch. 497, L. 1997; amd. Sec. 10, Ch. 391, L. 2007; amd. Sec. 4, Ch. 59, L. 2019.

85-2-343. Basin closure — exceptions. (1) As provided in 85-2-319 and subject to the provisions of subsection (2) of this section, the department may not grant an application for a permit to appropriate water or for a reservation to reserve water within the upper Missouri River basin until the final decrees have been issued in accordance with part 2 of this chapter for all of the subbasins of the upper Missouri River basin.

(2) The provisions of subsection (1) do not apply to:

(a) an application for a permit to appropriate ground water if the applicant complies with the provisions of 85-2-360;

(b) an application for a permit to appropriate water for a nonconsumptive use;

(c) an application for a permit to appropriate water for:

(i) domestic use from surface water or pursuant to 85-2-306;

(ii) stock use; or

(iii) use of surface water by or for a municipality;

(d) an application to store water during high spring flows;

(e) an application for a permit to use water from the Muddy Creek drainage, which drains to the Sun River, if the proposed use of water will help control erosion in the Muddy Creek drainage;

(f) an application submitted pursuant to 85-20-1401, Article VI;

(g) temporary emergency appropriations, including for emergency fire training and emergency fire-related operations, as provided for in 85-2-113(3); or

(h) an application for a permit to appropriate surface water to conduct response actions related to natural resource restoration required for:

(i) remedial actions pursuant to the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9601, et seq.;

(ii) aquatic resource activities carried out in compliance with and as required by the federal Clean Water Act of 1977, 33 U.S.C. 1251 through 1387; or

(iii) remedial actions taken pursuant to Title 75, chapter 10, part 7.

(3) A permit issued to conduct remedial actions or aquatic resource activities under subsection (2)(h) may not be used for dilution.

(4) A change of use authorization for changing the purpose of use may not be issued for any permit issued pursuant to subsection (2)(b), (2)(c), (2)(e), (2)(g), or (2)(h).

History: En. Sec. 2, Ch. 385, L. 1993; amd. Sec. 455, Ch. 418, L. 1995; amd. Sec. 1, Ch. 441, L. 1997; amd. Sec. 15, Ch. 213, L. 2007; amd. Sec. 11, Ch. 391, L. 2007; amd. Sec. 5, Ch. 264, L. 2017.

85-2-344. Bitterroot River subbasin temporary closure — definitions — exceptions. (1) Unless the context requires otherwise, in this section, the following definitions apply:

(a) "Application" means an application for a beneficial water use permit pursuant to 85-2-302 or a state water reservation pursuant to 85-2-316.

(b) "Bitterroot River basin" means the drainage area of the Bitterroot River and its tributaries above the confluence of the Bitterroot River and Clark Fork of the Columbia River and designated as "Basin 76H".

(c) "Bitterroot River subbasin" means one of the following hydrologically related portions of the Bitterroot River basin:

(i) the mainstem subbasin, designated as "Subbasin 76HA";
(ii) the north end subbasin, designated as "Subbasin 76HB";
(iii) the east side subbasin, designated as "Subbasin 76HC";
(iv) the southeast subbasin, designated as "Subbasin 76HD";
(v) the south end subbasin, designated as "Subbasin 76HE";
(vi) the southwest subbasin, designated as "Subbasin 76HF";
(vii) the west central subbasin, designated as "Subbasin 76HG"; or
(viii) the northwest subbasin, designated as "Subbasin 76HH".

(2) As provided in 85-2-319, the department may not grant an application for a permit to appropriate water or for a state water reservation within a Bitterroot River subbasin until the closure for the basin is terminated pursuant to subsection (5) of this section, except for:

(a) an application for a permit to appropriate ground water if the applicant complies with the provisions of 85-2-360;

(b) an application for a permit to appropriate water for use of surface water by or for a municipality;

(c) temporary emergency appropriations, including for emergency fire training and emergency fire-related operations, pursuant to 85-2-113(3);

(d) an application submitted pursuant to 85-20-1401, Article VI;

(e) an application to store water during high spring flow in an impoundment with a capacity of 50 acre-feet or more; or

(f) an application for a permit to appropriate surface water to conduct response actions related to natural resource restoration required for:

(i) remedial actions pursuant to the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9601, et seq.;

(ii) aquatic resource activities carried out in compliance with and as required by the federal Clean Water Act of 1977, 33 U.S.C. 1251 through 1387; or

(iii) remedial actions taken pursuant to Title 75, chapter 10, part 7.

(3) A permit issued to conduct remedial actions or aquatic resource activities under subsection (2)(f) may not be used for dilution.

(4) A change of use authorization for changing the purpose of use may not be issued for any permit issued pursuant to subsection (2)(b), (2)(c), or (2)(f).

(5) Each Bitterroot River subbasin is closed to new appropriations and new state water reservations until 2 years after all water rights in the subbasin arising under the laws of the state are subject to an enforceable and administrable decree as provided in 85-2-406(4).

History: En. Sec. 1, Ch. 205, L. 1999; amd. Sec. 16, Ch. 213, L. 2007; amd. Sec. 12, Ch. 391, L. 2007; amd. Sec. 117, Ch. 2, L. 2009; amd. Sec. 6, Ch. 264, L. 2017.

85-2-345 through 85-2-349 reserved.

85-2-350. Repealed. Sec.2, Ch. 284, L. 2021.

History: En. Sec. 1, Ch. 447, L. 2001; amd. Sec. 1, Ch. 434, L. 2005; amd. Sec. 71, Ch. 44, L. 2007; amd. Sec. 11, Ch. 122, L. 2015; amd. Sec. 122, Ch. 261, L. 2021.

85-2-351. Notice to permitholders — Clark Fork River basin. The department shall provide a written notice to each person that receives a provisional water use permit to appropriate water within the Clark Fork River basin. The written notice must state: "This provisional water use permit has a priority date that is junior to the rights of senior water right holders in the Clark Fork River Basin. In accordance with Montana law, you may be subject to a call by senior water right holders, in which case you may be required to discontinue your use of water for the period of the call."

History: En. Sec. 2, Ch. 447, L. 2001.

85-2-352 through 85-2-354 reserved.

85-2-355. Definitions. As used in 85-2-306, the following definitions apply:

(1) "Ephemeral stream" means a watercourse that has a channel and that carries water only during and shortly after precipitation or snow melt events.

(2) "Intermittent stream" means a nonperennial flowing stream that has a channel and that annually carries water but is dry for part of the year in most years.

(3) "Perennial flowing stream" means a stream that has flowed continuously during all seasons during dry as well as wet years, except when the flow is interrupted by diversions.

History: En. Sec. 1, Ch. 161, L. 2005; amd. Sec. 2, Ch. 455, L. 2015.

85-2-356 through 85-2-359 reserved.

85-2-360. Ground water appropriation right in closed basins. (1) An application for a ground water appropriation right in a basin closed pursuant to 85-2-319, 85-2-321, 85-2-330, 85-2-336, 85-2-341, 85-2-343, or 85-2-344 must be accompanied by a hydrogeologic report conducted pursuant to 85-2-361, an aquifer recharge or mitigation plan if required, and an application for a change in appropriation right or rights if necessary.

(2) The department shall use the hydrogeologic report to determine if the proposed appropriation right could result in a net depletion of surface water.

(3) (a) For the purposes of 85-2-360 through 85-2-362, the prediction of net depletion does not mean that an adverse effect on a prior appropriator will occur or if an adverse effect does occur that the entire amount of net depletion is the cause of the adverse effect. A determination of whether or not there is an adverse effect on a prior appropriator as the result of a new appropriation right is a determination that must be made by the department based on the rate, location, and timing of the net depletion that causes the adverse effect relative to the historic beneficial use of the appropriation right that may be adversely affected.

(b) The department may not consider an adverse effect caused by the grant of an application pursuant to this section on any water right listed on a written consent to approval filed pursuant to 85-2-311.

(c) The department may grant a permit for a new appropriation only if the applicant proves by a preponderance of the evidence that the adverse effect would be offset through an aquifer recharge or mitigation plan that meets the requirements of 85-2-362.

History: En. Sec. 14, Ch. 391, L. 2007; amd. Sec. 7, Ch. 335, L. 2013; amd. Sec. 4, Ch. 243, L. 2017; amd. Sec. 3, Ch. 171, L. 2025.

Compiler's Comments

2025 Amendment: See 2025 Session Law for amendment made by sec. 3, Ch. 171, L. 2025. Amendment effective October 1, 2025.

85-2-361. Hydrogeologic report — minimum requirements. (1) A hydrogeologic report must include:

(a) a description of the proposed appropriation, including the point of diversion, the place of use, the area affected by the proposed appropriation, and aquifers and surface waters that may be affected by the proposed appropriation right;

(b) the amount of water diverted and the amount of water consumed by the proposed appropriation right;

(c) the amount of water that will likely be lost in conveyance, the amount of conveyance losses that would return to the system, and the location where conveyance losses would return to the system;

(d) the amount, timing, and location of return flows from the proposed use;

(e) the geology of the affected area, including stratigraphy and structure;

(f) the parameters of the aquifer system within the affected area to include estimates for:

(i) the lateral and vertical extent of the aquifer;

(ii) an analysis of whether the aquifer is confined or unconfined; and

(iii) the transmissivity and storage coefficient related to the aquifer;

(g) the locations of surface waters within the affected area that are subject to an appropriation right that may show a net depletion;

(h) an analysis of whether there may be a net depletion of surface water in the affected area and the rate, location, and timing of the depletion, if any; and

(i) a description of any water treatment method used at the time of any type of injection or introduction of water to the aquifer to ensure compliance with 75-5-410, 85-2-364, and the water quality laws under Title 75, chapter 5.

(2) A hydrogeologic report must be prepared by a hydrogeologist, a qualified scientist, or a qualified licensed professional engineer.

(3) The hydrogeologic report, the test well data, the monitoring well data, and other related information must be submitted to the department. The department shall submit this information to the bureau of mines and geology. The bureau of mines and geology shall make the information available through the ground water information center database.

History: En. Sec. 15, Ch. 391, L. 2007; amd. Sec. 8, Ch. 335, L. 2013.

85-2-362. Aquifer recharge or mitigation plans in closed basins — minimum requirements. (1) An applicant whose hydrogeologic report conducted pursuant to 85-2-361 predicts that there will be a net depletion of surface water shall submit an aquifer recharge or mitigation plan. An aquifer recharge or mitigation plan must include:

(a) where and how the water in the plan will be put to beneficial use;

(b) when and where, generally, water for aquifer recharge or mitigation will be required;

(c) the amount of water that is required for aquifer recharge or mitigation;

(d) how the proposed project or beneficial use for which the aquifer recharge or mitigation plan is required will be operated;

(e) evidence that an application for a change in appropriation right, if necessary, has been submitted;

(f) evidence of water availability;

(g) evidence of how the aquifer recharge or mitigation plan will offset the required amount of net depletion of surface water in a manner that will offset an adverse effect on a prior appropriator; and

(h) evidence that the appropriate water quality permits have been granted pursuant to Title 75, chapter 5, as required by 75-5-410 and 85-2-364.

(2) In addition to the requirements of subsection (1), an aquifer recharge plan must include a description of the process by which water will be reintroduced to the aquifer.

(3) The department may not require an applicant, through an aquifer recharge or mitigation plan, to provide more water than the quantity needed to offset the adverse effects on a prior appropriator caused by the net depletion.

(4) An appropriation right that relies on an aquifer recharge or mitigation plan must require that the aquifer recharge or mitigation plan be exercised when the appropriation right is exercised.

History: En. Sec. 16, Ch. 391, L. 2007; amd. Sec. 2, Ch. 104, L. 2009; amd. Sec. 9, Ch. 335, L. 2013.

85-2-363. Repealed. Sec. 13, Ch. 335, L. 2013.

History: En. Sec. 17, Ch. 391, L. 2007.

85-2-364. Department permit coordination — requirements for aquifer recharge or mitigation plans. To ensure that the department and the department of environmental quality are coordinating their respective permitting activities:

(1) an applicant for a new appropriation right pursuant to 85-2-360 that involves aquifer recharge or mitigation shall provide the department with a copy of a relevant discharge permit if necessary; and

(2) the department may not grant a new appropriation right pursuant to 85-2-360 that involves aquifer recharge or mitigation until the discharge permit, if necessary, has been obtained and presented to the department.

History: En. Sec. 18, Ch. 391, L. 2007; amd. Sec. 3, Ch. 104, L. 2009.

85-2-365 through 85-2-367 reserved.

85-2-368. Aquifer storage and recovery projects in closed basins. (1) An aquifer storage and recovery project may be authorized in a closed basin.

(2) In addition to the criteria provided in Title 85, chapter 2, part 3, and 85-2-402, an aquifer storage and recovery project must meet the requirements provided in 75-5-410 and 85-2-360 through 85-2-364.

History: En. Sec. 20, Ch. 391, L. 2007.

85-2-369. Permit not required for testing. (1) Water testing or monitoring is not a beneficial use of water requiring the filing of a permit application.

(2) A permit is not required if the intent of a person is to conduct aquifer tests, water quality tests, water level monitoring, or other testing or monitoring of a water source.

History: En. Sec. 21, Ch. 391, L. 2007; amd. Sec. 10, Ch. 335, L. 2013.

85-2-370. Rulemaking. The department may adopt rules to implement the provisions of 75-5-410, 85-2-360 through 85-2-364, and 85-2-368. The rules must be oriented toward the protection of existing rights from adverse effects from net depletions caused by new appropriation rights or changes in appropriation rights in closed basins and must be consistent with and not exceed the requirements of 75-5-410, 85-2-360 through 85-2-364, and 85-2-368.

History: En. Sec. 22, Ch. 391, L. 2007.

85-2-371 through 85-2-379 reserved.

85-2-380. Stream depletion zones — establishment — rulemaking. (1) Notwithstanding the provisions of subsection (2), the department may establish a stream depletion zone by rule if:

(a) the stream depletion zone lies within a basin closed pursuant to 85-2-319, 85-2-321, 85-2-330, 85-2-336, 85-2-341, 85-2-343, or 85-2-344; and

(b) there exists a hydrogeologic assessment for the area where the stream depletion zone is proposed that was conducted by either the ground water investigation program established by 85-2-525 or by a hydrogeologist or a qualified licensed professional engineer.

(2) If the provisions of subsection (1) are met, the department shall initiate rulemaking to establish a stream depletion zone upon receipt of a petition signed by:

(a) a municipality, county, conservation district, or local water quality district formed under Title 7, chapter 13, part 45; or

(b) the owners of at least 15% of the flow rate of the surface water rights in the area estimated to be affected, the boundary of which cannot exceed the boundaries of the drainage subdivisions established by the office of water data coordination, United States geological survey, and used by the water court.

(3) The department shall provide notice of the rulemaking by first-class mail to an appropriator of water who, according to the records of the department, may be affected by the proposed stream depletion zone.

(4) In establishing rules related to stream depletion zones, the department shall consult with the ground water investigation program and the ground water assessment steering committee established by 2-15-1523.

History: En. Sec. 3, Ch. 421, L. 2013.

85-2-381. Water right enforcement of ground water uses exempt from permitting — findings and purpose. (1) The legislature finds that:

(a) the state of Montana has managed the allocation of water under the prior appropriation doctrine for more than 100 years;

(b) Article IX, section 3, of the Montana constitution recognizes and confirms all existing water rights;

(c) the right to the use of water through a water right is a recognized property right;

(d) the development of ground water wells that are exempt from permitting may have an adverse effect on other water rights;

(e) the Water Use Act requires the department to coordinate the development and use of the water resources of the state so as to effect full utilization, conservation, and protection of its water resources; and

(f) the ability to develop ground water wells that are exempt from permitting contributes to the full utilization of the water resources of the state.

(2) The establishment of a stream depletion zone pursuant to 85-2-380 provides a conclusive, scientific basis for determining where ground water rights that are exempt from permitting are affecting senior surface water rights.

(3) The purpose of this section is to continue allocating water under the exemptions provided for in 85-2-306 while providing a process by which senior water right holders may protect their rights under the prior appropriation doctrine. Nothing in this section is intended to limit the ability of a senior water right holder to enforce a water right or limit that enforcement to a specific area. Creation of a stream depletion zone is not a prerequisite to an enforcement action.

(4) Any use of water granted by a certificate of water right pursuant to 85-2-306(3)(a) is subject to enforcement according to priority by:

(a) any remedy legally available;

(b) the department, upon receiving a complaint, through the provisions of 85-2-114 and 85-2-122; or

(c) a water commissioner appointed pursuant to 85-5-101.

(5) For each certificate issued pursuant to 85-2-306(3)(a) after October 1, 2013, the department shall include written notice of the provisions of this section.

History: **En. Sec. 4, Ch. 421, L. 2013.**

85-2-382. *(Temporary)* **Fox Hills-Hell Creek aquifer — ground water study.** (1) The bureau of mines and geology shall complete a feasibility study on ground water availability from the Fox Hills-Hell Creek aquifer in the department administrative boundaries 39E, 39FJ, 39G, 39H, 40D, 40E, 40P, 40Q, 40R, 40S, 42A, 42C, 42J, 42K, 42KJ, 42L, and 42M. The study may include:

(a) the compilation and update of new geologic and hydrogeologic data;

(b) a limited field collection of water levels and pressure for wells with historical data;

(c) a preliminary water budget for the Fox Hills-Hell Creek aquifer; and

(d) a preliminary model to evaluate the effects of pumping on water levels and pressure.

(2) The bureau shall report the progress and results of its study to the water policy interim committee established in 5-5-231. The committee shall consider the results of the study and make recommendations to the legislature for department suspension or closure of new ground water appropriations from the Fox Hills-Hell Creek aquifer. *(Terminates June 30, 2027—sec. 4, Ch. 759, L. 2025.)*

History: **En. Sec. 1, Ch. 759, L. 2025.**

Compiler's Comments

Effective Date: Section 3, Ch. 759, L. 2025, provided: "[This act] is effective on passage and approval." Approved May 13, 2025.

Termination: Section 4, Ch. 759, L. 2025, provided: "[This act] terminates June 30, 2027."

Part 4
Utilization of Water

85-2-401. *(Temporary)* **Priority — recognition and confirmation of changes in appropriations issued after July 1, 1973.** (1) As between appropriators, the first in time is the first in right. Priority of appropriation does not include the right to prevent changes by later appropriators in the condition of water occurrence, such as the increase or decrease of streamflow or the lowering of a water table, artesian pressure, or water level, if the prior appropriator can reasonably exercise the water right under the changed conditions.

(2) Priority of appropriation made under this chapter dates from the filing of an application for a permit with the department, except as otherwise provided in 85-2-301 through 85-2-303, 85-2-306, 85-2-310(7), and 85-2-313.

(3) Priority of appropriation perfected before July 1, 1973, must be determined as provided in part 2 of this chapter.

(4) All changes in appropriation rights actions of the department after July 1, 1973, are recognized and confirmed subject to this part and any terms, conditions, and limitations placed on a change in appropriation authorization by the department. *(Terminates June 30, 2031—sec. 9, Ch. 244, L. 2023.)*

85-2-401. *(Effective July 1, 2031)* **Priority — recognition and confirmation of changes in appropriations issued after July 1, 1973.** (1) As between appropriators, the first in time is the first in right. Priority of appropriation does not include the right to prevent changes by later appropriators in the condition of water occurrence, such as the increase or decrease of streamflow or the lowering of a water table, artesian pressure, or water level, if the prior appropriator can reasonably exercise the water right under the changed conditions.

(2) Priority of appropriation made under this chapter dates from the filing of an application for a permit with the department, except as otherwise provided in 85-2-301 through 85-2-303, 85-2-306, 85-2-310(8), and 85-2-313.

(3) Priority of appropriation perfected before July 1, 1973, must be determined as provided in part 2 of this chapter.

(4) All changes in appropriation rights actions of the department after July 1, 1973, are recognized and confirmed subject to this part and any terms, conditions, and limitations placed on a change in appropriation authorization by the department.

History: En. Sec. 27, Ch. 452, L. 1973; R.C.M. 1947, 89-891; amd. Sec. 33, Ch. 697, L. 1979; amd. Sec. 17, Ch. 497, L. 1997; amd. Sec. 17, Ch. 213, L. 2007; amd. Sec. 6, Ch. 251, L. 2009; amd. Sec. 5, Ch. 244, L. 2023.

Final decree, 85-2-234.

85-2-402. Changes in appropriation rights — definition. (1) (a) The right to make a change in appropriation right subject to the provisions of this section in an existing water right, a permit, or a state water reservation is recognized and confirmed. In a change in appropriation right proceeding under this section, there is no presumption that an applicant for a change in appropriation right cannot establish lack of adverse effect prior to the adjudication of other rights in the source of supply pursuant to this chapter. Except as provided in 85-2-410 and 85-2-429, an appropriator may not make a change in an appropriation right without the approval of the department or, if applicable, of the legislature. An applicant shall submit a correct and complete application.

(b) If an application involves a change in a point of diversion, conveyance, or place of use located on national forest system lands, the application is not correct and complete until the applicant has submitted proof to the department of any written special use authorization required by federal law for the proposed change in occupancy, use, or traverse of national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water.

(c) The applicant is not required to prove a lack of adverse effect for any water right identified on a written consent to approval filed pursuant to subsection (16) in connection with an application.

(2) Except as provided in subsections (4) through (6) and, if applicable, subject to subsections (1)(c) and (15), the department shall approve a change in appropriation right if the appropriator proves by a preponderance of evidence that the following criteria are met:

(a) The proposed change in appropriation right will not adversely affect the use of the existing water rights of other persons or other perfected or planned uses or developments for which a permit or certificate has been issued or for which a state water reservation has been issued under part 3. For purposes of this section, adverse effects analysis is specific to the proposed change in appropriation right and a determination that water is not legally available pursuant to 85-2-311 does not necessarily mean that an adverse effect will occur.

(b) The proposed means of diversion, construction, and operation of the appropriation works are adequate, except for:

(i) a change in appropriation right for instream flow pursuant to 85-2-320 or 85-2-436;

(ii) a temporary change in appropriation right for instream flow pursuant to 85-2-408; or

(iii) a change in appropriation right pursuant to 85-2-420 for mitigation or marketing for mitigation.

(c) The proposed use of water is a beneficial use.

(d) The applicant has a possessory interest, or the written consent of the person with the possessory interest, in the property where the water is to be put to beneficial use or, if the proposed change involves a point of diversion, conveyance, or place of use on national forest system lands, the applicant has any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water. This subsection (2)(d) does not apply to:

(i) a change in appropriation right for instream flow pursuant to 85-2-320 or 85-2-436;

(ii) a temporary change in appropriation right for instream flow pursuant to 85-2-408; or

(iii) a change in appropriation right pursuant to 85-2-420 for mitigation or marketing for mitigation.

(e) If the change in appropriation right involves salvaged water, the proposed water-saving methods will salvage at least the amount of water asserted by the applicant.

(f) The water quality of an appropriator will not be adversely affected.

(g) The ability of a discharge permitholder to satisfy effluent limitations of a permit issued in accordance with Title 75, chapter 5, part 4, will not be adversely affected.

(3) The applicant is required to prove that the criteria in subsections (2)(f) and (2)(g) have been met only if a valid objection is filed. A valid objection must contain substantial credible information establishing to the satisfaction of the department that the criteria in subsection (2)(f) or (2)(g), as applicable, may not be met.

(4) The department may not approve a change in purpose of use or place of use of an appropriation of 4,000 or more acre-feet of water a year and 5.5 or more cubic feet per second of water unless the appropriator proves by a preponderance of evidence that:

(a) the criteria in subsection (2) are met; and

(b) the proposed change in appropriation right is a reasonable use. A finding of reasonable use must be based on a consideration of:

(i) the existing legal demands of water rights on the state water supply, as well as projected legal demands of water rights for future beneficial purposes, including municipal water supplies, irrigation systems, and minimum streamflows for the protection of existing water rights and aquatic life;

(ii) the benefits to the applicant and the state;

(iii) the effects on the quantity and quality of water for existing uses in the source of supply;

(iv) the availability and feasibility of using low-quality water for the purpose for which application has been made;

(v) the effects on private property rights by any creation of or contribution to saline seep; and

(vi) the probable significant adverse environmental impacts of the proposed use of water as determined by the department pursuant to Title 75, chapter 1, or Title 75, chapter 20.

(5) The department may not approve a change in purpose of use or place of use for a diversion that results in 4,000 or more acre-feet of water a year and 5.5 or more cubic feet per second of water being consumed unless:

(a) the applicant proves by clear and convincing evidence and the department finds that the criteria in subsections (2) and (4) are met; and

(b) for the withdrawal and transportation of appropriated water for out-of-state use, the department then petitions the legislature and the legislature affirms the decision of the department after one or more public hearings.

(6) The state of Montana has long recognized the importance of conserving its public waters and the necessity to maintain adequate water supplies for the state's water requirements, including requirements for federal non-Indian and Indian reserved water rights held by the United States for federal reserved lands and in trust for the various Indian tribes within the state's boundaries. Although the state of Montana also recognizes that, under appropriate conditions, the out-of-state transportation and use of its public waters are not in conflict with the public welfare of its citizens or the conservation of its waters, the following criteria must be met before out-of-state use may occur:

(a) The department and, if applicable, the legislature may not approve a change in appropriation right for the withdrawal and transportation of appropriated water for use outside the state unless the appropriator proves by clear and convincing evidence and, if applicable, the legislature approves after one or more public hearings that:

(i) depending on the volume of water diverted or consumed, the applicable criteria and procedures of subsection (2) or (4) are met;

(ii) the proposed out-of-state use of water is not contrary to water conservation in Montana; and

(iii) the proposed out-of-state use of water is not otherwise detrimental to the public welfare of the citizens of Montana.

(b) In determining whether the appropriator has proved by clear and convincing evidence that the requirements of subsections (6)(a)(ii) and (6)(a)(iii) will be met, the department and, if applicable, the legislature shall consider the following factors:

(i) whether there are present or projected water shortages within the state of Montana;

(ii) whether the water that is the subject of the proposed change in appropriation might feasibly be transported to alleviate water shortages within the state of Montana;

(iii) the supply and sources of water available to the applicant in the state where the applicant intends to use the water; and

(iv) the existing legal demands of water rights placed on the applicant's supply in the state where the applicant intends to use the water.

(c) When applying for a change in appropriation right to withdraw and transport water for use outside the state, the applicant shall submit to and comply with the laws of the state of Montana governing the appropriation and use of water.

(7) For any application for a change in appropriation right involving 4,000 or more acre-feet of water a year and 5.5 or more cubic feet per second of water, the department shall give notice of the proposed change in appropriation right in accordance with 85-2-307 and shall hold one or more hearings in accordance with 85-2-309 prior to its approval or denial of the proposed change in appropriation right. The department shall provide notice and may hold one or more hearings upon any other proposed change in appropriation right if it determines that the proposed change in appropriation right might adversely affect the rights of other persons, except for any water right for which a written consent to approval has been filed pursuant to subsection (16) in connection with the application.

(8) The department or the legislature, if applicable, may approve a change in appropriation right subject to the terms, conditions, restrictions, and limitations that it considers necessary to satisfy the criteria of this section, including limitations on the time for completion of the change in appropriation right. The department may extend time limits specified in the change in appropriation right approval under the applicable criteria and procedures of 85-2-312.

(9) (a) On actual application of water to the proposed beneficial use within the time allowed, the appropriator shall notify the department that the appropriation has been completed. The notification must contain a certified statement by a person with experience in the design, construction, or operation of appropriation works describing how the appropriation was completed. The department shall review the certified statement and may inspect the appropriation to verify whether the appropriation was completed in substantial accordance with the terms of the change in appropriation right.

(b) For a change in appropriation right of an existing water right granted prior to issuance of a final decree in the basin where the existing water right is located, the department shall verify that the elements and conditions of the change in appropriation right are in substantial accordance with the elements of the existing water right as adjudicated in the final decree. If the notice of completion of the change in appropriation of an existing water right was verified prior to issuance of a final decree in the basin where the existing water right is located, the department shall verify that the elements and conditions of the change in appropriation right are in substantial accordance with the elements of the existing water right as adjudicated in the final decree. The department verification is subject to any modifications to the final decree based on an appeal under 85-2-235.

(c) For a change in appropriation right on a provisional permit granted before issuance of a final decree in the basin where the provisional permit is located, the department shall verify that the elements and conditions of the change in appropriation right are in substantial accordance with any modification or reduction of the provisional permit pursuant to 85-2-313. If the notice of completion for a change in appropriation right was verified by the department prior to an order reducing or modifying the provisional permit pursuant to 85-2-313, the department shall verify that the elements and conditions of the change in appropriation right are in substantial accordance with the reduction or modification of the provisional permit.

(10) If a change in appropriation right is not completed as approved by the department or legislature, if the terms, conditions, restrictions, and limitations of the change in appropriation right approval are not complied with, or if the elements of the change in appropriation right are not in substantial accordance with the elements of the existing water right in the final decree or with the reduction or modification of the provisional permit pursuant to 85-2-313, the department may, after notice and opportunity for hearing, require the appropriator to show cause why the change in appropriation right approval should not be modified or revoked. If the appropriator fails to show sufficient cause, the department may modify or revoke the change in appropriation right approval.

(11) The original of a change in appropriation right approval issued by the department must be sent to the applicant, and a duplicate must be kept in the office of the department in Helena.

(12) A person holding an issued permit or change in appropriation right approval that has not been perfected may change the place of diversion, place of use, purpose of use, or place of storage by filing an application for change in appropriation right pursuant to this section.

(13) A change in appropriation right contrary to the provisions of this section is invalid. An officer, agent, agency, or employee of the state may not knowingly permit, aid, or assist in any manner an unauthorized change in appropriation right. A person or corporation may not, directly or indirectly, personally or through an agent, officer, or employee, attempt to change an appropriation right except in accordance with this section.

(14) The department may adopt rules to implement the provisions of this section.

(15) The department shall accept and process an application for a change in appropriation right for instream flow to protect, maintain, or enhance streamflows pursuant to 85-2-320 and this section and to benefit the fishery resource pursuant to 85-2-436 and this section.

(16) The department may not conduct an adverse effects analysis on a water right if the water right holder files a written consent to approval of an application for a change in appropriation right.

Definitions, 85-2-602.

85-2-403. Transfer of appropriation right. (1) The right to use water shall pass with a conveyance of the land or transfer by operation of law, unless specifically exempted therefrom. All transfers of interests in appropriation rights shall be without loss of priority.

(2) Failure to comply with the provisions of 85-2-402 does not render a conveyance or reservation of a water right void, but the right may not be used until the department has approved the change. This subsection applies retroactively, within the meaning of 1-2-109, to a conveyance or reservation made after July 1, 1973.

History: En. Sec. 29, Ch. 452, L. 1973; amd. Sec. 4, Ch. 238, L. 1974; R.C.M. 1947, 89-893; amd. Sec. 16, Ch. 448, L. 1983; amd. Sec. 7, Ch. 674, L. 1983; amd. Sec. 9, Ch. 535, L. 1987.

Cross-References

85-2-404. Abandonment of appropriation right. (1) If an appropriator ceases to use all or a part of an appropriation right with the intention of wholly or partially abandoning the right or if the appropriator ceases using the appropriation right according to its terms and conditions with the intention of not complying with those terms and conditions, the appropriation right is, to that extent, considered abandoned and must immediately expire.

(2) If an appropriator ceases to use all or part of an appropriation right or ceases using the appropriation right according to its terms and conditions for a period of 10 successive years and there was water available for use, there is a prima facie presumption that the appropriator has abandoned the right for the part not used.

(3) If an appropriator ceases to use all or part of an appropriation right in compliance with a candidate conservation agreement initiated pursuant to 50 CFR 17.32 or because the land to which the water is applied to a beneficial use is contracted under a state or federal conservation set-aside program:

(a) the set-aside and resulting reduction in use of the appropriation right does not represent an intent by the appropriator to wholly or partially abandon the appropriation right or to not comply with the terms and conditions attached to the right; and

(b) the period of nonuse that occurs for part or all of the appropriation right as a result of the contract may not create or may not be added to any previous period of nonuse to create a prima facie presumption of abandonment.

(4) (a) If an appropriator ceases to use all or part of an appropriation right during a drought, the reduction in use or the nonuse of the appropriation right does not by itself represent an intent by the appropriator to wholly or partially abandon the appropriation right or to not comply with the terms and conditions attached to the appropriation right if:

(i) the place of diversion or use is within a county experiencing D1 moderate drought or worse, as designated by the United States drought monitor; and

(ii) the reduction in use or the nonuse is made in compliance with a local, regional, or state drought plan filed with the department that identifies a metric or criterion that compels the voluntary reduction or cessation of water diversions in a geographic area or for water rights included in the drought plan.

(b) The owner of a water right who reduces or ceases all or part of the use of the water right in accordance with this subsection (4) shall file a report on a form prescribed by the department by December 30 of the year in which the water right use was reduced or ceased.

(5) The lease of an existing right pursuant to 85-2-436, a temporary change in appropriation right pursuant to 85-2-407 or 85-2-408, or a temporary lease of an appropriation right pursuant to 85-2-428 does not constitute an abandonment or serve as evidence that could be used to establish an abandonment of any part of the right.

(6) Subsections (1) and (2) do not apply to existing rights until they have been finally determined in accordance with part 2 of this chapter.

History: En. Sec. 30, Ch. 452, L. 1973; R.C.M. 1947, 89-894; amd. Sec. 1, Ch. 339, L. 1987; amd. Sec. 3, Ch. 658, L. 1989; amd. Sec. 2, Ch. 435, L. 1991; amd. Sec. 8, Ch. 487, L. 1995; amd. Cross-References

Abandonment by failure to file claim, 85-2-226.
Final decree in adjudication program, 85-2-234.
Temporary lease of appropriation right — notice, 85-2-428.

85-2-405. Procedure for declaring appropriation rights abandoned. (1) When the department has reason to believe that an appropriator may have abandoned an appropriation right under 85-2-404 or when another appropriator in the opinion of the department files a valid claim that the appropriator has been or will be injured by the resumption of use of an appropriation right alleged to have been abandoned, the department shall petition the district court that determined the existing rights in the source of the appropriation in question to hold a hearing to determine whether the appropriation right has been abandoned. Proceedings under this section must be conducted in accordance with the Montana Rules of Civil Procedure, and appeal must be taken in accordance with the Montana Rules of Appellate Procedure.

(2) At the hearing, the burden of proof is on the department, which shall establish by a preponderance of the evidence that the appropriation has been abandoned under 85-2-404.

(3) The determination of the court must be appended to the final decree. The department shall keep a copy of the determination in its office in Helena.

History: En. Sec. 31, Ch. 452, L. 1973; R.C.M. 1947, 89-895; amd. Sec. 2761, Ch. 56, L. 2009.

Cross-References

Final decree, 85-2-234.

85-2-406. District court supervision of water distribution. (1) The district courts shall supervise the distribution of water among all appropriators. This supervisory authority includes the supervision of all water commissioners appointed prior or subsequent to July 1, 1973. The supervision must be governed by the principle that first in time is first in right.

(2) (a) A district court may order the distribution of water pursuant to a district court decree entered prior to July 1, 1973, until an enforceable decree is entered under part 2 of this chapter or the matter has been adjudicated under the procedure set forth in subsection (2)(b).

(b) When a water distribution controversy arises upon a source of water in which not all existing rights have been conclusively determined according to part 2 of this chapter, any party to the controversy may petition the district court to certify the matter to the chief water judge. If a certification request is made, the district court shall certify to the chief water judge the determination of the existing rights that are involved in the controversy according to part 2 of this chapter. The district court from which relief is sought shall retain exclusive jurisdiction to grant injunctive or other relief that is necessary and appropriate pending adjudication of the existing water rights certified to the water judge. Certified controversies must be given priority over all other adjudication matters. After determination of the matters certified, the water judge shall return the decision to the district court with a tabulation or list of the existing rights and their relative priorities.

(3) A controversy between appropriators from a source that has been the subject of a final decree under part 2 of this chapter must be settled by the district court. The order of the district court settling the controversy may not alter the existing rights and priorities established in

the final decree except to the extent the court alters rights based upon abandonment, waste, or illegal enlargement or change of right. In cases involving permits issued by the department, the court may not amend the respective rights established in the permits or alter any terms of the permits unless the permits are inconsistent or interfere with rights and priorities established in the final decree. The order settling the controversy must be appended to the final decree, and a copy must be filed with the department. The department must be served with process in any proceeding under this subsection, and the department may, in its discretion, intervene in the proceeding.

(4) A temporary preliminary decree or preliminary decree or a portion of a temporary preliminary decree or preliminary decree as modified after objections and hearings is enforceable and administrable according to its terms. If an action to enforce a temporary preliminary decree or preliminary decree is commenced, the water judge shall upon referral from the district court establish, in a form determined to be appropriate by the water judge, one or more tabulations or lists of all existing rights and their relative priorities.

(5) A person whose existing rights and priorities are determined in a temporary preliminary decree or preliminary decree or a person exercising a suspension under 85-2-217 and part 7 of this chapter may appeal a determination made pursuant to subsection (2).

History: En. Sec. 32, Ch. 452, L. 1973; amd. Sec. 12, Ch. 485, L. 1975; R.C.M. 1947, 89-896; amd. Sec. 34, Ch. 697, L. 1979; amd. Sec. 6, Ch. 604, L. 1989; amd. Sec. 6, Ch. 174, L. 1997.

Cross-References

85-2-407. Temporary changes in appropriation right. (1) Except as provided in 85-2-410, an appropriator may not make a temporary change in appropriation right for the appropriator's use or another's use except with department approval in accordance with 85-2-402, 85-2-429, and this section.

(2) Except as provided in subsection (9), a temporary change in appropriation right may be approved for a period not to exceed 10 years. A temporary change in appropriation right may be approved for consecutive or intermittent use.

(3) An authorization for a temporary change in appropriation right may be renewed by the department for a period not to exceed 10 years. There is no limitation on the number of renewals the appropriator may seek. Renewal of an authorization for a temporary change in appropriation right requires notice to the department by the appropriator. Upon receipt of the notice, the department shall notify other appropriators potentially affected by the renewal and shall allow 90 days for submission of new evidence of adverse effects to other water rights. A temporary change authorization may not be renewed by the department if it determines that the right of an appropriator is adversely affected, except for an appropriator described in subsection (7) or a water right identified in a written consent to approval filed pursuant to 85-2-402 in connection with a temporary change.

(4) (a) During the term of the original temporary change authorization, the department may modify or revoke its authorization for a temporary change if it determines that the right of an appropriator is adversely affected, except for an appropriator described in subsection (7) or a water right identified in a written consent to approval filed pursuant to 85-2-402 in connection with a temporary change.

(b) An appropriator, other than an appropriator identified in subsection (7), may object:

(i) during the initial temporary change application process;

(ii) during the temporary change renewal process; and

(iii) once during the term of the temporary change permit.

(5) The priority of appropriation for a temporary change in appropriation right is the same as the priority of appropriation of the right that is temporarily changed.

(6) Neither a change in appropriation right nor any other authorization right is required for reversion of the appropriation right to the permanent purpose, place of use, point of diversion, or place of storage after the period for which a temporary change was authorized expires.

(7) A person issued a water use permit with a priority of appropriation after the date of filing of an application for a temporary change in appropriation right under this section

may not object to the exercise of the temporary change according to its terms, the renewal of the authorization for the temporary change, or the reversion of the appropriation right to its permanent purpose, place of use, point of diversion, or place of storage. Persons described in this subsection must be notified of the existence of any temporary change authorizations from the same source of supply.

(8) If a water right for which a temporary change in appropriation right has been approved is transferred as an appurtenance of real property, the temporary change remains in effect unless another change in appropriation right is authorized by the department.

(9) If the quantity of water that is subject to a temporary change in appropriation right is made available from the development of a new water conservation or storage project, a temporary change in appropriation right may be approved for a period not to exceed 30 years unless a renewal is obtained pursuant to subsection (3).

History: En. Sec. 1, Ch. 435, L. 1991; amd. Sec. 3, Ch. 322, L. 1995; amd. Sec. 4, Ch. 381, L. 2001; amd. Sec. 1, Ch. 433, L. 2001; amd. Sec. 1, Ch. 122, L. 2003; amd. Sec. 5, Ch. 85, L. 2005; amd. Sec. 6, Ch. 243, L. 2017; amd. Sec. 5, Ch. 171, L. 2025; amd. Sec. 5, Ch. 679, L. 2025.

Cross-References

Abandonment of appropriation right, 85-2-404.

85-2-408. Temporary change authorization for instream flow — additional requirements. (1) The department shall accept and process an application for a temporary change in appropriation rights to maintain or enhance instream flow to benefit the fishery resource under the provisions of 85-2-402, 85-2-407, and this section. The application must:

(a) include specific information on the length and location of the stream reach in which the streamflow is to be maintained or enhanced; and

(b) provide a detailed streamflow measuring plan that describes the point where and the manner in which the streamflow must be measured.

(2) (a) A temporary change authorization under the provisions of this section is allowable only if the owner of the water right voluntarily agrees to:

(i) change the purpose of a consumptive use water right to instream flow for the benefit of the fishery resource; or

(ii) lease a consumptive use water right to another person for instream flow to benefit the fishery resource.

(b) For the purpose of this subsection (2), "person" means and is limited to an individual, association, partnership, or corporation.

(3) In addition to the requirements of 85-2-402 and 85-2-407, an applicant for a change authorization under this section shall prove by a preponderance of evidence that:

(a) the temporary change authorization for water to maintain and enhance instream flow to benefit the fishery resource, as measured at a specific point, will not adversely affect the water rights of other persons; and

(b) the amount of water for the proposed use is needed to maintain or enhance instream flows to benefit the fishery resource.

(4) The applicant is not required to prove a lack of adverse effect for any water right identified in a written consent to approval filed pursuant to 85-2-402 in connection with a change application.

(5) The department shall approve the method of measurement of the water to maintain and enhance instream flow to benefit the fishery resource through a temporary change authorization as provided in this section.

(6) Only the owner of the water right may seek enforcement of the temporary change authorization or object under 85-2-308.

(7) A temporary change authorization under this section does not create a right of access across private property or allow any infringement of private property rights.

(8) The maximum quantity of water that may be changed to maintain and enhance streamflows to benefit the fishery resource is the amount historically diverted. However, only the amount historically consumed, or a smaller amount if specified by the department in the

lease authorization, may be used to maintain or enhance streamflows to benefit the fishery resource below the existing point of diversion.

History: **En. Sec. 1, Ch. 322, L. 1995; amd. Sec. 6, Ch. 85, L. 2005; amd. Sec. 7, Ch. 243, L. 2017; amd. Sec. 6, Ch. 171, L. 2025.**

85-2-410. Short-term lease of appropriation right. (1) An appropriator may lease for a term not to exceed 90 days all or part of an appropriation right for road construction or dust abatement without the prior approval of the department, subject to the requirements of this section. The lease agreement must include the following information:

(a) the name and address of the lessee;
(b) the name of the owner of the appropriation right;
(c) the number of the appropriation right;
(d) the purpose of use of water for which the lease is being made;
(e) the source of water to be appropriated;
(f) the starting and ending date of the proposed use of water;
(g) the proposed point of diversion;
(h) the proposed place of use;
(i) the diversion flow rate and volume of water to be used during the period of use; and
(j) a description of how the existing use of water will be reduced to accommodate the temporary change of use of the appropriation right, including the number and location of acres to be removed from irrigation, if applicable.

(2) A short-term lease of an appropriation right under this section may not exceed 60,000 gallons a day or the amount of the appropriation right, whichever is less. Any combination of short-term leases cannot exceed 120,000 gallons a day for one project.

(3) Except as provided in subsection (9), the following information must be submitted to the department at least 2 days prior to the use of water by a lessee under this section:

(a) a copy of the publication notice or copies of the individual notice required under subsection (4);

(b) a copy of the lease agreement; and

(c) for a combination of short-term leases greater than 60,000 gallons a day for one project, an analysis by the lessee of any potential adverse effects and a description of planned actions to mitigate any potential adverse effects to appropriators in the area of the proposed point of diversion.

(4) Except as provided in subsection (9), the lessee of an appropriation right under this section shall, 30 days prior to the use of the water, publish a notice of the proposed use of water once in a newspaper of general circulation in the area of the diversion or mail individual notice to potentially affected appropriators in the area of the proposed point of diversion. The published notice or the individual notice must contain the information listed in subsections (1)(a) through (1)(j) and (3)(c).

(5) (a) The owner of a water right, whether the right is prior or subsequent in priority to the short-term lease acquired by a person under this section, who cannot satisfy in full the owner's right during the time that the short-term lessee is diverting water may make a complaint to the department and cause the short-term lessee's diversion to be discontinued.

(b) The diversion is discontinued until the owner's right is satisfied or until the lessee establishes to the department that the discontinuance has had no effect on the owner's water right. Upon establishment that discontinuance has not had an effect, the department shall enter an order allowing the diversion to continue.

(6) If a person purposely, with malicious intent, causes the discontinuance of a short-term diversion through the complaint process provided in subsection (5)(a) and the complaint is found to be invalid and frivolous, the person is, upon conviction, guilty of a misdemeanor and shall be fined in an amount not to exceed $500.

(7) This section does not limit the remedies available to an appropriator to enjoin or to seek damages from a person appropriating water under this section.

(8) A civil action instituted to enjoin or seek damages from a person appropriating water pursuant to this section must be commenced against the lessee. The lessor is not a necessary party to a civil action. The lessee has the burden of establishing that the lessee's use does not have an adverse effect on a prior appropriator of water.

(9) (a) A local government entity, as defined in 7-6-602, is not subject to the requirements of subsections (3)(a) and (4) when conducting dust abatement that was not scheduled or contracted for 30 days or more prior to the use of the water.

(b) A local government entity that does not publish notice as provided in subsection (4) shall post a copy of the lease agreement at the point of diversion at least 24 hours prior to and during the time that water is diverted.

History: En. Sec. 1, Ch. 381, L. 2001; amd. Sec. 1, Ch. 49, L. 2003.

85-2-411. Water turned into natural channels. Water appropriated under an existing right or pursuant to this chapter may be turned into the natural channel of another stream or from a reservoir into the natural channel and withdrawn or diverted at a point downstream for beneficial use, but the waters of that stream may not thereby be diminished in quantity or deteriorated in quality to the detriment of a prior appropriator. Water stored in a reservoir under an existing right or pursuant to this chapter which is turned into a natural channel for withdrawal or diversion and beneficial use downstream shall not be considered a part of the natural flow of that stream.

History: En. 89-891.1 by Sec. 1, Ch. 103, L. 1974; R.C.M. 1947, 89-891.1.

The Natural Streambed and Land Preservation Act of 1975, Title 75, ch. 7, part 1.

85-2-412. Return of surplus water to stream. If, by virtue of prior appropriation, a person has diverted all the water of any stream or to an extent that there may not be an amount sufficient left for those having a subsequent right to the waters of the stream and there is, at any time, a surplus of water so diverted, over and above what is actually and necessarily used by the prior appropriator, the prior appropriator must be required to turn and cause to flow back into the stream the surplus water. Upon failure to do so within 24 hours after demand being made upon the prior appropriator in writing, to the prior appropriator in person or at the prior appropriator's place of residence, by any person having a right to the use of the surplus water, the person diverting the water is liable to the person aggrieved for the damage resulting from the diversion in a sum determined by court.

History: En. Sec. 1, p. 52, L. 1879; re-en. Sec. 731, p. 562, 5th Div. Rev. Stat. 1879; re-en. Sec. 1239, 5th Div. Comp. Stat. 1887; amd. Sec. 1884, Civ. C. 1895; re-en. Measure of damages, Title 27, ch. 1, part 3.

Prevention of waste, 85-2-114.

85-2-413. Diversion of natural flow of waters — when permitted. A person who owns or is in possession of lands susceptible of irrigation from any stream, the waters of which are so diminished by prior appropriations that a sufficient amount of water for the irrigation of the person's lands cannot be obtained from the natural flow of the stream, and who constructs a reservoir or purchases or leases water from a reservoir owned by the department or another or otherwise acquires an interest in the reservoir or in water stored in the reservoir, which is located so that because of natural or other obstacles the water impounded in the reservoir cannot be conducted to the lands that the person desires to irrigate, may, if the stored water can be discharged into the stream in a manner that it can be used beneficially by prior appropriators, divert the natural flow of the stream for the irrigation of the person's lands in lieu of an equal amount of stored water. However, an exchange of water under this section must be made without injury to prior appropriators.

History: En. Sec. 1, Ch. 39, L. 1937; amd. Sec. 155, Ch. 253, L. 1974; R.C.M. 1947, 89-806; amd. Sec. 2763, Ch. 56, L. 2009.

85-2-414. Conduction of water. The right to conduct water from or over the land of another for any beneficial use includes the right to raise any water by means of dams, reservoirs, or embankments to a sufficient height to make the same available for the use intended, and the right to any and all land necessary therefor may be acquired upon payment of just compensation in the manner provided by law for the taking of private property for public use. If it is necessary to conduct the water across the right-of-way of any railroad, it shall be the duty of the owners of the ditch or flume to give 30 days' notice in writing to the owner or owners of such railway of their intention to construct a ditch or flume across the right-of-way of such railroad, the point at which the ditch or flume will cross the railroad, and the time when the construction of said ditch or flume will be made. If the owner or owners of such railroad or their agent fail to appear and attend at the time and place fixed in said notice, it shall be lawful for the owner or owners of the said flume or ditch to construct the same across the right-of-way of such railroad without further notice to said owner or owners of the railroad.

History: En. Sec. 1894, Civ. C. 1895; re-en. Sec. 4857, Rev. C. 1907; re-en. Sec. 7110, R.C.M. 1921; re-en. Sec. 7110, R.C.M. 1935; R.C.M. 1947, 89-820.

Measurement of water, 85-2-103.
Prevention of waste, 85-2-114.

85-2-416. Duty of purchaser to dig ditches. A person desiring to purchase surplus water pursuant to 85-2-415 shall, at the person's own cost and expense, construct or dig the necessary flumes or ditches to receive and convey the surplus water desired by the person and pay or tender to the person having the right to the use, sale, or disposal of that water an amount equal to the necessary cost and expense of tapping any gulch, stream, reservoir, ditch, flume, or aqueduct and putting in gates, gauges, or other proper and necessary appliances usual and customary, and until that work is done, the delivery of the surplus water may not be required as provided in 85-2-415.

History: En. Sec. 2, p. 406, L. 1877; re-en. Sec. 743, 5th Div. Rev. Stat. 1879; re-en. Sec. 1264, 5th Div. Comp. Stat. 1887; re-en. Sec. 1898, Civ. C. 1895; re-en. Sec. 4861, Rev. C. 1907; re-en. 85-2-417. Enforcement of right to surplus. Any person constructing the necessary ditches, aqueducts, or flumes and making the payments or tenders hereinbefore provided is entitled to the use of so much of the surplus water as said ditches, flumes, or aqueducts have the capacity to carry and for which payment or tender is made and may institute and maintain any appropriate action at law or in equity for the enforcement of such right or recovery of damages arising from a failure to deliver or wrongful diversion of the same.

85-2-418. Purchaser not to sell surplus water. Sections 85-2-415 through 85-2-417 may not be construed to give the person acquiring the right to the use of water, as provided in those sections, the right to sell or dispose of the water after being used by the person or to prevent the original owner or proprietor from retaking, selling, and disposing of the water in the usual and customary manner after it is used as provided in those sections.

History: En. Sec. 4, p. 407, L. 1877; re-en. Sec. 745, 5th Div. Rev. Stat. 1879; re-en. Sec. 1266, 5th Div. Comp. Stat. 1887; re-en. Sec. 1900, Civ. C. 1895; re-en. Sec. 4863, Rev. C. 1907; re-en. 85-2-419. Salvaged water. It is the declared policy of the state in 85-1-101 to encourage the conservation and full use of water. Consistent with this policy, holders of appropriation rights who salvage water may retain the right to the salvaged water for beneficial use. Except for a short-term lease pursuant to 85-2-410, any use of the right to salvaged water for any purpose or in any place other than that associated with the original appropriation right must be approved by the department as a change in appropriation right in accordance with 85-2-402 and 85-2-436, if applicable. Sale of the right to salvaged water must also be in accordance with 85-2-403, and the lease of the right to salvaged water must be in accordance with 85-2-408, 85-2-410, or 85-2-436.

History: En. Sec. 1, Ch. 308, L. 1991; amd. Sec. 1, Ch. 123, L. 1999; amd. Sec. 5, Ch. 381, L. 2001; amd. Sec. 7, Ch. 85, L. 2005; amd. Sec. 4, Ch. 448, L. 2007.

85-2-420. Change in appropriation right for aquifer recharge or mitigation — marketing. (1) Subject to 85-2-402 and this section, an appropriator may apply for a change in appropriation right for the purpose of aquifer recharge or mitigation or for the purpose of marketing water for aquifer recharge or mitigation.

(2) During the completion period authorized by the department for a change pursuant to this section, the appropriator may continue to use the appropriation right for any authorized beneficial use provided that proportionate amounts of the appropriation right are retired as the mitigation or aquifer recharge beneficial use is perfected.

(3) (a) If the full amount of the appropriation right is not sold or marketed as mitigation or aquifer recharge prior to the completion date, the water right retains the beneficial uses authorized prior to the change approved pursuant to this section.

(b) For an appropriation right that retains the original beneficial uses pursuant to this section, if the water retained for the original beneficial uses and the amount sold or marketed for mitigation or aquifer recharge are:

(i) not diverted at a common point of diversion, the flow rate and volume of water retained at the point of diversion for the original beneficial uses must be equal to the flow rate and volume allowed under the original beneficial uses minus the amount sold or marketed for mitigation or aquifer recharge; or

(ii) diverted at a common point of diversion, the entire flow rate and volume of the appropriation is allowed from the common point of diversion.

(4) As part of a change in appropriation right approved pursuant to this section, the department shall:

(a) determine a period for the change in appropriation right to be completed that does not exceed 20 years;

(b) determine an appropriate location for measuring the amount of water that will be used for mitigation or aquifer recharge and, if necessary, require installation of a measuring device; and

(c) require the appropriator to notify the department within 30 days each time a portion of the change is completed.

History: En. Sec. 1, Ch. 29, L. 2011; amd. Sec. 1, Ch. 222, L. 2019.

85-2-421. Purpose. The purpose of 85-2-421 through 85-2-424 and 85-2-426 is to facilitate the maintenance of a reliable record of water right ownership.

History: En. Sec. 1, Ch. 674, L. 1983; amd. Sec. 1, Ch. 271, L. 1985; amd. Sec. 146, Ch. 370, L. 1987; amd. Sec. 10, Ch. 70, L. 2005; amd. Sec. 2, Ch. 366, L. 2007.

Cross-References

Transfer of appropriation right, 85-2-403.

85-2-422. Repealed. Sec. 5, Ch. 59, L. 2019.

History: En. Sec. 2, Ch. 674, L. 1983; amd. Sec. 147, Ch. 370, L. 1987; amd. Sec. 3, Ch. 366, L. 2007.

85-2-423. Water right ownership update form. The chief water judge and the department shall prescribe the form and content of the water right ownership update form.

History: En. Sec. 3, Ch. 674, L. 1983; amd. Sec. 11, Ch. 70, L. 2005.

85-2-424. Filing. (1) Except in the case of a transfer of real property served by a public service water supply, when a person presents for recording a deed or other instrument evidencing a transfer of real property, the realty transfer certificate must contain a water rights disclosure in which the transferor shall acknowledge, at or before closing or transfer of real property, whether or not any water rights are associated with the property to be transferred and whether or not any water rights will transfer with the real property.

(2) (a) The department shall update its records to reflect the new ownership of a water right within 30 days after receipt of either:

(i) information received from the department of revenue, if:

(A) the transferor of the property is the same as the owner of record for the water right;

(B) the transferor conveys the entirety of the property associated with the place of use; and

(C) the department has not received a form pursuant to subsection (3), (4), or (5); or

(ii) a complete water right ownership update form provided by the department and submitted to the department.

(b) If the department receives information from the department of revenue that a transfer has occurred and the transferor of the property is not the same as the owner of record for the water rights, the department shall within 30 days after receipt of the information from the department of revenue notify each party indicated as a transferee that:

(i) the party is required to submit a complete water right ownership update form and the required fee within 60 days after the notice; and

(ii) ownership of the water right will not be changed in the department's records until the complete water right ownership update form is provided.

(c) The appropriate fee must be paid at closing or upon completion of the transfer of real property as provided in 85-2-426.

(d) The transferee of a water right, after receiving notice as provided in subsection (2)(e), is responsible for compliance with this section.

(e) If the department receives notice from the department of revenue that a property transfer has occurred and the proper fee was not received by the department, the department shall send a notice to the transferee requesting payment of the fee. If the transferee does not pay the fee within 60 days, the department may assess a penalty against the transferee pursuant to 85-2-431.

(3) (a) Except as provided in subsection (3)(b), if the realty transfer certificate discloses the division of the place of use of a water right among separate parcels, each transferee receiving a portion of the water right shall file with the department a complete water right ownership update form confirming the transfer, a map, and the required fee.

(b) If a complete water right ownership update form is not filed by all parties pursuant to subsection (3)(a), the parties must be reflected as co-owners on the water right.

(4) If a person exempts a water right pursuant to 85-2-403, the person shall file with the department a complete form provided by the department describing the exempting of the water right and the appropriate fee.

(5) If a person severs a water right from appurtenant property without conveying the property, the person shall file with the department a complete form provided by the department describing the severance and the appropriate fee.

(6) If the realty transfer certificate submitted with a deed or other instrument indicates that a water right is being transferred, severed, divided, or exempted, the clerk and recorder may not record the deed or instrument unless there is submitted with the deed or instrument a certification under penalty of false swearing, on a form provided by the department and signed by the transferor and transferee, that states either:

(a) that the documents and fee necessary to comply with this section are held in escrow, in which case the certification must also be signed by the escrow agent; or

(b) if there is no escrow, that the transferor and transferee certify that they have filed or mailed the required documents and fee with or to the department.

(7) Any written agreement to transfer land that has appurtenant water rights on record with the department must contain the following disclosure or words of a similar nature:

"WATER RIGHT OWNERSHIP UPDATE DISCLOSURE:

By Montana law, failure of the parties at closing or transfer of real property to pay the required fee to the Montana Department of Natural Resources and Conservation for updating water right ownership may result in the transferee of the property being subject to a penalty. Additionally, in the case of water rights being exempted, severed, or divided, the failure of the parties to comply with section 85-2-424, MCA, could result in a penalty against the transferee and rejection of the deed for recording."

(8) Except as provided in subsection (2), the department shall update its records to reflect new ownership without collection of a transfer fee within 30 days after:

(a) receiving a withdrawal of a water right, or an interest in a water right, by an owner of the right or interest;

(b) receiving an order from the water court or other court of competent jurisdiction that modifies or terminates ownership of a water right; or

(c) learning of a clerical error resulting from an error on a water right ownership update form.

(9) In the event of a dispute over the ownership of a water right, the department shall, within 30 days after being notified of the dispute, certify the matter to the water court or other court of competent jurisdiction for resolution.

(10) The department may not delay updating ownership based on nonpayment of transfer fees by a transferee. The department's sole remedy in the event of nonpayment of transfer fees is to assess a penalty and seek collection from the transferee pursuant to 85-2-431.

(11) For the purposes of this section, "complete" means that the information requested in the form has been supplied, together with a copy of the executed deed or deeds or any other instruments confirming the transferee's ownership or the ownership by the person exempting the water right, for each water right listed on the form. The department shall notify the transferee or the person exempting the water right of any deficiencies causing the form to be considered not complete within 60 days of submission.

History: En. Sec. 4, Ch. 674, L. 1983; amd. Sec. 2, Ch. 271, L. 1985; amd. Sec. 10, Ch. 805, L. 1991; amd. Sec. 3, Ch. 167, L. 1997; amd. Sec. 12, Ch. 70, L. 2005; amd. Sec. 4, Ch. 366, L. 2007; amd. Sec. 12, Ch. 335, L. 2013; amd. Sec. 1, Ch. 70, L. 2017; amd. Sec. 1, Ch. 260, L. 2021.

85-2-425. Repealed. Sec. 6, Ch. 271, L. 1985.

History: En. Sec. 5, Ch. 674, L. 1983.

85-2-426. Fee. (1) The department shall by rule prescribe a fee that may not be higher than necessary to cover the cost to the department of updating its water right ownership records. A fee must be paid:

(a) at closing when the realty transfer certificate discloses the transfer of a water right; or

(b) at the time of filing of the water right ownership update form or the form describing the severance or exempting of the water right.

(2) The fee must be deposited in the water right appropriation account provided for in 85-2-318.

History: En. Sec. 6, Ch. 674, L. 1983; amd. Sec. 3, Ch. 271, L. 1985; amd. Sec. 456, Ch. 418, L. 1995; amd. Sec. 13, Ch. 70, L. 2005; amd. Sec. 5, Ch. 366, L. 2007.

85-2-427. Terminated. Sec. 4, Ch. 236, L. 2013.

History: En. Sec. 1, Ch. 236, L. 2013; amd. Sec. 9, Ch. 294, L. 2015.

85-2-428. Temporary lease of appropriation right — notice. (1) Applications to temporarily lease an appropriation right that comply with the requirements of this section are not subject to the provisions of 85-2-402, 85-2-407, 85-2-408, 85-2-410, or 85-2-436. After obtaining approval pursuant to this section, an appropriator may temporarily lease an appropriation right.

(2) The amount of water leased may not exceed the total consumptive use of the appropriation right. For an irrigation right, the consumptive volume may not exceed 2 acre-feet per acre irrigated.

(3) (a) Each appropriation right leased pursuant to this section:

(i) must have been in use within 5 years prior to the application date;

(ii) may be leased only during the period of diversion for the appropriation right;

(iii) may not be leased for more than 5 years during any consecutive 10-year period;

(iv) may not be leased for more than 40 days a year; and

(v) may only be leased for a beneficial use as defined in 85-2-102.

(b) The volume and flow rate of water leased may not exceed the appropriator's original water appropriation right.

(c) The point of diversion for the appropriation right may not be changed.

(4) The use of an appropriation right on a place of use associated with leased water is prohibited during any year that leased water is put to beneficial use.

(5) Storage may be temporarily added during the term of the leased appropriation right if the water is diverted at the original point of diversion and subsequently put to a beneficial use.

(6) This section does not apply to change in an appropriation right that would result in leased water being transported outside Montana. Proposed out-of-state uses are subject to the provisions of 85-2-402.

(7) Water leased pursuant to this section must be measured at the point of diversion by a meter approved by the department. The appropriator shall report the amount of water measured at the end of the year in which the lease occurred or upon request of the department.

(8) An applicant proposing to lease an appropriation right pursuant to this section shall submit an application on a form provided by the department and a fee as established by rule. The application must include:

(a) the name and address of each lessee;

(b) the names of all owners of each appropriation right;

(c) the number of each appropriation right;

(d) the proposed use and the place of use for the leased water;

(e) the source of water to be appropriated;

(f) the start and end dates of the proposed lease;

(g) the flow rate of the proposed diversion and the volume of water to be used during the lease;

(h) evidence that the appropriation right has been used within the last 5 years;

(i) a statement of potential adverse effect and a description of planned actions to mitigate potential adverse effects that, in aggregate, demonstrate no adverse effect;

(j) a copy of the executed lease agreement; and

(k) a description of how the existing beneficial use of the appropriation right would cease at the place of use during the lease period, including the number and location of acres to be removed from irrigation, if applicable.

(9) Within 10 days of receipt of an application, the department shall provide written notice to potentially affected appropriators identified by the department that are proximate to the point of diversion.

(10) (a) Within 30 days of receipt of an application, the department shall:

(i) determine whether the application is correct and complete;

(ii) evaluate whether the application meets the requirements of subsections (2), (3), and (8); and

(iii) approve or deny the application.

(b) The department may approve an application with conditions.

(c) Leased water may not be used until the department approves an application.

(11) (a) For a period of 30 days from a date an application is authorized pursuant to subsection (10), the department shall accept correct and complete objections to a proposed lease from a person whose property, water rights, or interests would be adversely affected by the proposed appropriation. The objection must be made on a form provided by the department.

(b) Within 5 business days of receipt of a correct and complete objection, the department shall determine whether the objection is valid. A valid objection must contain facts indicating that the rights of other appropriators would be adversely affected by the lease of the appropriation right. If the department determines that an objection is valid, the authorization of the lease is suspended and no water may be put to beneficial use pursuant to the lease.

(c) (i) The owner of an appropriation right whose authorization is suspended under subsection (11)(b) may request a hearing on the objection pursuant to the informal proceedings provided for in 2-4-604 within 15 days of notice of the suspension. At the hearing, the owner of the appropriation right has the burden of proof to prove lack of adverse effects.

(ii) If the owner proves by a preponderance of the evidence that the water rights of other appropriators will not be adversely affected by the lease, the department shall issue an order reinstating the authorization for the beneficial use of the leased appropriation right.

(iii) If the department determines that the water rights of other appropriators have been or will be adversely affected by the lease, the department may revoke the authorization or modify its approval with necessary terms, conditions, restrictions, or limitations.

(d) A person who purposely, with malicious intent, causes the suspension of a temporary lease pursuant to this section through an objection found invalid and frivolous is, upon conviction, guilty of a misdemeanor and shall be fined an amount not to exceed $500.

(12) Violations of this section are subject to the provisions of 85-2-114 and 85-2-122. This subsection does not limit the remedies available to an appropriator to enjoin or seek damages from the owner of an appropriation right who leased the water or from a lessee.

(13) The department shall report annually to the water policy interim committee provided for in 5-5-231 in accordance with 5-11-210. The report must include the number of leases, the amount of water leased, and the number of irrigated acres taken out of production.

(14) Pursuant to 85-20-1902, the provisions of this section do not apply within the exterior boundaries of the Flathead Indian reservation.

History: En. Sec. 1, Ch. 347, L. 2025.

Compiler's Comments

Effective Date: This section is effective October 1, 2025.

85-2-429. Changes in appropriation rights — exceptions. (1) (a) An appropriator may change an appropriation right without the prior approval of the department for the purpose of constructing a redundant water supply well in a public water supply system as defined in 75-6-102 if the redundant water supply well:

(i) withdraws water from the same source aquifer as the original well; and

(ii) is required by a state or federal agency.

(b) The priority date of the redundant water supply well is the same as the priority date of the original well. Only one well may be used at one time.

(c) (i) Within 60 days of completion of a redundant water supply well and the infrastructure necessary to use the well, the appropriator shall file a correct and complete notice of change in appropriation right for redundant water supply well construction with the department on a form provided by the department. If the redundant water supply well is located on national forest system lands, the notice is not correct and complete under this subsection (1)(c)(i) until the appropriator has submitted proof of any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of constructing the redundant water supply well.

(ii) The department may not issue an authorization of a change in appropriation right until a correct and complete notice of change in appropriation right for redundant water supply well construction has been filed with the department.

(2) (a) An appropriator may change an appropriation right for a replacement well without the prior approval of the department if:

(i) the appropriation right is for:

(A) ground water outside the boundaries of a controlled ground water area; or

(B) ground water inside the boundaries of a controlled ground water area and if the provisions of the rule establishing the controlled ground water area do not restrict a change in appropriation right;

(ii) the change in appropriation right is to replace an existing well and the existing well will no longer be used;

(iii) the rate and volume of the appropriation from the replacement well are equal to or less than that of the well being replaced and the distance between the replacement well and the well being replaced is no greater than 200 feet;

(iv) the water from the replacement well is appropriated from the same source aquifer as the water appropriated from the well being replaced; and

(v) a timely, correct, and complete notice of change in appropriation right for a replacement well is submitted to the department as provided in subsection (2)(b).

(b) The appropriator shall file a correct and complete notice of change in appropriation right for a replacement well with the department on a form provided by the department within 60 days after completion of a replacement well and appropriation of ground water for a beneficial use.

(c) For each well that is replaced under this subsection (2), the appropriator shall follow the well abandonment procedures, standards, and rules adopted by the board of water well contractors pursuant to 37-43-202.

(3) (a) An appropriator may change an appropriation right for a replacement point of diversion without the prior approval of the department if:

(i) the existing point of diversion is inoperable due to natural causes or deteriorated infrastructure;

(ii) there are no other changes to the water right;

(iii) the capacity of the diversion is not increased;

(iv) there are no points of diversion or intervening water rights between the existing point of diversion and the replacement point of diversion or the appropriator obtains written waivers from all intervening water right holders;

(v) the replacement point of diversion is on the same surface water source and is located as close as reasonably practicable to the existing point of diversion;

(vi) the replacement point of diversion replaces an existing point of diversion and the existing point of diversion will no longer be used;

(vii) the existing point of diversion has been used in the 10 years prior to the notice for change of appropriation right for a replacement point of diversion;

(viii) the change will not increase access to water availability, change the method of irrigation, if applicable, or increase the amount of water diverted, used, or consumed; and

(ix) a timely, correct, and complete notice of change in appropriation right for a replacement point of diversion is submitted to the department as provided in subsection (3)(b).

(b) The appropriator shall file a correct and complete notice of change in appropriation right for a replacement point of diversion with the department on a form provided by the department within 60 days after completion of a replacement in point of diversion.

(4) (a) A municipality as defined in 7-1-4121 or a county water and sewer district organized under Title 7, chapter 13, part 22, may change the place of use for an unperfected municipal use permit or water reservation without the prior approval of the department if:

(i) the flow rate authorized by the permit or water reservation will not be exceeded;

(ii) the volume authorized by the permit or water reservation will not be exceeded;

(iii) the place of use is within:

(A) the municipality's land use plan and future land use map boundary duly adopted by the municipality pursuant to Title 76, chapter 25;

(B) the municipality's growth policy boundary duly adopted by the municipality pursuant to Title 76, chapter 1; or

(C) a county water and sewer district's service area boundary adopted under Title 7, chapter 13, part 23;

(iv) all water being diverted by the system is being measured; and

(v) there are no other changes to the water right or rights.

(b) The appropriator shall file a correct and complete notice of change in appropriation right for municipal use with the department on a form provided by the department within 180 days of annexation by a municipality under Title 7, chapter 2, or addition of land to a county water and sewer district under Title 7, chapter 13, part 23.

(c) A notice of change in appropriation right for municipal use may include a change in place of use for a water right that is not an unperfected permit or water reservation if:

(i) the criteria in subsection (4)(a) are satisfied for each unperfected permit and water reservation;

(ii) the criteria in subsection (4)(a) are satisfied for each additional water right being changed;

(iii) the unperfected volume of the unperfected permit or water reservation is adequate to satisfy the additional water use needs of the entire additional place of use;

(iv) the existing place of use is the same for all rights being changed; and

(v) all rights being changed share the same common distribution system.

(5) (a) An appropriator with a water right for stock use may add, move, or remove stock tanks without the prior approval of the department if:

(i) stock tanks are added to a water right for livestock direct from source;

(ii) stock tanks are added to or removed from an existing stock watering system; or

(iii) stock tanks are moved on an existing stock watering system.

(b) The following requirements must be met for a change filed under this subsection (5):

(i) the diverted flow rate of the stock watering system may not exceed the historical diverted flow rate of the stock watering system. If stock tanks are being added to a livestock direct from source water right, the maximum flow rate for the diversion to the tanks may not exceed 35 gallons a minute.

(ii) the number of stock animal units that will be watered on the system may not exceed the historical number of stock animal units watered;

(iii) the stock watering system infrastructure is adequate to control diversions and prevent waste of water; and

(iv) the appropriator has a possessory interest or the written consent of a person with a possessory interest in the property where the water is to be put to beneficial use or, if the proposed change involves a point of diversion, conveyance, or place of use on national forest system lands, the appropriator has any written special use authorization required by federal law to occupy, use, or traverse national forest system lands for the purpose of diversion, impoundment, storage, transportation, withdrawal, use, or distribution of water.

(c) The appropriator shall file a correct and complete notice of change in appropriation right for stock tanks with the department on a form provided by the department within 60 days after stock tanks are added or moved.

(d) A temporary change in appropriation right for stock tanks may be authorized in accordance with 85-2-407.

(6) (a) If the department determines a notice of change in appropriation filed pursuant to subsections (1) through (5) is not correct and complete, the department shall return the notice to the appropriator, along with a notification describing the defects. A notice of change in appropriation right that is not corrected and completed within 60 days of the notification is terminated.

(b) Within 90 days of determining a notice of change in appropriation right is correct and complete, the department shall determine if the applicable criteria for issuance of a change in appropriation right are satisfied, and:

(i) if the department determines that the notice of change in appropriation right satisfies the applicable criteria in subsection (1), (2), (3), (4), or (5), the department shall issue an authorization of a change in appropriation right; or

(ii) if the department determines that the notice of change in appropriation right does not satisfy the criteria in subsection (1), (2), (3), (4), or (5), the department shall notify the appropriator, and the appropriator shall submit an application for a change in appropriation right to the department pursuant to 85-2-402.

(7) (a) If an authorization of a change in appropriation right is issued under subsection (3), (4), or (5), the department shall prepare a public notice that includes a summary of the change in appropriation right. The public notice must state that within no more than 45 days after the date of publication, a person may file with the department a written objection to the authorization of the change in appropriation right. The department shall publish the notice once in a newspaper of general circulation in the area of the source.

(b) The department shall also serve the notice by first-class mail on:

(i) an appropriator of water or applicant for or holder of a permit who, according to the records of the department, may be affected by the proposed appropriation;

(ii) any purchaser under contract for deed as defined in 70-20-115 of property that according to the records of the department may be affected by the proposed appropriation; and

(iii) any public agency that has reserved waters in the source under 85-2-316.

(c) The department may, in the department's discretion, also serve notice on any state agency or other person the department believes may be interested in or affected by the proposed appropriation.

(d) The department shall file in the department's records proof of service by affidavit of the publisher in cases of notice by publication and by affidavit of the department in cases of service by mail.

(8) (a) An objector to a change authorization issued under subsection (3), (4), or (5) shall file a correct and complete objection on a form prescribed by the department on or before the date specified in the notice provided under subsection (7).

(i) A person has standing to file an objection under this subsection (8) if the property, water rights, or interests of the person would be adversely affected by the proposed change.

(ii) The department shall adopt rules delineating the components of a correct and complete objection.

(iii) The department shall notify the objector of any defect in an objection. An objection not corrected or completed within 15 business days from the date of notification of the defect is terminated.

(iv) An objection is valid if the objector has standing, has filed a correct and complete objection within the prescribed time, and has stated the applicable information required under this subsection (8) and the rules of the department.

(v) An objection must state facts indicating that the change in appropriation right:

(A) will adversely affect the use of the water rights of the objector or of other persons or other perfected or planned uses or developments for which a permit or certificate has been issued or for which a state water reservation has been issued under Title 85, chapter 2, part 3; or

(B) does not satisfy the applicable criteria set forth in subsection (3), (4), or (5).

(b) If a valid objection is filed, the department shall hold a contested case hearing pursuant to 85-2-309. The contested case hearing is limited to those issues for which a correct and complete objection is filed. The appropriator changing the water right bears the burden of proof of lack of adverse effect or any of the criteria for which a correct and complete objection is filed.

(c) If the department determines after a contested case hearing on the objection that the rights of other appropriators have been or will be adversely affected or that the change in appropriation right does not satisfy the criteria set forth in subsection (3), (4), or (5), the department may revoke the change in appropriation right or make the change subject to terms, conditions, restrictions, or limitations necessary to protect the rights of other appropriators.

History: **En. Sec. 1, Ch. 679, L. 2025.**

Compiler's Comments

Effective Date: This section is effective October 1, 2025.

85-2-430 reserved.

85-2-431. Penalty. (1) A person who fails to comply with the requirements of 85-2-424 is liable for a civil penalty of not more than $300.

(2) An action to recover the penalty may be brought by the department and filed in the district court in the county where the real property is located.

(3) The department may recover its reasonable costs for recovering the penalty, including but not limited to attorney fees and costs incurred during collection.

(4) Any penalty fee collected under this section must be deposited in the water right appropriation account provided for in 85-2-318.

History: **En. Sec. 4, Ch. 271, L. 1985; amd. Sec. 4, Ch. 167, L. 1997; amd. Sec. 14, Ch. 70, L. 2005; amd. Sec. 6, Ch. 366, L. 2007; amd. Sec. 2, Ch. 260, L. 2021; amd. Sec. 53, Ch. 535, L. 2021.**

85-2-432 through 85-2-435 reserved.

85-2-436. Instream flow to protect, maintain, or enhance streamflows to benefit fishery resource — change in appropriation rights. (1) The department of fish, wildlife, and parks may change an appropriation right, which it either holds in fee simple or leases, to an instream flow purpose of use and a defined place of use to protect, maintain, or enhance streamflows to benefit the fishery resource.

(2) The change in purpose of use or place of use must meet all of the criteria and process outlined in 85-2-307 through 85-2-309, 85-2-401, and 85-2-402 and the additional criteria and process described in subsection (3) of this section to protect the rights of other appropriators from adverse impacts.

(3) (a) The department of fish, wildlife, and parks, with the consent of the commission, may lease existing rights for the purpose of protecting, maintaining, or enhancing streamflows to benefit the fishery resource.

(b) The department may not approve a change in appropriation right until all objections are resolved.

(c) The application for a change in appropriation right authorization must include specific information on the length and location of the stream reach in which the streamflow is to be protected, maintained, or enhanced and must provide a detailed streamflow measuring plan that describes the points where and the manner in which the streamflow must be measured.

(d) The maximum quantity of water that may be changed to instream flow is the amount historically diverted. However, only the amount historically consumed, or a smaller amount if specified by the department in the change in appropriation right authorization, may be used to protect, maintain, or enhance streamflows below the point of diversion that existed prior to the change in appropriation right.

(e) A lease for instream flow purposes may be entered for a term of up to 10 years, except that a lease of water made available from the development of a water conservation or storage project may be for a term equal to the expected life of the project but not more than 30 years. All leases may be renewed an indefinite number of times but not for more than 10 years for each term. Upon receiving notice of a lease renewal, the department shall notify other appropriators potentially affected by the lease and shall allow 90 days for submission of new evidence of adverse effects to other water rights. A change in appropriation right authorization is not required for a renewal unless an appropriator other than an appropriator described in subsection (3)(i) submits evidence of adverse effects to the appropriator's rights that has not been considered previously. If new evidence is submitted, a change in appropriation right authorization must be obtained according to the requirements of 85-2-402.

(f) The department may modify or revoke the change in appropriation right authorization up to 10 years after it is approved if an appropriator other than an appropriator described in subsection (3)(i) submits new evidence not available at the time the change in appropriation right was approved that proves by a preponderance of evidence that the appropriator's water right is adversely affected.

(g) The priority of appropriation for a lease or change in appropriation right under this section is the same as the priority of appropriation of the right that is changed to an instream flow purpose.

(h) Neither a change in appropriation right nor any other authorization is required for the reversion of a leased appropriation right to the lessor's previous use.

(i) A person issued a water use permit with a priority of appropriation after the date of filing of an application for a change in appropriation right authorization under this section may not object to the exercise of the changed water right according to its terms or to the reversion of a leased appropriation right to the lessor according to the lessor's previous use.

(j) The department of fish, wildlife, and parks shall pay all costs associated with installing devices or providing personnel to measure streamflows according to the measuring plan required under this section.

(4) (a) The department of fish, wildlife, and parks shall complete and submit to the department, commission, and water policy interim committee a biennial progress report in accordance with 5-11-210. This report must include a summary of all appropriation rights changed to an instream flow purpose in the last 2 years.

(b) For each change in appropriation right to an instream flow purpose, the report must include a copy of the change authorization issued by the department and must address:

(i) the length of the stream reach and how it is determined;

(ii) critical streamflow or volume needed to protect, maintain, or enhance streamflow to benefit the fishery resource;

(iii) the amount of water available for instream flow as a result of the change in appropriation right;

(iv) contractual parameters, conditions, and other steps taken to ensure that each change in appropriation right does not harm other appropriators, particularly if the stream is one that experiences natural dewatering; and

(v) methods used to monitor use of water under each change in appropriation right.

(5) This section does not create the right for a person to bring suit to compel the renewal of a lease that has expired.

(6) (a) From May 8, 2007, through June 30, 2029, the department of fish, wildlife, and parks may change, pursuant to this section, the appropriation rights that it holds in fee simple to instream flow purposes on no more than 12 stream reaches.

(b) After June 30, 2029, the department of fish, wildlife, and parks may not change the appropriation rights that it holds in fee simple to instream flow purposes on any stream reaches.

(7) After June 30, 2029, the department of fish, wildlife, and parks may not enter into any new lease agreements pursuant to this section or renew any leases that will expire after that date.

85-2-441. Temporary use of a water right on state trust land — restrictions on state ownership — rescinding of noncompliant ownership interests required. (1) A water right owner may put water from a well or developed spring with ground water development works located on private land to beneficial use on state trust land for the duration of a state land lease the water right owner holds.

(2) The state may not obtain an ownership interest in a water right or the ground water development works of a water right that is diverted from a well or developed spring located on private land exclusively based on trustee obligations for state trust land unless:

(a) a court of competent jurisdiction determines that the state is an owner of that particular water right; or

(b) the state is in possession of a deed transferring ownership of the water right to the state.

(3) Before September 30, 2019, the state shall rescind any claim of ownership it asserted or acquired to satisfy trustee obligations for state trust land prior to May 11, 2019, in a water right or ground water development works that do not meet the requirements of subsection (2).

(4) For the purposes of this section, "state trust land" has the meaning provided in 77-1-101.

History: **En. Sec. 1, Ch. 432, L. 2019.**

85-2-501. Definitions. Unless the context requires otherwise, in this part the following definitions apply:

(1) "Aquifer" means any underground geological structure or formation that is capable of yielding water in usable quantities or is capable of recharge.

(2) "Aquifer test" means stressing an aquifer by removing or adding water at a known rate or changing the pressure by a known quantity and measuring the resultant change in hydraulic head for the purpose of determining the aquifer's hydraulic properties near the tested well.

(3) "Bureau" means the Montana state bureau of mines and geology provided for in 20-25-211.

(4) "Ground water" means any water that is beneath the ground surface.

(5) "Ground water area" means an area that, as nearly as known facts permit, may be designated so as to enclose a single and distinct body of ground water, which must be described horizontally by surface description in all cases and which may be limited vertically by describing known geological formations if conditions dictate vertical limits to be desirable.

History: **En. Sec. 1, Ch. 237, L. 1961; amd. Sec. 16, Ch. 280, L. 1965; amd. Sec. 1, Ch. 307, L. 1971; amd. Sec. 40, Ch. 452, L. 1973; amd. Sec. 167, Ch. 253, L. 1974; amd. 85-2-503. Controlled ground water subareas. For purposes of administration, large ground water areas may be divided into convenient administrative units known as subareas.

History: **En. Sec. 1, Ch. 237, L. 1961; amd. Sec. 16, Ch. 280, L. 1965; amd. Sec. 1, Ch. 307, L. 1971; amd. Sec. 40, Ch. 452, L. 1973; amd. Sec. 167, Ch. 253, L. 1974; amd. Sec. 8, Ch. 460, L. 1977; R.C.M. 1947, 89-2911(part).**

85-2-504. Standards for determining fresh water. Fresh water shall be considered to be water fit for domestic, livestock, or agricultural use. The department, after notice and hearing, may fix definite standards for determining fresh water in any controlled ground water area or subarea of the state.

History: **En. Sec. 1, Ch. 237, L. 1961; amd. Sec. 16, Ch. 280, L. 1965; amd. Sec. 1, Ch. 307, L. 1971; amd. Sec. 40, Ch. 452, L. 1973; amd. Sec. 167, Ch. 253, L. 1974; amd. Sec. 8, Ch. 460, L. 1977; R.C.M. 1947, 89-2911(part).**

Cross-References

Water quality — classification and standards, Title 75, ch. 5, part 3.

85-2-505. Waste and contamination of ground water prohibited. (1) No ground water may be wasted. The department shall require all wells producing waters that contaminate other waters to be plugged or capped. It shall also require all flowing wells to be so capped or equipped with valves that the flow of water can be stopped when the water is not being put to beneficial use. Likewise, both flowing and nonflowing wells must be so constructed and maintained as to prevent the waste, contamination, or pollution of ground water through leaky casings, pipes, fittings, valves, or pumps either above or below the land surface. However, in the following cases the withdrawal or use of ground water may not be construed as waste under this part:

(a) the withdrawal of reasonable quantities of ground water in connection with the construction, development, testing, or repair of a well or other means of withdrawal of ground water;

(b) the inadvertent loss of ground water owing to breakage of a pump, valve, pipe, or fitting, if reasonable diligence is shown by the person in effecting the necessary repair;

(c) the disposal of ground water without further beneficial use that must be withdrawn for the sole purpose of improving or preserving the utility of land by draining the same or that must be removed from a mine to permit mining operations or to preserve the mine in good condition;

(d) the disposal of ground water used in connection with producing, reducing, smelting, and milling metallic ores and industrial minerals or that displaced from an aquifer by the storage of other mineral resources; and

(e) the management, discharge, or reinjection of ground water produced in association with a coal bed methane well in accordance with 82-11-175(2)(b) through (2)(d).

(2) The department at any time may hold a hearing on its own motion or upon petition signed by a representative body of users of ground water in any area or subarea to determine whether the water supply within that area or subarea is used in compliance with this part.

History: En. Sec. 16, Ch. 237, L. 1961; amd. Sec. 173, Ch. 253, L. 1974; amd. Sec. 47, Ch. 460, L. 1977; R.C.M. 1947, 89-2926; amd. Sec. 5, Ch. 578, L. 2001.

85-2-506. Controlled ground water areas — designation or modification. (1) The department may by rule designate or modify permanent or temporary controlled ground water areas as provided in this part. The rule for each controlled ground water area must designate the boundaries of the controlled ground water area.

(2) The rulemaking process for designation or modification of a controlled ground water area may be initiated by:

(a) the department;

(b) submission of a correct and complete petition from a state or local public health agency for identified public health risks; or

(c) submission of a correct and complete petition:

(i) by a municipality, county, conservation district, or local water quality district formed under Title 7, chapter 13, part 45; or

(ii) signed by at least one-third of the water right holders in a proposed controlled ground water area.

(3) (a) A correct and complete petition must:

(i) be in a form prescribed by the department and must contain analysis prepared by a hydrogeologist, a qualified scientist, or a qualified licensed professional engineer concluding that one or more of the criteria provided in subsection (5) are met; and

(ii) describe proposed measures, if any, to mitigate effects of the criteria identified in subsection (5) that are alleged in the petition.

(b) When the department proposes a rule pursuant to this section, the place for the hearing must be within or as close as practical to the proposed or existing controlled ground water area.

(c) (i) The department shall notify the petitioner of any defects in a petition within 180 days. If the department does not notify the petitioner of any defects within 180 days, the petition must be treated as correct and complete.

(ii) A petition that is not made correct and complete within 90 days from the date of notification by the department of any defect is terminated.

(4) (a) Within 60 days after a petition is determined to be correct and complete, the department shall:

(i) deny in writing the petition in whole or in part, stating the reasons for denial;

(ii) inform the petitioner that the department will study the information presented in the petition for a period not to exceed 90 days before denying or proceeding with the petition; or

(iii) initiate rulemaking proceedings in accordance with Title 2, chapter 4, part 3.

(b) Failure of the department to act under subsection (4)(a) does not mandate that the department grant the petition for rulemaking.

(c) In addition to the notice requirements of Title 2, chapter 4, parts 1 through 4, the department shall provide public notice of the rulemaking hearing by:

(i) publishing a notice at least once each week for 3 successive weeks, with the first notice not less than 30 days before the date of the hearing in a newspaper of general circulation in the county or counties in which the proposed controlled ground water area is located;

(ii) serving by mail a copy of the notice, not less than 30 days before the hearing, upon each person or public agency known from an examination of the records of the department to be a water right holder with a diversion within the proposed controlled ground water area, all landowners of record within the proposed controlled ground water area, and each well driller licensed in Montana whose address is within any county in which any part of the proposed controlled ground water area is located; and

(iii) serving by mail a copy of the notice upon any other person or state or federal agency that the department feels may be interested in or affected by the proposed designation or modification of a controlled ground water area.

(d) The notice under subsection (4)(c) must include a summary of the basis for the proposed rule. Publication and mailing of the notice as prescribed in this section, when completed, is considered to be sufficient notice of the hearing to all interested persons.

(5) The department may designate a permanent controlled ground water area by rule if it finds by a preponderance of the evidence that any of the following criteria have been met and cannot be appropriately mitigated:

(a) current or projected reductions of recharge to the aquifer or aquifers in the proposed controlled ground water area will cause ground water levels to decline to the extent that water right holders cannot reasonably exercise their water rights;

(b) current or projected ground water withdrawals from the aquifer or aquifers in the proposed controlled ground water area have reduced or will reduce ground water levels or surface water availability necessary for water right holders to reasonably exercise their water rights;

(c) current or projected ground water withdrawals from the aquifer or aquifers in the proposed controlled ground water area have induced or altered or will induce or alter contaminant migration exceeding relevant water quality standards;

(d) current or projected ground water withdrawals from the aquifer or aquifers in the proposed controlled ground water area have impaired or will impair ground water quality necessary for water right holders to reasonably exercise their water rights based on relevant water quality standards;

(e) ground water within the proposed controlled ground water area is not suited for beneficial use; or

(f) public health, safety, or welfare is or will become at risk.

(6) (a) If the department finds that sufficient facts are not available to designate a permanent controlled ground water area, it may designate by rule a temporary controlled ground water area to allow studies to obtain the facts needed to determine whether or not it is appropriate to designate a permanent controlled ground water area. The department shall set the length of time that the temporary controlled ground water area will be in effect. Subject to subsection (6)(c), the term of a temporary controlled ground water area may be extended by rule.

(b) A temporary controlled ground water area designation is for the purpose of study and cannot include the control provisions provided in subsection (7), other than measurement, water quality testing, and reporting requirements.

(c) A temporary controlled ground water area designation may not exceed a total of 6 years, including any extensions.

(d) Prior to expiration of a temporary controlled ground water area, the department may amend or repeal the rule establishing the temporary controlled ground water area or may designate a permanent controlled ground water area through the rulemaking process under this section.

(e) Studies for temporary controlled ground water areas may be considered for funding under the renewable resource grant and loan program in Title 85, chapter 1, part 6.

(f) If there is a ground water investigation program within the bureau, the ground water assessment steering committee established by 2-15-1523 shall consider temporary controlled ground water areas for study.

(7) A controlled ground water area may include but is not limited to the following control provisions:

(a) a provision closing the controlled ground water area to further appropriation of ground water;

(b) a provision restricting the development of future ground water appropriations in the controlled ground water area by flow, volume, purpose, aquifer, depth, water temperature, water quality, density, or other criteria that the department determines necessary;

(c) a provision requiring measurement of future ground water or surface water appropriations;

(d) a provision requiring the filing of notice on land records within the boundary of a permanent controlled ground water area to inform prospective holders of an interest in the property of the existence of a permanent controlled ground water area. Notice of the designation must be removed or modified as necessary to accurately reflect modification or repeal of a permanent designation within 60 days.

(e) a provision for well spacing requirements, well construction constraints, and prior department approval before well drilling, unless the well is regulated pursuant to Title 82, chapter 11;

(f) a provision for mitigation of ground water withdrawals;

(g) a provision for water quality testing;

(h) a provision for data reporting to the department; and

(i) other control provisions that the department determines are appropriate and adopts through rulemaking.

(8) Pursuant to 85-20-1902, the provisions of this section do not apply within the exterior boundaries of the Flathead Indian reservation.

(a) applying for and receiving a permit from the department in accordance with part 3 of this chapter; or

(b) following the requirements of a rule promulgated pursuant to 85-2-506.

(2) The department may not grant a permit if the withdrawal would be beyond the capacity of the aquifer or aquifers in the controlled ground water area to yield ground water within a reasonable or feasible pumping lift, in the case of pumping developments, or within a reasonable or feasible reduction of pressure, in the case of artesian developments.

History: En. Sec. 8, Ch. 237, L. 1961; amd. Sec. 43, Ch. 452, L. 1973; amd. Sec. 172, Ch. 253, L. 1974; R.C.M. 1947, 89-2918; amd. Sec. 6, Ch. 161, L. 2005; amd. Sec. 6, Ch. 86, L. 2009.

85-2-510. Production of water from oil and gas wells — hearings — jurisdiction of board of oil and gas conservation. The regulation of the production, use, or disposal of fresh, brackish, or saline water that is entirely the result of the production of oil or gas, or both, must be under the jurisdiction of the board of oil and gas conservation and is subject to the requirements of 82-11-123. Hearings pertaining to the production, use, or disposal of water from those wells must be held by that board in accordance with the procedures established by that board. The department may petition the board of oil and gas conservation for hearings in regard to those operations, and it must be notified by the board of oil and gas conservation of those hearings instigated by other parties.

History: En. Sec. 6, Ch. 237, L. 1961; amd. Sec. 170, Ch. 253, L. 1974; R.C.M. 1947, 89-2916(2); amd. Sec. 2, Ch. 555, L. 2023.

85-2-521. Renumbered 82-11-175. Sec. 1, Ch. 117, L. 2003.

85-2-522. Aquifer tests. (1) Aquifer tests required by a state agency must be forwarded by the agency to the bureau.

(2) Except as provided in subsection (3), the aquifer test report must be filed on a form specified by the department in consultation with the department of environmental quality and the bureau.

(3) The bureau may allow submission of an aquifer test report in an electronic format if it meets the requirements for the form provided for in subsection (2).

History: En. Sec. 3, Ch. 412, L. 2007.

85-2-523. Rulemaking. The department shall adopt rules for the purpose of implementing 85-2-506 and other controlled ground water area statutes. The rules must include but are not limited to petition requirements and the hearing procedure and process for controlled ground water areas.

History: En. Sec. 4, Ch. 86, L. 2009.

85-2-524. Criteria for petition applications. Municipalities, counties, conservation districts, and local water quality districts may establish specific criteria for acceptance of an application to the municipality, county, conservation district, or local water quality district to petition for creation of a controlled ground water area and other criteria necessary to implement this part. Those criteria may include but are not limited to:

(1) the submission of substantial credible evidence that one or more of the criteria provided in 85-2-506(5) are met;

(2) a description of proposed measures, if any, to mitigate effects of the criteria identified in 85-2-506(5);

(3) a description of proposed studies for a temporary controlled ground water area;

(4) a requirement that an application be supported by owners of at least one-fourth of the water rights with a point of diversion of water within the boundaries of the proposed controlled ground water area;

(5) a requirement that an applicant pay an application or processing fee for the application; and

(6) a description of proposed funding for studies for a controlled ground water area.

History: En. Sec. 7, Ch. 86, L. 2009.

85-2-525. Ground water investigation program — advisory committee. (1) The Montana bureau of mines and geology shall develop and implement a ground water investigation program for the purpose of collecting and compiling ground water and aquifer data. The program shall gather data, compile existing information, conduct field studies, and prepare a detailed hydrogeologic assessment report for each subbasin. The program shall develop a monitoring plan and a hydrogeologic model for each subbasin for which a report is prepared.

(2) The ground water assessment steering committee, established by 2-15-1523, shall prioritize subbasins for investigation based upon current and anticipated growth of agriculture, industry, housing, and commercial activity. Permit applications for the development of surface water or ground water and the timing of adjudication of water rights may be taken into account in prioritizing subbasins.

(3) The bureau of mines and geology shall report, in accordance with 5-11-210, on the work of the ground water investigation program to the water policy committee established in 5-5-231.

History: En. Sec. 1, Ch. 436, L. 2009; amd. Sec. 4, Ch. 465, L. 2019.

Part 6

Yellowstone River Basin

Part Cross-References

Diversions from Yellowstone River Basin, Title 85, ch. 2, part 8.
Yellowstone River Compact, Title 85, ch. 20, part 1.

85-2-601. Statement of legislative findings and policy. The legislature, noting that appropriations have been claimed, that applications have been filed for, and that there is further widespread interest in making substantial appropriations of water in the Yellowstone River basin, finds that these appropriations threaten the depletion of Montana's water resources to the significant detriment of existing and projected agricultural, municipal, recreational, and other uses and of wildlife and aquatic habitat. The legislature further finds that these appropriations foreclose the options to the people of this state to utilize water for other future beneficial purposes, including municipal water supplies, irrigation systems, and minimum flows for the protection of existing rights and aquatic life. The legislature, pursuant to its mandate and authority under Article IX of the Montana constitution, declares that it is the policy of this state that before these proposed appropriations are acted upon, existing rights to water in the Yellowstone basin must be accurately determined for their protection and that reservations of water within the basin must be established as rapidly as possible for the preservation and protection of existing and future beneficial uses.

History: En. 89-8-103 by Sec. 1, Ch. 116, L. 1974; R.C.M. 1947, 89-8-103.

Cross-References

Declaration of policy and purpose, 85-2-101.

85-2-602. Definitions. Unless the context clearly requires otherwise, in this part the following definitions apply:

(1) (a) "Application" means an application for a permit under part 3 of this chapter to appropriate surface water from any source of supply within the basin for either or both of the following purposes:

(i) a reservoir with a total planned capacity of 14,000 acre-feet or more; or

(ii) for a flow rate greater than 20 cubic feet of water per second.

(b) The term also includes an application for approval under 85-2-402 and 85-2-436, if applicable, to change the purpose of use.

(2) "Basin" means the Yellowstone River basin.

(3) "Reservation" means a reservation of water provided for by 85-2-316.

History: En. 89-8-104 by Sec. 2, Ch. 116, L. 1974; R.C.M. 1947, 89-8-104(Intro.), (2) thru (4); amd. Sec. 6, Ch. 448, L. 2007.

85-2-603. Suspension of action. (1) The department may not grant or otherwise take any action on an application until one of the following first occurs:

(a) the department makes a final determination on the applications for reservations of water in the basin filed before January 1, 1977, in accordance with 85-2-316;

(b) a final determination of existing rights has been made in the source of supply in accordance with part 2 of this chapter; or

(c) January 1, 1978. However, if a court stays or enjoins the continuance of proceedings on any pending application for reservation of water in the basin filed before January 1, 1977, and the stay or injunction prevents the board from making a final determination on the application before January 1, 1978, the court shall extend this date by the length of delay incurred. The court may not extend this date beyond January 15, 1979.

(2) A reservation established before an application for permit is granted is a preferred use over the right to appropriate water pursuant to the permit, and the permit, if granted, must be issued subject to that preferred use.

History: En. 89-8-105 by Sec. 3, Ch. 116, L. 1974; amd. Sec. 1, Ch. 26, L. 1977; R.C.M. 1947, 89-8-105; amd. Sec. 465, Ch. 418, L. 1995.

85-2-604. When department may suspend action. The department may suspend action on applications not meeting the definition of application in 85-2-602 if it determines, after a public hearing conducted under the contested case procedures of the Montana Administrative Procedure Act, that the cumulative impact of those applications, if granted, would be contrary to the policies and purposes of this part. If the department suspends action on such applications, the provisions of 85-2-603 apply.

History: En. 89-8-106 by Sec. 4, Ch. 116, L. 1974; R.C.M. 1947, 89-8-106.

Cross-References

Contested case hearing, 2-4-612.

85-2-605. Reservations. (1) The department may apply for reservations and shall, as rapidly as possible, assist other appropriate state agencies and political subdivisions in applying for reservations within the basin. The United States or any agency of the United States may apply for reservation of water in the basin under 85-2-316 for beneficial use of that water in the state of Montana. Particular emphasis must be given to applications to reserve water for agricultural, municipal, and minimum flow purposes for the protection of existing rights and aquatic life.

(2) Notwithstanding other provisions of this title, the department shall extend the duration of the 14 conservation district reservations and 8 municipal reservations approved by administrative order dated December 15, 1978, in the basin until those reservations are perfected, or until those reservations are revoked pursuant to 85-2-316.

History: En. 89-8-107 by Sec. 5, Ch. 116, L. 1974; amd. Sec. 10, Ch. 416, L. 1977; R.C.M. 1947, 89-8-107; amd. Sec. 1, Ch. 145, L. 1997.

Part Cross-References

Indian lands recognized to be under federal jurisdiction, Art. I, Mont. Const.
Reserved Water Rights Compact Commission, 2-15-212.
Fort Peck-Montana Compact, Title 85, ch. 20, part 2.
Northern Cheyenne-Montana Compact, Title 85, ch. 20, part 3.

85-2-701. Legislative intent. (1) Because the water and water rights within each water division are interrelated, it is the intent of the legislature to conduct unified proceedings for the general adjudication of existing water rights under the Montana Water Use Act. It is the intent of the legislature that the unified proceedings include all claimants of reserved Indian water rights as necessary and indispensable parties under authority granted the state by 43 U.S.C. 666. However, it is further intended that the state of Montana proceed under the provisions of this part in an effort to conclude compacts for the equitable division and apportionment of waters between the state and its people and the several Indian tribes claiming reserved water rights within the state.

(2) To the maximum extent possible, the reserved water rights compact commission established under 2-15-212 should make the negotiation of water rights claimed by the federal government or Indian tribes in or affecting the basins identified by 85-2-218 its highest priority. In negotiations, the commission is acting on behalf of the governor.

History: En. Sec. 27, Ch. 697, L. 1979; amd. Sec. 9, Ch. 651, L. 1987; amd. Sec. 466, Ch. 418, L. 1995; amd. Sec. 298, Ch. 42, L. 1997.

Cross-References

Statement of claim for federal reserved water rights, 85-2-224.
Final decree, 85-2-234.

85-2-702. Negotiation with Indian tribes. (1) The reserved water rights compact commission, created by 2-15-212, may negotiate with the Indian tribes or their authorized representatives jointly or severally to conclude compacts authorized under 85-2-701. Compact proceedings must be commenced by the commission. The commission shall serve by certified mail directed to the governing body of each tribe a written request for the initiation of negotiations under this part and a request for the designation of an authorized representative of the tribe to conduct compact negotiations. Compact negotiations commence upon receipt of the written designation from the governing body of a tribe.

(2) When the compact commission and the Indian tribes or their authorized representatives have agreed to a compact, they shall sign a copy and file an original copy with the department of state of the United States of America and copies with the secretary of state of Montana and with the governing body for the tribe involved. The compact is effective and binding upon all parties upon ratification by the legislature of Montana and any affected tribal governing body, and approval by the appropriate federal authority.

(3) Upon its ratification by the Montana legislature and the tribe, the terms of a compact must be included in the preliminary decree as provided by 85-2-231, and unless an objection to the compact is sustained under 85-2-233, the terms of the compact must be included in the final decree without alteration. However, if approval of the state legislature and the tribe has not been accomplished by July 1, 2013, all Indian claims for reserved water rights that have not

been resolved by a compact must be filed with the department within 24 months. These new filings must be used in the formulation of the preliminary decree and must be given treatment similar to that given to all other filings.

History: **En. Sec. 27, Ch. 697, L. 1979; amd. Sec. 8, Ch. 268, L. 1981; amd. Sec. 6, Ch. 667, L. 1985; amd. Sec. 2, Ch. 358, L. 1987; amd. Sec. 3, Ch. 784, L. 1991; amd. Sec. 2, Ch. 44, L. 1997; amd. Sec. 2, Ch. 103, L. 2003; amd. Sec. 2, Ch. 5, L. 2009.**

Cross-References

Jurisdiction on Indian lands, Title 2, ch. 1, part 3.

85-2-703. Negotiation with federal government. The compact commission may also enter into separate negotiations with the federal government for the conclusion of compacts concerning the equitable division and apportionment of water between the state and its people and the federal government claiming non-Indian reserved waters within the state. The terms and conditions of such negotiations shall be the same as provided in this section for negotiations with Indian tribes.

History: **En. Sec. 27, Ch. 697, L. 1979.**

Cross-References

Negotiations with other states by Department, 85-1-223.

85-2-704. Termination of negotiations. (1) The commission or any negotiating tribe or federal agency may terminate negotiations by providing notice to all parties 30 days in advance of the termination date. On the termination date, the suspension of the application of part 2 provided for in 85-2-217 also terminates. The tribe or federal agency shall file all of its claims for reserved rights within 24 months of the termination of negotiations.

(2) Once negotiations have been terminated pursuant to subsection (1), they may be reopened only by mutual agreement of the parties.

History: **En. Sec. 27, Ch. 697, L. 1979; amd. Sec. 9, Ch. 268, L. 1981; amd. Sec. 7, Ch. 667, L. 1985; amd. Sec. 3, Ch. 5, L. 2009.**

85-2-705. Status reports to chief water judge. (1) The Montana reserved water rights compact commission must submit to the chief water judge, appointed pursuant to 3-7-221, a report on the status of its negotiations on July 1, 1985, and every 6 months thereafter.

(2) Each report must state which Indian tribes and federal agencies are engaged in negotiations, whether any negotiations with Indian tribes or federal agencies have been terminated, and the progress of negotiations on a tribe-by-tribe and agency-by-agency basis. The report must be made available to the public.

History: **En. Sec. 8, Ch. 667, L. 1985.**

85-2-706. Renumbered 85-20-401. Code Commissioner, 1994.

85-2-707. Renumbered 85-20-402. Code Commissioner, 1994.

85-2-708. Water administration interim agreements within Indian reservations. (1) Because it appears to be to the common advantage of the state and Indian tribes to cooperate in matters involving the permitting and use of water within the exterior boundaries of an Indian reservation prior to the final adjudication of Indian reserved water rights and because the state does not intend by enactment of this section to limit, expand, alter, or waive state jurisdiction to administer water rights within the exterior boundaries of an Indian reservation, pursuant to the requirements of Title 18, chapter 11, the department may negotiate and conclude an interim agreement with the tribal government of any Indian tribe in Montana prior to final adjudication of Indian reserved water rights for the purpose of implementing a water administration plan and a permitting process for the issuance of water rights and changes in water right uses within the exterior boundaries of an Indian reservation.

(2) Subject to subsection (4), an agreement entered into pursuant to subsection (1) must:

(a) provide for the retention of exclusive authority by the state to issue permits to applicants who are not members of the tribe and to issue change of use authorizations;

(b) provide that any permits must be issued in accordance with the criteria established by state law; and

(c) provide that permits may be only for new uses with a date of priority in compliance with state law.

(3) Prior to concluding any agreement under this section, the department shall hold public meetings, after proper public notice of the meetings has been given and the proposed agreement has been made available for public review, to afford the public an opportunity to comment on the contents of the agreement.

(4) The provisions of subsection (2) do not apply if a court of competent jurisdiction has held that the department lacks exclusive authority to issue new water use permits within the exterior boundaries of an Indian reservation pending final adjudication of Indian reserved water rights. In that case, the department, with the approval of the governor, may enter into an interim agreement that provides for joint tribal and state administration of new water uses on the reservation pending final adjudication of Indian reserved water rights. Any interim agreement entered into pursuant to this subsection (4):

(a) must address how and whether new ground water uses for domestic and municipal purposes will be granted. Except for the criterion in 85-2-311(1)(a)(ii), an interim agreement that grants new ground water uses must establish criteria for new water uses that incorporate the criteria listed in 85-2-311.

(b) must address how and whether changes in existing appropriation rights within the exterior boundaries of the reservation will be granted. An interim agreement that grants changes must establish criteria for changes in existing appropriation rights that incorporate the criteria listed in 85-2-402.

(c) must address how and whether water use will be authorized under the interim agreement and how the use will be secure and valid in the event of the termination of the interim agreement, quantification of reserved water rights, or termination of negotiations of reserved water rights under 85-2-704;

(d) must maintain the jurisdictional claims of each party to the interim agreement;

(e) must protect each party against a waiver of the right to challenge the claims of each party at any time;

(f) may not prejudice the regulatory or adjudicatory jurisdiction of either party;

(g) must provide that none of the activities of each party in the negotiation or implementation of an interim agreement may be used to affect the equitable or legal position of either party in any future litigation; and

(h) must provide that nothing in the negotiation or implementation of an interim agreement may be considered as enlarging or diminishing the jurisdiction or authority of either party within the reservation.

Part 8
Diversions From the Yellowstone River Basin

85-2-801. Definitions. Unless the context requires otherwise, in this part the following definitions apply:

(1) "Basin" means the Yellowstone River basin.

(2) "Compact" means the Yellowstone River Compact provided for in 85-20-101.

History: En. Sec. 1, Ch. 581, L. 1981.

85-2-802. Authority to approve diversions. The department may consent on behalf of the state of Montana to diversions of water from the basin pursuant to Article X of the compact, including diversions of water allocated under the terms of the compact to the other signatory states of Wyoming and North Dakota.

History: En. Sec. 2, Ch. 581, L. 1981.

85-2-803. Legislative review. (1) A diversion of water from the basin pursuant to Article X of the compact consented to by the department under the provisions of this part may not be made until one of the following occurs, whichever is later:

(a) the legislature ratifies the first determination of the department to consent to a diversion of water from the basin pursuant to Article X of the compact; or

(b) July 1, 1983.

(2) A decision by the department to disapprove a diversion of water is not subject to legislative approval.

History: En. Sec. 3, Ch. 581, L. 1981.

85-2-804. Application — notice — objections — hearing. (1) An appropriator proposing to divert from the basin water allocated to Montana under the terms of the compact or divert from the basin unallocated compact water within Montana shall file an application with the department. The application must state the name and address of the applicant and facts tending to show that:

(a) the diversion and ultimate use of the water in Montana is for a beneficial use of water;

(b) the diversion and ultimate use of water will not adversely affect the water rights of other persons;

(c) the proposed means of diversion, construction, and operation are adequate;

(d) the diversion and ultimate use will not interfere unreasonably with other planned uses or developments for which a water right has been established or a permit has been issued or for which water has been reserved;

(e) the diversion and ultimate use of the water will not exceed the allocated share under the compact of any of the signatory states;

(f) the diversion and ultimate use of the water are in the public interest of Montana; and

(g) the applicant intends to comply with the laws of the signatory states to the compact.

(2) An appropriator proposing to divert from the basin water allocated to North Dakota or Wyoming under the terms of the compact or divert from the basin unallocated compact water within North Dakota or Wyoming shall file an application with the department. The application must state the name and address of the applicant and facts tending to show that:

(a) the proposed means of diversion, construction, and operation are adequate;

(b) the diversion and ultimate use of the water will not exceed the allocated share under the compact of any of the signatory states; and

(c) the applicant intends to comply with the compact.

(3) Notice of the proposed diversion must be given by the department in the same manner as provided in 85-2-307.

(4) An objection to an application must be filed by the date specified by the department in the notice.

(5) The objector to an application under subsection (1) shall state the objector's name and address and facts tending to show that:

(a) the diversion and ultimate use of the water in Montana are not for a beneficial use of water;

(b) the property, rights, or interests of the objector would be adversely affected by the proposed diversion or ultimate use of the water;

(c) the proposed means of diversion, construction, and operation are not adequate;

(d) the diversion and ultimate use will interfere unreasonably with the objector's planned uses or development for which the objector has a water right, a permit, or a reserved water right;

(e) the diversion and ultimate use of the water will exceed the allocated share under the compact of any signatory state; or

(f) the diversion and ultimate use of the water are not in the public interest of Montana.

(6) The objector to an application under subsection (2) shall state the objector's name and address and facts tending to show that:

(a) the property, rights, or interests of the objector would be adversely affected by the proposed diversion or ultimate use of the water;

(b) the proposed means of diversion, construction, and operation are not adequate; or

(c) the diversion and ultimate use of the water will exceed the allocated share under the compact of any signatory state.

(7) If the department receives an objection to an application, it shall hold a hearing on the application within 60 days from the date set by the department for filing objections. Service of notice of the hearing must be made by certified mail upon the applicant and the objector.

(8) The hearing must be conducted under the contested case procedures of the Montana Administrative Procedure Act in Title 2, chapter 4, part 6.

History: En. Sec. 4, Ch. 581, L. 1981; amd. Sec. 2766, Ch. 56, L. 2009; amd. Sec. 7, Ch. 251, L. 2009; amd. Sec. 2, Ch. 52, L. 2015.

85-2-805. Criteria for approval — terms. (1) The department may issue its approval of a diversion of water allocated to Montana under the terms of the compact or unallocated compact water diverted in Montana if:

(a) the diversion and the ultimate use of the water in Montana are for a beneficial use of water;

(b) the diversion and ultimate use of water will not adversely affect the water rights of other persons;

(c) the proposed means of diversion, construction, and operation are adequate;

(d) the diversion and ultimate use will not interfere unreasonably with other planned uses or developments for which a water right has been established or a permit has been issued or for which water has been reserved;

(e) the diversion and ultimate use of water will not exceed the allocated share under the compact of any of the signatory states;

(f) the diversion and ultimate use of the water are in the public interest of Montana; and

(g) the applicant signs an agreement to comply with the laws of the signatory states to the compact in constructing, operating, and maintaining all facilities associated with the diversion and ultimate use of the water.

(2) The department may approve a diversion of water allocated to North Dakota or Wyoming or unallocated compact water diverted in North Dakota or Wyoming if the diversion will not adversely affect the property, rights, or interests of an appropriator located in Montana and if the diversion and ultimate use of water will not exceed the allocated share under the compact of any of the signatory states.

(3) The department may approve a diversion subject to such terms, conditions, restrictions, and limitations as it considers necessary to meet the applicable criteria listed in subsection (1) or (2).

History: En. Sec. 5, Ch. 581, L. 1981.

85-2-806. Combined proceeding. The department, upon petition by the applicant, may consider and act upon any application for diversion of water from the basin filed pursuant to the provisions of this part in conjunction with proceedings involving the siting of a facility or associated facilities conducted under the provisions of Title 75, chapter 20, part 4, as amended, or in conjunction with any departmental proceeding involving the issuance of a permit or approval of a change conducted under Title 85, chapter 2, if in the opinion of the department consideration of both applications in the same proceeding will better enable the department to fulfill its functions, duties, and responsibilities under the provisions of Title 75, chapter 20, part 4, or Title 85, chapter 2, and this part. The department's consent to the diversion of Montana water out of the basin for ultimate use in a facility as defined in Title 75, chapter 20, must be contingent upon the department's issuance of a certificate for the facility in accordance with Title 75, chapter 20. The department's consent terminates 10 years after the date of issuance of the consent unless the department issues the certificate for the facility in accordance with Title 75, chapter 20, and approval of North Dakota and Wyoming is secured in accordance with Article X of the compact or unless consent is extended by the department.

History: En. Sec. 6, Ch. 581, L. 1981; amd. Sec. 467, Ch. 418, L. 1995.

85-2-807. Department authorized to appear in administrative and legal proceedings. The department may appear on behalf of the state of Montana in proceedings before the legislatures and administrative agencies of the other signatory states to the compact and in legal proceedings commenced in federal or state court within the other signatory states involving the consent of such signatory states to diversions of water from the basin under Article X of the compact and any other laws or rules of such signatory states applicable to such diversions to the extent necessary to protect the interests and the citizens of Montana in those proceedings.

History: En. Sec. 7, Ch. 581, L. 1981.

Part 9
Ground Water Assessment

Part Cross-References

Ground Water Assessment Steering Committee, 2-15-1523.
The Montana Resource Indemnity Trust and Ground Water Assessment Act, 15-38-101.
Water well contractors — annual renewal — fee — revocation for nonrenewal, 37-43-307.
Application for permit — fee, 85-2-302.

85-2-901. Short title. This part may be cited as the "Montana Ground Water Assessment Act".

History: En. Sec. 1, Ch. 769, L. 1991.

85-2-902. Findings and purpose. (1) The legislature finds that:

(a) Montana's citizens depend on ground water for a variety of uses, including domestic, agricultural, industrial, irrigation, mining, municipal, power, and recreation, and for maintenance of ecosystems and surface water supplies;

(b) ground water supplies and quality are threatened by a variety of contaminant sources;

(c) there is insufficient information characterizing the volume, quality, and flow patterns of the state's ground water;

(d) ground water information deficiencies are hampering the efforts of citizens and units of government to properly manage, protect, and develop ground water;

(e) government policies and programs should focus on preventing ground water contamination and supply depletion, but in order for preventive policies and programs to be effective, better ground water information is required; and

(f) there is a need for better coordination among those numerous units of state, federal, and local government with responsibility for ground water management, protection, and development.

(2) The purposes of this part are:

(a) to improve the quality of ground water management, protection, and development decisions within the public and private sectors by establishing a program to systematically assess and monitor the state's ground water and to disseminate the information to interested persons; and

(b) to improve coordination of ground water management, protection, development, and research functions among units of state, federal, and local government by establishing a ground water assessment steering committee.

History: En. Sec. 2, Ch. 769, L. 1991.

85-2-903. Definitions. As used in this part, the following definitions apply:

(1) "Aquifer" means a water-bearing, subsurface formation capable of yielding sufficient quantities of water to a well for a beneficial use.

(2) "Ground water assessment steering committee" means the committee established by 2-15-1523.

(3) "Ground water characterization program" means a program to systematically assess and document the hydrogeology and quality of the state's major aquifers.

(4) "Ground water characterization study" means the assessment of individual aquifers in specific areas within the state.

(5) "Ground water monitoring program" means a program to produce and maintain a long-term record of ground water chemistry and water level changes, based on information collected from a statewide network of observation wells.

History: En. Sec. 3, Ch. 769, L. 1991.

85-2-904 reserved.

85-2-905. Ground water assessment account. (1) There is a ground water assessment account within the special revenue fund established in 17-2-102. The Montana bureau of mines and geology is authorized to expend amounts from the account necessary to carry out the purposes of this part.

(2) The account may be used by the Montana bureau of mines and geology only to carry out the provisions of this part.

(3) Subject to the direction of the ground water assessment steering committee, the Montana bureau of mines and geology shall investigate opportunities for the participation and financial contribution of agencies of federal and local governments to accomplish the purposes of this part.

(4) There must be deposited in the account:

(a) at the beginning of each fiscal year, the proceeds from the resource indemnity and ground water assessment tax, as authorized by 15-38-106, and the interest earnings from the resource indemnity trust fund, as authorized by 15-38-202;

(b) funds provided by state government agencies and by local governments to carry out the purposes of this part; and

(c) funds provided by any other public or private sector organization or person in the form of gifts, grants, or contracts specifically designated to carry out the purposes of this part.

History: En. Secs. 4, 5, Ch. 769, L. 1991; amd. Sec. 2, Ch. 31, L. 1995; amd. Sec. 299, Ch. 42, L. 1997; amd. Sec. 6, Ch. 444, L. 1997; amd. Sec. 8, Ch. 552, L. 1999; amd. Sec. 14, Ch. 522, L. 2003; amd. Sec. 23, Ch. 432, L. 2007.

85-2-906. Ground water characterization program — ground water monitoring program. (1) There is a ground water characterization program and a ground water monitoring program.

(2) Subject to the direction of the ground water assessment steering committee, the Montana bureau of mines and geology shall establish and administer the ground water characterization program and the ground water monitoring program.

(3) The Montana bureau of mines and geology shall work with units of local government, ground water users, and other affected organizations and individuals in areas of the state that are included in a ground water characterization study and, if warranted by the level of local interest in a ground water characterization study, shall establish a local ground water assessment advisory committee.

(4) The ground water assessment steering committee created by 2-15-1523 shall:

(a) oversee expenditures from the ground water assessment account and organization plans and work plans proposed by the Montana bureau of mines and geology to implement the ground water characterization and ground water monitoring programs, including plans for local involvement and participation in ground water characterization studies;

(b) approve ground water monitoring sites;

(c) prioritize and select ground water characterization study areas;

(d) develop plans for ground water information management and dissemination;

(e) develop plans for integrating existing ground water information with information collected under the programs created by subsection (1);

(f) coordinate ground water information collection projects sponsored by individual units of state, federal, or local government with the programs created by subsection (1); and

(g) evaluate reports and other information produced by the Montana bureau of mines and geology from ground water characterization studies.

(5) The ground water assessment steering committee shall invite representatives of local governments and Indian tribes with jurisdiction over areas of the state that are included in an active ground water characterization study or in a study scheduled to begin in the ensuing biennium, as well as affected citizens in these areas, to participate in steering committee meetings.

History: En. Sec. 6, Ch. 769, L. 1991.

85-2-907. Ground water information collection by local governments. Units of local government may conduct ground water information collection projects in advance of ground water characterization studies conducted under the program created by 85-2-906(1). Local governments shall consult with the Montana bureau of mines and geology in designing local ground water information collection projects and studies and, subject to local funding availability, shall conduct the local projects and studies to produce information that is compatible with the type of information produced by the ground water characterization program.

History: En. Sec. 7, Ch. 769, L. 1991.

Part 10
Surface Water Assessment and Monitoring Program

85-2-1001. Surface water assessment and monitoring program — steering committee. (1) The Montana bureau of mines and geology shall develop and implement a surface water assessment and monitoring program for the purpose of collecting and compiling surface water information. The bureau shall gather data, compile existing information, conduct field studies, and prepare a detailed hydrogeologic assessment report for each subbasin. The bureau shall develop a monitoring plan and a hydrogeologic model for each subbasin for which a report is prepared.

(2) (a) There is a surface water assessment and monitoring program steering committee consisting of:

(i) an employee of each of the following state agencies that have responsibility for surface water protection, management, or information who is appointed by the head of the respective state agency:

(A) the department of natural resources and conservation;

(B) the department of environmental quality;

(C) the department of agriculture; and

(D) the Montana state library, natural resource information system; and

(ii) at least one representative of tribal governments in Montana, appointed by the governor.

(b) The committee may include representatives of the following agencies and units of government with expertise or management responsibility related to surface water:

(i) the legislative services division;

(ii) the board of oil and gas conservation;

(iii) the Montana bureau of mines and geology;

(iv) a soil and water conservation district;

(v) a unit of the Montana university system, other than the Montana bureau of mines and geology, appointed by the board of regents of higher education for the university system;

(vi) a county government, appointed by an organization of Montana counties;

(vii) a city, town, or city-county government, appointed by an organization of Montana cities and towns; and

(viii) each principal federal agency that has responsibility for surface water protection, management, or research, appointed by the Montana head of the respective federal agency.

(c) The committee may include one representative of each of the following organizations and groups, appointed by the governor, to serve as ex officio members:

(i) agricultural water users;

(ii) industrial water users;

(iii) a conservation or ecological protection organization; and

(iv) the development community.

(3) The steering committee shall prioritize subbasins for investigation based on current and anticipated growth of agriculture, industry, housing, and commercial activity. Permit applications for the development of surface water or ground water and the timing of the adjudication of water rights may be taken into account when prioritizing subbasins.

(4) The steering committee shall elect a presiding officer from its voting members.

(5) The Montana bureau of mines and geology shall provide staff support to the steering committee.

History: En. Sec. 1, Ch. 361, L. 2017.

CHAPTER 3
ATMOSPHERIC WATER
WEATHER MODIFICATION

Part 1 — General Provisions

85-3-101. Definitions.
85-3-102. Standards for research in weather modification control.
85-3-103. Department powers.

85-3-104. Nonliability of state and agents for acts of private persons.
85-3-105. Violation as misdemeanor and continuing violations.

Part 2 — Licenses and Permits

85-3-201. License and permit required for weather modification and control.
85-3-202. Department to review applications.
85-3-203. Licenses — qualifications of licensees.
85-3-204. Licenses — term and renewal.
85-3-205. License or renewal fee.
85-3-206. Permits — requirements and hearing.
85-3-207. Separate permit for each operation.
85-3-208. Notice of intention to apply for permit.
85-3-209. Notice of intention — contents.
85-3-210. Publication of notice of intention.
85-3-211. Proof of financial responsibility by applicant.
85-3-212. Permit fee.
85-3-213. State special revenue fund.
85-3-214. Termination of licenses and permits.

Part 3 — Records

85-3-301. Records of operations maintained by licensees.
85-3-302. Reports of operations.
85-3-303. Records and reports open to public.

Part 4 — County Weather Modification Authorities

85-3-401. Definitions.
85-3-402 through 85-3-410 reserved.
85-3-411. Weather modification authority created by petition — expiration — reinstatement.
85-3-412. Petition content.
85-3-413. Creation of authority by election.
85-3-414. Creation of authority by resolution.
85-3-415. Creation of authority by vote after resolution of county commissioners.
85-3-416. Abolishment of authority by election.
85-3-417. Procedure for abolishment of authority by recall petition — petition form — disposition of funds.
85-3-418 through 85-3-420 reserved.
85-3-421. Commissioners — compensation — meetings — officers — disbursements.
85-3-422. Tax certified by weather modification authority — disposition of proceeds.
85-3-423. County budget waived for first appropriation — conditions.
85-3-424. Declaration of emergency — hearing — determination of need for weather modification operation.

Part 1

General Provisions

85-3-101. Definitions. Unless the context requires otherwise, in this chapter, the following definitions apply:

(1) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(2) "Operation" means the performance of weather modification and control activities entered into for the purpose of producing or attempting to produce a certain modifying effect within one geographical area over one continuing time interval, not exceeding 1 year.

(3) "Research and development" means theoretical analysis, exploration, and experimentation and the extension of investigative findings and theories of a scientific and technical nature into practical application for experimental and demonstration purposes, including the experimental production and testing of models, devices, equipment, materials, and processes.

(4) "Weather modification and control" means changing or controlling or attempting to change or control, by artificial methods, the natural development of atmospheric cloud forms or precipitation forms that occur in the troposphere.

History: (1), (2), (4), (5)En. Sec. 1, Ch. 20, L. 1967; amd. Sec. 1, Ch. 368, L. 1973; amd. Sec. 140, Ch. 253, L. 1974; Sec. 89-310, R.C.M. 1947; (3)En. Sec. 10, Ch. 20, L. 1967; amd. Sec. 5, Ch. 460, L. 1977; Sec. 89-319, R.C.M. 1947; R.C.M. 1947, 89-310, 89-319(2); amd. Sec. 468, Ch. 418, L. 1995.

85-3-102. Standards for research in weather modification control. The department may establish by rule standards and instructions to govern the carrying out of research and development or projects in weather modification and control as it considers necessary or desirable to minimize danger to health, safety, welfare, or property.

History: En. Sec. 3, Ch. 368, L. 1973; amd. Sec. 141, Ch. 253, L. 1974; R.C.M. 1947, 89-312.1; amd. Sec. 469, Ch. 418, L. 1995.

Cross-References

Adoption and publication of rules, Title 2, ch. 4, part 3.

85-3-103. Department powers. In addition to any other acts authorized by law, the department may:

(1) acquire materials, equipment, and facilities as are necessary to perform its duties under this chapter;

(2) receive any funds which may be offered or become available from federal grants or appropriations, private gifts, donations, bequests, or any other source and unless their use is restricted, expend the funds for the administration of this chapter;

(3) make such studies and investigations and obtain such information as the department may deem necessary in exercising its authority in the administration or enforcement of this chapter;

(4) cooperate with public or private agencies in the performance of the department's functions or duties and in furtherance of the purposes of this chapter;

(5) represent the state in any and all matters pertaining to plans, procedures, or negotiations for interstate compacts relating to weather modification and control;

(6) enter into cooperative agreements with the United States government or any of its agencies, with the various counties and cities of this state, or with any private or public agencies for conducting weather modification or cloud seeding operations;

(7) act for and represent the state and the counties, cities, and private or public agencies in contracting with private concerns for the performance of weather modifications or cloud seeding operations; and

(8) conduct and make arrangements, including contracts and agreements, for the conduct of research and development activities relating to:

(a) the identification and evaluation of meteorological, environmental, ecological, agricultural, economic, hydrological, and sociological impacts of weather modification in Montana;

(b) the theory and development of methods of weather modification and control, including processes, materials, and devices relating thereto;

(c) the utilization of weather modification and control for agricultural, industrial, commercial, recreational, and other purposes;

(d) the protection of life and property during research and operational activities.

History: En. Sec. 3, Ch. 20, L. 1967; amd. Sec. 2, Ch. 368, L. 1973; R.C.M. 1947, 89-312.

Cross-References

Water rights, Art. IX, sec. 3, Mont. Const.

Conformity to federal regulations authorized, 85-1-222.

Department powers, 85-2-111.

85-3-104. Nonliability of state and agents for acts of private persons. This chapter may not be construed to impose or accept any liability or responsibility on the part of the state, the department, or any state officials or employees for any weather modification and control activities of any private person or group.

History: En. Sec. 21, Ch. 20, L. 1967; amd. Sec. 152, Ch. 253, L. 1974; R.C.M. 1947, 89-330; amd. Sec. 470, Ch. 418, L. 1995.

Cross-References

State subject to suit, Art. II, sec. 18, Mont. Const.

85-3-105. Violation as misdemeanor and continuing violations. A person violating any provision of this chapter is guilty of a misdemeanor, and a continuing violation is punishable as a separate offense for each day during which it occurs.

History: En. Sec. 22, Ch. 20, L. 1967; R.C.M. 1947, 89-331.

Cross-References

Classification of offenses, 45-1-201.
Misdemeanor defined, 45-2-101.
Misdemeanor — when no penalty specified, 46-18-212.

Part 2
Licenses and Permits

85-3-201. License and permit required for weather modification and control. A person may not engage in activities for weather modification and control except under and in accordance with a license and a permit issued by the department authorizing the activities.

History: En. Sec. 4, Ch. 20, L. 1967; R.C.M. 1947, 89-313; amd. Sec. 471, Ch. 418, L. 1995.

85-3-202. Department to review applications. (1) The department shall review all applications for weather modification activities. The department shall prepare a report and an environmental impact statement pursuant to Title 75, chapter 1, part 2. The report must contain information relative to all of the criteria applicable to issuance of a permit in 85-3-206. Prior to preparing the report, the department shall conduct at least one public meeting in the area affected by the proposed weather modification activity. The department's actual costs of conducting the public meeting, preparing the report, and preparing the environmental impact statement must be paid by the applicant.

(2) The department may provide by rule for exempting from the license and permit requirements of this chapter:

(a) research, development, and experiments by state and federal agencies, institutions of higher learning, and bona fide nonprofit research organizations and their agents;

(b) laboratory research and experiments;

(c) activities of an emergency character for protection against fire, frost, sleet, or fog; and

(d) activities normally engaged in for purposes other than those of inducing, increasing, decreasing, or preventing precipitation or hail.

History: En. Sec. 5, Ch. 20, L. 1967; amd. Sec. 4, Ch. 368, L. 1973; amd. Sec. 142, Ch. 253, L. 1974; R.C.M. 1947, 89-314; amd. Sec. 1, Ch. 611, L. 1993; amd. Sec. 472, Ch. 418, L. 1995.

Cross-References

Adoption of rules, Title 2, ch. 4, part 3.
Research programs — powers of university units, 20-25-108.

85-3-203. Licenses — qualifications of licensees. The license to engage in activities for weather modification and control must be issued, in accordance with procedures and subject to conditions the department may by rule establish to effectuate the provisions of this chapter, to applicants who demonstrate competence in the field of meteorology to the satisfaction of the department. If the applicant is an organization, these requirements must be met by the individual who will be in charge of the operation for the applicant.

History: En. Sec. 6, Ch. 20, L. 1967; R.C.M. 1947, 89-315; amd. Sec. 473, Ch. 418, L. 1995.

85-3-204. Licenses — term and renewal. The license shall be issued for a period to expire at the end of the calendar year in which it is issued and, if the licensee possesses the qualifications necessary for the issuance of a new license, shall upon application be renewed at the expiration of the period.

History: En. Sec. 7, Ch. 20, L. 1967; R.C.M. 1947, 89-316.

85-3-205. License or renewal fee. A license shall be issued or renewed only upon the payment to the department of $100 for the license or renewal.

History: En. Sec. 8, Ch. 20, L. 1967; amd. Sec. 143, Ch. 253, L. 1974; R.C.M. 1947, 89-317.

85-3-206. Permits — requirements and hearing. (1) The permits must be issued in accordance with procedures and subject to conditions that the department may by rule establish to effectuate this chapter.

(2) Within 30 days after completion of the report required under 85-3-202, the department shall hold a hearing under Title 2, chapter 4, part 6, to determine whether to grant, conditionally grant, or deny the application for a permit. The department may not grant or conditionally grant an application unless all requirements of this section are satisfied and the applicant establishes by a preponderance of the evidence that the following criteria have been met:

(a) the applicant is licensed pursuant to this chapter;

(b) sufficient notice of intention has been published;

(c) an applicant has furnished proof of financial responsibility in an amount to be determined by the department as required in 85-3-211;

(d) the fee for the permit has been paid as required in 85-3-212 and the department's costs incurred under 85-3-202 have been paid;

(e) the weather modification and control activities to be conducted have been determined by the department to be for the general welfare and the public good. That determination must be based on a finding of whether the operation:

(i) is reasonably conceived to improve water quantity or quality, reduce loss from weather hazards, provide economic benefits for the people of Montana, or advance scientific knowledge;

(ii) is designed to include adequate safeguards to minimize or avoid possible damage to the public health, safety, and welfare and to the environment; and

(iii) will adversely affect another operation for which a permit has been issued.

(3) The department may determine not to hold a public hearing only if after giving notice of a hearing, no person files a notice of intent to appear at the hearing to contest the issuance of a permit. If a hearing is not held, the department may grant or conditionally grant a permit based on the information contained in the application and the department's report.

(4) Costs incurred by the department in holding a hearing under subsection (2) must be paid by the applicant.

History: En. Sec. 9, Ch. 20, L. 1967; amd. Sec. 1, Ch. 214, L. 1973; amd. Sec. 5, Ch. 368, L. 1973; amd. Sec. 144, Ch. 253, L. 1974; amd. Sec. 1, Ch. 46, L. 1977; R.C.M. 1947, 89-318; amd. Sec. 2, Ch. 611, L. 1993; amd. Sec. 474, Ch. 418, L. 1995.

85-3-207. Separate permit for each operation. (1) Separate permits must be issued for each operation.

(2) If a permit is issued, the holder of the permit shall confine activities to the time and area limits set forth in the notice of intention, unless modified by the department. The permittee's activities must conform to any conditions imposed by the department. The permit may not be sold or transferred.

History: (1)En. Sec. 10, Ch. 20, L. 1967; amd. Sec. 5, Ch. 460, L. 1977; Sec. 89-319, R.C.M. 1947; (2)En. Sec. 11, Ch. 20, L. 1967; amd. Sec. 145, Ch. 253, L. 1974; amd. Sec. 2, Ch. 46, L. 1977; Sec. 89-320, R.C.M. 1947; R.C.M. 1947, 89-319(1), 89-320(part); amd. Sec. 475, Ch. 418, L. 1995.

85-3-208. Notice of intention to apply for permit. Before undertaking any weather modification and control activities, the applicant for a permit shall file with the department a notice of intention.

History: En. Sec. 11, Ch. 20, L. 1967; amd. Sec. 145, Ch. 253, L. 1974; amd. Sec. 2, Ch. 46, L. 1977; R.C.M. 1947, 89-320(part).

85-3-209. Notice of intention — contents. The notice of intention shall set forth at least the following:

(1) the name and address of the applicant;

(2) the nature, purpose, and objective of the intended operation and the person or organization on whose behalf it is to be conducted;

(3) the area in which and the approximate time during which the operation will be conducted;

(4) the area which is intended to be affected by the operation;

(5) the materials and methods to be used in conducting the operation.

History: En. Sec. 12, Ch. 20, L. 1967; R.C.M. 1947, 89-321.

85-3-210. Publication of notice of intention. (1) The department shall have the notice of intention, or that portion thereof including the items specified in 85-3-209, published at least once a week for 2 consecutive weeks in a newspaper having a general circulation and published within any county in which the operation is to be conducted and in which the affected area is located, or if the operation is to be conducted in more than one county or if the affected area is located in more than one county or is located in a county other than the one in which the operation is to be conducted, then in newspapers having a general circulation and published within each of the counties.

(2) The applicant shall reimburse the department for the costs of publication of the notice of intention.

History: En. Sec. 12, Ch. 20, L. 1967; amd. Sec. 146, Ch. 253, L. 1974; amd. Sec. 3, Ch. 46, L. 1977; R.C.M. 1947, 89-322.

Cross-References

Publication of legal notices, Title 18, ch. 7, part 2.

85-3-211. Proof of financial responsibility by applicant. Proof of financial responsibility may be furnished by an applicant by showing, to the satisfaction of the department, the applicant's ability to respond in damages for liability that might reasonably be attached to or result from the applicant's weather modification and control activities.

History: En. Sec. 14, Ch. 20, L. 1967; R.C.M. 1947, 89-323; amd. Sec. 300, Ch. 42, L. 1997.

85-3-212. Permit fee. The fee to be paid by each applicant for a permit must be equivalent to 1% of the estimated cost of the operation, the estimated cost to be computed by the department from the evidence available to it. The fee is due and payable to the department as of the date of issuance of the permit. However, if the applicant is able to give satisfactory security for the payment of the balance, the applicant may be permitted to commence the operation and a permit may be issued upon the payment of not less than 50% of the fee. The balance due must be paid within 3 months from the date of termination of the operation as prescribed in the permit.

History: En. Sec. 15, Ch. 20, L. 1967; amd. Sec. 1, Ch. 151, L. 1969; amd. Sec. 147, Ch. 253, L. 1974; R.C.M. 1947, 89-324; amd. Sec. 476, Ch. 418, L. 1995.

85-3-213. State special revenue fund. All license and permit fees and fines collected under this chapter, other than those collected in a justice's court, shall be deposited in the state special revenue fund for use by the department in the administration of this chapter or as appropriated by the legislature.

History: En. Sec. 16, Ch. 20, L. 1967; amd. Sec. 1, Ch. 151, L. 1969; amd. Sec. 148, Ch. 253, L. 1974; amd. Sec. 1, Ch. 147, L. 1975; R.C.M. 1947, 89-325; amd. Sec. 1, Ch. 277, L. 1983; amd. Sec. 60, Ch. 557, L. 1987; amd. Sec. 6, Ch. 630, L. 1991.

85-3-214. Termination of licenses and permits. After notice to the licensee and a reasonable opportunity for a hearing, the department may modify, suspend, revoke, or refuse to renew any license or permit issued if it appears that the licensee no longer possesses the qualifications necessary, if it appears that the licensee has violated any of the provisions of this chapter, or, in the case of a modification, if it appears that it is necessary for the protection of the health or the property of any person.

History: En. Sec. 20, Ch. 20, L. 1967; R.C.M. 1947, 89-329; amd. Sec. 477, Ch. 418, L. 1995.

Part 3
Records

85-3-301. Records of operations maintained by licensees. A licensee shall keep and maintain a record of all operations conducted by the licensee under the license and each permit, showing:

(1) the method employed;
(2) type of equipment used;
(3) kinds and amounts of material used;
(4) times and places of operation of the equipment;
(5) names and addresses of all individuals participating or assisting in the operation;
(6) any other general information that the department may require.

History: En. Sec. 17, Ch. 20, L. 1967; amd. Sec. 149, Ch. 253, L. 1974; R.C.M. 1947, 89-326; amd. Sec. 2767, Ch. 56, L. 2009.

85-3-302. Reports of operations. The department shall require written reports, in a manner as it provides, of each operation for which a permit is issued. The department shall also require reports from any organization that is exempt from license and permit requirements as provided in 85-3-202.

History: En. Sec. 18, Ch. 20, L. 1967; amd. Sec. 150, Ch. 253, L. 1974; R.C.M. 1947, 89-327.

85-3-303. Records and reports open to public. The records and reports in the custody of the department shall be open for public examination.

History: En. Sec. 19, Ch. 20, L. 1967; amd. Sec. 151, Ch. 253, L. 1974; R.C.M. 1947, 89-328.

Part 4
County Weather Modification Authorities

Part Cross-References

Counties, Title 7, ch. 1, part 21.
County Commissioners, Title 7, ch. 4, part 21.

85-3-401. Definitions. As used in this part, the following definitions apply:

(1) "Authority" means a county weather modification authority established pursuant to 85-3-411 or 85-3-413 through 85-3-415.

(2) "Commissioner" means a county weather modification authority commissioner appointed pursuant to 85-3-411 or 85-3-413 through 85-3-415.

History: En. Sec. 1, Ch. 609, L. 1983.

85-3-402 through 85-3-410 reserved.

85-3-411. Weather modification authority created by petition — expiration — reinstatement. (1) Upon receipt of a valid petition signed by at least 51% of the qualified electors of a county, as determined by the vote cast for the office of governor at the preceding general election, a board of county commissioners may by resolution create a weather modification authority. The board of county commissioners shall appoint five residents of the county as weather modification authority commissioners from those names set forth in the petition and designated by the petitioners to be appointed commissioners. If any of the five candidates named in the petition to be appointed commissioner is unable or refuses for any reason to accept appointment as commissioner or is disqualified by not meeting residence requirements as an elector in the county, the board of county commissioners shall name an appointee to fill the position. Each commissioner shall serve a 5-year term of office. If a commissioner submits a resignation in writing to the board of county commissioners or becomes unable or disqualified for any reason after accepting office, the board of county commissioners shall name an appointee to fill the vacancy. The board of county commissioners may remove any commissioner from office whenever it appears, by competent evidence and after hearing, that the commissioner has been guilty of misconduct, malfeasance, crime in office, or gross incompetency. A vacancy occurring otherwise than by expiration of a term of office must be filled for the unexpired term.

(2) An authority created pursuant to this section expires 5 years after the date of the initial appointment of the commissioners. Any unexpended funds remaining in the name of the authority after all proper bills and expenses have been paid must be transferred into the county general fund by the officers of the authority on or before the 5-year termination date provided by this section. However, all unexpended funds remaining in the name of the authority after all proper bills and expenses have been paid must remain in the name of the authority if the board of county commissioners of the county by resolution creates a weather modification authority and all its powers in accordance with 85-3-414.

(3) Nothing in this section prevents renewal of an authority for another 5 years by petition of the qualified electors in the same manner as the initial authority was created.

(4) If more than one petition is filed with the board of county commissioners on or about the same time, the petition with the highest percentage of the qualified county electors voting for the office of governor at the preceding general election must be selected by the board of county commissioners. However, the petition with the highest percentage must have the signatures of at least 40% of the qualified electors in the county, and the total of all qualified electors signing all petitions filed must equal at least 60% of the qualified electors in the county. If the name of the same elector appears on two or more petitions, the name must be stricken from both petitions.

History: En. Sec. 2, Ch. 609, L. 1983; amd. Sec. 2768, Ch. 56, L. 2009.

85-3-412. Petition content. (1) The petition for the creation of a weather modification authority and for appointment of commissioners must contain:

(a) a title with the heading "Petition for Creation of (insert name of county) Weather Modification Authority";

(b) the following paragraph: We, the undersigned qualified electors of (name of county), state of Montana, request that the (name of county) board of county commissioners create by resolution a (name of county) weather modification authority and appoint the following five qualified electors of the county to 5-year terms of office as commissioners for the (name of county) weather modification authority:

(Here insert the name and address of each proposed commissioner for the (name of county) weather modification authority.)

(c) the following paragraph: We, the undersigned qualified electors of the (name of county), state of Montana, are notified that the creation of the (name of county) weather modification authority and the appointment of its commissioners by the (name of county) board of county commissioners will grant the authority the power to certify to the board of county commissioners a mill levy tax upon the taxable value of all taxable property in the county for a weather modification fund. The tax is subject to 15-10-420. The weather modification fund must be used for weather modification activities as provided by 85-3-424. We, the undersigned, understand that the authority requested in this petition expires 5 years after the creation of the weather modification authority, except that the board of county commissioners may by resolution create a weather modification authority and all its powers, including the power to certify a tax levy as provided in 85-3-422, for one or more 5-year periods in accordance with 85-3-414.

(d) a heading, "Committee for Petitioners", followed by this statement: The following electors of (name of county), state of Montana, are authorized to represent and act for us and shall constitute the "Committee for the Petitioners" in the matter of this petition and all acts subsequent to this petition.

(2) All signatures to the petition must be numbered and dated by month, day, and year. The name must be written, with residence address and post-office address, including the county of residence.

(3) An affidavit must be attached to each petition and sworn to under oath before a notary public by the person circulating each petition, attesting to the fact that the person circulated the petition and that each of the signatures to the petition is the genuine signature of the person whose name it purports to be and that each person is a qualified elector in the county in which the petition was circulated.

History: En. Sec. 3, Ch. 609, L. 1983; amd. Sec. 240, Ch. 574, L. 2001.

Cross-References

Qualifications of voter, 13-1-111.

85-3-413. Creation of authority by election. When a petition signed by not less than 20% of the qualified electors of the county, as determined by the vote cast for the office of governor at the last preceding gubernatorial election, requesting an election upon the establishment of a weather modification authority is presented to the board of county commissioners not later than 90 days prior to the next general election, the board of county commissioners shall submit the question to the electors of the county at the next general election. Upon approval by a majority of the votes cast, the board of county commissioners shall by resolution establish an authority as described in 85-3-411 with all powers set out in this part, including the power to certify a tax levy as provided by 85-3-422.

History: En. Sec. 8, Ch. 609, L. 1983.

85-3-414. Creation of authority by resolution. (1) When an authority is about to expire, the board of county commissioners may by resolution authorize the creation of such weather modification authority and all its powers, including the power to certify a tax levy as provided by 85-3-422, for an additional 5-year period if the resolution authorizing the creation of such authority is adopted by the board of county commissioners before the date prescribed in the preceding resolution for its termination. Upon passing such resolution for the creation of the authority, the board of county commissioners shall appoint five commissioners to 5-year terms of office, subsequently filling vacancies in the manner prescribed by 85-3-411.

(2) The board may create the authority for subsequent 5-year periods by following the procedure provided in this section.

History: En. Sec. 6, Ch. 609, L. 1983.

Cross-References

85-3-415. Creation of authority by vote after resolution of county commissioners. The board of county commissioners of any county may, by resolution after a public hearing, submit the question of the creation of a weather modification authority to the electors of the county at the next countywide election. Upon approval by a majority of the votes cast, the board of county commissioners shall pass a resolution creating an authority as described in 85-3-411. Such an authority has all powers provided by this chapter, including the authority to levy a tax as provided by 85-3-422.

History: En. Sec. 10, Ch. 609, L. 1983.

Cross-References

Local election administration, Title 13, ch. 1, part 3.

85-3-416. Abolishment of authority by election. When a petition signed by not less than 20% of the qualified electors of the county, as determined by the vote cast for governor in the last preceding gubernatorial election, requesting an election upon the abolishment of an authority created pursuant to 85-3-413 or 85-3-414 is presented to the board of county commissioners not later than 90 days prior to the next general election, the board of county commissioners shall submit the question to the electors of the county at the next general election. Upon approval by a majority of the votes cast, the board of county commissioners shall abolish the authority as of December 31 following the election. All unexpended funds remaining in the name of the authority after all proper bills and expenses have been paid must be deposited in the general fund of the county.

History: En. Sec. 9, Ch. 609, L. 1983.

Cross-References

Times for holding general elections, 13-1-104.

85-3-417. Procedure for abolishment of authority by recall petition — petition form — disposition of funds. (1) After 51% of the qualified electors of a county, as determined by the vote cast for the office of governor at the last preceding gubernatorial election, petition the board of county commissioners of their county to recall the commissioners of an authority created pursuant to 85-3-411 and to abolish the authority, the board of county commissioners shall adopt a resolution recalling all commissioners of such authority and abolishing their offices and the authority until a weather modification authority is created by petition in accordance with 85-3-411.

(2) A recall petition must have a title with the heading "Recall Petition for the Abolishment of (insert name of county) Weather Modification Authority". The recall petition must incorporate a paragraph stating its purpose in clear language and must comply with all requirements prescribed in subsections (1)(d), (2), and (3) of 85-3-412 relating to petition content, committee for petitioners, petition details, affidavits, and persons circulating such petitions.

(3) If the board of county commissioners adopts a resolution recalling all commissioners of a weather modification authority and abolishing the authority, all unexpended funds remaining in the name of the authority, after all proper bills and expenses have been paid, must be transferred to the county general fund by the weather modification authority commissioners on the effective date of the resolution. If outstanding valid bills are unpaid after that date, the board of county commissioners may pay such obligations from money in the county general fund.

85-3-418 through 85-3-420 reserved.

85-3-421. Commissioners—compensation—meetings—officers—disbursements. (1) A commissioner may not receive compensation for the commissioner's services. Certificates of appointment must be filed with the county clerk and recorder.

(2) The powers of each authority are vested in its commissioners. A majority of the commissioners constitutes a quorum for the purpose of conducting the business of the authority, but action may not be taken by the authority except by an affirmative vote of not less than a majority of all the commissioners. A presiding officer, vice presiding officer, secretary, and treasurer must be elected from among the commissioners. An authority may delegate to one or more of its commissioners powers or duties that it considers proper.

(3) The secretary shall keep minutes of official meetings and shall include all official business, such as operations requested, and all authorizations for payment of weather modification authority funds.

(4) Disbursements authorized by the authority must be made by check signed by the presiding officer and the treasurer of the authority. Official policies must be entered into the minutes. An annual report must disclose funds received and expended, and a copy of the report must be filed with the county clerk and recorder. The annual report must be presented at a public meeting called for that purpose.

History: **En. Sec. 4, Ch. 609, L. 1983; amd. Sec. 2769, Ch. 56, L. 2009.**

85-3-422. Tax certified by weather modification authority — disposition of proceeds. (1) The authority may certify annually to the board of county commissioners a tax on the taxable value of all taxable property in the county for a weather modification fund. Subject to 15-10-420, the tax may be levied by the board of county commissioners. The weather modification fund may be used only for weather modification activities as provided by 85-3-424. The tax certified by the authority is limited to the period of existence of the authority.

(2) The money in the weather modification fund must be invested to earn interest at the rate most advantageous to the fund, consistent with law and prudent business practice.

History: **En. Sec. 5, Ch. 609, L. 1983; amd. Sec. 151, Ch. 584, L. 1999; amd. Sec. 241, Ch. 574, L. 2001.**

Part 4 — Water Ditches Under Joint or Corporate Control

85-5-401. Determination of water rights between partners, tenants in common, and corporate stockholders.
85-5-402. Appointment of commissioner prior to final decree.
85-5-403. Division of water.
85-5-404. Authority of commissioner.
85-5-405. Compensation and expenses.
85-5-406. Interference with actions of commissioner.
85-5-407. Appointment of water commissioner after final decree.
85-5-408. Apportionment of costs.

Part 1
Appointment and Duties

85-5-101. Appointment of water commissioners. (1) Whenever the rights of persons to use the waters of any stream, ditch or extension of ditch, watercourse, spring, lake, reservoir, or other source of supply have been determined by a decree of a court of competent jurisdiction, including temporary preliminary, preliminary, and final decrees issued by a water judge, it is the duty of the judge of the district court having jurisdiction of the subject matter, upon the application of the owners of at least 15% of the water rights affected by the decree or at least 15% of the flow rate of the water rights affected by the decree, in the exercise of the judge's discretion, to appoint one or more commissioners. The commissioners have authority to admeasure and distribute to the parties owning water rights in the source affected by the decree the waters to which they are entitled, according to their rights as fixed by the decree and by any certificates, permits, and changes in appropriation right issued under chapter 2 of this title. When petitioners make proper showing that they are not able to obtain the application of the owners of at least 15% of the water rights affected or at least 15% of the flow rate of the water rights affected and they are unable to obtain the water to which they are entitled, the judge of the district court having jurisdiction may appoint a water commissioner.

(2) When the existing rights of all appropriators from a source or in an area have been determined in a temporary preliminary decree, preliminary decree, or final decree issued

under chapter 2 of this title, the judge of the district court may, upon application by both the department of natural resources and conservation and one or more holders of valid water rights in the source, appoint a water commissioner. The water commissioner shall distribute to the appropriators, from the source or in the area, the water to which they are entitled.

(3) The department of natural resources and conservation or any person or corporation operating under contract with the department or any other owner of stored waters may petition the court to have stored waters distributed by the water commissioners appointed by the district court. The court may order the commissioner or commissioners appointed by the court to distribute stored water when and as released to water users entitled to the use of the water.

(4) At the time of the appointment of a water commissioner or commissioners, the district court shall fix their compensation, require a commissioner or commissioners to purchase a workers' compensation insurance policy and elect coverage on themselves, and require the owners and users of the distributed waters, including permittees, certificate holders, and holders of a change in appropriation right, to pay their proportionate share of fees and compensation, including the cost of workers' compensation insurance purchased by a water commissioner or commissioners. The judge may include the department in the apportionment of costs if it applied for the appointment of a water commissioner under subsection (2).

(5) Upon the application of the board or boards of one or more irrigation districts entitled to the use of water stored in a reservoir that is turned into the natural channel of any stream and withdrawn or diverted at a point downstream for beneficial use, the district court of the judicial district where the most irrigable acres of the irrigation district or districts are situated may appoint a water commissioner to equitably admeasure and distribute stored water to the irrigation district or districts from the channel of the stream into which it has been turned. A commissioner appointed under this subsection has the powers of any commissioner appointed under this chapter, limited only by the purposes of this subsection. A commissioner's compensation is set by the appointing judge and paid by each district and other users of stored water affected by the admeasurement and distribution of the stored water. In all other matters, the provisions of this chapter apply so long as they are consistent with this subsection.

(6) A water commissioner appointed by a district court is not an employee of the judicial branch, a local government, or a water user.

(7) A water commissioner who fails to obtain workers' compensation insurance coverage required by subsection (4) is precluded from receiving benefits under Title 39, chapter 71, as a result of the performance of duties as a water commissioner.

Board power to provide sufficient water, 85-7-1907.

85-5-102. Appointment of chief commissioner. When the judge of the district court appoints two or more commissioners to admeasure and distribute the waters mentioned in 85-5-101, the judge may appoint one of them as chief commissioner and empower the chief commissioner to exercise direction and control over the other commissioners in the discharge of their duties. The judge may depose the person appointed as chief commissioner from that position and appoint another as chief commissioner whenever it appears to the judge that better service may be given to the water users by making the change.

History: En. Sec. 2, Ch. 43, L. 1911; re-en. Sec. 7137, R.C.M. 1921; re-en. Sec. 7137, R.C.M. 1935; R.C.M. 1947, 89-1002; amd. Sec. 2770, Ch. 56, L. 2009.

Cross-References

85-5-104. Term of office. A water commissioner holds office for the time during the irrigation season of each year that may be designated by the judge in the order making the appointment. The judge may fix the date of the commencement of the term and may, in in the judge's discretion or when requested in writing by at least three persons entitled to the use of the waters, change the term for closing of the commissioner's service.

History: **En. Sec. 4, Ch. 43, L. 1911; amd. Sec. 1, Ch. 116, L. 1921; re-en. Sec. 7139, R.C.M. 1921; re-en. Sec. 7139, R.C.M. 1935; amd. Sec. 1, Ch. 68, L. 1955; R.C.M. 1947, 89-1004; amd. Sec. 2772, Ch. 56, L. 2009.**

Cross-References

Appointment of Water Commissioners, 3-7-211, 85-5-101.

85-5-105. Power and duty to distribute water. Upon the issuance of an order, the water commissioner or commissioners have authority and it is the commissioner's or commissioners' duty to admeasure and distribute to the users of water, as their interests may appear and be required, the stored and supplemental water stored and as released by the department of natural resources and conservation under provisions of Title 85, chapter 1, to be diverted into and through a stream, ditch or extension of ditch, watercourse, spring, lake, reservoir, or other source of supply in the same manner and under the same rules as decreed water rights are admeasured and distributed. The water commissioner or commissioners and the owners and users of the stored and supplemental water are bound by and are subject to the provisions of this chapter. However, the admeasurements and distribution of the stored and supplemental water may not interfere with decreed water rights. The purpose of Title 85, chapter 5, parts 1 through 3, is to provide a uniform, equitable, and economical distribution of adjudicated, stored, and supplemental waters.

History: **En. Sec. 1, Ch. 43, L. 1911; re-en. Sec. 7136, R.C.M. 1921; amd. Sec. 1, Ch. 125, L. 1925; re-en. Sec. 7136, R.C.M. 1935; amd. Sec. 1, Ch. 187, L. 1939; amd. Sec. 1, Ch. 231, L. 1963; amd. Sec. 39, Ch. 452, L. 1973; amd. Sec. 1, Ch. 51, L. 1975; R.C.M. 1947, 89-1001(4); amd. Sec. 2773, Ch. 56, L. 2009.**

Cross-References

Priority, 85-2-401.
District Court supervision of water distribution, 85-2-406.

85-5-106. Maintenance and repair of ditches or systems. Upon written request of the owners of at least 51% of the water rights in any adjudicated ditch or single water system, the judge of the district court may empower the commissioner to maintain and keep in reasonable repair such water ditch or water system at the expense of the owners thereof, and for such purposes the commissioner shall have authority to enter and work upon any ditch, canal, aqueduct, or other source of conveying the waters affected by the decree and the right-of-way thereof and to visit, inspect, and adjust all headgates or other means of distribution of such waters.

History: **En. Sec. 6, Ch. 43, L. 1911; re-en. Sec. 7141, R.C.M. 1921; re-en. Sec. 7141, R.C.M. 1935; R.C.M. 1947, 89-1006.**

85-5-107. Record of distribution of water. (1) Each water commissioner shall keep a daily record, unless a different recording schedule is ordered by the district judge, of the amount of water distributed to each water user and shall file a summary of the record with the clerk of the court monthly or seasonally, at the discretion of the district judge during the judge's term of service. The report must show in detail the total amount of water distributed to each water user during the month or the season and the cost of distributing the water, based upon the water commissioner's or commissioners' daily salary, other costs of the water commissioner or commissioners approved by the district judge, and the proportionate amount of water distributed. When two or more water commissioners serve under the same decree or decrees by order of the judge, they may file a joint summary of their records with the clerk of the court, or the chief commissioner, if one has been appointed by the judge, may file a summary on behalf of all of them.

(2) If the district court judge determines that it is necessary to establish a billing cycle prior to a distribution season, as provided in 85-5-204, the report or reports must serve as the basis for the amounts billed.

History: **En. Sec. 9, Ch. 43, L. 1911; re-en. Sec. 7144, R.C.M. 1921; re-en. Sec. 7144, R.C.M. 1935; R.C.M. 1947, 89-1009; amd. Sec. 1, Ch. 305, L. 1983; amd. Sec. 1, Ch. 513, L. 2007.**

85-5-110. Appointment of water mediators — duties. (1) Except as provided in 85-20-1902, the judge of the district court may appoint a water mediator to mediate a water controversy in a decreed or nondecreed basin under the following circumstances:

(a) upon request of the governor;

(b) upon petition by at least 15% of the owners of water rights in a decreed or nondecreed basin; or

(c) in the discretion of the district court having jurisdiction.

(2) A water mediator appointed under this section may:

(a) discuss proposed solutions to a water controversy with affected water right holders;

(b) review options related to scheduling and coordinating water use with affected water right holders;

(c) discuss water use and water needs with persons and entities affected by the existing water use;

(d) meet with principal parties to mediate differences over the use of water; and

(e) hold public meetings and conferences to discuss and negotiate potential solutions to controversies over use of water.

(3) If the governor requests or a state agency petitions for a water mediator, the governor or agency shall pay all or a majority of the costs of the water mediator as determined equitable by the district court having jurisdiction.

(4) The governor may use funds appropriated under 75-1-1101 to pay the costs of a water mediator.

(5) This section does not allow a water mediator to require any valid water right holder to compromise or reduce any of the holder's existing water rights.

(6) If an appropriator voluntarily ceases to use all or part of an appropriation right or voluntarily ceases to use an appropriation right according to its terms and conditions as a result

of the efforts of a mediator appointed under this section, the appropriator may not be considered to have abandoned all or any portion of the appropriation right.

History: En. Sec. 1, Ch. 625, L. 1989; amd. Sec. 1, Ch. 108, L. 1991; amd. Sec. 2776, Ch. 56, L. 2009; amd. Sec. 11, Ch. 294, L. 2015.

85-5-111. Water commissioner and mediator education. (1) The department of natural resources and conservation, in cooperation with the Montana supreme court, the Montana water courts, the district courts of Montana, the Montana university system, and other appropriate state and federal agencies, shall develop an educational program for water commissioners and mediators that includes:

(a) an annual seminar on commissioner and mediator duties, mediation techniques, and water measuring techniques;

(b) preparation and, as necessary, revision of a water commissioner and mediator manual; and

(c) an outreach program that identifies persons who might serve as water commissioners or mediators.

(2) Unless a district court judge having jurisdiction determines otherwise, a water commissioner appointed pursuant to 85-5-101 shall complete at least one educational program as provided in subsection (1) prior to administering water.

History: En. Sec. 2, Ch. 625, L. 1989; amd. Sec. 1, Ch. 118, L. 2017.

Part 2
Charges and Expenses

85-5-201. Distribution of water and related expenses. (1) Each water commissioner appointed by the judge of the district court for the purpose of distributing water has the authority to determine the appropriate quantity and distribute to the parties interested, under a decree, permit, certificate, or change in appropriation right, the water to which those who are parties to the decree or holders of a permit, certificate, or change in appropriation right, or privy to a permit, certificate, or change in appropriation right, are entitled, according to their priority as established by the decree, permit, certificate, or change in appropriation right.

(2) The water commissioner may incur necessary expenses in the making of headgates or dams for the distribution of the waters if the parties fail or refuse to do so. Expenses associated with making headgates or dams for the distribution of water must be assessed against and paid by the party or parties for whom the ditch or ditches were repaired or the dams or headgates were made. In the discretion of the court, the costs or expenses may be assessed against the land upon which or for the benefit of which the expense had been incurred.

(3) (a) At the district court's discretion, a water commissioner may bill water users prior to the beginning of a distribution season for the purpose of offsetting costs associated with distributing water and water commissioner duties by submitting the information necessary for the billing to the clerk of the district court. A billing issued prior to the beginning of a distribution season:

(i) must be assessed on a per-user basis;

(ii) must be based on the report provided for in 85-5-107 for the prior year; and

(iii) may not exceed 80% of the amount that was provided to the district court pursuant to 85-5-107 for the prior distribution season on a per-user basis.

(b) Upon receipt of the information from the water commissioner, the clerk of district court shall proceed as provided in 85-5-204.

History: En. Sec. 5, Ch. 43, L. 1911; re-en. Sec. 7140, R.C.M. 1921; amd. Sec. 2, Ch. 125, L. 1925; re-en. Sec. 7140, R.C.M. 1935; R.C.M. 1947, 89-1005; amd. Sec. 2, Ch. 246, L. 1983; amd. Sec. 2, Ch. 92, L. 2007; amd. Sec. 2, Ch. 513, L. 2007.

Irrigation districts — taxes and assessments, Title 85, ch. 7, part 21.

85-5-202. Repair expenses. The judge may allow as a charge any expenses necessarily incurred by the water commissioner in the discharge of duties in the employment of extra labor for the repair of dams, headgates, ditches, or flumes when immediate action is necessary to preserve the rights of the parties entitled to the waters of a stream or when the judge has, in the order appointing the commissioner, required the commissioner to repair ditches and keep in repair necessary headgates, ditches, or flumes. The water commissioner shall report all expenses, and the cost must be taxed against the party or parties for whose benefit the expenses were incurred. In the discretion of the court, the costs or expenses may be assessed against the land upon which or for the benefit of which the expense had been incurred.

History: En. Sec. 10, Ch. 43, L. 1911; re-en. Sec. 7145, R.C.M. 1921; amd. Sec. 3, Ch. 125, L. 1925; re-en. Sec. 7145, R.C.M. 1935; R.C.M. 1947, 89-1010; amd. Sec. 2777, Ch. 56, L. 2009.

Cross-References

Board powers over district property, 85-7-1908.

85-5-203. Telephone expenses. The judge may also allow as a charge reasonable expenses incurred by a water commissioner in telephoning to the judge for instructions in cases of emergency. When there are two or more commissioners acting under the judge's order, reasonable expenses incurred in communicating with each by telephone or with the judge of the district court, in order to carry on the distribution of the waters harmoniously and in accordance with the decree, shall be deemed a necessary expense. These expenses shall be reported by the water commissioner or commissioners at the close of the season and shall be taxed against all the water users affected by the decree or decrees ratably in proportion to the whole amount of water distributed to them during the season.

History: En. Sec. 11, Ch. 43, L. 1911; re-en. Sec. 7146, R.C.M. 1921; re-en. Sec. 7146, R.C.M. 1935; R.C.M. 1947, 89-1011.

Cross-References

Water Judges, Title 3, ch. 7, part 2.

85-5-204. Apportionment of fees and expenses. (1) Upon the filing of the report by the water commissioner or water commissioners, the clerk of court shall notify by letter each person mentioned in the report:

(a) of the amount the water user is made liable for by the report;

(b) that objections to the report and the amount taxed against the water user may be made by any person interested in the report or the amount assessed against the water user within 20 days after the date of the mailing of the notice; and

(c) that, unless objections are filed, an order will be made by the judge of the district court finally fixing and determining the amount due from each of the water users.

(2) The affidavit of the clerk that the clerk has mailed a notice to each person mentioned in the report at the person's last-known post-office address, in the usual manner, must be considered prima facie evidence that the person received the notice provided for in this section.

(3) At the discretion of the district judge, the water commissioner may issue a bill prior to the beginning of a distribution season for the purpose of offsetting costs associated with distributing water and water commissioner duties by submitting the information necessary for the billing to the clerk of the district court. The bill for each water user may not exceed 80% of the amount that was provided to the district court pursuant to 85-5-107 for the prior distribution season.

(4) If the cost of distributing water during a distribution season is less than the amount that was collected through a bill issued prior to a distribution season, the water commissioner shall refund the money to the water user based on the amount of water that the water user received during the distribution season. The water commissioner shall submit a refund report, along with proof that any refunds were issued, to the clerk of district court for filing.

History: En. Sec. 12, Ch. 43, L. 1911; re-en. Sec. 7147, R.C.M. 1921; amd. Sec. 1, Ch. 11, L. 1923; amd. Sec. 1, Ch. 45, L. 1927; re-en. Sec. 7147, R.C.M. 1935; R.C.M. 1947, 89-1012; amd. Sec. 3, Ch. 513, L. 2007.

Cross-References

General duties of Clerk of District Court, 3-5-501.

85-5-205. Objections to expenses — hearing. At the expiration of the 20 days' notice, as provided for in the preceding section, if objections to said report have been filed or a motion to retax the same has been made, the court or judge shall fix a time for the hearing of such objections or motion to retax, which time of hearing shall be as soon as the judge or a court can conveniently hear the same. Any person objecting to said report shall be entitled to at least 5 days' notice of the date and time of such hearing. At such hearing the court or judge shall hear and determine the motion or objections and shall make an order fixing and determining the amount found due from each of said water users to such commissioner or commissioners. In case no objections are filed within the 20 days, as hereinbefore provided for, such order shall be made as a matter of course, and in either case said order shall be final determination of the matter.

History: **En. Sec. 13, Ch. 43, L. 1911; re-en. Sec. 7148, R.C.M. 1921; amd. Sec. 2, Ch. 11, L. 1923; re-en. Sec. 7148, R.C.M. 1935; R.C.M. 1947, 89-1013.**

85-5-206. Effect of order fixing fees. After the order of the court fixing the fees and compensation and expenses of the water commissioner is final, the order has the force and effect of a judgment against the person to whom the water was or will be distributed and for whose benefit it was used or will be used. When the expenses of a commissioner or commissioners has been assessed against the land for which the service of the commissioner or commissioners has been rendered, the assessment is a lien against the land. The lien has the same effect as a judgment. The lien may be executed in the same manner as a judgment upon order of the court. The water commissioner, at the water commissioner's discretion, may withhold further determinations of quantity or distribution of water to any person entitled to the water until the person has paid all fees, compensation, and expenses of the water commissioner or commissioners fixed by the court and apportioned and charged to the person, including bills sent prior to the beginning of a distribution season. The commissioner may withhold the determination of quantity and distribution of water from any land against which there exists any lien that is the result of lack of payment pursuant to this section until the lien has been fully discharged.

History: **En. Sec. 14, Ch. 43, L. 1911; re-en. Sec. 7149, R.C.M. 1921; amd. Sec. 4, Ch. 125, L. 1925; amd. Sec. 1, Ch. 39, L. 1929; re-en. Sec. 7149, R.C.M. 1935; R.C.M. 1947, 89-1014; amd. Sec. 4, Ch. 513, L. 2007.**

Cross-References

Part 3
Rights and Duties of Water Users

85-5-301. Complaint by dissatisfied user. (1) A person owning or using any of the waters of the stream or ditch or extension of the ditch who is dissatisfied with the method of distribution of the waters of the stream or ditch by the water commissioner or water commissioners and who claims to be entitled to more water than the person is receiving or to a right prior to that allowed the person by the water commissioner or water commissioners may file a written complaint, duly verified, setting forth the facts of the claim.

(2) Upon receipt of the complaint, the judge shall fix a time for the hearing of the petition and shall direct that notice be given to the parties interested in the hearing as the judge considers necessary. At the time fixed for the hearing, the judge shall hear and examine the complainant and other parties who appear to support or resist the claim and examine the water commissioner or water commissioners and witnesses regarding the charges contained in the complaint.

(3) Upon the determination of the hearing, the judge shall make findings and issue an order that the judge considers just and proper. If it appears to the judge that the water commissioner or water commissioners have not properly distributed the water according to the provisions of the decree, permit, certificate, or change in appropriation right, the judge shall give the proper instructions for distribution of the water.

(4) The judge may remove any water commissioner and appoint a new water commissioner if the judge determines that the interests of the parties in the waters mentioned in the decree, permit, certificate, or change in appropriation right will be best served by appointing a new water commissioner. If it appears to the judge that the water commissioner has willfully failed to perform the water commissioner's duties, the water commissioner may be proceeded against

for contempt of court, as provided in contempt cases. The judge shall make an order regarding the payment of costs of the hearing that the judge determines is just and proper.

History: En. Sec. 15, Ch. 43, L. 1911; re-en. Sec. 7150, R.C.M. 1921; amd. Sec. 5, Ch. 125, L. 1925; re-en. Sec. 7150, R.C.M. 1935; amd. Sec. 13, Ch. 460, L. 1977; R.C.M. 1947, 89-1015; amd. Sec. 3, Ch. 92, L. 2007.

Cross-References

Contempts, Title 3, ch. 1, part 5.
Appeals from final decree, 85-2-235.

85-5-302. Maintenance of headgates and measuring devices. All persons using water from any stream or ditch for which a water commissioner is appointed are required to have suitable headgates at the point where a ditch taps a stream and shall also, at some suitable place on the ditch and as near the head as practicable, place and maintain a proper measuring box, weir, or other appliance for the measurement of the waters flowing in the ditch. If a person fails to place or maintain a proper measuring appliance, it is the duty of the water commissioner not to apportion or distribute any water through the ditch. The commissioner shall notify all parties interested by certified mail or in person 1 week before making the annual repair or cleaning of a stream or ditch or performing necessary labor or expenses to divert water to a ditch. The sending of a certified letter to the last-known post-office address of any interested party is prima facie evidence of the fact that the party was duly notified. Any work in the way of repairing a ditch made necessary by an emergency may be done without notice when injury would result from a delay.

History: En. Sec. 7, Ch. 64, L. 1905; re-en. Sec. 4890, Rev. C. 1907; re-en. Sec. 7151, R.C.M. 1921; amd. Sec. 6, Ch. 125, L. 1925; re-en. Sec. 7151, R.C.M. 1935; R.C.M. 1947, 89-1016; amd. Sec. 4, Ch. 432, L. 1989; amd. Sec. 2778, Ch. 56, L. 2009.

District Court supervision of water distribution, 85-2-406.
Duty of purchaser to dig ditches, 85-2-416.
Board agreements for joint operation or cooperation, 85-7-1905.

85-5-402. Appointment of commissioner prior to final decree. After the filing of the complaint in an action under 85-5-401, the court may, upon 5 days' notice to the other parties to the action, appoint a commissioner to divide and distribute the waters of the ditch to the respective parties, according to their respective rights, during the pendency of the action. The court may, upon good cause shown, appoint a commissioner without notice, and when a commissioner is appointed without notice, any party to the action may, on 5 days' notice to the plaintiff, move the court or judge to vacate the appointment or to modify the order as to the distribution of the waters of the ditch. The court or judge, on hearing, may affirm, vacate, or modify the order previously made. Each water commissioner appointed shall subscribe to an oath of office before commencing the discharge of duties.

85-5-406. Interference with actions of commissioner. A person opening or closing a headgate after being set by the commissioner or who in any manner interferes with the commissioner in the discharge of the commissioner's duties is guilty of contempt of court and may be proceeded against for contempt of court as provided in contempt cases.

History: En. Sec. 6, Ch. 181, L. 1919; re-en. Sec. 7157, R.C.M. 1921; re-en. Sec. 7157, R.C.M. 1935; R.C.M. 1947, 89-1022; amd. Sec. 2782, Ch. 56, L. 2009.

Cross-References

Contempts, Title 3, ch. 1, part 5.

85-5-407. Appointment of water commissioner after final decree. When the rights of the respective parties in an action to the use of the waters flowing in a ditch are adjudicated, the judge of the district court having jurisdiction of the subject matter, upon the application of the owners of at least 10% of the waters of the ditch, may, in the exercise of the judge's discretion, appoint a water commissioner to divide, apportion, and distribute the waters of the ditch to the respective parties according to their respective rights as set forth in the decree. When a commissioner is appointed under the provisions of this chapter to apportion and distribute the waters of the stream from which the water flowing in a ditch is taken, the commissioner shall, when directed by the judge or court, apportion and distribute the waters of the ditch according to the decree by which the rights of the respective owners were adjudicated.

History: En. Sec. 7, Ch. 181, L. 1919; re-en. Sec. 7158, R.C.M. 1921; re-en. Sec. 7158, R.C.M. 1935; R.C.M. 1947, 89-1023; amd. Sec. 301, Ch. 42, L. 1997.

Cross-References

Appeals from final decree, 85-2-235.

85-5-408. Apportionment of costs. (1) When a commissioner is appointed upon the application of an owner or owners of a ditch, the court may fix the compensation of the commissioner and the term of the commissioner's employment. The court shall make an order apportioning the amount of compensation among the several owner or owners, tenants in common, or stockholders of the ditch according to their respective rights and interest. The order has the effect of a judgment against the person to whom the water was admeasured and for whose benefit it was used. When, in the discretion of the court, an order of apportionment of expense is made against the land for which the water was used, it has the effect of a lien against the land to which the apportionment was made. Execution may issue upon the order as upon a judgment by direction of the court, upon the application of any person interested in the order.

(2) When a commissioner is appointed under the provisions of this chapter to distribute the waters of the stream from which the waters flowing in a ditch are taken and to apportion and distribute the waters of the ditch according to the rights of the respective owners of the waters, the judge, in the judge's discretion, may, in addition to the apportionment taxed against the respective owners of the waters of the stream, apportion and tax the amount, if any, that the owners of the ditch shall pay in addition to the amount taxed under the provisions of this chapter.

History: En. Sec. 8, Ch. 181, L. 1919; re-en. Sec. 7159, R.C.M. 1921; amd. Sec. 7, Ch. 125, L. 1925; re-en. Sec. 7159, R.C.M. 1935; R.C.M. 1947, 89-1024; amd. Sec. 302, Ch. 42, L. 1997.

CHAPTER 6
WATER USERS' ASSOCIATIONS

Part 1 — General Provisions

85-6-101. Power to levy new assessments.
85-6-102. Assessments to be equitable.
85-6-103. Transfer of shares of stock.
85-6-104. Assessment of shares of stock.
85-6-105. Division of irrigation project into districts.
85-6-106. Vacancies in board of directors.
85-6-107. Liability of associations.
85-6-108. Exemption from payment of fees.
85-6-109. Operation of projects with water users' association — definitions.

Part 1
General Provisions

85-6-101. Power to levy new assessments. Whenever any water users' association, having a contract with the United States government for construction of works and delivery of water and also a contract with its shareholders, organized under and by virtue of the corporation laws of this state and in conformity with the laws of the United States, shall have levied an assessment or assessments upon its capital stock, which assessment or assessments or any part thereof remain uncollected, such association shall have the power to discharge all assessments theretofore levied and to levy in lieu thereof an assessment which shall include all previous assessments levied upon the shareholders of said association and to give credit for all payments on assessments theretofore made.

History: En. Sec. 1, Ch. 141, L. 1917; re-en. Sec. 7160, R.C.M. 1921; re-en. Sec. 7160, R.C.M. 1935; R.C.M. 1947, 89-1101.

85-6-103. Transfer of shares of stock. Shares of stock of water users' associations organized in conformity with the requirements of the laws of the United States and the state of Montana and under the Reclamation Act of June 17, 1902, (which shares of stock, by the articles of incorporation of said association, are inseparably appurtenant to the lands for which they are subscribed) shall, upon the presentation of proof to such association of the transfer of any of said land, be transferred on the books of said association, by the proper officers of the association, to the grantee or successor in title to said land.

History: En. Sec. 1, Ch. 29, L. 1915; re-en. Sec. 7162, R.C.M. 1921; re-en. Sec. 7162, R.C.M. 1935; R.C.M. 1947, 89-1103.

Cross-References

U.C.C. — investment securities, Title 30, ch. 8.
Securities regulation, Title 30, ch. 10.

85-6-104. Assessment of shares of stock. The assessable stock of any such water users' association may at the time of any assessment made, after the major portion of such irrigation project is completed and the irrigable area thereunder determined, be one share for each irrigable acre, and appropriate bylaws of the association may provide for the discharge of assessments levied on stock appurtenant to lands then determined to be nonirrigable.

History: En. Sec. 2, Ch. 29, L. 1915; re-en. Sec. 7163, R.C.M. 1921; re-en. Sec. 7163, R.C.M. 1935; R.C.M. 1947, 89-1104.

85-6-105. Division of irrigation project into districts. Such water users' association shall be permitted to divide the area under such irrigation project into as many districts as there are directors provided for in its articles of incorporation. Each district shall elect one director for a term not to exceed 5 years. At the first election held to elect directors under the provisions of this chapter, each district shall elect one director, who shall hold office for such a term of years as the bylaws shall provide, and thereafter a director shall be elected in the district and at the annual election held just prior to the expiration of the term of office of the director of that district.

History: En. Sec. 3, Ch. 29, L. 1915; re-en. Sec. 7164, R.C.M. 1921; re-en. Sec. 7164, R.C.M. 1935; R.C.M. 1947, 89-1105.

85-6-107. Liability of associations. An incorporated water users' association that is sustaining and responsible for the operations of a works is solely liable for any court action which may be brought against it for any injury or damages occurring on the works caused by a failure to maintain safe working and operating conditions. The state of Montana is not liable for injury to a person or property that occurs on a works as a result of a failure by a water users' association to maintain the works in a safe working and operating condition.

History: En. Sec. 11, Ch. 35, Ex. L. 1933; re-en. Sec. 349.12, R.C.M. 1935; amd. Sec. 1, Ch. 459, L. 1973; amd. Sec. 129, Ch. 253, L. 1974; amd. Sec. 3, Ch. 73, L. 1977; amd. Sec. 2, Ch. 460, L. 1977; R.C.M. 1947, 89-115(2).

Cross-References

State subject to suit, Art. II, sec. 18, Mont. Const.
Liability, Title 27, ch. 1, part 7.

85-6-108. Exemption from payment of fees. Any water users' association organized in conformity with the requirements of the laws of the United States and of the state of Montana, under the Reclamation Act of June 17, 1902, which, under the articles of incorporation, is authorized to furnish water only to its stockholders shall be exempt from the payment of any license fee and from the payment of any annual license tax and, upon filing its articles of incorporation with the secretary of state, shall be required to pay only a fee of $40 for the filing and recording of such articles of incorporation and the issuance of certificate of incorporation.

History: En. Sec. 1, Ch. 66, L. 1905; re-en. Sec. 167, Rev. C. 1907; re-en. Sec. 147, R.C.M. 1921; re-en. Sec. 147, R.C.M. 1935; amd. Sec. 9, Ch. 117, L. 1961; R.C.M. 1947, 25-110; amd. Sec. 1, Ch. 326, L. 1979.

85-6-109. Operation of projects with water users' association — definitions. (1) As used in this section, the following definitions apply:

(a) "Association" means a water users' association.

(b) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(2) Whenever the department proposes a program of maintenance, repair, operation, or alteration of a project in excess of $25,000, the cost of which will be borne by an association pursuant to the terms of a water marketing contract, the association must be informed of the program and given an opportunity to comment. The department shall notify the association of its decision. If the association believes the program to be unnecessary or excessive in cost, it may appeal the department decision to the district court in any county where all or part of the project works is located.

(3) If an appeal is filed under subsection (2), the court shall hold a trial de novo on the question of necessity of the department program and the question of excessive costs. If the association prevails, the court may award costs to the association. The court may specify an acceptable program of maintenance, repair, operation, or alteration or may order the department and the association to develop a program, subject to court approval.

(4) Whenever a program of maintenance, repair, operation, or alteration is proposed, the department shall assist the association in attempting to secure sources of financing, including federal funds.

(5) Whenever the department proposes to abandon, sell, or otherwise dispose of a project that involves a water users' association, the department shall notify the association. Before the department may take further action to abandon, sell, or otherwise dispose of a project that involves a water users' association, the department must receive a petition approving the abandonment, sale, or disposition. The petition must be signed by stockholders of the association who represent 66⅔% or more of the issued and outstanding stock of the association. If, within 30 days of receipt of the final proposal of abandonment, sale, or other disposal, stockholders of the association who represent 30% or more of the issued and outstanding stock of the association file a petition of protest with the department, the project may not be abandoned, sold, or otherwise disposed of without the consent of the legislature.

History: En. 89-1107 by Sec. 1, Ch. 253, L. 1977; R.C.M. 1947, 89-1107; amd. Sec. 3, Ch. 156, L. 1981; amd. Sec. 2, Ch. 425, L. 1991; amd. Sec. 478, Ch. 418, L. 1995; amd. Sec. 303, Ch. 42, L. 1997; amd. Sec. 54, Ch. 535, L. 2021.

CHAPTER 7
IRRIGATION DISTRICTS

Part 1 — Creation of Districts — Generally

85-7-101. Creation of irrigation districts by percentage of titleholders.
85-7-102. Evidence of title.
85-7-103. Report by department of natural resources and conservation required.
85-7-104. Petition for organization.
85-7-105. Order and notice of hearing on petition.
85-7-106. Hearing on petition.
85-7-107. Court decision — appointment of commissioners.
85-7-108. Effect of court findings and order.
85-7-109. Irrigation district as public corporation.
85-7-110. Districts organized under earlier laws.

Part 2 — Creation of Districts — Adjudicated Streams

85-7-201. Creation of districts by owners of water of adjudicated streams.
85-7-202. Application of part.
85-7-203. Petition, hearing, and order.
85-7-204. Election of board of trustees.
85-7-205. Duty of trustees, levy, and indebtedness.
85-7-206. Basis and apportionment of annual tax.
85-7-207. Part not to conflict with other regulations.
85-7-208. Dissolution of district.

Part 3 — Creation of Districts Common Water Supply

85-7-301. Creation of district by owners of rights in common water supply.
85-7-302. Application of part.
85-7-303. Establishment of district.
85-7-304. Sections not applicable.
85-7-305. Apportionment of water by commissioners.
85-7-306. Development of water supply — levy for expenses.
85-7-307. Tax levy.
85-7-308. Validity of districts organized earlier.

Part 4 — Subdistricts

85-7-401. Authority to create subdistricts — petition — requirements.
85-7-402. Notice of hearing on petition to create subdistrict.
85-7-403. Hearing on petition to create subdistrict.
85-7-404. Review of petition — creation of irrigation subdistrict.
85-7-405 through 85-7-410 reserved.
85-7-411. Alteration and determination of subdistrict acreage.
85-7-412. Dissolution of subdistrict.

Parts 5 through 9 reserved

Part 10 — Dissolution of Districts

85-7-1001. Proceedings for dissolution of district.
85-7-1002. Dissolution of districts having incurred indebtedness.
85-7-1003. Contents of petition.
85-7-1004. Use of corporation to carry out dissolution plan.
85-7-1005. Hearing on petition, notice, and order.
85-7-1006. Court's authority at hearing.
85-7-1007. Court decree and sale of assets.
85-7-1008. Final decree of dissolution — when made.

Parts 11 through 13 reserved

Part 14 — Irrigation District Revenue Bond Act

85-7-1401. Short title.
85-7-1402. Definitions.
85-7-1403. Interpretation.
85-7-1404 through 85-7-1410 reserved.
85-7-1411. Authority to acquire, construct, maintain, operate, and lease various undertakings.
85-7-1412. Joint undertakings.
85-7-1413. Authority to issue revenue bonds.
85-7-1414. Determination of cost.
85-7-1415. Nature of revenue bonds.
85-7-1416. Undertakings to be self-supporting.
85-7-1417. Use of revenue from undertaking.
85-7-1418. Authorization for undertaking and issuance of bonds.

85-7-1419. Covenants in resolution authorizing issuance of bonds.
85-7-1420 through 85-7-1430 reserved.
85-7-1431. Remedies.
85-7-1432. Presumptions of validity of bonds.
85-7-1433. Liens arising from bonds.
85-7-1434. Security interest in undertaking.
85-7-1435. Details relating to revenue bonds.
85-7-1436. Sale of bonds.
85-7-1437. Notice of sale of bonds.
85-7-1438. Interim receipts or certificates.

Part 15 — Organization of Districts

85-7-1501. Qualifications of commissioners and term of office.
85-7-1502. Organization of board of commissioners and establishment of office.
85-7-1503. Board meetings.
85-7-1504. Bonds for commissioner and secretary.
85-7-1505. Compensation and expenses of commissioners.
85-7-1506. Liability of officers.
85-7-1507. Conflict of interest — criminal penalty.
85-7-1508. Compensation and duties of secretary.

Part 16 — Joint Operations

85-7-1601. Authority for joint operation of districts.
85-7-1602. Election on joint operations.
85-7-1603. Withdrawal from joint operation.
85-7-1604. Validity of joint operations under earlier agreements.
85-7-1605. Purpose.
85-7-1606 through 85-7-1610 reserved.
85-7-1611. Board of control — composition and vacancies.
85-7-1612. Board of control — powers and duties.
85-7-1613. Board of control — per diem and expenses.
85-7-1614. Board of control — office and records.
85-7-1615. Manager of operations.
85-7-1616. Required records and audits.
85-7-1617. Apportionment of costs of joint operation.
85-7-1618. Custody and disbursement of funds.

Part 17 — Elections

85-7-1701. Repealed.
85-7-1702. Election of commissioners — term of office.
85-7-1703. Vacancies among commissioners.
85-7-1704. Repealed.
85-7-1705. Repealed.
85-7-1706. Repealed.
85-7-1707. Repealed.
85-7-1708. Repealed.
85-7-1709. Repealed.
85-7-1710. Qualification of electors and nature of voting rights.
85-7-1711. Repealed.
85-7-1712. Call for election.
85-7-1713. Where documents to be filed and proceedings to be held.

Part 18 — Alteration and Determination of District Acreage

85-7-1801. Change in boundaries.
85-7-1802. Elimination of lands from district.
85-7-1803. Requirements for petition to eliminate lands.
85-7-1804. Minor errors.
85-7-1805. Notice requirements.
85-7-1806. Court hearing on petition to eliminate lands.
85-7-1807. Court findings and order on petition to eliminate lands.
85-7-1808. Extension of boundaries and addition of lands.
85-7-1809. Notice of hearing for addition of lands.
85-7-1810. Hearing and order on petition for addition of lands.
85-7-1811. Procedure to correct errors and omissions in orders or decrees.
85-7-1812 through 85-7-1820 reserved.
85-7-1821. Change of boundaries of irrigation districts indebted to United States.
85-7-1822. Petition to exclude lands.
85-7-1823. Notice of hearing.
85-7-1824. Conduct of hearing.
85-7-1825. Court order and relief granted.

85-7-1826. Interpretation of provisions.
85-7-1827 through 85-7-1830 reserved.
85-7-1831. Withdrawal of lands to organize separate or consolidated district for cooperation with federal projects — petition.
85-7-1832. Petition for withdrawal of lands.
85-7-1833. Proceedings subsequent to presenting petition.
85-7-1834 through 85-7-1836 reserved.
85-7-1837. Limitation on irrigable acreage — special election or petition.
85-7-1838 through 85-7-1840 reserved.
85-7-1841. Fixing of taxable acreage.
85-7-1842. Petition for fixing of taxable area.
85-7-1843. Summons, publication, and court determination.
85-7-1844. Decree fixing amount of irrigable acreage.
85-7-1845. Appeal to supreme court.
85-7-1846. Terminated.

Part 19 — Operation of Districts

85-7-1901. Board plan for acquisition and construction.
85-7-1902. Management of district by board.
85-7-1903. Entry upon land by board or agent.
85-7-1904. Acquisition of water and waterworks by board.
85-7-1905. Board agreements for joint operations or cooperation.
85-7-1906. Relations with United States.
85-7-1907. Board power to provide sufficient water.
85-7-1908. Board powers over district property.
85-7-1909. Rights-of-way for irrigation works.
85-7-1910. Board power to dispose of district property.
85-7-1911. Apportionment of water by board.
85-7-1912. Exchange of water by board.
85-7-1913. Board to maintain records.
85-7-1914. Board to file annual report.
85-7-1915 through 85-7-1920 reserved.
85-7-1921. Distribution system defined.
85-7-1922. Regulation, supervision, apportionment, and control of water distribution.
85-7-1923. Entry on land.
85-7-1924. Interference with commissioners or distribution system — penalty.
85-7-1925. Installing and assessing costs of distributing or measuring devices.
85-7-1926 through 85-7-1930 reserved.
85-7-1931. Use of water for irrigation a public use.
85-7-1932. Noninterference with navigation or water rights.
85-7-1933. Diversion of waters.
85-7-1934. Lands under irrigation — inclusion in district.
85-7-1935. Lands under irrigation — limits on charges for costs.
85-7-1936 through 85-7-1940 reserved.
85-7-1941. Contracts.
85-7-1942. Competitive bidding.
85-7-1943. Exceptions for certain projects.
85-7-1944 through 85-7-1950 reserved.
85-7-1951. United States contracts — loans, sinking fund, and investment.
85-7-1952. United States contracts — assessments.
85-7-1953. Amount owed United States — lien and special tax.
85-7-1954. Assumption of operations by United States upon default.
85-7-1955. Liquidation of indebtedness with federal funds.
85-7-1956. Majority vote or petition necessary to contract with United States.
85-7-1957. United States contracts — court approval required.
85-7-1958. Power to contract with United States cumulative.
85-7-1959 and 85-7-1960 reserved.
85-7-1961. Districts organized prior to certain date — authority to continue electrical power operations.
85-7-1962 through 85-7-1970 reserved.
85-7-1971. Contracts with the state of Montana — loans, sinking fund, and investments.
85-7-1972. State contracts — assessments.
85-7-1973. Amount owed state — lien and special tax.
85-7-1974. Majority vote or petition necessary to contract with the state.
85-7-1975. State contracts — court approval required.

Part 20 — Indebtedness, Bonds, and Bankruptcy

85-7-2001. Limitations on debt-incurring power.
85-7-2002 through 85-7-2010 reserved.
85-7-2011. Exemption of irrigation district property.

85-7-2012. Purposes for which bonds may be issued.
85-7-2013. Majority vote, petition, and protest requirements.
85-7-2014. Procedure after election, petition, or resolution filed.
85-7-2015. Effect of contracting with United States.
85-7-2016. Repealed.
85-7-2017. Repealed.
85-7-2018. Repealed.
85-7-2019. Refunding bonds.
85-7-2020. Details relating to bonds.
85-7-2021. Liens of bonds.
85-7-2022. Sale of bonds.
85-7-2023. Notice of sale of bonds.
85-7-2024. Issuance of bonds for direct contract payments.
85-7-2025. Cancellation of unused bonds.
85-7-2026. Delivery of bonds.
85-7-2027. Disposition of bond proceeds.
85-7-2028 through 85-7-2030 reserved.
85-7-2031. Amending or supplementing United States contracts — effect on indebtedness.
85-7-2032. Amending or supplementing United States contracts — petition, election, or resolution not necessary.
85-7-2033. Private sale of bonds.
85-7-2034 through 85-7-2040 reserved.
85-7-2041. Bankruptcy proceedings by irrigation districts.
85-7-2042. Levy of special taxes or assessments by resolution.
85-7-2043. Resolution of intent to levy special taxes or assessments — determination of irrigable acres.
85-7-2044. Notice of resolution of intention for levy of special taxes or assessments — hearing — exception.
85-7-2045. Right to protest levy of special taxes or assessments.
85-7-2046. Hearing on protest.
85-7-2047. Sufficient protest to bar issuance of bonds and to postpone further special tax or assessment proceedings.
85-7-2048. Resolution authorizing special taxes or assessments.
85-7-2049. Adjournment of hearings on resolutions for special taxes or assessments.
85-7-2050. Collection of special taxes or assessments by county treasurer — delinquencies.

Part 21 — Taxes and Assessments

85-7-2101. Tax or assessment to pay bonds and interest.
85-7-2102. Added lands to pay proportional share of bonded indebtedness.
85-7-2103. All irrigable lands chargeable alike.
85-7-2104. Annual tax levy — apportionment when tracts divided.
85-7-2105. Cancellation of tax levy under certain conditions.
85-7-2106. Back assessments.
85-7-2107. Procedure for the determination of irrigable area.
85-7-2108. Taxes to be lien upon land.
85-7-2109. List of all lands in district or subdistrict to be prepared.
85-7-2110. Nonirrigable lands not to be taxed.
85-7-2111. Refunds and cancellation of excess taxes.
85-7-2112. Confirmation of board actions by district court.
85-7-2113. Effect of federal involvement.
85-7-2114. Apportionment of costs when bonds issued.
85-7-2115. Objection by landowner.
85-7-2116. Restrictions on reduction of taxable acreage.
85-7-2117. Conclusiveness of tax or assessment.
85-7-2118. United States contracts — cancellation of assessment on amended contracts.
85-7-2119. United States contracts — assessments where district partly outside state.
85-7-2120 through 85-7-2124 reserved.
85-7-2125. Terminated.
85-7-2126 through 85-7-2130 reserved.
85-7-2131. Funds for payment of each series of bonds to be kept distinct.
85-7-2132. Sinking fund for straight maturity bonds.
85-7-2133. Role of county officers in collection of tax or assessment.
85-7-2134. Levy of taxes and assessments by county commissioners.
85-7-2135. Transmission of funds from other counties.
85-7-2136. Collection of taxes or assessment.
85-7-2137. Failure to levy or collect tax or assessment.
85-7-2138. Surplus in construction fund.
85-7-2139. Transfer of funds.
85-7-2140. Investment of funds.
85-7-2141. Repealed.
85-7-2142. Misconduct in relation to bond funds.

85-7-2143. Prosecution for misconduct.
85-7-2144 through 85-7-2150 reserved.
85-7-2151. Delinquent sale and redemption.
85-7-2152. Proceeds of sale.
85-7-2153. Assignment of debenture certificates.
85-7-2154. Redemption of lands sold.
85-7-2155. Sale by county commissioners when land not redeemed.
85-7-2156. Proceedings in which county is possessor of tax lien and lien is not redeemed.
85-7-2157. Purchase of lands by district — revolving fund, credits, and expenditures.
85-7-2158. Purchase of lands by district — tax lien assignments and payment.
85-7-2159. Issuance of tax deed.
85-7-2160. Sale by district of purchased tax-deed lands.
85-7-2161. Action to quiet title in district.
85-7-2162. Powers of district commissioners to acquire and manage tax lien lands.
85-7-2163. Granting of tax deed.
85-7-2164. Application of certain sections.
85-7-2165. Partitioning interest in tax-deed lands in certain districts.
85-7-2166. Liability of county treasurers.
85-7-2167. Sale or transfer of lands.

Part 22 — Miscellaneous Provisions

85-7-2201. Limitation on actions attacking decrees.
85-7-2202. Consolidation of appeals.
85-7-2203. Nonsubstantial errors disregarded — rules of practice — costs.
85-7-2204. Written consent of owners — acknowledgment and recording requirements.
85-7-2205. Definition of irrigable land.
85-7-2206 through 85-7-2210 reserved.
85-7-2211. Irrigation ditches — duties relating to safety.
85-7-2212. Irrigation ditches — limits of liability.

Part 1
Creation of Districts — Generally

Part Cross-References

Definition of irrigable land, 85-7-2205.

85-7-101. Creation of irrigation districts by percentage of titleholders. (1) Sixty per centum in number of the holders of title or evidence of title to lands sought to be included in an irrigation district and which are susceptible of irrigation, such holders of title or evidence of title also representing 60% of the acreage of said lands, may propose the establishment and organization of an irrigation district under the provisions of this part and part 15. When any of such land sought to be included in such irrigation district is covered by mortgage or other lien, then the owner or owners of such land shall first procure the written consent of the holder of such mortgage or other lien before proposing the establishment and organization of such irrigation district.

(2) Irrigation districts may be formed in order to cooperate with the United States under the federal reclamation laws heretofore or hereafter enacted or under any act of congress which shall permit of the performance by the United States of work in this state for the purposes of construction of irrigation works, including drainage works, or for purchase, extension, operation, or maintenance of constructed works or for the assumption, as principal or guarantor, of indebtedness to the United States on account of district lands. When so organized, such district shall have the powers conferred or that may hereafter be conferred by law upon such irrigation district. In all irrigation districts organized in connection with United States reclamation projects, a majority of the holders of title or evidence of title to lands sought to be included in such irrigation district under the provisions of this part may propose the establishment and organization of such district.

85-7-102. Evidence of title. (1) The following documents are sufficient evidence of title for the purpose of this chapter:

(a) the certificate of the county clerk and recorder;
(b) the certificate of the department of natural resources and conservation; or
(c) records of ownership prepared by licensed title insurance producers.

(2) When lands have been purchased from the state and part or all of the purchase money has been paid but the patents or deeds from the state to the lands have not been issued, the receipt or receipts held by the purchasers or the certificate of the department showing the payments on account of purchase is evidence of title to the lands under this chapter.

History: En. Sec. 1, Ch. 146, L. 1909; amd. Sec. 1, Ch. 153, L. 1917; amd. Sec. 1, Ch. 116, L. 1919; re-en. Sec. 7166, R.C.M. 1921; amd. Sec. 1, Ch. 157, L. 1923; amd. Real property — what may be recorded — recording copy in another county, 70-21-201.

85-7-103. Report by department of natural resources and conservation required. (1) Before any such district shall be established, there shall be presented to the district court, at the hearing on the petition for such establishment, a written report or opinion from the department of natural resources and conservation on the engineering features involved and the possibilities of water supplies, accompanied by a copy of the decree of the district court showing the adjudicated water rights in said streams from which said waters are to be diverted. For this purpose, a copy of the petition provided for in 85-7-104 and of all maps and other papers filed with the same shall be filed with the department at the time the original petition is filed with the clerk of the district court. The expense, if any, incurred by the department in the investigation and report upon the proposed district shall be certified with the report and shall be assessed as costs in said hearing, which costs shall be paid by the district in event of its establishment, and in event such petition be denied, then such costs shall be paid by the petitioners. The department shall, within a period of 120 days from the filing of said petition with the department, render its report, as herein provided, to the district court.

(2) Such report or opinion shall not be requested or obtained and shall not be necessary whenever it is proposed to cooperate with the United States under the federal reclamation laws heretofore or hereafter enacted or under any act of congress which shall permit of the performance by the United States of work in this state for the purposes of construction of irrigation works, including drainage works, or for purchase, extension, operation, or maintenance of constructed works or for the assumption, as principal or guarantor, of indebtedness to the United States on account of district laws.

History: En. Sec. 1, Ch. 146, L. 1909; amd. Sec. 1, Ch. 153, L. 1917; amd. Sec. 1, Ch. 116, L. 1919; re-en. Sec. 7166, R.C.M. 1921; amd. Sec. 1, Ch. 157, L. 1923; amd. Sec. 1, Ch. 112, L. 1925; re-en. Sec. 7166, R.C.M. 1935; amd. Sec. 15, Ch. 280, L. 1965; amd. Sec. 164, Ch. 253, L. 1974; R.C.M. 1947, 89-1201(3).

Drainage districts, Title 85, ch. 8.

85-7-104. Petition for organization. (1) For the purpose of establishing and organizing an irrigation district hereunder, a petition signed by the required number of holders of title or evidence of title to lands within the proposed district mentioned in 85-7-101 shall be filed with the clerk of the district court of the county in which the greatest portion of the lands of the proposed district is located. The petition shall set forth:

(a) the name suggested for the proposed district;
(b) a general description of the lands to be included in the proposed district;
(c) the names of the holders of title or evidence of title to the lands in the proposed district, ascertained in the manner mentioned in 85-7-101 and 85-7-102, and if a holder is a nonresident of the county or counties in which the proposed district lies, the post-office address of the nonresident owner, if known;
(d) generally, the source from which the lands in the proposed district are to be irrigated and the character of the works, water rights, canals, and other property proposed to be acquired or constructed for irrigation purposes in the proposed district;
(e) a prayer that the lands embraced within the proposed district be organized as an irrigation district according to the applicable provisions of this chapter.

(2) The petition shall be accompanied by:
(a) a map or plat of the proposed district; and
(b) a good and sufficient bond or undertaking, to be approved by the district court or judge thereof of the county in which the petition is required to be filed under the provisions of subsection (1), to pay all costs in and about the proceedings preliminary to the organization of the district in the event that the organization is not effected.

(3) Mere error or omission in the description of any lands or in the names of any of the holders of title or evidence of title to lands does not render invalid any proceedings hereunder or deprive the district court of jurisdiction of the subject matter. Such misdescribed lands or misnamed persons may not be included in the district.

History: En. Sec. 2, Ch. 146, L. 1909; re-en. Sec. 7167, R.C.M. 1921; re-en. Sec. 7167, R.C.M. 1935; amd. Sec. 14, Ch. 460, L. 1977; R.C.M. 1947, 89-1202.

Cross-References

General duties of Clerk of District Court, 3-5-501.
Department powers over state waters, 85-1-204.

85-7-105. Order and notice of hearing on petition. (1) On such petition being filed, the district court or judge thereof shall make an order fixing the time and place of hearing on the petition and directing that notice thereof be given. Thereupon the clerk of said court shall cause to be published at least once a week for 2 successive calendar weeks in some newspaper published in the county where the petition is filed a copy of such petition, together with a notice stating the time and place fixed by the district court when and where the hearing on said petition will be had. If any portion of the lands within the proposed district lies within any other county or counties, then said petition and notice shall be published as above provided in a newspaper published in each such other county. If there be no newspaper published in such county, said petition and notice may be published in an adjoining county.

(2) The first publication of said petition and notice shall be not less than 30 days prior to the time mentioned in said notice for said hearing.

(3) If any holder of title or evidence of title to lands within the proposed district is a nonresident of the county or counties in which the proposed district lies, the clerk of said court shall, within 3 days after the first publication aforesaid, mail a copy of said petition and notice to each such nonresident whose post-office address is stated in said petition.

(4) The certificate of the clerk of the district court, under the seal of the court, as to the facts of the publishing and mailing of said petition and notice, affixed to a copy of said notice, shall be sufficient evidence of such facts.

History: En. Sec. 3, Ch. 146, L. 1909; re-en. Sec. 7168, R.C.M. 1921; re-en. Sec. 7168, R.C.M. 1935; R.C.M. 1947, 89-1203.

Cross-References

General duties of Clerk of District Court, 3-5-501.
Publication of legal notices, Title 18, ch. 7, part 2.

85-7-106. Hearing on petition. (1) At the time specified in the notice mentioned in 85-7-105, the district court in which the petition is filed shall hear the petition but may adjourn such hearing from time to time, not exceeding 3 weeks in all, and may continue the hearing for want of sufficient notice or other good cause. The court, upon application of the petitioners or any interested person or persons, shall permit the petition to be amended and may order further or additional notice to be given. Upon such hearing all interested persons whose lands or rights may be damaged or benefited by the organization of the district or by the irrigation works or improvements therein or to be acquired or constructed may appear and contest the necessity or utility of the proposed district or any part thereof, and the contestants and petitioners may offer any competent evidence in regard thereto.

(2) The court shall hear and determine whether the requirements of 85-7-101 through 85-7-105 have been complied with and for that purpose shall hear all competent and relevant testimony that may be offered.

History: En. Sec. 4, Ch. 146, L. 1909; amd. Sec. 2, Ch. 153, L. 1917; amd. Sec. 2, Ch. 116, L. 1919; re-en. Sec. 7169, R.C.M. 1921; re-en. Sec. 7169, R.C.M. 1935; amd. Sec. 15, Ch. 460, L. 1977; R.C.M. 1947, 89-1204(1), (2).

85-7-107. Court decision — appointment of commissioners. (1) (a) The court may make such changes in the proposed district as may be considered advisable or as fact, right, and justice may require. Land which is susceptible of irrigation from the same general source and by the same general system of works applicable to the other lands of the proposed district may not be excluded from the proposed district if the owner or owners of the lands file in the district court a written request that the lands be included.

(b) Lands which will not, in the judgment of the court, be benefited by irrigation from the works of the proposed district; which are already under irrigation; which have appurtenant water rights; or which can be irrigated from sources more feasible than the proposed district may not be included in the district unless the owner of such lands consents in writing to the inclusion.

(c) Notwithstanding the provisions of subsection (1)(b), whenever a district is formed to cooperate with the United States, lands previously irrigated and having appurtenant water rights may be included within the district boundaries if it appears to the court that the lands will be benefited by inclusion.

(d) All lands having appurtenant water rights, served by an irrigation works system supplying more than 10,000 acres, may, in the discretion of the court, be included in the proposed district upon petition by at least a majority, both in number and acreage, of the holders of title or evidence of title to the lands served by the irrigation system and having appurtenant water rights.

(e) Lands of the district need not be contiguous. The location of a particular tract in the proposed district is not a bar to exclusion.

(2) For purposes of including or excluding land from a proposed district, the court may subdivide any tract into 40-acre or smaller parcels.

(3) If, on final hearing, it is found by the court that the petition does not substantially comply with the requirements of this part or that the facts stated are not sustained by the evidence, the court shall dismiss the petition at the cost of the petitioners and make and enter an order to that effect. If it is found that the petition substantially complies with the requirements and that the facts stated are sustained by the evidence, the court shall make and enter an order:

(a) setting forth findings and allowing the petition;

(b) establishing the proposed district;

(c) giving accurate descriptions of the lands included within the proposed district;

(d) dividing the proposed district into three, five, or seven divisions, as may be advisable in view of the size of the district;

(e) appointing as commissioner one competent person for each division of the district having the qualifications as provided by 85-7-1501.

History: En. Sec. 4, Ch. 146, L. 1909; amd. Sec. 2, Ch. 153, L. 1917; amd. Sec. 2, Ch. 116, L. 1919; re-en. Sec. 7169, R.C.M. 1921; re-en. Sec. 7169, R.C.M. 1935; amd. Sec. 15, Ch. 460, L. 1977; R.C.M. 1947, 89-1204(3) thru (5).

Cross-References

85-7-108. Effect of court findings and order. The finding and order are conclusive upon all the owners of lands within the district that they have assented to and accepted the applicable provisions of this chapter and are final unless appealed from to the supreme court within 60 days from the day of entry of the order. A copy of the order, duly certified to by the clerk of the district court, shall be filed for record within 30 days after the order is made and entered with the county clerk and recorder of the county where the lands included within the district are situated. Lands not situated in the county in which the copy is filed shall be omitted from the copy.

History: En. Sec. 4, Ch. 146, L. 1909; amd. Sec. 2, Ch. 153, L. 1917; amd. Sec. 2, Ch. 116, L. 1919; re-en. Sec. 7169, R.C.M. 1921; re-en. Sec. 7169, R.C.M. 1935; amd. Sec. 15, Ch. 460, L. 1977; R.C.M. 1947, 89-1204(6).

85-7-110. Districts organized under earlier laws. Any irrigation district organized under the provisions of Chapter 70, Laws of 1907, and Chapter 16, Laws of 1909, shall be governed by the applicable provisions of this chapter. Whenever any irrigation district shall have already been organized under the provisions of said session laws and shall have issued bonds or entered into any contract of purchase or construction, nothing contained in this chapter shall be construed as affecting the rights of the holders of said bonds or of any person, persons, corporation, or association party or parties to any such contract with said district, under or by virtue of any of the provisions of said session laws. If a majority of the holders of title or evidence of title to lands included in the district heretofore organized under the provisions of said session laws (said holders of title or evidence of title, also representing a majority in acreage of irrigable lands of said district) shall petition under the provisions of this part for the organization of a new district, including not less than four-fifths of the irrigable lands embraced within such districts so organized, and shall pray for an order disorganizing such district and vacating all proceedings therein, the court shall have jurisdiction to proceed under this part and part 15 to organize such new district and, in making its final order creating such new district, shall also make an order vacating and disorganizing the old district. All money or property belonging to such old district shall be and become the money and property of such new district. Should any lands included in the old district not be included in the new district, the commissioners of the latter shall pay to the owner or owners of such land their just proportion thereof, on the basis of the last assessment made.

History: En. Sec. 67, Ch. 146, L. 1909; re-en. Sec. 7263, R.C.M. 1921; re-en. Sec. 7263, R.C.M. 1935; R.C.M. 1947, 89-2110(part).

Dissolution of districts, Title 85, ch. 7, part 10.

Part 2
Creation of Districts — Adjudicated Streams

85-7-201. Creation of districts by owners of water of adjudicated streams. It is the purpose and intention of this part, in the furtherance of public welfare, to provide an effective public agency for the improvement, development, and maintenance of certain existing irrigation systems in cases where administration thereof, through the agency of a water commissioner and the existing statutes, is not effective.

History: En. Sec. 1, Ch. 117, L. 1933; re-en. Sec. 7187.4, R.C.M. 1935; R.C.M. 1947, 89-1318.

85-7-202. Application of part. This part shall apply only when 20 or more owners of land with water rights appurtenant thereto are being served by one stream and its branches or from one source of water supply and in which the rights to the use of water shall have been determined by decree of a court of competent jurisdiction and at least 2,000 acres of land, contiguous in location or of reasonably compact area, are being served by the single stream or source.

History: En. Sec. 2, Ch. 117, L. 1933; re-en. Sec. 7187.5, R.C.M. 1935; amd. Sec. 20, Ch. 460, L. 1977; R.C.M. 1947, 89-1319.

Cross-References

Water Courts, Title 3, ch. 7.

85-7-203. Petition, hearing, and order. Whenever the owners of land and water rights, as described in 85-7-202, desire to organize for the purposes mentioned in this part, a petition to that effect, signed by not less than 60% of the individual landowners who represent not less than 51% of the irrigable acres to be affected by the proposed district and 51% of the cubic feet of water per second decreed or adjudicated in the stream from which the irrigation district is to operate, shall be filed with the clerk of the district court of the county or counties in which the district is to be created. For the purpose of determining whether the requirements of acreage and cubic feet of water per second have been met by the petition, water diverted from the adjudicated stream and distributed under irrigation districts other than the one to be created under this part may not be considered; however, such water and acreage shall be required to pay all assessments the same as other water and acreage affected by irrigation districts created under this part. Upon filing of the petition, the court shall set a date for a hearing on the petition and a written notice shall be mailed, not less than 5 days prior to the hearing, to each landowner or water right owner affected by the proposed district. If the court finds from such hearing that an irrigation district, as prayed for in the petition, is feasible and practical, the court shall issue an order creating the irrigation district. The order shall constitute the authority for the district to function for the purposes and intent as outlined in this part. The court shall appoint five commissioners who are landowners or water right owners affected by such district to act until the first annual meeting.

History: En. Sec. 3, Ch. 117, L. 1933; re-en. Sec. 7187.6, R.C.M. 1935; amd. Sec. 21, Ch. 460, L. 1977; R.C.M. 1947, 89-1320.

Cross-References

85-7-204. Election of board of trustees. On the first Monday in March of each year after the creation of the district, a meeting of the water right owners of such district shall be called, time and place for such meeting to be published in at least two issues of the local paper prior to such meeting, and at such meeting a board of trustees of five members to serve for 1 year shall be elected by ballot.

History: En. Sec. 4, Ch. 117, L. 1933; re-en. Sec. 7187.7, R.C.M. 1935; R.C.M. 1947, 89-1321.

Cross-References

Publication of legal notices, Title 18, ch. 7, part 2.

85-7-205. Duty of trustees, levy, and indebtedness. The board of trustees may develop the source of supply; clean, improve, and develop the channel of the stream; and do and perform other work on the main distributing system as will be beneficial to the better distribution of the waters of the decreed water right stream and may cover the expenses of such work by levy. Whenever waters of the stream under the irrigation district created by this part are commingled with other waters or it is difficult to determine how many acres are irrigable by the water rights held in the stream, the acre basis of levy shall be determined by the number of cubic feet of water per second owned by such party or parties at the rate of .025 cubic feet of water per second to the acre. The board may not issue bonds or incur any indebtedness other than warrant indebtedness under the limitations imposed by law.

History: En. Sec. 5, Ch. 117, L. 1933; re-en. Sec. 7187.8, R.C.M. 1935; amd. Sec. 22, Ch. 460, L. 1977; R.C.M. 1947, 89-1322; amd. Sec. 1, Ch. 112, L. 1981.

Part 3
Creation of Districts
Common Water Supply

85-7-301. Creation of district by owners of rights in common water supply. (1) It is a purpose and intention of this part, in the furtherance of the public welfare, to provide an effective public agency for the improvement, development, operation, maintenance, and administration of certain existing irrigation systems in cases where administration thereof through the agency of a water commissioner is not effective.

(2) It is a purpose and intention of this part to extend to irrigation districts organized hereunder the powers, duties, and status of the public corporations organized under the irrigation district laws of the state of Montana, as the same may now or hereafter exist; provided, that neither such districts nor the board of commissioners thereof shall have any power or authority to issue bonds or incur indebtedness, other than warrant indebtedness, under the limitations proposed by law. This part does not contemplate the acquisition by the district of the existing water, water rights, or system or works owned by the respective water right owners within the district.

History: **En. Secs. 1, 8, Ch. 100, L. 1925; re-en. Secs. 7264.1, 7264.8, R.C.M. 1935; R.C.M. 1947, 89-2111, 89-2118.**

Cross-References

Business corporations, Title 35, ch. 14.

85-7-302. Application of part. This part shall apply only when more than 15 owners of land, with water rights appurtenant thereto, shall have diverted water by means of a single intake from the source of supply and shall have provided a single canal for conveying such water to the branches and laterals of an established irrigation system, serving at least 1,000 acres of land contiguous in location or of reasonably compact area and in which the rights to the use of the water shall have been determined by decree of a court of competent jurisdiction.

History: **En. Sec. 2, Ch. 100, L. 1925; re-en. Sec. 7264.2, R.C.M. 1935; amd. Sec. 1, Ch. 134, L. 1943; R.C.M. 1947, 89-2112.**

85-7-303. Establishment of district. Whenever the owners of land and water rights, situated as described in 85-7-302, desire to organize for the purposes mentioned in this part, such owners may propose the establishment and organization of an irrigation district under the provisions of this chapter, except part 2, insofar as such laws are applicable hereto and not in conflict with the purposes and provisions of this part.

History: **En. Sec. 3, Ch. 100, L. 1925; re-en. Sec. 7264.3, R.C.M. 1935; R.C.M. 1947, 89-2113.**

85-7-304. Sections not applicable. The provisions of 85-7-1911(1) and (2), 85-7-1934, 85-7-1935, 85-7-1941 through 85-7-1943, 85-7-2001, 85-7-2011 through 85-7-2027, 85-7-2031, and 85-7-2032 do not apply to the organization of irrigation districts under this part.

History: **En. Sec. 4, Ch. 100, L. 1925; re-en. Sec. 7264.4, R.C.M. 1935; R.C.M. 1947, 89-2114; amd. Sec. 79, Ch. 130, L. 2005.**

85-7-305. Apportionment of water by commissioners. The board of commissioners shall apportion the water for irrigation among the lands of the district in a just and equitable manner and in compliance with the decree adjudicating the rights thereto, but the maximum amount apportioned to any land shall be the amount that can be beneficially used thereon.

History: **En. Sec. 5, Ch. 100, L. 1925; re-en. Sec. 7264.5, R.C.M. 1935; R.C.M. 1947, 89-2115.**

Cross-References

Priority, 85-2-401.

85-7-306. Development of water supply — levy for expenses. The board of commissioners of such irrigation district shall have authority to develop the source of supply and increase the means of distribution of water to the end that all owners of water rights under the system shall receive the amount of water which can be beneficially used upon their lands within the district. The board may levy against each irrigable acre of land in the district on account of administrative expenses, cost of maintenance and repairs, development of water supply, or enlargement of distribution facilities.

History: **En. Sec. 6, Ch. 100, L. 1925; re-en. Sec. 7264.6, R.C.M. 1935; R.C.M. 1947, 89-2116; amd. Sec. 2, Ch. 112, L. 1981.**

Part 4
Subdistricts

85-7-401. Authority to create subdistricts — petition — requirements. (1) The board of commissioners of an irrigation district created and organized under Title 85, chapter 7, parts 1 and 15, may establish one or more subdistricts within the irrigation district to provide for and finance the cost of irrigation works, including gravity irrigation systems, gravity measure systems, or sprinkling systems, that would irrigate lands in the subdistrict but not other lands in the district. A subdistrict may be established only upon a petition signed by at least 60%, in number and acreage, of the holders of title or evidence of title to lands to be included within the subdistrict. The petition must be addressed to and filed with the board of commissioners and be accompanied by a map or plat of the proposed subdistrict.

(2) The petition must state:

(a) the name suggested for the proposed subdistrict;

(b) a general description of the land to be included in the proposed subdistrict;

(c) the name of each holder of title or evidence of title to the lands in the proposed subdistrict, as determined according to 85-7-101 and 85-7-102 and, if a holder is a nonresident of the county or counties in which the proposed district lies, the post-office address of the nonresident owner, if known;

(d) the general water source from which the land in the proposed subdistrict will be irrigated and the general character of the works, water rights, canals, and other property proposed to be acquired or constructed for irrigation purposes in or for the benefit of the proposed subdistrict; and

(e) a request that the land within the proposed subdistrict be made a subdistrict according to the provisions of 85-7-401 through 85-7-404.

History: **En. Sec. 1, Ch. 439, L. 1989.**

85-7-402. Notice of hearing on petition to create subdistrict. (1) Upon the filing of a petition to create a subdistrict, the board of commissioners of the irrigation district shall by order fix the time and place for a hearing on the petition and shall direct that notice of the hearing be given.

(2) The notice of the hearing must state:

(a) the name of the proposed subdistrict and its purpose;

(b) the time and place of the hearing;

(c) a general description of the land proposed to be included in the subdistrict;

(d) a general description of the water source; and

(e) the general character of the works, water rights, canals, and other property proposed to be acquired or constructed in or for the benefit of the subdistrict.

(3) The board shall publish notice of the hearing at least once a week for 2 successive weeks in a newspaper published in each county in which the proposed subdistrict is located. The first publication must occur not less than 15 days before the date of the hearing.

(4) Notice of the hearing must also be mailed not less than 15 days before the date of the hearing to each holder of title or evidence of title to land within the proposed subdistrict. However, a defect in the notice or failure to give mailed notice does not affect the validity of the proceeding for the creation of a subdistrict under 85-7-401 through 85-7-404.

History: **En. Sec. 2, Ch. 439, L. 1989.**

85-7-403. Hearing on petition to create subdistrict. (1) The board of commissioners shall hear the petition at the time specified in the notice provided under 85-7-402. The board may adjourn the hearing for lack of sufficient notice or other good cause. The hearing must be completed within 3 weeks of the initial hearing.

(2) Upon application of the petitioners or any interested person or persons, the board shall allow the petition to be amended and may order that additional notice be given.

(3) At the hearing, any person whose land or property rights may be damaged or benefited by the creation of the subdistrict or by the irrigation works or improvements to be acquired or constructed in or for the benefit of the subdistrict may appear and submit oral or written testimony.

History: **En. Sec. 3, Ch. 439, L. 1989.**

85-7-404. Review of petition — creation of irrigation subdistrict. (1) After the hearing on the creation of the proposed subdistrict, the board of commissioners shall by resolution create the subdistrict if it finds that:

(a) the petition substantially complies with the provisions of 85-7-401; and

(b) it is in the best interests of the holders of title or evidence of title in the subdistrict and the district to establish the subdistrict.

(2) The board shall describe in the resolution the land to be included in the subdistrict. The land does not need to be contiguous but must be located within the district.

(3) In creating the subdistrict proposed by the petition, the board may alter the geographic area of the subdistrict or the scope or type of irrigation improvements to be undertaken in or for the benefit of the subdistrict, subject to the following conditions:

(a) The board may not include within the subdistrict land not identified by the petition as part of the proposed subdistrict unless notice and hearing on the addition are provided according to 85-7-402 and 85-7-403.

(b) The board may not exclude land from the proposed subdistrict if:

(i) the land can be irrigated from the same general source and by the same general system of works proposed for other land in the subdistrict; and

(ii) the owner or owners of the land file a written statement with the board requesting that the land be included in the subdistrict.

(c) The board shall exclude land from the proposed subdistrict if it determines that:

(i) the land will not benefit from irrigation obtained from the works of the proposed subdistrict; or

(ii) the land has appurtenant water rights or can be irrigated from sources more feasible than the proposed subdistrict and the owner or owners of the land have not filed a written statement with the board consenting to inclusion of the land in the subdistrict.

(4) For purposes of including or excluding land from a proposed subdistrict, the board of commissioners may subdivide any tract into 40-acre or smaller parcels.

(5) The creation of a subdistrict by the board of commissioners is conclusive on all owners of land within the subdistrict unless, within 30 days after adoption by the board of the resolution establishing the subdistrict, a holder of title or evidence of title to land within the subdistrict petitions the district court of the county in which the greater portion of the proposed subdistrict is located, for review of the creation of the subdistrict. Upon the timely filing of a petition for review of the creation of the subdistrict, the district court shall conduct a hearing and shall issue a decision in substantially the same manner required for review of a petition for an irrigation district under 85-7-105 through 85-7-108. The district court shall base its decision on whether the requirements of 85-7-401 through 85-7-403 and subsections (1) through (4) of this section have been met.

(6) A proceeding initiated in the district court for review of the validity of the bond issue or issues to finance the irrigation improvements to be undertaken in the subdistrict may be consolidated with a proceeding initiated under this section. Any indebtedness or liability incurred by the board of commissioners of the district with respect to or on behalf of a subdistrict, including bonds issued by the district, may not constitute a charge or lien on any land in the district except the land within the subdistrict.

History: En. Sec. 4, Ch. 439, L. 1989.

85-7-405 through 85-7-410 reserved.

85-7-411. Alteration and determination of subdistrict acreage. (1) Land may be deleted from or added to the subdistrict in the same manner provided for irrigation districts in 85-7-1801 through 85-7-1810.

(2) Land in a subdistrict that is deleted from an irrigation district remains in the subdistrict unless it is specifically deleted from the subdistrict according to subsection (1).

(3) The taxable area of the land in the subdistrict may be determined in the manner provided in 85-7-1841 through 85-7-1845.

History: En. Sec. 5, Ch. 439, L. 1989; amd. Sec. 2, Ch. 306, L. 1997.

Cross-References

Alteration and determination of district acreage, Title 85, ch. 7, part 18.

85-7-412. Dissolution of subdistrict. A subdistrict created under 85-7-404 may be dissolved by order of the district court of the county in which the greatest portion of lands of the subdistrict are located, in the manner provided for dissolution of irrigation districts in Title 85, chapter 7, part 10.

History: En. Sec. 6, Ch. 439, L. 1989.

Parts 5 through 9 reserved

Part 10
Dissolution of Districts

85-7-1001. Proceedings for dissolution of district. (1) Whenever an irrigation district has been organized under the provisions of parts 1 and 15, then such district may be dissolved by an order of the district court of the county in which the lands or the greater portion of the lands are situate whenever:

(a) no irrigation plant or system for the irrigation of the lands in the district has been constructed or purchased;

(b) no bonded indebtedness has been incurred; and

(c) all expenses for the organization and all other indebtedness of the district have been paid.

(2) In order that the district court may acquire jurisdiction to enter such order dissolving the district, a petition must be filed with the clerk of said district court, signed by an equal number of holders of title or evidence of title as are required to sign the original petition for the creation of the district. The district court must make an order for the hearing of said petition within 30 days from its filing, and the clerk of the court must give due notice of the hearing of such petition by posting three notices in three public places in said district and by publication of a notice of the hearing for 2 successive weeks in a newspaper of general circulation published in the county. Upon the hearing of said petition, any person interested may appear and give evidence for or against the granting of said petition. If, upon said hearing, the court finds that no bonded indebtedness of the district has been created and all of the expenses of organization and all other indebtedness have been paid and that the best interests of the landowners of said district require that the district shall be dissolved, the district court shall make such order dissolving said district and shall cause a certified copy of the order to be recorded in the office of the county clerk and recorder of said county.

History: **En. Sec. 3, Ch. 96, L. 1919; re-en. Sec. 7253, R.C.M. 1921; re-en. Sec. 7253, R.C.M. 1935; R.C.M. 1947, 89-2001.**

85-7-1002. Dissolution of districts having incurred indebtedness. (1) Any irrigation district organized and existing under the laws of the state of Montana may be dissolved by an order of the district court of the county in which the land or the greater portion of the lands of the district are situated.

(2) In case a district has incurred bonded indebtedness and has constructed or purchased any irrigation plant or system for the irrigation of the land in the district, it shall be necessary, in order that the district court may acquire jurisdiction to enter an order dissolving the district, that a petition be filed with the clerk of said district court. This petition shall be signed by an equal number of holders of title or evidence of title as are required to sign the original petition for the creation of the district and must also be signed by a sufficient number of bondholders of the district or by their assignees or duly authorized agents, representing at least 80% of the outstanding bonds of said district.

(3) In case a district has incurred bonded indebtedness but has not constructed or purchased any irrigation plant or system for the irrigation of land in the district and more than 10 years have expired since the date of organization of the district, then in such case, such district may be dissolved by an order of the district court of the county in which the land or the greater part of the lands are situated if the petition praying for dissolution shall be signed by a majority of the board of irrigation district commissioners and also by a sufficient number of bondholders of the district or by their assignees or duly authorized agents, representing at least 80% of the outstanding bonds of said district.

History: **En. Sec. 1, Ch. 60, L. 1933; re-en. Sec. 7253.1, R.C.M. 1935; amd. Sec. 1, Ch. 144, L. 1943; R.C.M. 1947, 89-2002.**

Cross-References

General duties of Clerk of District Court, 3-5-501.

85-7-1003. Contents of petition. The petition of 85-7-1002 shall set forth the amount of the outstanding bonds, coupons, and other indebtedness, if any, together with the general description of them, showing the amount of each described indebtedness and the ownership, so far as known, of the indebtedness. The petition shall also state the assets of the district, including any irrigation systems, dams, reservoirs, canals, franchises, water rights, and other property; and in case any proposition has been made by the holders of the indebtedness to settle the indebtedness, this proposition, together with any plan proposed to carry the proposition into execution, shall be included in the petition.

History: **En. Sec. 2, Ch. 60, L. 1933; re-en. Sec. 7253.2, R.C.M. 1935; amd. Sec. 37, Ch. 460, L. 1977; R.C.M. 1947, 89-2003.**

85-7-1004. Use of corporation to carry out dissolution plan. In carrying out such plan and proposition, a corporation may be organized under the general laws for the purpose of acquiring the assets of said district, including the irrigation system, if any, dams, reservoirs, canals, franchises, water rights, and other property, which corporation shall have all the powers, rights, and franchises of corporate bodies organized under general laws and in addition shall have such further power as may be necessary to possess and carry on said irrigation system and exercise such franchise and water rights.

History: **En. Sec. 3, Ch. 60, L. 1933; re-en. Sec. 7253.3, R.C.M. 1935; R.C.M. 1947, 89-2004.**

85-7-1005. Hearing on petition, notice, and order. The district court must make an order for the hearing of the petition for the dissolution of the district within 30 days from its filing, and the clerk of the court must give due notice of the hearing of said petition by posting three notices in three public places in said district and by publication of a notice of the hearing for 2 successive weeks in a newspaper of general circulation published in the county and by mailing notice of said hearing to all known bondholders of the district. Upon the hearing of said petition, any person interested may appear and give evidence for or against the granting of said petition.

History: **En. Sec. 4, Ch. 60, L. 1933; re-en. Sec. 7253.4, R.C.M. 1935; R.C.M. 1947, 89-2005.**

Cross-References

Publication of legal notices, Title 18, ch. 7, part 2.

85-7-1006. Court's authority at hearing. (1) At the hearing by said court it shall determine the regularity, legality, and correctness of all proceedings and in so doing shall disregard any error, irregularity, or omission which does not affect the substantial rights of the parties. The rules of pleading and practice in Title 25 not inconsistent with the provisions of this part are made applicable to the proceedings herein provided. The proceedings herein are declared to be for the general interest of the public and state. The hearing upon said petition shall be considered as an equitable action in rem.

(2) If the court shall consider, after hearing, that the plan proposed in the petition is not in the public interest and will not promote public welfare or is unfair to bondholders or property holders or general creditors, it may allow the petitioners to amend their petition and to submit a modified or different plan and hear the amended petition and hear and dispose of objections to the same. The judgment may dissolve the district as a public corporation; transfer water rights appurtenant to lands, whether represented by shares of stock or otherwise; and divest the lien of bonds upon lands in the district.

History: **En. Sec. 5, Ch. 60, L. 1933; re-en. Sec. 7253.5, R.C.M. 1935; R.C.M. 1947, 89-2006.**

85-7-1007. Court decree and sale of assets. (1) The court, in its decree, shall have the power to make the orders necessary to carry out said proposition for the discharge of the indebtedness and distribution of the property of said district and may decree a sale of its assets in such manner as may effectuate said proposition and as the court may judge best, either in one lot or in such parcels as may be provided and may provide for conveyance of said irrigation system, including dams, reservoirs, canals, franchises, water rights, and other property and also of any other assets of the district, including lands sold thereto.

(2) The court, in its investigation and determination of said matter, may take into consideration the fact that payments have been made by certain of the water users in excess of other water users who have defaulted. In its decree the court may require that the purchaser of the assets may give consideration to various water users for payments theretofore made by them on the irrigation system.

History: **En. Sec. 6, Ch. 60, L. 1933; re-en. Sec. 7253.6, R.C.M. 1935; R.C.M. 1947, 89-2007.**

85-7-1008. Final decree of dissolution — when made. Whenever all the property of such irrigation district shall have been disposed of and all the obligations thereof, if any there be, shall have been discharged, the court shall enter a final decree declaring said district to be dissolved.

History: **En. Sec. 7, Ch. 60, L. 1933; re-en. Sec. 7253.7, R.C.M. 1935; R.C.M. 1947, 89-2008.**

Parts 11 through 13 reserved

Part 14
Irrigation District Revenue Bond Act

Part Cross-References

Public bond issues generally, Title 17, ch. 5.

85-7-1401. Short title. This part may be cited as the "Irrigation District Revenue Bond Act".

History: En. Sec. 1, Ch. 193, L. 1987.

85-7-1402. Definitions. As used in this part, unless the context requires otherwise, the following definitions apply:

(1) "Irrigation district" means a district created pursuant to Title 85, chapter 7, part 1.

(2) "Issuer" means the board of commissioners of an irrigation district or a board of control created pursuant to Title 85, chapter 7, part 16.

(3) "Revenues" means any fees, charges, rates, rents, or lease payments.

(4) "Undertaking" means any one or a combination of the following:

(a) water sources, water rights, irrigation canals, irrigation systems, including pumping facilities or gravity measure systems, reservoirs, reservoir sites, or small power production facilities that are:

(i) certified as such by the federal energy regulatory commission; and

(ii) are associated with federal reclamation projects;

(b) any real or personal property or water rights related to or necessary to provide, operate, and maintain an undertaking listed in subsection (4)(a).

History: En. Sec. 2, Ch. 193, L. 1987.

85-7-1403. Interpretation. (1) The powers conferred in this part are in addition to the powers conferred by any other general, special, or local law.

(2) An undertaking may be acquired, constructed, or improved, and bonds may be issued under this part for such purposes, notwithstanding the provisions of Title 85, chapter 7.

(3) If the provisions of this part are inconsistent with the provisions of Title 85, chapter 7, the provisions of this part control.

History: En. Sec. 3, Ch. 193, L. 1987.

85-7-1404 through 85-7-1410 reserved.

85-7-1411. Authority to acquire, construct, maintain, operate, and lease various undertakings. (1) An irrigation district may:

(a) construct, acquire by gift, purchase, or lease, or improve any undertaking, within or outside the irrigation district, and acquire by gift, purchase, or lease land or rights in land or water rights in connection with the undertaking;

(b) operate and maintain or enter into a contract for the operation and maintenance of any undertaking and furnish or enter into a contract for the furnishing of services, facilities, and commodities of the undertaking for its own use and for the use of public and private consumers within or outside the territorial boundaries of the irrigation district. However, an irrigation district may not furnish or enter into a contract for the furnishing of electrical energy or capacity except to a qualified purchaser under the Public Utility Regulatory Policies Act of 1978.

(c) lease any undertaking to a private or governmental entity.

(2) This section may not be construed to permit an irrigation district to condemn any property owned or controlled by a rural electric cooperative or a utility, whether publicly or privately owned. An irrigation district is expressly prohibited from condemning, pursuant to Title 70, chapter 30, property owned or controlled by a rural electric cooperative or utility.

History: En. Sec. 4, Ch. 193, L. 1987; amd. Sec. 105, Ch. 125, L. 2001; amd. Sec. 23, Ch. 275, L. 2017.

85-7-1412. Joint undertakings. Irrigation districts, through their respective boards of commissioners, may enter into contracts to jointly plan, acquire, construct, operate, maintain, and finance any undertaking in accordance with Title 85, chapter 7, part 16. The contract must specify, if an undertaking is financed under this part:

(1) that the contract cannot be terminated prior to the redemption or cancellation of any bonds issued under it; and

(2) the manner of disposing of the undertaking upon termination of the contract.

History: En. Sec. 5, Ch. 193, L. 1987.

85-7-1413. Authority to issue revenue bonds. An irrigation district may:

(1) issue its bonds to finance in whole or in part the acquisition, construction, or improvement of any undertaking; and

(2) pledge to the punctual payment of bonds issued under this part and interest thereon an amount of the revenue of the undertaking (including subsequent improvements or extensions) sufficient to pay the bonds and interest as they become due, and maintain reasonable reserves therefor.

History: En. Sec. 6, Ch. 193, L. 1987.

85-7-1414. Determination of cost. An issuer, in determining costs for purposes of 85-7-1413, may include:

(1) all costs and estimated costs of the issuance of the bonds;

(2) all engineering, inspection, fiscal, and legal expenses; and

(3) interest that it estimates will accrue during the construction period and for 6 months thereafter on money borrowed or that it estimates will be borrowed.

History: En. Sec. 7, Ch. 193, L. 1987.

85-7-1415. Nature of revenue bonds. (1) No holder of any bonds issued under this part may compel the levy of any tax or assessment on property within the irrigation district to pay the bonds or interest thereon.

(2) Each bond issued under this part must recite in substance that:

(a) the bond, including interest thereon, is payable from the revenue pledged to the payment thereof or any other security pledged therefor, including a lien on the undertaking; and

(b) the bond does not constitute a debt of the irrigation district within the meaning of any constitutional or statutory limitation or provision.

History: En. Sec. 8, Ch. 193, L. 1987.

85-7-1416. Undertakings to be self-supporting. (1) An issuer issuing bonds pursuant to this part shall collect reasonable fees for the services, facilities, and commodities of the undertaking and shall revise the fees from time to time so that the undertaking remains self-supporting.

(2) The fees prescribed must produce revenue at least sufficient to:

(a) pay when due all bonds and interest thereon for which the revenue is pledged, including reserves; and

(b) provide for all expenses of operation and maintenance of the undertaking, including reserves.

History: En. Sec. 9, Ch. 193, L. 1987.

85-7-1417. Use of revenue from undertaking. (1) An issuer of bonds pursuant to this part for the acquisition, construction, or improvement of any undertaking may apply the revenue of the undertaking for the following purposes:

(a) to pay when due all bonds and interest thereon for which the revenue is pledged, including reserves;

(b) to provide for all expenses of operation and maintenance of the undertaking, including reserves;

(c) to pay and discharge notes, bonds, or other obligations and interest thereon not issued under this part for which the revenue of the undertaking is pledged;

(d) to pay and discharge notes, bonds, or other obligations and interest thereon that do not constitute a lien or encumbrance on the revenue of the undertaking and which were issued for the purpose of financing the acquisition, construction, or improvement of the undertaking; and

(e) to provide a reserve for improvements to the undertaking.

(2) Unless adequate provision has been made for the purposes listed in subsection (1), no irrigation district may transfer the revenue of the undertaking to its general fund.

History: En. Sec. 10, Ch. 193, L. 1987.

85-7-1418. Authorization for undertaking and issuance of bonds. (1) The acquisition, construction, or improvement of any undertaking may be authorized under this part.

(2) Bonds may be authorized to be issued under this part by resolution of the governing body of the issuer without an election.

History: En. Sec. 11, Ch. 193, L. 1987.

85-7-1419. Covenants in resolution authorizing issuance of bonds. A resolution authorizing the issuance of bonds under this part may contain covenants relating to:

(1) the purposes for which the proceeds of sale of the bonds may be applied and the use and disposition of the proceeds;

(2) the use and disposition of the revenue of the undertaking for which the bonds are to be issued, including the creation and maintenance of reserves;

(3) the issuance of other or additional bonds payable from the revenue of the undertaking;

(4) the operation and maintenance of the undertaking;

(5) the insurance to be carried on the undertaking and the use and disposition of insurance money;

(6) books of account and the inspection and audit of the books; and

(7) the terms and conditions upon which the holders of the bonds or any portion of them or any trustee is entitled to the appointment of a receiver by the district court, which court shall have jurisdiction in such proceedings and which receiver may:

(a) enter and take possession of the undertaking;

(b) operate and maintain the undertaking;

(c) prescribe fees, subject to the approval of the public service commission if such approval is required; and

(d) collect, receive, and apply all revenues in the same manner as the issuer itself might do.

History: En. Sec. 12, Ch. 193, L. 1987.

85-7-1420 through 85-7-1430 reserved.

85-7-1431. Remedies. The provisions of the resolution authorizing the bonds are enforceable by any bondholder in any court of competent jurisdiction by mandamus or other appropriate proceeding.

History: En. Sec. 13, Ch. 193, L. 1987.

85-7-1432. Presumptions of validity of bonds. (1) Bonds bearing the signatures of officers in office on the date of the signing of the bonds are valid obligations, notwithstanding that before the delivery of the bonds and payment for the bonds, any of the persons whose signatures appear on the bonds have ceased to be officers.

(2) The validity of the bonds is not dependent on the validity or regularity of any proceedings relating to the acquisition, construction, or improvement of the undertaking for which the bonds are issued.

(3) The resolution authorizing the bonds may provide that the bonds must contain a recital that they are issued pursuant to this part, which recital is conclusive evidence of their validity and of the regularity of the issuance.

History: En. Sec. 14, Ch. 193, L. 1987.

85-7-1433. Liens arising from bonds. The resolution authorizing the bonds must specify and define the revenues or portion of the undertaking's revenues that is appropriated and pledged for the security and payment of the bond principal and interest and the relative security of liens on the revenues in favor of bonds of one or more series or issues, whether issued concurrently or at different times.

History: En. Sec. 15, Ch. 193, L. 1987.

85-7-1434. Security interest in undertaking. The issuer may, pursuant to a mortgage, trust indenture, or security agreement, grant a security interest in the real and personal property constituting the undertaking itself.

History: En. Sec. 16, Ch. 193, L. 1987.

85-7-1435. Details relating to revenue bonds. Bonds authorized to be issued under this part shall bear interest at a rate not exceeding the limitation of 17-5-102, payable semiannually, and may be in one or more series; bear such date or dates; mature at such time or times, not exceeding 40 years from their respective dates of issuance; be payable in such place or places; carry such registration privileges; be subject to such terms of redemption; be executed in such manner; contain such terms, covenants, and conditions; and be in such form, either coupon or registered, as the resolution or subsequent resolutions may provide.

History: En. Sec. 17, Ch. 193, L. 1987.

85-7-1436. Sale of bonds. (1) Bonds authorized to be issued may be sold at a price not less than 97% of face value if the issuer determines that the sale is in the best interests of the irrigation district.

(2) The bonds may be sold at public or private sale as determined by the irrigation district pursuant to 17-5-107.

History: En. Sec. 18, Ch. 193, L. 1987; amd. Sec. 25, Ch. 253, L. 2011.

85-7-1437. Notice of sale of bonds. (1) Except as provided in subsection (2), the notice of sale of bonds required by 85-7-1436 for bonds sold publicly must be published once at least 5 days prior to such sale:

(a) in a newspaper of general circulation in the county in which the office of the issuer is located; and

(b) in a financial newspaper in New York, Chicago, or San Francisco.

(2) If the bond issue is in an amount of less than $150,000, the bond issue must be advertised at least 5 days prior to sale in a newspaper of general circulation throughout the state of Montana.

History: En. Sec. 19, Ch. 193, L. 1987; amd. Sec. 26, Ch. 253, L. 2011.

85-7-1438. Interim receipts or certificates. Pending the preparation of the definitive bonds, interim receipts or certificates, in a form and with provisions determined by the governing body, may be issued to the purchaser or purchasers of bonds sold pursuant to this part. The bonds and interim receipts or certificates are fully negotiable, as provided by Title 30, chapter 8.

History: En. Sec. 20, Ch. 193, L. 1987.

Part 15
Organization of Districts

Part Cross-References

Administration of conservation districts, Title 76, ch. 15, part 3.
Conservancy districts — organization and procedure, Title 85, ch. 9, part 4.

85-7-1501. Qualifications of commissioners and term of office. (1) To qualify as a commissioner, an individual:

(a) must own irrigable land within the division of the district that the individual would represent or hold an equity ownership in an entity that owns irrigable land within the division of the district that the individual would represent; and

(b) must be a resident of the county, or an adjoining county, in which some portion of the division of the district that the individual would represent is located.

(2) The commissioners appointed shall hold their respective offices until their respective successors are elected and qualified. Each of the commissioners shall qualify in the same manner as justices of the peace. The bond for a commissioner must be approved by the district court or judge of the district court and filed in the office of the clerk of the court.

(3) For the purposes of this section, the term "entity" means a corporation, a limited liability company, a business trust, an estate, a trust, a partnership, an unincorporated association, or a foundation.

History: En. Sec. 5, Ch. 146, L. 1909; amd. Sec. 1, Ch. 145, L. 1915; re-en. Sec. 7170, R.C.M. 1921; re-en. Sec. 7170, R.C.M. 1935; amd. Sec. 16, Ch. 460, L. 1977; R.C.M. 1947, 89-1205(part); amd. Sec. 398, Ch. 571, L. 1979; amd. Sec. 1, Ch. 584, L. 1989; amd. Sec. 1, Ch. 402, L. 2005.

Justices of the Peace, Title 3, ch. 10, part 2.
Division of irrigation project into districts, 85-6-105.

85-7-1502. Organization of board of commissioners and establishment of office. (1) The commissioners shall meet within 10 days after their appointment and shall organize as a board by the election of one of their number as president. They shall also elect a secretary (who may or may not be a commissioner). Except as provided in part 16 of this chapter, the compensation of the secretary and all other employees authorized under this chapter shall be fixed by the board.

(2) The board shall also at this meeting designate the place where the office of the board shall be established and maintained and its records kept, which place shall be in the county containing a substantial portion of the lands in the district; and such place shall not be changed except by resolution of the board, of which notice shall be given by at least one publication in some newspaper published or of general circulation in the county wherein the office of the district is located and by posting in at least three public places in each division of the district.

History: En. Sec. 6, Ch. 146, L. 1909; re-en. Sec. 7171, R.C.M. 1921; amd. Sec. 2, Ch. 157, L. 1923; re-en. Sec. 7171, R.C.M. 1935; amd. Sec. 1, Ch. 78, L. 1961; R.C.M. 1947, 89-1206.

Cross-References

Publication of legal notices, Title 18, ch. 7, part 2.

85-7-1503. Board meetings. (1) All meetings of the board of commissioners shall be public and a complete record of all proceedings shall be kept by the secretary.

(2) Regular meetings of the board shall be held at such times as the board may by rule or bylaw prescribe. Special meetings may be called on 24 hours' notice by the president or any two members of the board or in such other manner and upon such other notice as the board may by rule or bylaw prescribe. All meetings of the board may be adjourned as the board shall order or direct. A majority of the commissioners shall constitute a quorum.

History: En. Sec. 7, Ch. 146, L. 1909; re-en. Sec. 7172, R.C.M. 1921; re-en. Sec. 7172, R.C.M. 1935; R.C.M. 1947, 89-1207.

Cross-References

Open meetings, Title 2, ch. 3, part 2.

85-7-1504. Bonds for commissioner and secretary. (1) When the obligations of the district, either existing or proposed, total $250,000 or more, the commissioners of an irrigation district shall each furnish a bond in the penal sum of $2,500, with corporate surety conditioned for the faithful performance of their duties under this chapter. The secretary shall furnish bond, with corporate surety, in the sum of $1,000, conditioned for the faithful performance of the secretary's duties pursuant to this chapter and for the proper safekeeping of the records and documents of the district. In all other cases, the bond for the commissioners is $1,000.

(2) If a district established under this chapter is appointed fiscal agent of the United States or is authorized by the United States to make collections of money for and on behalf of the United States in connection with any federal reclamation project, each commissioner shall execute a further and additional official bond in a sum that the secretary of the interior may require, conditioned for the faithful discharge of the duties of office and the faithful discharge by the district of its duties as fiscal or other agent of the United States under any appointment or authorization, and that bond may be sued upon by the United States or by any person injured by the failure of the commissioner or the district to fully, promptly, and completely perform respective duties.

History: (1)En. Sec. 8, Ch. 146, L. 1909; amd. Sec. 1, Ch. 120, L. 1921; re-en. Sec. 7173, R.C.M. 1921; amd. Sec. 3, Ch. 157, L. 1923; amd. Sec. 1, Ch. 116, L. 1927; amd. Sec. 16, Ch. 460, L. 1977; Sec. 89-1205, R.C.M. 1947; R.C.M. 1947, 89-1205(part), 89-1208(3); amd. Sec. 2783, Ch. 56, L. 2009.

Cross-References

General provisions related to official bonds, Title 2, ch. 9, part 5.
Bonds of state officers and employees, Title 2, ch. 9, part 6.
Suretyship, Title 28, ch. 11, part 4.

85-7-1505. Compensation and expenses of commissioners. (1) The commissioners, when sitting as a board or when engaged in the business of the district, are entitled to compensation at an amount determined by a majority vote of the board for each day that they are actually and necessarily engaged in the performance of irrigation district duties. The amount of compensation determined by the board may be no greater than $100.

(2) The commissioners are also entitled to reimbursement for travel expenses, as provided in 2-18-501 through 2-18-503, and for their necessary expenses when otherwise engaged in district business, including premiums on qualifying bonds and any other bonds required of the commissioners in connection with their office.

History: **En. Sec. 8, Ch. 146, L. 1909; amd. Sec. 1, Ch. 120, L. 1921; re-en. Sec. 7173, R.C.M. 1921; amd. Sec. 3, Ch. 157, L. 1923; amd. Sec. 1, Ch. 116, L. 1927; amd. 85-7-1508. Compensation and duties of secretary. The member of the board acting as secretary or any person appointed by the board as secretary for the district must receive compensation for services as allowed by the board. It is the duty of the secretary to keep the books and records of accounts, contracts, securities, and other records, to perform the duties promptly each month, and to make a monthly reconcilement of accounts with the county treasurer. It is the duty of the county treasurer to make a monthly report to the secretary of all receipts, disbursements, and balances. A failure by the secretary to comply with the provisions of this section causes a forfeiture of the secretary's salary, and the secretary must be removed from office by the board.

History: **En. Sec. 2, Ch. 212, L. 1921; re-en. Sec. 7261, R.C.M. 1921; re-en. Sec. 7261, R.C.M. 1935; R.C.M. 1947, 89-2108; amd. Sec. 2786, Ch. 56, L. 2009.**

Joint Operations

85-7-1601. Authority for joint operation of districts. Whenever the board of commissioners of one or more irrigation districts, established and organized by virtue of the provisions of 85-7-101 through 85-7-103 shall, in their discretion, deem it advisable for the best interests of their district to operate, manage, supervise, and maintain the operation of their district jointly with another irrigation district, the said commissioners are hereby authorized and empowered to enter into written contracts for the creation of a joint board of control. Where irrigation works lie partly in the state of Montana and partly in an adjacent state, the board of commissioners may contract with the district or districts in the adjacent state for the creation of a joint board of control.

History: **En. Sec. 1, Ch. 179, L. 1959; R.C.M. 1947, 89-1209.**

Cross-References

Negotiations with other states by Department, 85-1-223.

85-7-1602. Election on joint operations. At any time after March 7, 1959, in the event that it is deemed advisable or desirable for any irrigation districts to operate under the direction of a board of control as herein provided, the boards of commissioners of the districts, after petition requesting the same be received and filed with them, must call an election to put the question before the landowners of the districts which are petitioned to be joined. In the event a majority of the landowners of each district, as provided by 85-7-1710, vote for organizing such board of control, then the commissioners of each district will be authorized and directed to enter into such contract to operate the districts in accordance with the terms of this part as provided by 85-7-1601. The election herein provided shall be conducted in the same manner and the same persons shall be entitled to vote thereat as provided for elections of commissioners of irrigation districts, in accordance with 85-7-1702, 85-7-1710, and 85-7-1712.

History: **En. Sec. 10, Ch. 179, L. 1959; R.C.M. 1947, 89-1218(part); amd. Sec. 399, Ch. 571, L. 1979.**

Cross-References

What contracts must be in writing, 28-2-903.

85-7-1603. Withdrawal from joint operation. Any district having entered into a written contract, as provided by this part, may withdraw from such contract upon submitting to the board of control, in writing, a 90-day notice of withdrawal, except that if revenue bonds have been issued by the board of control under part 14 of this chapter, the district may not withdraw from such contract until such bonds are canceled or redeemed.

History: **En. Sec. 11, Ch. 179, L. 1959; R.C.M. 1947, 89-1219; amd. Sec. 21, Ch. 193, L. 1987.**

Cross-References

Written contracts, Title 28, ch. 2, part 9.

85-7-1604. Validity of joint operations under earlier agreements. Any contract previously entered into between any two or more irrigation districts or between any such irrigation districts and the United States bureau of reclamation which meets the requirements of this part and which creates a board of control meeting all the requirements of this part is hereby declared to be a valid contract and to create a valid board of control under this part.

History: **En. Sec. 10, Ch. 179, L. 1959; R.C.M. 1947, 89-1218(part).**

Cross-References

Essential characteristics of object — contracts, 28-2-602.

85-7-1605. Purpose. This part is not intended to conflict in any way with statutes governing irrigation districts but is for the sole purpose of making it possible for one or more irrigation districts to function jointly through a central control agency for the purpose of efficiency, simplicity, and economy.

History: **En. Sec. 12, Ch. 179, L. 1959; amd. Sec. 18, Ch. 460, L. 1977; R.C.M. 1947, 89-1220.**

85-7-1606 through 85-7-1610 reserved.

85-7-1611. Board of control — composition and vacancies. (1) The board of control must be composed of one or more irrigation commissioners from each district involved and one member at large. Each irrigation commissioner must be appointed for 1 year by the board of commissioners of the district that the commissioner represents. The member at large must be a landowner from one of the districts involved or a person representing any person or entity that receives water delivery from the irrigation project that delivers water to the member districts. The member at large must be appointed by the commissioner members to serve for a period of 1 year and shall give a bond, the same as an irrigation district commissioner. The member at large may not be an employee, agent, water commissioner, or servant of any of the districts involved. At no time may the board membership be less than three members. Each member of the board of control and the manager, if hired, before beginning duties shall give a bond to the board of control in the amount of $5,000, conditioned upon the faithful performance of the member's duties.

(2) Vacancies occurring during the term in the position of a commissioner member must be filled for the remainder of the unexpired term by appointment of the board of commissioners of the district involved. Vacancies occurring in the position of member at large must be filled for the remainder of the unexpired term in the same manner as the original appointment.

History: En. Sec. 2, Ch. 179, L. 1959; R.C.M. 1947, 89-1210; amd. Sec. 1, Ch. 143, L. 1999.

Cross-References

Suretyship, Title 28, ch. 11, part 4.

85-7-1612. Board of control — powers and duties. (1) The board of control established by this part is the operating agent of the contracting districts for the operation and maintenance of irrigation and/or drainage works and the delivery of water therefrom.

(2) The board shall make and execute all necessary contracts; employ and appoint such agents, officers, and employees as may be required; and prescribe their duties.

(3) The board may institute and maintain any and all actions and proceedings and suits at law or in equity, necessary or proper in order to fully carry out the provisions of this chapter or to enforce, maintain, protect, or preserve any and all rights, privileges, and immunities created by this part or acquired in pursuance thereof. In all courts, suits, or proceedings, the board may sue, appear, and defend in person or by its attorneys and in the name of such board of control.

(4) The board may adopt rules and bylaws governing the calling and holding of meetings of the board; the manner of transacting business thereat; and the publishing or posting of the orders, resolutions, and proceedings of the board. The board shall pass or adopt bylaws and rules for the apportionment and distribution of water to the lands of the contracting districts and for the protection and preservation of the works and other property of the districts. All orders and resolutions shall be passed or adopted by a majority of the members of the board of control by a "yea" and "nay" vote, to be entered upon the records of the board.

(5) The board of control may perform all other acts necessary or appropriate to fully carry out the purposes of this part.

(6) The board of control may plan, acquire, construct, operate, maintain, lease, or finance an undertaking through the issuance of revenue bonds, as provided in part 14 of this chapter.

History: En. Sec. 3, Ch. 179, L. 1959; R.C.M. 1947, 89-1211; amd. Sec. 3, Ch. 326, L. 1979; amd. Sec. 22, Ch. 193, L. 1987; amd. Sec. 79, Ch. 83, L. 1989.

Cross-References

Agency, Title 28, ch. 10.

Drainage districts, Title 85, ch. 8.

85-7-1613. Board of control — per diem and expenses. The members of the board of control, when sitting as a board or when engaged in the business of the board, are entitled to compensation of $25 for each day they are actually and necessarily engaged in the performance of irrigation district duties and to reimbursement for travel expenses as provided in 2-18-501 through 2-18-503, and for their necessary expenses.

History: En. Sec. 4, Ch. 179, L. 1959; R.C.M. 1947, 89-1212; amd. Sec. 4, Ch. 112, L. 1981; amd. Sec. 6, Ch. 672, L. 1983.

Cross-References

Public employees — travel, meals, and lodging, Title 2, ch. 18, part 5.

85-7-1614. Board of control — office and records. The board of control is hereby authorized and empowered to establish an office in one of the contracting districts; to hold its proceedings therein; and to keep on file all necessary petitions, papers, minutes, documents, or other instruments belonging to the board of control and the contracting districts.

History: En. Sec. 5, Ch. 179, L. 1959; R.C.M. 1947, 89-1213.

85-7-1615. Manager of operations. The board of control may hire a manager to supervise and conduct the operations of the district or districts over which it presides or to hire a manager for each district under its supervision, whichever it considers advisable. The manager or managers shall perform all duties set out by the board of control.

History: En. Sec. 6, Ch. 179, L. 1959; R.C.M. 1947, 89-1214; amd. Sec. 2787, Ch. 56, L. 2009.

85-7-1616. Required records and audits. (1) The board of control shall keep or cause to be kept, in the form prescribed by the department of administration, a full and complete book and record of the accounts, records, contracts, securities, minutes of meetings, and other matters of every kind pertaining to or belonging to the joint operation of the irrigation districts.

(2) The department of administration shall prescribe forms for the use of the board of control.

(3) The accounting records of all boards of control must be audited in accordance with 2-7-503.

History: En. Sec. 7, Ch. 179, L. 1959; amd. Sec. 165, Ch. 253, L. 1974; amd. Sec. 51, Ch. 213, L. 1975; R.C.M. 1947, 89-1215; amd. Sec. 7, Ch. 274, L. 1981; amd. Sec. 1, Ch. 287, L. 1983; amd. Sec. 11, Ch. 179, L. 1995; amd. Sec. 214, Ch. 483, L. 2001.

Cross-References

Studies and reports, Title 2, ch. 7.

85-7-1617. Apportionment of costs of joint operation. The districts entering into a contract for their joint control shall pay to the board of control, proportionately on an acreage basis the necessary costs, expenses, and charges for the general administration, maintenance, and repairs.

History: En. Sec. 8, Ch. 179, L. 1959; R.C.M. 1947, 89-1216.

85-7-1618. Custody and disbursement of funds. The county treasurer of the county in which the office of the board is established is the custodian of all funds made available for the use of the board, and the county treasurer shall pay out the funds upon the order of the board. The orders must be signed by the secretary or treasurer of the board of control and countersigned by the president or, in the president's absence, by the vice president of the board of control. The board funds must be kept separate and distinct from all other county funds. The county treasurer to whom board funds are entrusted is liable on the treasurer's bond for the safekeeping of the funds.

History: En. Sec. 9, Ch. 179, L. 1959; R.C.M. 1947, 89-1217; amd. Sec. 2788, Ch. 56, L. 2009.

85-7-1701. Repealed. Sec. 407, Ch. 571, L. 1979.

History: En. Sec. 10, Ch. 146, L. 1909; re-en. Sec. 7175, R.C.M. 1921; re-en. Sec. 7175, R.C.M. 1935; R.C.M. 1947, 89-1302.

85-7-1702. Election of commissioners — term of office. (1) The election for commissioners in each district must be held annually in accordance with Title 13, chapter 1, part 5. The election may be at the district's annual meeting or on the date established in 13-1-504(1).

(2) A person eligible to vote in the district may file a declaration of candidacy for the office of commissioner with the election administrator or deputy election administrator within the time period specified in 13-1-502.

(3) Within 40 days following their election, the commissioners shall meet and organize as a board by electing a president from their number and a secretary, who may or may not be a commissioner, who shall each hold office at the pleasure of the board.

(4) Except as provided in 85-7-204, the term of office of each commissioner begins on the date of the commissioner's election and continues for 3 years.

(5) Commissioners are elected by the electors of the entire district.

History: En. Sec. 11, Ch. 146, L. 1909; amd. Sec. 4, Ch. 153, L. 1917; amd. Sec. 1, Ch. 3, L. 1921; amd. Sec. 1, Ch. 7, Ex. L. 1921; re-en. Sec. 7176, R.C.M. 1921; re-en. Sec. 7176, R.C.M. 1935; amd. 85-7-1703. Vacancies among commissioners. If there is a vacancy on the board of commissioners from any cause, the vacancy must be filled until the next regular or special election by appointment by the board. The remaining commissioners constitute a quorum for the purpose of filling any vacancy. If a vacancy exists for every position on the board, the judge of the district court of the county in which the division or major portion of the division is situated shall make the appointments. The appointee must be an owner of irrigable land within the division of the district that the appointee represents and must be a resident of the county in which the division of the district or some portion of the division is situated. A commissioner appointed under this section holds office until a successor is elected and qualified.

85-7-1710. Qualification of electors and nature of voting rights. (1) (a) At all elections held under the provisions of this part, except as otherwise expressly provided, the following holders of title or evidence of title to irrigable lands within the district, designated "electors", are entitled to vote if, except as provided in subsection (1)(b), they are qualified electors under the constitution and general election laws of the state:

(i) guardians, executors, administrators, and trustees;

(ii) domestic corporations, by their duly authorized agents; and

(iii) owners of land described in subsection (3), including but not limited to corporations, limited liability companies, partnerships, and other entities that may vote through their duly authorized agents.

(b) Electors under this section are not subject to state residency requirements, registration requirements, or county signature verification requirements.

(2) In all elections held under this part, each elector is permitted to cast one vote for each acre of irrigable land or major fraction of an acre owned by the elector within the district, irrespective of the location of the irrigable lands within the tracts designated by the commissioners for assessment and taxation purposes or within congressional subdivisions,

platted lots or blocks except as otherwise provided for, election precincts, or district divisions, but any elector owning any less than 1 acre of irrigable land is entitled to one vote. Until the irrigable area under the proposed plan of reclamation is determined, all land included within the boundaries of the district must be considered irrigable land for election purposes.

(3) (a) Whenever land is owned by co-owners, either owner may vote on behalf of the co-owners, the owners may vote based on an agreed-upon percentage ownership, or the owners may designate one of their number or an agent to cast the vote for the owners. Whenever the land is owned by a single owner, the owner at the owner's discretion may designate an agent to cast the vote. Only one vote may be cast for each acre of irrigable land or major fraction of an acre by the voting individual. Whenever land is under contract of sale to a purchaser, the purchaser may vote on behalf of the owner of the land. Prior to voting, the agent of a corporation, a single owner or the co-owners, the co-owner designated for the purpose of voting, or the purchaser of land under contract of sale shall file with the secretary of the district a written document indicating the agent's authority, executed and signed by the proper officers of the corporation, by the single owner or co-owners, or by the owner of land under contract of sale, and upon filing, the agent or co-owner or purchaser is an elector within the meaning of this part.

(b) Prior to voting, if there is a change in the designated agent, the new designated agent is responsible for providing a written document signed by the proper officers of the corporation, by the single owner or co-owners, or by the owner of land under contract of sale indicating the changes in the designated agent.

(c) When an irrigation district provides notice of an election, the notice must indicate that, if there is a change in a designated agent, a new signed document must be presented to the district indicating the change. The list of designated agents compiled under this section must be maintained and certified by the irrigation district to ensure that only one vote is cast on behalf of each acre or fraction of an acre.

(4) The board of commissioners shall choose one of the following methods of balloting:

(a) for 10 votes or less, separate ballots must be used, and for more than 10 votes, the elector shall vote in blocks of 10 using one ballot for each 10 votes and separate ballots for odd votes over multiples of 10; or

(b) the elector shall submit a ballot that includes the number of irrigable acres owned within the district and the number of votes being cast.

(5) (a) Except as provided in subsections (5)(b) and (5)(c), if the county election office administers the election, the list of eligible electors that is maintained and certified by the irrigation district must be provided to the county election office not less than 60 days before the election.

(b) If the irrigation district receives a valid change document regarding a qualified elector or a designated agent at least 14 days prior to an election being administered by the county election office and the district fulfills the requirements of subsection (5)(c), the elector or designated agent is eligible to vote.

(c) The irrigation district shall notify the election office within 4 days of receiving a change document as described in subsection (5)(b) and shall provide the necessary information regarding the change to the election office in order for the election office to administer the proper ballot.

(d) After receiving notice in accordance with subsection (5)(c), the county election office shall provide the elector with a ballot.

(e) If a qualified elector or designated agent provides a valid change document to an irrigation district within the 13 days prior to and including election day, the district must provide to the elector or agent a notice, which the elector or agent may present to the election office. If the election office determines that the votes have not already been cast for the respective irrigable acres, the elector or agent may receive a ballot and cast the votes for those acres.

Ex post facto, obligation of contracts, and irrevocable privileges, Art. II, sec. 31, Mont. Const.

85-7-1802. Elimination of lands from district. Whenever lands have been included within the boundaries of an established and organized irrigation district, which from their location or conformation cannot be successfully irrigated by the irrigation works or system already constructed or proposed to be constructed or the cost of irrigating the same will become burdensome upon the landowners of the district, a majority in number of the holders of title or evidence of title to the land included in such district (such holders of title or evidence of title also representing a majority in acreage of said lands) may petition the district court of the county in which the lands of the district or the greater portion thereof are situated for an order or decree changing the boundaries of the district by the elimination therefrom of such lands.

History: En. Sec. 23, Ch. 146, L. 1909; amd. Sec. 1, Ch. 98, L. 1919; re-en. Sec. 7188, R.C.M. 1921; re-en. Sec. 7188, R.C.M. 1935; R.C.M. 1947, 89-1401(part); amd. Sec. 3, Ch. 306, L. 1997.

Cross-References

85-7-1803. Requirements for petition to eliminate lands. (1) The petition for this purpose must be signed by the required number of holders of title or evidence of title to lands within such district, as hereinbefore specified, and the same shall be filed with the clerk of the district court as herein designated.

(2) Such petition shall set forth:

(a) the name of the district;

(b) a general description of the lands to be eliminated or excluded from the district;

(c) the names of the holders of title or evidence of title to the lands sought to be excluded; the names of the holders of title or evidence of title to the remainder of the lands of said district, ascertained in the manner mentioned in 85-7-101 and 85-7-102; and if any holder of title is a nonresident of the county or counties in which the district lies, the post-office address of such nonresident owners, if known;

(d) a brief description of the character of the works, water rights, canals, and other property acquired or proposed to be acquired or constructed for irrigation purposes in the district;

(e) a brief statement of the reasons why the lands sought to be excluded should be eliminated from the district;

(f) a prayer for the exclusion of the lands sought to be eliminated therefrom.

(3) The petition shall be accompanied by a map or plat of the district, showing thereon the lands sought to be eliminated therefrom, and a good and sufficient bond or undertaking to be approved by the district court or judge thereof of the county in which the petition is required to be filed under the provisions hereof, to pay all costs in and about the proceedings and the hearing thereof in the event that said petition is denied.

History: En. Sec. 23, Ch. 146, L. 1909; amd. Sec. 1, Ch. 98, L. 1919; re-en. Sec. 7188, R.C.M. 1921; re-en. Sec. 7188, R.C.M. 1935; R.C.M. 1947, 89-1401(part).

85-7-1805. Notice requirements. (1) Upon the filing of a petition, the district court shall fix the time and place of hearing on the petition and direct that notice of the petition be given.

(2) The petitioner shall cause to be published at least once a week for 2 successive weeks in a newspaper published in the county where the petition is filed a notice stating the time and place of the hearing on the petition that includes a brief statement of the matters set forth in the petition. If any portion of the lands sought to be excluded from the district lie within any other county or counties, then the notice shall be published as provided above in a newspaper published in each county or counties. The first publication of the notice must occur not less than 30 days before the hearing.

(3) If any holder of title or evidence of title to lands sought to be excluded from the district is a nonresident of the county or counties in which the district lies, the petitioner shall within 3 days of the first publication of the notice mail a copy of the notice to each nonresident whose address is stated in the petition. The affidavit of publication as to the facts of the publishing and mailing of the notice affixed to a copy of the notice is sufficient evidence of the facts.

85-7-1806. Court hearing on petition to eliminate lands. (1) At the time specified in the notice, the district court in which the petition is filed shall hear the petition but may adjourn such meeting from time to time, not exceeding 2 weeks in all, and may continue the hearing for the want of sufficient notice or other good cause. The court upon application of the petitioners shall permit the petition to be amended and may order further or additional notice to be given. Upon such hearing, all persons interested whose lands or rights may be damaged or benefited by the granting of the petition or the exclusion of the lands from the district may appear and contest the necessity or justice of the court's making an order granting such petition in whole or in part, and the contestants and petitioners may offer any competent evidence in regard thereto.

(2) It shall be the duty of the court to hear and determine whether the requirements as herein set forth have been complied with, and for that purpose shall hear all competent and relevant testimony that may be offered.

History: **En. Sec. 23, Ch. 146, L. 1909; amd. Sec. 1, Ch. 98, L. 1919; re-en. Sec. 7188, R.C.M. 1921; re-en. Sec. 7188, R.C.M. 1935; R.C.M. 1947, 89-1401(part).**

Cross-References

District Court jurisdiction, Title 3, ch. 5, part 3.

85-7-1807. Court findings and order on petition to eliminate lands. The court may grant such petition in whole or in part and may make an order making such changes in the boundaries of the district by the exclusion of such lands therefrom as may be deemed advisable or as fact, right, and justice may require. Such order shall be conclusive upon all of the owners of lands within the district and shall be final unless appealed from to the supreme court within 60 days of the entry of said order. For the purposes of any such appeal, such order shall be regarded as a final judgment of said district court. A copy of such order, duly certified to by the clerk of said court, shall be filed for record within 30 days after such order is made and entered with the county clerk and recorder of the county wherein lands included within such district are situated; provided, however, there shall be omitted from such copy lands not situated in the county in which such copy is filed.

History: **En. Sec. 23, Ch. 146, L. 1909; amd. Sec. 1, Ch. 98, L. 1919; re-en. Sec. 7188, R.C.M. 1921; re-en. Sec. 7188, R.C.M. 1935; R.C.M. 1947, 89-1401(part).**

Confirmation of Board actions by District Court, 85-7-2112.

85-7-1809. Notice of hearing for addition of lands. When such petition is presented, the district court or judge thereof shall appoint a day for a public hearing. Notice of the hearing shall be given by the clerk of the court by publication at least once a week for at least 2 weeks in a newspaper published or of general circulation in the county in which the office of the district is situated. If any of said lands sought to be included in the district lie in a county or counties other than that in which the office of the district is situated, such notice shall also be likewise published in some newspaper published or of general circulation in each such other county or counties. If there be no such newspaper, then such notice shall be posted in at least three public places in the territory sought to be included.

History: **En. Sec. 24, Ch. 146, L. 1909; amd. Sec. 3, Ch. 145, L. 1915; re-en. Sec. 7189, R.C.M. 1921; re-en. Sec. 7189, R.C.M. 1935; R.C.M. 1947, 89-1402(2).**

85-7-1810. Hearing and order on petition for addition of lands. At such public hearing, the district court shall hear those who may desire changes made in the proposed extension, all those whose lands are included or sought to be included in the district, and all other persons whose rights may be affected by the proposed extension. Such public hearing may be adjourned from day to day, not exceeding 20 days in all, and the court shall make an order either granting or denying said petition. If said petition is granted, said order shall describe the lands included in said extension and the terms on which said land shall be included, and a copy of said order shall be filed with the county clerk and recorder in the county wherein said lands are situated. The order of the district court shall be final and conclusive, the same as the order originally creating the district, unless appealed from to the supreme court within 10 days from the entry of the order. The extension of such boundaries shall not deprive the lands already in said district of an adequate supply of water for irrigation purposes.

History: En. Sec. 24, Ch. 146, L. 1909; amd. Sec. 3, Ch. 145, L. 1915; re-en. Sec. 7189, R.C.M. 1921; re-en. Sec. 7189, R.C.M. 1935; R.C.M. 1947, 89-1402(3).

85-7-1811. Procedure to correct errors and omissions in orders or decrees. (1) The district court retains jurisdiction of any petition presented to establish an irrigation district or to enlarge and increase its boundaries or to exclude land from the district for the purpose of correcting any omissions, defects, or errors in the proceedings of the court. The court may correct and, if necessary, amend the order of the district court establishing the district, any order extending the boundaries of the district, or any order excluding lands from the district, including the description of lands included or intended to be included in the district or excluded from the district or intended to be excluded, the boundaries of the divisions into which it is divided, and any other matter that is before the court on the application to create the district, to enlarge or extend its boundaries, or to exclude lands from the district. The court may, on application of the board of commissioners of the district, correct and amend the terms of any order or judgment of the court so that it conforms to the provisions of the statute under the authority of which the order was made. The board of commissioners of any district may adopt a resolution directing its president and secretary to prepare, execute, and file with the clerk of the district court a petition that sets forth the following matters:

(a) the name of the district and a reference to the order in which the defect, error, omission, errors in description of lands included or excluded, or departure from the statute occurred;

(b) a statement of the defects, errors, omissions, irregularities, errors in description of lands included or excluded, or variance from the statutory requirements; and

(c) a request for an order correcting the defects, errors, omissions, or irregularities.

(2) If the error, defect, omission, irregularity, or variance is in the description of any land or lands embraced in the district, the petition must set forth the correct description of the lands, the names of the holders of title or evidence of title to the lands, ascertained in the manner provided in 85-7-101 and 85-7-102, and if any holder is a nonresident of the county or counties in which the district lies, the post-office address of the nonresident owner, if known. Upon the filing of the petition, the court shall direct notice of the hearing of the petition to be given in a manner as determined necessary to protect the rights and interests of the parties and, after a hearing of any parties intervening, shall enter an order correcting the defects, errors, omissions, or irregularities. If the defects, errors, omissions, or irregularities are in the description of the lands embraced in the district, the district court or judge shall direct the clerk of the court to publish, at least once a week for 2 successive weeks, in some newspaper published in the county where the petition is filed, a copy of the petition, together with a notice stating the time and place fixed by the district court when and where a hearing on the petition will be held, and, if any portion of the lands within the district lies within any other county or counties, the petition and notice must be published as provided in this subsection in a newspaper published in each of those counties. If a newspaper is not published in the county, the petition and notice may be

published in an adjoining county. The first publication of the petition and notice must be not less than 30 days prior to the time mentioned in the notice for the hearing. If any holder of title or evidence of title to lands within the district is a nonresident of the county or counties in which the district lies, the clerk of court shall, within 3 days after the first publication, mail a copy of the petition and notice to each nonresident whose post-office address is stated in the petition. The certificate of the clerk of the district court, under the seal of the court, as to the facts of the publishing and mailing of the petition and notice, affixed to a copy of the notice, is sufficient evidence of the facts.

(3) At the time specified in the notice, the district court in which the petition is filed shall hear the petition but may adjourn the hearing from time to time and may continue the hearing for want of sufficient notice or other good cause. The court, upon application of the petitioners or any person or persons interested, shall permit the petition to be amended and may order further or additional notice to be given. Upon the hearing, all persons interested may appear and contest the application for the order requested in the petition, and the contestants and petitioners may offer any competent evidence pertinent to the request of the petition.

(4) The court may make changes in the description of the lands embraced within the limits of the district that may be considered advisable or as fact, right, and justice may require but may not exclude from the district any lands described as a part of the district in the order creating it after the district has issued bonds or entered into a contract with the United States under 85-7-1906. However, lands may be excluded from a district that has entered into a contract with the United States under 85-7-1906 if the secretary of the interior consents to the exclusion.

(5) If, on final hearing, it is found by the court that the petition does not substantially comply with the requirements of this section or that the facts stated in the petition are not sustained by the evidence, the court shall dismiss the petition at the cost of the petitioners and shall make and enter an order to that effect. If it is found that the petition substantially complies with the requirements of this section and that the facts stated in the petition are sustained by the evidence, the court shall make and enter an order in accordance with the request of the petition.

(6) All orders and findings of the district court made under the provisions of this section are conclusive upon all owners of lands within the district and are final unless appealed from to the supreme court within 60 days from the date of entry of the order. A copy of the order, certified to by the clerk of court, must be filed for record within 30 days after the order is made and entered with the county clerk and recorder of the county in which the lands included within the district are situated. There must be omitted from the copy lands not situated in the county in which the copy is filed.

85-7-1822. Petition to exclude lands. (1) Whenever lands have been included within the boundaries of any irrigation district of the character designated in 85-7-1821 which from their location or conformation cannot be successfully irrigated by the irrigation works or system constructed for that purpose or when the cost of irrigating the same has or will become burdensome upon the landowners of the district, the owners of said lands, with the consent of the board of commissioners of said district and the secretary of interior of the United States or such other federal authority, instrumentality, or agency as may be appropriate, may petition the district court of the county in which such lands are situated for an order or decree changing the boundaries of the district by the elimination therefrom of such lands. The petition for this purpose must be signed by the owners of the land sought to be excluded and accompanied with the written consent of the board of commissioners of the district and the secretary of the interior of the United States or such other federal authority, instrumentality, or agency as may be appropriate. Such petition shall set forth:

(a) the name of the district;

(b) a particular description of the land sought to be excluded or eliminated from the district;

(c) the names of the holders of title to the lands sought to be excluded;

(d) a brief description of the character of works, water rights, canals, or works owned and acquired by the district;

(e) a statement of the reasons why the lands sought to be excluded should be eliminated from the district;

(f) a prayer for the exclusion of the lands sought to be eliminated therefrom.

(2) The petition shall be accompanied with a map or plat of the district, showing thereon the lands sought to be eliminated therefrom, and a good and sufficient bond or undertaking to be approved by the district court or judge thereof of the county in which the petition is required to be filed under the provisions hereof, to pay all costs in and about the proceedings and hearing thereof in the event that said petition is denied.

Power to contract with United States cumulative, 85-7-1958.

85-7-1833. Proceedings subsequent to presenting petition. When said petition is duly presented to the district court, all further proceedings with reference to lands, the owners of which seek to form a new and separate district, shall be as prescribed in 85-7-101 through 85-7-103, 85-7-1504(1), 85-7-1505, and 85-7-1507, and all further proceedings with reference to lands, the owners of which desire that they be incorporated in another existing district, shall be as prescribed in 85-7-1809 and 85-7-1810, insofar as said provisions are not inconsistent with the purposes of 85-7-1831 through 85-7-1833.

History: **En. Sec. 3, Ch. 98, L. 1933; re-en. Sec. 7187.3, R.C.M. 1935; R.C.M. 1947, 89-1317.**

85-7-1834 through 85-7-1836 reserved.

85-7-1837. Limitation on irrigable acreage — special election or petition. (1) The board of commissioners of an irrigation district shall, when authorized as provided in subsection (2), limit the amount of acreage within any farm operation in the district that may be serviced by the district.

(2) In determining whether to impose an acreage limitation on a particular farm operation:

(a) the board of commissioners may submit the question to the qualified electors of the district by election as provided in 85-7-1712; or

(b) the limitation may be imposed based on a petition signed by not less than 60% of landowners representing not less than 60% of the irrigated land within the boundaries of the irrigation district.

(3) If a limitation is imposed by special election or petition, the minimum acreage limit that may be imposed is 960 acres of land owned or leased by a qualified recipient.

(4) An irrigation district that has imposed an acreage limitation may require certification of acreage and designation of excess acreage by the electors. Except as provided in subsection (5), the district may withhold water on all acres designated as excess acres.

(5) A qualified recipient that owns or leases irrigated acreage in excess of the limitation at the time the process of imposing a limitation begins may continue operations without penalty and without having water withheld as long as the ownership or lease remains with the qualified recipient.

(6) The board of commissioners may adopt regulations necessary to administer the provisions of this section.

(7) For the purposes of this section, "qualified recipient" means an individual, married couple, corporation, trust, or partnership that operates as an individual, independent farm operation.

History: **En. Sec. 1, Ch. 87, L. 1995; amd. Sec. 248, Ch. 49, L. 2015; amd. Sec. 1, Ch. 198, L. 2023.**

Cross-References

Elections, Title 85, ch. 7, part 17.

85-7-1838 through 85-7-1840 reserved.

85-7-1841. Fixing of taxable acreage. Whenever any lot, tract, or parcel of land has been heretofore or may hereafter be included within the boundaries of any public irrigation district formed under the laws of this state and the acreage thereof fixed and stated in the decree for the creation of said district or in any other proceeding relating thereto is fixed at a greater number of acres than actually exist within such lot, tract, or parcel of land or at a greater number of acres than can be irrigated from the reclamation system of said district or whenever, from any action or proceeding by or on behalf of said district or its commissioners, any such lot, tract, or parcel of land included therein has been or is about to be assessed from a greater acreage than exists therein or can be irrigated from the reclamation system of said district, the owner or holder of title or evidence of title to said lands, as defined by the irrigation district acts, may have the taxable acreage contained therein fixed and adjudicated as provided for by 85-7-1841 through 85-7-1845. However, if any bonds have been issued with the approval and pursuant to confirmation by the court then no proceeding for the determination of the acreage shall be allowed to alter or reduce in any manner the acreage subject to the lien of such bonds, in principal or interest, or of the taxes or assessments to meet the interest or principal thereof while such bonds or the interest thereon are unpaid in whole or in part. Such proceeding may still be allowed to correct or determine acreage subject to taxes or assessments for maintenance and current expenses and insofar as the latter only are to be affected.

History: En. Sec. 24, Ch. 146, L. 1909; amd. Sec. 3, Ch. 145, L. 1915; re-en. Sec. 7190, R.C.M. 1921; amd. Sec. 3, Ch. 54, L. 1923; re-en. Sec. 7190, R.C.M. 1935; R.C.M. 1947, 89-1404.

85-7-1842. Petition for fixing of taxable area. The owner or holder of title or evidence of title, as defined by the irrigation district acts, may file in the district court of the county wherein said lands are situated a petition praying that the acreage of the lands set forth and described in such petition may be permanently fixed and adjudicated, which petition shall set forth:

(1) the name or names of the owner or owners, holder of title or evidence of title thereto, who shall be the party or parties plaintiff therein;

(2) the names and kind and character of interest of every person owning, holding, or claiming any right, title, or interest in or to the lands described in said petition, who shall, where they do not appear as parties plaintiff under subsection (1), sit as parties defendant;

(3) the name of the district in which said lands are included, together with the name of the board of commissioners thereof and the secretary thereof, and said district, its commissioners and secretary shall be made parties defendant therein;

(4) a statement of the substance of all proceedings, orders, and decrees creating said districts and fixing the acreage of the lands therein described, together with any proceedings of the board of commissioners of said district or its officers relating to the acreage thereof, to such extent as to fully inform the court of the manner and extent to which said lands have been included and taxed or assessed in said district;

(5) the actual acreage of the lands described as irrigable from the reclamation system of said district;

(6) the excess of acreage complained of;

(7) the amount of taxes previously paid on such excess acreage;

(8) a general statement of the exact nature of the relief sought and the grounds therefor.

85-7-1843. Summons, publication, and court determination. (1) Upon the filing of such petition, summons shall be issued thereon and served upon all parties defendant thereto, with a copy of the petition attached thereto, in the same manner and in the same form as issued in civil actions. Whenever any necessary party thereto cannot, after due diligence, be found within the state of Montana, service upon such party or parties may be had by publication of a summons, which shall be obtained, issued, and published in the same manner as a published summons in a civil action.

(2) The provisions of Title 25 and the rules of pleading and practice applicable to civil actions generally shall apply, so far as applicable, to this proceeding.

(3) If the allegations to such petition be denied, the district court shall, when the time for appearance of the parties defendant thereto has expired and said parties have appeared by answer or made default, proceed to hear and determine the issues in said proceedings as joined.

85-7-1844. Decree fixing amount of irrigable acreage. Upon the hearing of said petition, the court shall, by its decree, fix and determine the irrigable acreage contained in the lots, tracts, or parcels of land complained of. The acreage so fixed by such decree shall be the acreage upon which all assessments of said lands in said irrigation district shall thereafter be based. Upon said hearing the court shall determine the amount of taxes, if any, which have theretofore been levied and assessed upon any excess or nonexistent acreage and shall enter judgment in favor of the owner or holder thereof and against said district for the excess of taxes theretofore collected by said district or shall cancel such excess if the same shall not have been collected for the benefit of said district. However, no judgment for the recovery of excess taxes paid shall be entered against any district until there shall have been deducted therefrom any unpaid valid taxes and assessments levied and assessed for the benefit of said district against the lands described in said petition, and all sums so recovered shall bear interest at the rate of 8% per annum from the date of payment by the landholder. Said judgment shall bear legal interest from the date of entry, and the judgment so rendered may be paid by warrants or funds of said future taxation upon said lands. Costs shall be allowed to the plaintiff in the same manner as other civil actions.

History: **En. Sec. 24, Ch. 146, L. 1909; amd. Sec. 4, Ch. 145, L. 1915; re-en. Sec. 7193, R.C.M. 1921; re-en. Sec. 7193, R.C.M. 1935; R.C.M. 1947, 89-1407.**

85-7-1845. Appeal to supreme court. From any such judgment or decree an appeal may be taken to the supreme court by any party thereto at any time within 10 days of the entry of said judgment or decree. Such appeal shall be taken, perfected, and heard in the manner prescribed by Title 25 governing appeals from the district court to the supreme court. If no such appeal be taken within the time aforesaid or, if taken, the judgment or decree of the district court shall be affirmed by the supreme court, such judgment or decree shall be forever conclusive upon the parties thereto. In case contract has been made between the district and the United States, as provided in 85-7-1906, no change shall be made in the boundaries of the district, and the district court shall make no order changing the boundaries of the district until the secretary of the interior shall assent thereto in writing and such assent be filed with the district court.

History: **En. Sec. 24, Ch. 146, L. 1909; amd. Sec. 4, Ch. 145, L. 1915; re-en. Sec. 7194, R.C.M. 1921; re-en. Sec. 7194, R.C.M. 1935; R.C.M. 1947, 89-1408.**

85-7-1901. Board plan for acquisition and construction. (1) For the purpose of purchasing or constructing the necessary irrigation canals or works or acquiring the necessary property and rights for canals or works and otherwise carrying out the provisions of this chapter, the board of commissioners of any irrigation district shall, as soon as practicable after the district has been organized, formulate a general plan for the purchase, construction, and acquisition of the property. The board shall cause surveys, examinations, and plans to be made that demonstrate the practicability of the plans, as well as of procuring water from other and different sources and the amount of land that can be irrigated under the plan, and shall furnish the proper basis for an estimate of the cost of carrying out the plan and the value of any canal, works, property, or system of irrigation proposed to be purchased.

(2) All surveys, examinations, maps, plans, and estimates must be made by or under the direction and supervision of an irrigation engineer of well-known standing and competency, and all necessary surveys, examinations, maps, plans, and estimates must be certified to by the engineer. When the surveys, examinations, maps, plans, and estimates are completed, the engineer shall submit them with all proper field notes to and file them with the board of commissioners, accompanied by the engineer's report and recommendation. This report must include a discussion of the plans submitted by the engineer to the board, of the question of water supply, of the sufficiency of the works proposed to accomplish the desired results, of the practicability of the proposed system from an engineering standpoint, and of the probability of being acquired or constructed within the estimate of the cost stated and a general discussion and recommendation in regard to the engineering and financial features of the whole matter that in the judgment of the engineer is desirable for the information of the people of the district. The report must be accompanied by a map when a map is necessary for a proper explanation or understanding of the report and recommendation.

(3) Upon receiving the report, the board of commissioners shall proceed to determine the amount of money necessary to be raised for the purchase or construction of the proposed property, canals, or irrigation works and system and within 10 days after arriving at that determination shall cause the secretary of the board to notify all persons or corporations holding title or evidence of title to lands within the district, determined as provided in 85-7-101 and 85-7-102, of the filing of the report and their determination on the report. The notices must be given through the United States mail by letter addressed to the person or corporation at the last-known post-office address of each person or corporation. A certificate of the secretary of the board as to the fact of mailing the notice, affixed to a copy of the notice and recorded in the record book of the board of commissioners, is sufficient and conclusive evidence of mailing.

85-7-1902. Management of district by board. (1) The board of commissioners of every irrigation district established and organized under and by virtue of parts 1 and 15 of this chapter shall constitute the corporate authority of said district.

(2) The board shall have the power and it shall be the duty of the members thereof to manage and conduct the business and affairs of the district; adopt a corporate seal therefor; make and execute all necessary contracts; and employ and appoint such agents, officers, and employees as may be required and prescribe their duties.

(3) The board is hereby authorized and empowered to institute and maintain any and all actions and proceedings, suits at law or in equity, necessary or proper in order to fully carry out the provisions of this chapter, or to enforce, maintain, protect, or preserve any and all rights, privileges, and immunities created by this chapter or acquired in pursuance thereof. In all courts, suits, or proceedings, the board may sue, appear, and defend in person or by attorneys and in the name of such irrigation district.

(4) The board may adopt rules and bylaws governing the calling and holding of meetings of the board; the manner of transacting business thereat; and the publishing or posting of the orders, resolutions, and proceedings of the board. It shall be the duty of said board to pass or

adopt bylaws and rules for the apportionment and distribution of water to the lands of the district and for the protection and preservation of the works and other property of the district, and the board may therein require the prompt payment of all current and delinquent taxes and assessments and other financial obligations owing the district as a prerequisite to water service. The bylaws and rules shall be printed in convenient form for distribution in the district. All orders and resolutions shall be passed or adopted by a majority of the commissioners by a yea and nay vote, to be entered upon the records of the board.

(5) Said board shall have power generally to do and perform all such other acts as shall be necessary or appropriate to fully carry out the purposes of this chapter.

85-7-1904. Acquisition of water and waterworks by board. (1) The board may:

(a) appropriate water in the name of the district;

(b) acquire, by purchase, lease, or contract:

(i) water and water rights;

(ii) additional water and supplies of water; and

(iii) canals, reservoirs, dams, and other works already constructed or in the course of construction; and

(c) acquire by purchase, lease, contract, condemnation pursuant to Title 70, chapter 30, or other legal means:

(i) land and rights in lands for rights-of-way, for reservoirs, for the storage of waters, and for dam sites and necessary appurtenances; and

(ii) other lands and property that may be necessary for the construction, use, maintenance, repair, improvement, enlargement, and operation of any district or subdistrict system of irrigation works.

(2) The board may contract with the owner or owners of canals, reservoirs, dams, and other works purchased and in the course of construction for the completion of the works.

(3) A purchase, lease, or contract for purchase of any water, water rights, canals, reservoirs, reservoir sites, dam sites, irrigation works, or other property of any nature or kind or for the making or purchasing of surveys, maps, plans, estimates, and specifications or for the purchase of machinery for pumping plants or for the erection of buildings, aqueducts, and other structures necessarily used in connection with the pumping plants, for a price or rental in excess of $150,000 or 25% of the district's annual operation and maintenance budget, whichever is greater, may not be entered into by the district without the written consent or petition of at least a majority in number and acreage of the holders of title or evidence of title to the lands within the district or, if the purchase, lease, or contract substantially benefits a subdistrict in the district, by a majority in number and acreage of the holders of title or evidence of title to lands within the subdistrict. Any splitting or division of a purchase, lease, or contract with the purpose or intention of avoiding or circumventing the provisions of this section renders the divided or split contract or contracts void.

Cross-References

Joint operations, Title 85, ch. 7, part 16.

85-7-1906. Relations with United States. (1) For the purpose of acquiring control over government land within the district and of complying with the provisions of the act of congress of August 11, 1916, the board shall have authority to make such investigations and base thereon such representations and assurances to the secretary of the interior as may be requisite.

(2) The board may enter into any obligation or contract with the United States:

(a) for the construction, operation, and maintenance of the necessary works for the delivery and distribution of water therefrom and the necessary drainage works;

(b) for the assumption, as principal or guarantor, of indebtedness to the United States on account of district lands, under the provisions of the federal Reclamation Act of June 17, 1902, all acts amendatory thereof or supplementary thereto, and the rules and regulations established thereunder; or

(c) for a water supply under any act of congress providing for or permitting such contract.

(3) In case contract has been or may hereafter be made with the United States as herein provided, bonds of the district may be deposited with the United States at 90% of their par value, to the amount to be paid by the district to the United States under any such contract. The interest on said bonds of the district and regularly paid to the United States is to be applied as provided in such contract. If bonds of the district are not so deposited, it shall be the duty of the board of commissioners to include, as part of any levy or assessment provided for in 85-7-2101 or 85-7-2132, an amount sufficient to meet each year all payments accruing under the terms of any such contract. The board may accept, on behalf of the district, appointment of the district as fiscal agent of the United States or authorization of the district by the United States to make collections of money for or on behalf of the United States in connection with any federal reclamation project, whereupon the district shall be authorized to so act and to assume the duties and liabilities incident to such action. The board shall have full power to do all things required by the federal statutes now or hereafter enacted in connection therewith and all things required by the rules and regulations now or that may hereafter be established by any department of the federal government in regard thereto, including the power to require the prompt payment of all charges as prerequisite to water service.

(2) The legal title to all property acquired by or for any irrigation district or any subdistrict in the district under the provisions of this chapter shall immediately and by operation of law vest in that district, as set forth in this chapter. The board of commissioners may hold, use, maintain, acquire, manage, occupy, and possess that property, as provided in this chapter. Any property acquired by the district may be conveyed to the United States for the construction, operation, and maintenance of works by the United States for the benefit of the district or a subdistrict in the district under any contract that may be entered into with the United States pursuant to this chapter.

History: (1)En. Sec. 9, Ch. 146, L. 1909; amd. Sec. 2, Ch. 145, L. 1915; amd. Sec. 3, Ch. 153, L. 1917; amd. Sec. 3, Ch. 116, L. 1919; re-en. Sec. 7174, R.C.M. 1921; amd. Sec. 4, Ch. 157, L. 1923; re-en. Sec. 7174, R.C.M. 1935; amd. Sec. 1, Ch. 111, L. 1973; amd. Sec. 1, Ch. 307, L. 1975; Sec. 89-1301, R.C.M. 1947; (2)En. Sec. 30, Ch. 146, L. 1909; amd. Sec. 5, Ch. 153, L. 1917; re-en. Sec. 7200, R.C.M. 1921; re-en. Sec. 7200, R.C.M. 1935; Sec. 89-1605, R.C.M. 1947; R.C.M. 1947, 89-1301(9), 89-1605; amd. Sec. 10, Ch. 439, L. 1989.

85-7-1909. Rights-of-way for irrigation works. (1) The board of commissioners shall have the power to construct irrigation works across any stream of water, watercourse, street, avenue, highway, railway, canal, ditch, or flume which the route of said canal or canals may intersect or cross in such manner as to afford security to life and property. Said board shall restore the same, when so crossed or intersected, to its former state, as near as may be, so as not to destroy its usefulness. Every company whose railroad shall be intersected or crossed by said works shall unite with said board in forming said intersection and crossing, and if such railroad company or the owners and controllers of said property, thing, or franchise so to be crossed and said board cannot agree upon the amount to be paid therefor or the points or the manner of said crossing or intersections, the same shall be ascertained and determined in all respects as herein provided in respect to taking of land for public use.

(2) Nothing contained herein shall require the payment to the state or any subdivision thereof of any sum for the right to cross any public highway with any such works. The right-of-way is hereby given, dedicated, and set apart to locate, construct, and maintain said works over and through any of the lands which are now or hereafter may be the property of this state.

History: En. Sec. 26, Ch. 146, L. 1909; re-en. Sec. 7196, R.C.M. 1921; re-en. Sec. 7196, R.C.M. 1935; R.C.M. 1947, 89-1601.

Cross-References

Construction across streams, highways, or other obstacles, 85-1-208.

85-7-1910. Board power to dispose of district property. (1) The board of commissioners may, with the written consent of a majority in number and acreage of the owners of the lands in the district or, if the leased property substantially benefits a subdistrict in the district, of a majority in number and acreage of the owners of lands within the subdistrict, lease in whole or in part the system of canals and works or water belonging to the district, whenever the leasing is considered for the benefit of the district or subdistrict, if the leased property substantially benefits the subdistrict. When the board contemplates the leasing of the canals or works or water of a district or subdistrict, it shall declare the availability of the lease by resolution or order and give notice by publication in a newspaper published in the county in which the office of that irrigation district is situated at least 2 calendar weeks prior to the making of any lease. A lease may not be made unless a majority in number and acreage of the holders of title or evidence of title to the lands in the district or, if the lease substantially benefits a subdistrict, a majority in number and acreage of the holders of title or evidence of title to lands within the subdistrict, file with the board a written consent to make the lease. The lease may not interfere with any rights that have been established by law at the time the lease is made, nor may the lease operate to deprive any owner or owners of land in the district of the use of water from the works upon the lands. The board of commissioners shall require a sufficient bond to secure the faithful performance of the lease by the lessee.

(2) In addition to all other powers granted to any irrigation district existing under the laws of Montana for the purpose of securing financial aid in any form from the department of natural resources and conservation, an irrigation district may convey, assign, transfer, and set over to the department all or any part of its property, including all water rights, rights-of-way, and easements for reservoirs, reservoir sites, canals, ditches, laterals, and headgates, that may be required by the department as a condition to furnishing financial aid or assistance.

(3) If an irrigation district has ceased operation, the district prior to its dissolution may convey, assign, transfer, and set over to any person or association of persons all or any part of its property described in subsection (2), for the purpose of irrigating and reclaiming any or all other land that can be served and irrigated.

History: (1)En. Sec. 29, Ch. 146, L. 1909; re-en. Sec. 7199, R.C.M. 1921; re-en. Sec. 7199, R.C.M. 1935; Sec. 89-1604, R.C.M. 1947; (2)En. Sec. 1, Ch. 191, L. 1937; amd. 85-7-1911. Apportionment of water by board. (1) The board of commissioners shall apportion the water for irrigation among the lands in the district or a subdistrict in the district in a just and equitable manner, and the maximum amount apportioned to any land shall be the amount that can be beneficially used on the land. The amount of water is appurtenant to the land and inseparable from it but subject to reduction as provided in this chapter.

(2) In the event of a shortage of water, the amount of water delivered to each particular tract or piece of land shall be reduced proportionately.

(3) All surplus water belonging to the district may be sold or disposed of by the board for the benefit of the district or for the benefit of a subdistrict if the surplus water is derived from water that attaches to the substantial benefit of the subdistrict.

(4) All water, the right to the use of which is acquired by the district under any contract with the United States, shall be distributed and apportioned by the district in accordance with the acts of congress, the rules and regulations of the secretary of the interior, and the provisions of the contract.

Cross-References

Utilization of water, Title 85, ch. 2, part 4.

85-7-1912. Exchange of water by board. (1) Whenever any canal constructed, owned, or controlled by the district crosses any creek, stream, water channel, or watercourse, the water of which is used to irrigate land lying below the canal, the district may contract with the owner or owners of the right to the use of the water or waters in the stream, creek, water channel, or watercourse for an exchange of water and to supply the owner with water from the district system. The contract must be in writing, signed and acknowledged by all the parties before an officer authorized to take acknowledgments, and must be filed and recorded in the office of the clerk and recorder of the county in which the creek, stream, water channel, or watercourse is situated. The acknowledgment must be certified by the officer in the manner that deeds are required to be certified to entitle them to be recorded. After recording, the district may supply the land below the canal, whether the land is included in the district or not, with water from the works of the district, and the owner or lessee of the land must be furnished with the same quantity of water as that to which the owner or lessee would be entitled out of the creek, stream, water channel, or watercourse if the district works had not been built.

(2) The district may appropriate and take possession of the water replaced and has the same right to that water as the owner or lessee of the land had as long as the water is replaced by a like quantity of water from the works. The appropriating and taking of the water by the district may not deprive the owner or lessee of the right to retake and use the water if the owner or lessee at any time is prevented from having or using the same quantity of water from the works. The district also has the right to make appropriation and take possession of the water at any point and to sell, lease, or use the water on any land, either above or below the canal, and the appropriation of the water at any point or selling, leasing, or using the water may not prejudice the right of the district to the water and may not increase the rights of the owner or owners of any other water right on the creek, stream, water channel, or watercourse.

(3) All water, the right to the use of which is acquired by the district under any contract with the United States, must be distributed and apportioned by the district in accordance with the acts of congress, the rules and regulations of the secretary of the interior, and the provisions of the contract.

History: **En. Sec. 36, Ch. 146, L. 1909; amd. Sec. 9, Ch. 145, L. 1915; re-en. Sec. 7206, R.C.M. 1921; re-en. Sec. 7206, R.C.M. 1935; R.C.M. 1947, 89-1611; amd. Sec. 2792, Ch. 56, L. 2009.**

85-7-1913. Board to maintain records. (1) The board of commissioners shall keep a complete book and record of the accounts, records, contracts, securities, minutes of meetings, and other matters of every kind pertaining to or belonging to the irrigation district in the form prescribed by the department of administration. The department of administration shall prescribe forms for the use of irrigation districts. The books and records must be open to the inspection of any landowner of the district the same as other public records.

(2) The books and records of irrigation districts are subject to audit in accordance with 2-7-503.

(3) If a district is appointed fiscal agent of the United States or is authorized by the United States to make collections for or on behalf of the United States in connection with a federal irrigation project, the board of commissioners or its secretary shall at any time allow any officer or employee of the United States, when acting under the orders of the secretary of the interior, to have access to all books, records, and vouchers of the district that are in possession or control of the secretary or board.

(4) The failure of the board of commissioners to comply with 85-7-1914 or this section is grounds for removal from office, and the county attorney of any county in which the irrigation district is situated shall prosecute ouster proceedings against any commissioner or commissioners. The cost of the proceedings is a charge against the irrigation district and must be paid as are other bills against the districts.

85-7-1922. Regulation, supervision, apportionment, and control of water distribution. (1) In addition to all other powers granted them by the laws of Montana, boards of commissioners of all irrigation districts organized under any law of this state may regulate, supervise, apportion, and control the furnishing and delivery of water through the distribution system of the district. The authority to regulate, supervise, apportion, and control does not apply to users who have water rights or ditch rights, established, acquired by court decree, use, appropriation or otherwise, at the time or prior to the organization of the district, without regard to whether the distribution system or a portion of the system belongs to the district or to the owner of lands served by the district.

(2) Notwithstanding the provisions of 85-7-1921 and the powers granted to the board of commissioners under subsection (1) of this section, the irrigation district is not required to:

(a) construct, operate, or maintain internal delivery systems; or

(b) divide irrigation water after the water is delivered to the established project delivery points.

History: En. Sec. 2, Ch. 63, L. 1935; re-en. Sec. 7207.2, R.C.M. 1935; R.C.M. 1947, 89-1614; amd. Sec. 4, Ch. 136, L. 1993.

85-7-1934. Lands under irrigation — inclusion in district. (1) Any land already under irrigation from any source may be included in any irrigation district, either at the time of the organization of such district or at any time thereafter, and such land shall be entitled to receive and shall be given the same amount of water necessarily used thereon at the time of such inclusion. The canals, ditches, flumes, dams, or other works previously used to irrigate such land may be used or supplanted either wholly or in part by the district works. The owner of such land, canals, ditches, flumes, dams, or other works shall be entitled to compensation for any and all damage sustained by reason of the appropriation of the same or by the construction of said district works.

(2) Lands already under irrigation, lands having water rights appurtenant thereto, or lands which can be irrigated from sources more feasible than the district system shall not be included within such district unless the owner of such lands shall consent in writing to have such lands included in said district.

(3) Districts formed to cooperate with the United States may extend their boundaries to include such lands upon petition of the owners of two-thirds only of the acreage of the lands to be included, and the boundaries shall be susceptible of change as provided in 85-7-1808 through 85-7-1811 and 85-7-1841 through 85-7-1845.

(4) All lands having water rights appurtenant thereto which are served by a system of irrigation works supplying more than 10,000 acres of land may, in the discretion of the court, be included in the proposed district, on petition of at least a majority both in number and acreage of the holders of title or evidence of title to the land having water rights appurtenant thereto and served by the same system of irrigation works.

History: En. Sec. 35, Ch. 146, L. 1909; amd. Sec. 6, Ch. 153, L. 1917; amd. Sec. 4, Ch. 116, L. 1919; re-en. Sec. 7205, R.C.M. 1921; re-en. Sec. 7205, R.C.M. 1935; R.C.M. 1947, 89-1610.

85-7-1941. Contracts. (1) The construction by the district of irrigation works may be done by the district, by private owners, or by contract.

(2) Before any contract is let, the board of commissioners shall provide surveys, plans, maps, and estimates, which shall include everything necessary to show the entire cost in detail of everything necessary to complete the work required to irrigate any of the lands in the district under the proposed system.

(3) Notice of any contract to be awarded for the construction of such works shall state where the plans and specifications may be seen and shall be published at least once a week for

3 successive calendar weeks in a newspaper published or of general circulation in the county where the office of the district is located. Sealed bids shall be called for in such published notice, and bids shall be opened in public.

History: **En. Sec. 25, Ch. 146, L. 1909; amd. Sec. 4, Ch. 145, L. 1915; re-en. Sec. 7195, R.C.M. 1921; re-en. Sec. 7195, R.C.M. 1935; R.C.M. 1947, 89-1501(part); amd. Sec. 8, Ch. 112, L. 1981.**

85-7-1944 through 85-7-1950 reserved.

85-7-1951. United States contracts — loans, sinking fund, and investment. The board of commissioners of any irrigation district established and organized under and by virtue of the laws of Montana, whenever deemed advisable and to the interest of the district, shall have the power and authority to enter into any obligation or contract with the United States under any act of congress and the rules and regulations established thereunder, providing for or permitting such obligation or contract, for the purpose of obtaining from the United States a loan of money to be used by the district for the liquidation of bonded or other outstanding indebtedness of the district or for doing or causing to be done, under the supervision of the secretary of the interior of the United States, any construction, betterments, or repair work necessary to place the irrigation system of the district in good operating condition. The board shall also have the power and authority to create, by proper levy and collection of assessments, a sinking fund which shall be available for the construction of betterments to the irrigation system of the district, as may become necessary during the term of any contract made hereunder. Said sinking fund for said purpose, which shall be designated the ".... District Sinking Fund for Betterments", shall be in such an amount and shall be created within such time as may be agreed upon between the district and the United States. The board shall also have the power and authority to invest any surplus in the sinking fund herein provided for in legal investments backed, insured, or guaranteed by the United States or the state of Montana, including federal and state agency obligations.

History: **En. Sec. 1, Ch. 24, L. 1931; re-en. Sec. 7264.10, R.C.M. 1935; R.C.M. 1947, 89-2120; amd. Sec. 1, Ch. 166, L. 1987.**

85-7-1952. United States contracts — assessments. In any contract entered into between an irrigation district and the United States hereunder, the board of commissioners shall have the power to levy assessments for the United States contract fund against all of the land within the district for any and all of the purposes enumerated in the laws of Montana and, in addition thereto, the power to levy assessments in compliance with such contract, including such deficiency assessments as will enable the district to meet established or estimated delinquencies in making payments to the United States because of the failure of landowners to pay the assessments levied against their lands in the district.

History: **En. Sec. 2, Ch. 24, L. 1931; re-en. Sec. 7264.11, R.C.M. 1935; R.C.M. 1947, 89-2121.**

85-7-1953. Amount owed United States — lien and special tax. All amounts to be paid to the United States under any contract made pursuant to this part between the district and the United States are a general obligation of the district, and the amounts to be paid to the United States are a lien upon the irrigation system of the district. All lands within the district or added to the district must be subject to a special tax or assessment authorized under 85-7-2104 for the payment of all amounts to be paid to the United States under the contract between the district and the United States. The special tax or assessment constitutes a first and prior lien on the land against which the tax or assessment is levied to the same extent and with like force and effect as taxes levied for state and county purposes.

History: **En. Sec. 3, Ch. 24, L. 1931; re-en. Sec. 7264.12, R.C.M. 1935; amd. Sec. 1, Ch. 83, L. 1955; R.C.M. 1947, 89-2122; amd. Sec. 154, Ch. 584, L. 1999; amd. Sec. 9, Ch. 93, L. 2007.**

85-7-1954. Assumption of operations by United States upon default. In addition to other legal remedies, the board of commissioners of the district shall have the power and authority to provide in any contract executed between the United States and the district hereunder that in case of default for more than 12 months in the payment of any installments due under such contract, the control, operation, and maintenance of the district may, in the discretion of the secretary of the interior, be assumed by the United States and the delivery of water withheld until payments are duly made in accordance with the contract requirements.

History: **En. Sec. 4, Ch. 24, L. 1931; re-en. Sec. 7264.13, R.C.M. 1935; R.C.M. 1947, 89-2123.**

85-7-1955. Liquidation of indebtedness with federal funds. When money is provided by the United States for liquidating bonded indebtedness of any irrigation district, the county treasurer is authorized and empowered to cancel the district bonds so liquidated and surrender them to the United States, taking therefor a receipt signed by the secretary of the interior, which receipt shall be placed in the records of the county treasurer and shall be conclusive evidence of the cancellation and surrender of the district bonds.

History: **En. Sec. 5, Ch. 24, L. 1931; re-en. Sec. 7264.14, R.C.M. 1935; R.C.M. 1947, 89-2124.**

85-7-1956. Majority vote or petition necessary to contract with United States. No contract shall be made with the United States hereunder except upon approval of a majority of those voting on the question at an election conducted pursuant to 85-7-1710, provided that the voting majority must own at least 50% of the acreage included within the district, or upon a petition signed by at least 60% in number and acreage of the holders of title or evidence of title to the lands included within the district. Such petition shall be addressed to the board of commissioners, shall set forth the aggregate amount of money to be borrowed from the United States and the purpose or purposes thereof, shall have attached thereto an affidavit certifying the signatures to said petition, and shall be filed with the secretary of the board of commissioners. Such petition may consist of one or more parts or papers.

History: **En. Sec. 6, Ch. 24, L. 1931; re-en. Sec. 7264.15, R.C.M. 1935; R.C.M. 1947, 89-2125; amd. Sec. 1, Ch. 463, L. 1983.**

85-7-1957. United States contracts — court approval required. (1) The board of commissioners of any irrigation district, before the making of any contract with the United States hereunder, shall commence a special proceeding in the district court of the state, by which the proceedings of the board and of the district leading up to the making of any such contract and the validity of the terms thereof shall be judicially examined and approved and affirmed or disapproved and disaffirmed.

(2) The practice and procedure for the confirmation of any step or action, as provided in subsection (1) shall be as nearly as possible in conformity with the practice and procedure now provided for the confirmation before the issuance and sale of bonds of an irrigation district. The court may approve and affirm such proceedings in part and disapprove and declare illegal or

invalid other and subsequent parts of the proceedings, and insofar as possible, the court shall remedy and cure all defects in said proceedings.

History: (1)En. Sec. 7, Ch. 24, L. 1931; re-en. Sec. 7264.16, R.C.M. 1935; amd. Sec. 39, Ch. 460, L. 1977; Sec. 89-2126, R.C.M. 1947; (2)En. Sec. 8, Ch. 24, L. 1931; re-en. Sec. 7264.17, R.C.M. 1935; Sec. 89-2127, R.C.M. 1947; R.C.M. 1947, 89-2126, 89-2127.

85-7-1958. Power to contract with United States cumulative. Sections 85-7-1951 through 85-7-1958 shall not limit the power and authority of an irrigation district or the commissioners thereof to contract with the United States under other applicable statutes but shall be cumulative thereto.

History: En. Sec. 9, Ch. 24, L. 1931; re-en. Sec. 7264.18, R.C.M. 1935; R.C.M. 1947, 89-2128.

85-7-1959 and 85-7-1960 reserved.

85-7-1961. Districts organized prior to certain date — authority to continue electrical power operations. (1) An irrigation district or project that was organized prior to March 30, 1981, under Title 85, chapter 7, is authorized to continue all electrical power operations it conducted prior to March 30, 1981.

(2) Electrical power operations authorized by subsection (1) of this section include generation, distribution, and sale of electrical power and the reasonable and necessary means to carry out such operations.

(3) In addition to the authority otherwise provided in this section and Title 85, chapter 7, irrigation districts or projects organized under Title 85, chapter 7, or described in 85-7-110, may construct, install, operate, and maintain facilities to generate, transmit, and sell, as well as any associated facilities necessary to that end, electricity using the water power potential of irrigation projects or works or federally owned water impoundment projects where electric power generation facilities have not heretofore been installed and licensed under the Federal Power Act.

History: En. Sec. 1, Ch. 179, L. 1981; amd. Sec. 1, Ch. 553, L. 1983.

Cross-References

Small power production facilities, Title 69, ch. 3, part 6.

85-7-1962 through 85-7-1970 reserved.

85-7-1971. Contracts with the state of Montana — loans, sinking fund, and investments. (1) The board of commissioners of any irrigation district, whenever considered advisable and in the interest of the district, may enter into any obligation or contract with the state of Montana for the purpose of obtaining a loan of money from various sources, including the coal severance tax bonding program provided for in Title 17, chapter 5, part 7, to be used by the district for:

(a) the liquidation of any bonded or outstanding indebtedness of the district; or

(b) the provision of any construction, improvement, or repair work necessary to place the irrigation system of the district in good operating condition.

(2) The board shall create, by proper levy and collection of assessments, a sinking fund that must be available for the construction of betterments to the irrigation system of the district as may be necessary during the term of any contract made with the state as provided for in subsection (1). The sinking fund must be designated the "... District Sinking Fund for Betterments" and must be created in such an amount and within such time as may be agreed upon between the district and the state of Montana.

(3) The board shall invest any surplus in the sinking fund in legal investments backed, insured, or guaranteed by the United States or the state of Montana, including federal and state agency obligations.

History: En. Sec. 1, Ch. 301, L. 1987.

Cross-References

Public contracts generally, Title 18, ch. 1.

85-7-1972. State contracts — assessments. In any contract entered into between an irrigation district and the state of Montana under 85-7-1971 through 85-7-1975, the board of commissioners shall, in compliance with such contract, levy assessments against the lands benefited by the contract within the district, including such deficiency assessments as will enable the district to meet established or anticipated delinquencies in making payments to the state of Montana because of the failure of landowners to pay the assessments levied against their lands in the district.

History: En. Sec. 2, Ch. 301, L. 1987.

85-7-1973. Amount owed state — lien and special tax. All amounts owed to the state under any contract made under 85-7-1971 through 85-7-1975 between the district and the state of Montana establish a general obligation of the district for payment, and any amounts to be paid to the state of Montana constitute a lien upon the irrigation system of the district. All lands now within the district or added to the district are subject to a special tax or assessment under 85-7-2104 for the payment of all amounts owed to the state under the contract between the district and the state of Montana. The special tax or assessment constitutes a first and prior lien on the land against which it is levied to the same extent and with the same force and effect as taxes levied for state and county purposes.

History: En. Sec. 3, Ch. 301, L. 1987; amd. Sec. 155, Ch. 584, L. 1999; amd. Sec. 10, Ch. 93, L. 2007.

Cross-References

State tax liens, Title 15, ch. 16, part 4.

85-7-1974. Majority vote or petition necessary to contract with the state. (1) No contract may be made between an irrigation district and the state of Montana under 85-7-1971 through 85-7-1975 except on:

(a) approval by a majority vote of those voting on the question at an election conducted in accordance with Title 13, chapter 1, part 5, and 85-7-1710; or

(b) receipt of a petition signed by at least 60% in number and acreage of the holders of title or evidence of title to lands within the district. The petition must be addressed to the board of commissioners and must set forth the aggregate amount of money to be borrowed from various sources, including the coal severance tax bonding program provided for in Title 17, chapter 5, part 7, and the purpose for which the money will be used. The petition must include an affidavit certifying the signatures to the petition and must be filed with the secretary of the board of commissioners.

(2) In an election held for approval of a district contract under this section, the voting majority must own at least 50% of the acreage included in the district.

History: En. Sec. 4, Ch. 301, L. 1987; amd. Sec. 249, Ch. 49, L. 2015.

85-7-1975. State contracts — court approval required. (1) The board of commissioners of an irrigation district, before the making of a contract with the state of Montana under 85-7-1971 through 85-7-1975, shall commence a special proceeding in the district court. In such proceeding, the proceedings of the board and of the district leading up to the making of the contract and the validity of the terms thereof must be judicially examined and approved or disapproved.

(2) The practice and procedure for the confirmation of any step or action provided for in subsection (1) must be as nearly as possible in conformity with the practice and procedure established for the confirmation before the issuance and sale of bonds of an irrigation district. The district court may approve such proceedings in part and declare illegal or invalid other parts of the proceedings. However, insofar as possible, the court shall remedy and cure all defects in the proceedings.

History: En. Sec. 5, Ch. 301, L. 1987.

Part 20
Indebtedness, Bonds, and Bankruptcy

Part Cross-References

Payment of funds — liability of officers, 20-9-444, 20-9-445.

85-7-2001. Limitations on debt-incurring power. (1) The board of commissioners or other officers of the district may not incur any debt or liability, either by issuing bonds or otherwise, except as provided in this chapter.

(2) An irrigation district may not become indebted, in any manner or for any purpose in any one year, in an amount exceeding 18.75% of the assessed valuation of the district, except as provided in subsection (4).

(3) An irrigation district may not incur indebtedness, in any manner or for any purpose in any one year, on behalf of any subdistrict in the district in an amount exceeding 18.75% of the assessed valuation of the subdistrict, except as provided in subsection (4).

(4) (a) For the purpose of organization; for any of the immediate purposes of this chapter; to make or purchase surveys, plans, and specifications; for stream gauging and gathering data; or to make any repairs occasioned by any calamity or other unforeseen contingency, the board of commissioners may, in any one year, incur the indebtedness of as many dollars as there are acres in the district and may issue warrants of the district.

(b) For the purpose of organization, for any of the immediate purposes of this chapter, or to meet the expenses occasioned by any calamity or other unforeseen contingency, the board of commissioners may, in any one year, incur (in addition to the 18.75% limitations of subsections (2) and (3)) an additional indebtedness not exceeding 12.5% of the assessed valuation of the district and may issue warrants of the district therefor.

(c) The limitations of subsections (1) through (3) do not apply to warrants issued for unpaid interest on the valid bonds of any irrigation district.

(d) The limitations of subsections (1) through (3) do not apply to bonds or obligations issued to the state of Montana, the United States, or any department, agency, or instrumentality of these governments if the bonds or obligations are issued:

(i) pursuant to a loan program specifically authorized by the legislature; or

(ii) to finance in whole or in part a project authorized by the legislature.

(e) The limitations of subsections (1) through (3) do not apply to any bonds issued under this chapter pursuant to a provision that expressly supersedes the limitation.

(5) Any debt or liability incurred in excess of the limitations provided by the irrigation district laws is void.

History: **En. Sec. 38, Ch. 146, L. 1909; amd. Sec. 1, Ch. 110, L. 1913; amd. Sec. 1, Ch. 127, L. 1913; re-en. Sec. 7208, R.C.M. 1921; re-en. Sec. 7208, R.C.M. 1935; amd. Cross-References

Sections 85-7-2001, 85-7-2011 through 85-7-2027, 85-7-2031, and 85-7-2032 not applicable to irrigation districts formed under Title 85, ch. 7, part 3, 85-7-304.

Failure to levy or collect tax assessment, 85-7-2137.

85-7-2002 through 85-7-2010 reserved.

85-7-2011. Exemption of irrigation district property. The bonds issued under the provisions of this part, rights-of-way, ditches, flumes, pipelines, dams, water rights, reservoirs, equipment, machinery, motor vehicles, and all other personal property belonging to any irrigation district organized under the laws of Montana and not operating for profit may not be taxed for state, county, or municipal purposes and may not be assessed costs for any improvement or maintenance district created under Title 7, chapter 12.

History: **En. Sec. 39, Ch. 146, L. 1909; re-en. Sec. 7209, R.C.M. 1921; re-en. Sec. 7209, R.C.M. 1935; amd. Sec. 2, Ch. 492, L. 1977; R.C.M. 1947, 89-1702; amd. Sec. 2, Ch. 276, L. 1987.**

Cross-References

Property tax exemptions, Art. VIII, sec. 5, Mont. Const.

85-7-2012. Purposes for which bonds may be issued. The board of commissioners of a district established under the provisions of Title 85, chapter 7, part 1, may authorize and issue negotiable fully registered bonds or negotiable coupon bonds of the district for the purpose of providing the necessary funds for:

(1) constructing the necessary irrigation canals and works, including drainage works, and constructing works for the generation and distribution of electricity within the district and for acquiring the property and rights necessary therefor;

(2) acquiring, by purchase or otherwise, waters, water rights, canals, reservoirs, reservoir sites, irrigation works, drainage works, and works for the generation and distribution of electricity, whether the works are constructed or partially constructed;

(3) meeting the expenses incurred incident to the construction or acquisition of the works and property, including administrative, engineering, and legal expenses;

(4) assuming, as principal or guarantor, indebtedness to the United States on account of district lands;

(5) providing a sufficient amount of money to pay the interest on all bonds of the district for a period not exceeding 5 years;

(6) redeeming or paying all or any portion of the existing indebtedness of the district, evidenced by outstanding bonds; delinquent interest coupons, overdue claims for interest, and accrued interest; or warrants, together with all delinquent and accrued interest, whether the indebtedness has or may become payable at the option of the district, by consent of the bondholders, or by any other lawful means;

(7) establishing a reserve for the payment of principal and interest on bonds of the district in an amount determined by the board to be reasonably required to market the bonds; or

(8) otherwise carrying out the provisions of the irrigation district laws.

History: En. Sec. 40, Ch. 146, L. 1909; amd. Sec. 11, Ch. 145, L. 1915; amd. Sec. 7, Ch. 153, L. 1917; amd. Sec. 5, Ch. 116, L. 1919; re-en. Sec. 7210, R.C.M. 1921; amd. Sec. 7, Ch. 157, L. 1923; amd. Sec. 1, Ch. 185, L. 1929; re-en. Sec. 7210, R.C.M. 1935; amd. Sec. 26, Ch. 460, L. 1977; R.C.M. 1947, 89-1703(1); amd. Sec. 15, Ch. 439, L. 1989.

Cross-References

Amending or supplementing United States contracts — effect on indebtedness — petition not necessary, 85-7-2031, 85-7-2032.

Apportionment of costs when bonds issued, 85-7-2114.

85-7-2013. Majority vote, petition, and protest requirements. (1) Bonds provided for in 85-7-2012 through 85-7-2015 may not be authorized or issued by or on behalf of any irrigation district organized under this chapter or by an irrigation district on behalf of a subdistrict located in the district and a contract may not be made with the United States as provided in 85-7-1906 except on:

(a) approval by a majority vote of those voting on the question at an election conducted in accordance with Title 13, chapter 1, part 5, with votes cast and counted as prescribed in 85-7-1710;

(b) receipt of a petition signed by a majority in acreage of the holders of title or evidence of title to lands included within the district or, if the bonds are issued on behalf of or if the contract relates to a subdistrict, a majority in acreage of the holders of title or evidence of title to lands within the subdistrict;

(c) receipt of a petition signed by at least 75%, in number and acreage, of the holders of title or evidence of title to the lands who are residents of the county or counties in which lands of the district are situated or, if the bonds are issued on behalf of or if the contract relates to a subdistrict, at least 75% in number and acreage of the holders of title or evidence of title to the lands who are residents of the county or counties in which lands of the subdistrict are situated; or

(d) adoption of a resolution by the board of commissioners approving special taxes or assessments to repay bonds pursuant to 85-7-2048 following a determination that a protest as provided in 85-7-2045 by owners of assessed irrigable acres as determined by 85-7-2043 comprises no more than 50% of the special tax or assessment proposed to pay the costs of the suggested improvements.

(2) The petition must be addressed to the board of commissioners, set forth the aggregate amount of bonds to be issued and the purpose or purposes of the bonds, have attached to it an affidavit verifying the signatures to the petition, and be filed with the secretary of the board. When bonds are issued for the sole purpose of redeeming or paying the existing and outstanding bonds or warrants, or both, including delinquent and accrued interest, of the district, the bonds may be authorized and issued in the manner provided for by 85-7-2019.

(3) In an election held for approval to allow a district or subdistrict to issue bonds or enter into a contract under this section, the voting majority must own at least 50% of the acreage included in the district or subdistrict.

85-7-2014. Procedure after election, petition, or resolution filed. Upon an election, the filing of the petition pursuant to 85-7-2013, or the adoption of a resolution approving the levy of a special tax or assessment under 85-7-2048, the board of commissioners shall, by appropriate order or resolution:

(1) authorize and direct the issuance of the bonds of the district to the amount and for the purpose or purposes specified in the election, petition, or resolution adopted pursuant to 85-7-2048;

(2) fix the numbers, denominations, and maturity or maturities of the bonds;

(3) specify the rate of interest on the bonds and whether it is payable annually or semiannually;

(4) designate the place and method of payment of the bonds and the interest on the bonds, within or outside the state of Montana;

(5) prescribe the form of the bonds; and

(6) provide for the levy of a special tax or assessment as provided in this chapter on all the lands in the district or for a levy on a subdistrict if the bonds are issued on behalf of the subdistrict, for the irrigation and benefit of which the district or subdistrict was organized and the bonds are issued or the contract is to be made, sufficient in an amount to pay the interest on and principal of the bonds when due and all amounts to be paid to the United States under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906.

85-7-2019. Refunding bonds. (1) Any irrigation district may issue refunding bonds.

(2) An irrigation district may issue refunding bonds for the purpose of redeeming or paying the indebtedness or any portion of the indebtedness of the district, whether represented by existing and outstanding bonds, interest coupons, or warrants, including accrued and unpaid interest on the bonds, coupons, and warrants, and whether the indebtedness is due or not due or has or may become payable at the option of the district, by consent of the bondholders or warrant holders, or by any other legal means and whether the indebtedness is now existing or may be created. The refunding bonds may be issued in one or more series. If the average annual interest rate of the refunding bonds is more than the average annual interest rate on the bonds being refunded or the term of the bonds being refunded is extended by the refunding bonds, a petition must be filed with the board of commissioners before proceeding with the

refunding. The petition for the refunding bonds must be signed as required by law by a majority in acreage of the holders of title or evidence of title to the lands included within the district, or by a majority in acreage of the holders of title or evidence of title to the lands within a subdistrict if the bonds to be refunded were issued by the district on behalf of the subdistrict, and addressed to the board of directors or commissioners of the district. The petition may contain the following specifications, in addition to the matters otherwise required by law:

(a) how many series of bonds shall be issued; and

(b) the terms, conditions, and liens of the bonds and the terms and conditions upon which each of the series of bonds shall be exchanged for outstanding bonds of the district if the bonds are to be exchanged and not sold.

(3) The specifications provided for in subsection (2), when set forth in the petition, are controlling upon the board of directors or commissioners. The petitioners shall in the specifications set forth the contract of exchange to be made, with particularity. The contract may include any term, requirement, grant, transfer of property or rights, covenant, or condition considered by the petitioners to be in the best interest of the district or of the subdistrict if the bonds that are the subject of the contract were issued by the district on behalf of the subdistrict. The petition shall state that the board of directors or commissioners of the district may authorize and direct the issuance of bonds according to the specifications of the petition, make any such contract, and bind the irrigation district under the contract.

History: (1)En. Sec. 1, Ch. 155, L. 1929; re-en. Sec. 7226.1, R.C.M. 1935; amd. Sec. 19, Ch. 315, L. 1974; Sec. 89-1712, R.C.M. 1947; (2), (3)En. Sec. 2, Ch. 155, L. 1929; re-en. Sec. 7226.2, R.C.M. 1935; amd. Sec. 29, Ch. 460, L. 1977; Sec. 89-1713, R.C.M. 1947; R.C.M. 1947, 89-1712, 89-1713; amd. Sec. 18, Ch. 439, L. 1989; amd. Sec. 13, Ch. 495, L. 2021.

85-7-2020. Details relating to bonds. (1) All bonds issued under the provisions of this part shall run for a period not longer than 40 years from their date but may contain a clause providing for their prior redemption and payment, at the option of the board of commissioners of the district, on any interest payment date after 5 years from their date. Instead of straight maturity bonds, bonds may be issued to mature serially at such times and in such amounts as the board of commissioners shall determine, but no bonds so issued may run for a longer period than 40 years from the date of issue. The bonds shall bear interest from their date until paid, payable annually or semiannually with the installments of interest to date of maturity of principal to be evidenced by appropriate coupons attached to each bond. The bonds and interest coupons shall be payable at such place or places within or without the state of Montana as the board of commissioners shall prescribe.

(2) The bonds shall be of such denomination or denominations and in such form as the board of commissioners shall prescribe. An issue of bonds is defined to be all the bonds issued in accordance with a resolution or order of the board of commissioners. Each issue of the bonds of a district shall be numbered consecutively as authorized, and the bonds of each issue shall be numbered consecutively. The board of commissioners shall fix the date of the bonds, or they may divide any issue into two or more divisions and fix different dates for the bonds of each division. The date of any bond must be subsequent to the order or resolution authorizing it and prior to its delivery to a purchaser from the district.

(3) All bonds issued hereunder shall be signed by the president and attested by the secretary of the board under the corporate seal of the district, and each of the interest coupons to be attached to the bonds shall be executed by the signatures of the president and secretary. Each bond shall be signed and each interest coupon shall be executed by the president and secretary of the board of commissioners who may be in office at the date of the bond and coupons or at any time thereafter prior to the delivery of the bond to the purchaser from the district.

(4) The board of commissioners may provide for the registration of bonds in their discretion. The secretary of the board of commissioners and county treasurer shall each keep a record of the bonds sold or otherwise disposed of; their date, number, amount, maturity, or maturities; to whom sold; rate of interest; and the place or places of payment.

History: En. Sec. 42, Ch. 146, L. 1909; amd. Sec. 1, Ch. 17, Ex. L. 1919; re-en. Sec. 7212, R.C.M. 1921; amd. Sec. 8, Ch. 157, L. 1923; re-en. Sec. 7212, R.C.M. 1935; amd. Sec. 12, Ch. 260, L. 1959; amd. Sec. 33, Ch. 234, L. 1971; amd. Sec. 28, Ch. 460, L. 1977; R.C.M. 1947, 89-1705.

85-7-2021. Liens of bonds. (1) All bonds issued under this chapter and all amounts to be paid to the United States under any contract between the district and the United States, accompanying which bonds of the district have not been deposited with the United States as provided in 85-7-1906, shall be a lien upon all the lands originally or at any time included in the district, or upon lands in a subdistrict if the bonds are issued on behalf of the subdistrict, for the irrigation and benefit of which the irrigation district or subdistrict was organized and the bonds were issued and for the benefit of which such contract between the district and the United States was made, except upon any lands as may at any time be included in the district or subdistrict on account of the exchange or substitution of water under the provisions of 85-7-1912; and all such lands are subject to a special tax or assessment for the payment of the interest on and principal of the bonds. All amounts to be paid to the United States under any contract between the district and the United States and the special tax or assessment constitute a first and prior lien on the land against which levied to the same extent and with like force and effect as taxes levied for state and county purposes.

(2) All liens created under this section remain upon the lands until the obligations of the district for the bonds are discharged, as provided by law or by the resolution of the board of commissioners authorizing their issuance.

History: En. Sec. 43, Ch. 146, L. 1909; amd. Sec. 12, Ch. 145, L. 1915; amd. Sec. 8, Ch. 153, L. 1917; amd. Sec. 8, Ch. 116, L. 1919; re-en. Sec. 7213, R.C.M. 1921; re-en. Sec. 7213, R.C.M. 1935; amd. Sec. 1, Ch. 190, L. 1973; R.C.M. 1947, 89-1706; amd. Sec. 19, Ch. 439, L. 1989.

Cross-References

Added lands to pay proportional share of bonded indebtedness, 85-7-2102.

85-7-2022. Sale of bonds. Bonds issued under the provisions of this part must be issued, negotiated, and sold by or under the direction of the board of commissioners but may not be sold for less than 97% of par value and accrued interest to the date of delivery. The board may sell the bonds from time to time in quantities necessary and most advantageous to raise money for the purposes for which the bonds were issued.

History: En. Sec. 44, Ch. 146, L. 1909; amd. Sec. 13, Ch. 145, L. 1915; re-en. Sec. 7214, R.C.M. 1921; amd. Sec. 9, Ch. 157, L. 1923; re-en. Sec. 7214, R.C.M. 1935; R.C.M. 1947, 89-1707(1); amd. Sec. 27, Ch. 253, L. 2011.

85-7-2023. Notice of sale of bonds. Except as provided in 85-7-2033 regarding a private sale, before making any sale, the board shall, by resolution at a meeting, declare its intention to sell a specified amount of the bonds and the day, hour, and place of the sale. The board shall enter the resolution into the minutes and provide notice of the sale by publication at least once a week for 3 successive calendar weeks in a newspaper in the county where the office of the board of commissioners is located, and the notice may be published in any other newspaper at the board's discretion. The notice must state that sealed proposals will be received by the board at its office for the purchase of bonds until the day and hour named in the resolution. At the time appointed, the board shall open the proposals and award the purchase of the bonds or any portion or portions of the bonds to the highest responsible bidder or bidders. The board may reject any or all bids. If an award is not made, the board may either readvertise the bonds or any part of the bonds for sale or sell the bonds or any part of the bonds at private sale. Coupons evidencing unearned interest must be detached and canceled.

History: En. Sec. 44, Ch. 146, L. 1909; amd. Sec. 13, Ch. 145, L. 1915; re-en. Sec. 7214, R.C.M. 1921; amd. Sec. 9, Ch. 157, L. 1923; re-en. Sec. 7214, R.C.M. 1935; R.C.M. 1947, 89-1707(2); amd. Sec. 20, Ch. 439, L. 1989; amd. Sec. 28, Ch. 253, L. 2011.

85-7-2024. Issuance of bonds for direct contract payments. Any bonds issued hereunder may, in the discretion of the board of commissioners, be issued direct in payment and satisfaction of the contract or purchase price of any irrigation works, canals, water, water rights, or other property constructed or acquired by or for the district or may be deposited with the United States as provided in 85-7-1906.

History: En. Sec. 44, Ch. 146, L. 1909; amd. Sec. 13, Ch. 145, L. 1915; re-en. Sec. 7214, R.C.M. 1921; amd. Sec. 9, Ch. 157, L. 1923; re-en. Sec. 7214, R.C.M. 1935; R.C.M. 1947, 89-1707(3).

85-7-2025. Cancellation of unused bonds. Any bonds which may have been authorized but which have not been sold or deposited as security for funds advanced or to be advanced and against which the state, United States, or any other person, firm, or corporation shall have no claim to or equity in may be canceled by the board of commissioners by appropriate resolution or order. After the cancellation of said bonds, the same shall not be sold or otherwise disposed of and shall be invalid and of no effect, and the board shall have no authority to replace such canceled bonds without an authorization from the members of the district similar to that which provided for their issuance.

History: En. Sec. 44, Ch. 146, L. 1909; amd. Sec. 13, Ch. 145, L. 1915; re-en. Sec. 7214, R.C.M. 1921; amd. Sec. 9, Ch. 157, L. 1923; re-en. Sec. 7214, R.C.M. 1935; R.C.M. 1947, 89-1707(4).

Cross-References

Cancellation of tax levy under certain conditions, 85-7-2105.

85-7-2026. Delivery of bonds. If bonds are sold for cash, they shall be delivered by the board of commissioners to the county treasurer of the county in which the office of the district is located. The county treasurer, after making a complete record of them, shall deliver them to the purchaser upon receipt of the purchase price. Delivery of the bonds may be made by the county treasurer to the purchaser at any place or places inside or outside this state, and the county treasurer may receive the proceeds of the sale of the bonds at the place or places of delivery.

History: En. Sec. 45, Ch. 146, L. 1909; re-en. Sec. 7215, R.C.M. 1921; amd. Sec. 10, Ch. 157, L. 1923; re-en. Sec. 7215, R.C.M. 1935; amd. Sec. 1, Ch. 258, L. 1967; amd. Sec. 145, Ch. 431, L. 1975; R.C.M. 1947, 89-1708(part).

85-7-2027. Disposition of bond proceeds. The county treasurer shall place the proceeds of the sale to the credit of the district, and the proceeds may be paid out by the county treasurer only upon the written order of the board of commissioners, signed by the president and secretary under the seal of the district. The proceeds may be spent only for the purpose for which the bonds were issued. If any portion of the funds realized from the sale of bonds is not needed immediately for the purpose for which the bonds were issued, the board of commissioners may direct the investment of the funds and any other surplus funds of the district or any portion of the funds in legal investments backed, insured, or guaranteed by the United States or the state of Montana, including federal and state agency obligations. The county treasurer shall transfer to the credit of the district and place to the credit of the fund or funds, as the board of commissioners may direct, all interest received upon investments of the district entrusted to the treasurer's care.

History: En. Sec. 45, Ch. 146, L. 1909; re-en. Sec. 7215, R.C.M. 1921; amd. Sec. 10, Ch. 157, L. 1923; re-en. Sec. 7215, R.C.M. 1935; amd. Sec. 1, Ch. 258, L. 1967; amd. Sec. 145, Ch. 431, L. 1975; R.C.M. 1947, 89-1708(part); amd. Sec. 7, Ch. 274, L. 1981; amd. Sec. 1, Ch. 287, L. 1983; amd. Sec. 2, Ch. 166, L. 1987; amd. Sec. 2795, Ch. 56, L. 2009.

85-7-2028 through 85-7-2030 reserved.

85-7-2031. Amending or supplementing United States contracts — effect on indebtedness. The board of commissioners of any irrigation district established and organized under and by virtue of the laws of Montana, whenever deemed advisable and to the interests of the district, shall have the power and authority to enter into any contract with the United States supplementing or amending any original contract with the United States, said original contract having been entered into pursuant to the provisions of 85-7-1906 and 85-7-2012 through 85-7-2015; provided, that such supplementary or amendatory contract does not increase the amount of the principal indebtedness of the district to the United States as it exists at the date of the supplementary or amendatory contract authorized under the provisions of 85-7-2012 through 85-7-2015.

History: En. Sec. 1, Ch. 71, L. 1933; re-en. Sec. 7215.1, R.C.M. 1935; R.C.M. 1947, 89-1709; amd. Sec. 14, Ch. 495, L. 2021.

85-7-2032. Amending or supplementing United States contracts — petition, election, or resolution not necessary. If a supplementary or amendatory contract is made with the United States under this part, an election, petition, or resolution required under 85-7-2012 through 85-7-2015 is not necessary. It is sufficient in the case of a contract made with the United States under this part for the board of commissioners of any irrigation district to authorize the execution of the contract by its president and secretary by appropriate resolution adopted at any regular or special meeting of the board of commissioners.

History: En. Sec. 2, Ch. 71, L. 1933; re-en. Sec. 7215.2, R.C.M. 1935; R.C.M. 1947, 89-1710; amd. Sec. 4, Ch. 164, L. 2011; amd. Sec. 15, Ch. 495, L. 2021.

85-7-2033. Private sale of bonds. The district may sell bonds issued under this part at private sale by negotiation and without public advertisement or solicitation of bids pursuant to 17-5-107.

History: En. Sec. 7, Ch. 439, L. 1989; amd. Sec. 29, Ch. 253, L. 2011.

85-7-2034 through 85-7-2040 reserved.

85-7-2041. Bankruptcy proceedings by irrigation districts. (1) The board of commissioners or directors of any irrigation district may, in the name and on behalf of such district, initiate and carry out proceedings for readjustment of the debts of such district, under Chapter IX of the federal Bankruptcy Act or similar provisions of any past or future federal bankruptcy act.

(2) This section is remedial in its nature and shall be liberally construed to effect its purpose, which is to permit irrigation districts to readjust their debts under federal bankruptcy acts and to confer upon the board of commissioners or directors thereof every power necessary therefor or reasonably incidental thereto.

History: En. Secs. 1, 2, Ch. 110, L. 1939; R.C.M. 1947, 89-1903(part), 89-1904.

Cross-References

Exempt property — bankruptcy proceeding, 31-2-106.

85-7-2042. Levy of special taxes or assessments by resolution. (1) In lieu of authorizing bonds by petition or election, the board of commissioners may undertake proceedings pursuant to this part that may result in a resolution pursuant to 85-7-2048 authorizing a levy of special taxes or assessments to repay and secure the repayment of bonds issued to pay the costs of improvements described in 85-7-2012. The costs of improvements may include the costs of bond issuance and a debt service reserve securing the repayment of bonds.

(2) A board of commissioners, if authorized by this part, shall levy and assess on all irrigable acres in the district or subdistrict benefited by the improvements an equal dollar amount for each irrigable acre to repay the bonds.

History: En. Sec. 1, Ch. 495, L. 2021.

85-7-2043. Resolution of intent to levy special taxes or assessments — determination of irrigable acres. (1) If the board of commissioners determines to undertake special tax or assessment proceedings to authorize the issuance of bonds, the board shall first determine the total number of irrigable acres in the district or subdistrict pursuant to 85-7-2107 and apportionment of the costs subject to 85-7-2114.

(2) If the condition in subsection (1) is met, the board of commissioners shall pass a resolution of intention to levy special taxes or assessments.

(3) The resolution of intention must:

(a) describe the number of irrigable acres in the district or subdistrict and the number of irrigable acres that would be subject to the special taxes or assessments and, if a subdistrict, include a map and description of the boundaries of the subdistrict;

(b) state the general character of the improvements that are desired to be made;

(c) designate the name of the engineer, if any, who is in charge of the work and the estimated costs of the improvements and of the estimated maximum principal amount of the bonds;

(d) specify that the costs of the improvements will be assessed against irrigable acres in the district or subdistrict benefited by the improvements on the basis of equal amount for each irrigable acre; and

(e) provide an estimate of the dollar amount proposed to be assessed against each irrigable acre based on the estimated maximum principal amount of the bonds.

(4) The board of commissioners may include in one proceeding under one resolution of intention the different kinds of improvement or work provided for in this part.

(5) In all resolutions, notices, orders, and determinations subsequent to the resolution of intention and notice of improvements, it is sufficient for the board to briefly describe the work or the assessments, or both, and to refer to the resolution of intention for further information.

History: En. Sec. 2, Ch. 495, L. 2021.

85-7-2044. Notice of resolution of intention for levy of special taxes or assessments — hearing — exception. (1) On passage of a resolution of intention to levy special taxes or assessments pursuant to 85-7-2043, the board of commissioners shall publish a notice of that action as provided in 7-1-2121.

(2) A copy of the notice must be mailed, as provided in 7-1-2122, to each person, firm, or corporation or the agent of the person, firm, or corporation owning real property within the district or subdistrict listed in the owner's name on the last-completed assessment roll for state, county, and school district taxes.

(3) (a) The notice must:

(i) describe the general character of the improvements proposed to be made or acquired by purchase;

(ii) state the estimated cost of the improvements and the estimated maximum principal amount of the bonds;

(iii) describe that the debt service on the bonds will be repaid by a tax or assessment levied on the basis of equal amount for each irrigable acre;

(iv) state the dollar amount to be levied against each irrigable acre based on the estimated maximum principal amount of the bonds;

(v) state that the deadline for the receipt of protests against the proposed issuance of the bonds or levy of special taxes or assessment, or both, is 5 p.m. on the date of the end of the protest period pursuant to 85-7-2045; and

(vi) designate the time when and the place where the board will hear and act on all protests that may be made against the proposed issuance of the bonds or levy of the special taxes or assessments, or both.

(b) The notice must refer to the resolution on file in the office of the commission secretary for the description of the particulars. If the proposal is for the purchase of an existing improvement, the notice must state the expected cost of the proposed improvement.

(4) If no officer of the county is specifically assigned to publish or post a resolution, order, notice, or determination subject to this section, the commission secretary shall post or procure the publication or posting.

(5) An error or mistake by the person posting or procuring the publication or posting of a resolution, notice, order, or determination does not invalidate or affect the notice and protest proceedings if the error or mistake is corrected in a timely manner.

History: **En. Sec. 3, Ch. 495, L. 2021.**

85-7-2045. Right to protest levy of special taxes or assessments. (1) Except as provided in subsection (2), within 30 days after the first publication date of a notice of a resolution of intention, a property owner liable to be assessed for the costs of improvements proposed in the resolution of intention pursuant to 85-7-2043 may make a written protest against the proposed issuance of the bonds or proposed levy of special taxes or assessments, or both. The protest must be in writing, identify the property owned by the protestor, and be signed by all owners of the property. The protest must be delivered to the commission secretary, who shall endorse the date of the receipt of the protest document.

(2) If the 30-day period described in subsection (1) concludes on a holiday pursuant to 1-1-216 or a Saturday or a Sunday, the period of protest is extended to the day immediately following the holiday, Saturday, or Sunday.

(3) For the purposes of this section, "owner" means, as of the date a protest is filed, the record owner of fee simple title to the irrigable acres to be assessed. The term does not include a tenant or other holder of a leasehold interest in the irrigable acres.

History: **En. Sec. 4, Ch. 495, L. 2021.**

85-7-2046. Hearing on protest. (1) At the next regular meeting of a board of commissioners after the 30-day protest period described in 85-7-2045, the board shall hear and rule on all protests made. Decisions of the board are final and conclusive. The board may recess this hearing from time to time.

(2) In determining whether or not sufficient protests have been made to prevent further proceedings pursuant to 85-7-2047, irrigable acres owned by the irrigation district or other state or local government bodies must be considered the same as other irrigable acres in the irrigation district or subdistrict.

History: **En. Sec. 5, Ch. 495, L. 2021.**

85-7-2047. Sufficient protest to bar issuance of bonds and to postpone further special tax or assessment proceedings. The board of commissioners may not authorize or hold further special tax or assessment proceedings to seek the authorization of the issuance of bonds for a period of 60 days from the date of the conclusion of the protest period if the board of commissioners finds that the protest is made by the owners of irrigable acres to be assessed for more than 50% of the costs of improvements to be financed with the bonds.

History: En. Sec. 6, Ch. 495, L. 2021.

85-7-2048. Resolution authorizing special taxes or assessments. (1) If the board of commissioners finds that a protest is made by the owners of irrigable acres to be assessed for not more than 50% of the costs of improvements to be financed with the bonds, the board of commissioners following the public hearing described in 85-7-2046 may adopt a resolution approving the levy of a special tax or assessment to repay the bonds in accordance with the resolution of intention that was introduced and passed by the board.

(2) The board may issue bonds to pay or reimburse the costs of the improvements when:

(a) sufficient protests have not been delivered to the secretary within the protest period pursuant to 85-7-2045;

(b) protests have been found by the board to be insufficient or have been overruled;

(c) conditions for proceeding with the improvements have been or will be satisfied to the satisfaction of the board of commissioners; and

(d) the requirements of 85-7-2014 and 85-7-2015 are satisfied.

History: En. Sec. 7, Ch. 495, L. 2021.

85-7-2049. Adjournment of hearings on resolutions for special taxes or assessments. If a board of commissioners hearing on proceedings on a special tax or assessment for the repayment of bonds is not held at the scheduled place and time, is adjourned, or is rescheduled, the board has not lost its power or jurisdiction to levy special taxes or assessments to repay the bonds. The board may fix a time and a place for a new or additional hearing. The board shall provide notice of the hearing by publication in a daily, semiweekly, or weekly newspaper at least 5 days before the date of the new hearing.

History: En. Sec. 8, Ch. 495, L. 2021.

85-7-2050. Collection of special taxes or assessments by county treasurer — delinquencies. (1) When a resolution approving special taxes or assessments for the repayment of bonds has been certified by the board secretary and delivered to the county clerk and recorder and the irrigation district has issued or will issue the bonds pursuant to 85-7-2014 and 85-7-2015, the county treasurer in the county in which the lot, tract, or parcel is located shall collect the special taxes or assessments in the same manner and at the same time as taxes for general state, county, and municipal purposes are collected.

(2) A board may declare an unpaid installment of special taxes or assessments as delinquent on the adoption of an appropriate resolution. The special taxes or assessments constitute a first and prior lien on the land against which it is levied as taxes levied for state, county, and municipal purposes. The lien may be extinguished only by the payment of the special taxes or assessments, with all penalties, costs, and interest, as provided in 85-7-2021 and Title 85, chapter 7, part 20.

(3) The lien of special taxes or assessments to repay the bonds must remain on the land for a period of 8 years after the date of the final maturity of the bonds. On the delinquency of one or all installments, the whole property must be sold as other property is sold for taxes. The enforcement of the lien does not prevent the enforcement of the lien of any subsequent installment when it becomes delinquent.

History: En. Sec. 9, Ch. 495, L. 2021.

Part 21
Taxes and Assessments

85-7-2101. Tax or assessment to pay bonds and interest. (1) All bonds and the interest thereon issued under this chapter and all payments due or to become due to the United States under any contract between the district and the United States for which the bonds of the district have not been deposited with the United States as provided in 85-7-1906 must be paid by revenue derived from a special tax or assessment levied upon all the lands included in the district, or upon all lands in a subdistrict of the district if the bonds are issued by the district on behalf of the subdistrict, except upon those lands that have been included in the district or subdistrict on account of the exchange or substitution of water under the provisions of 85-7-1912. All lands in the district, or in a subdistrict if the bonds are issued on behalf of the subdistrict, at the time the bonds are issued and all lands subsequently included which are chargeable under the provisions of this chapter remain liable to be taxed and assessed for the payment of the bonds and interest and all payments due or to become due to the United States under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906.

(2) The board of commissioners of the district, in the order or resolution authorizing and directing the issuance of bonds of the district mentioned in 85-7-2014, shall provide for the annual levy and collection of a special tax or assessment upon all the lands included in the district, or in a subdistrict if the bonds are to be issued on behalf of the subdistrict, and subject to taxation and assessment, sufficient in amount to meet the interest on the bonds promptly when and as the interest accrues and to discharge the principal of the bonds at their maturity or respective maturities and to meet all payments due or to become due to the United States under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906, at the times the payments by the contract become due and payable.

History: En. Sec. 46, Ch. 146, L. 1909; amd. Sec. 14, Ch. 145, L. 1915; re-en. Sec. 7232, R.C.M. 1921; re-en. Sec. 7232, R.C.M. 1935; amd. Sec. 34, Ch. 234, L. 1971; amd. Sec. 30, Ch. 460, L. 1977; R.C.M. 1947, 89-1801(part); amd. Sec. 21, Ch. 439, L. 1989.

85-7-2102. Added lands to pay proportional share of bonded indebtedness. (1) Where a district or subdistrict is extended after the construction of works of irrigation, including drainage works, to include other irrigable lands, the included lands are chargeable with the proportion of the bonded indebtedness incurred or authorized to be incurred by any district or subdistrict and the proportion of the indebtedness incurred under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906, as the district court shall order, as provided in 85-7-1808 through 85-7-1811 and 85-7-1841 through 85-7-1845. The board of commissioners of the district shall provide for the levy of a special tax or assessment against the included lands on account of the bonds and the interest on the bonds and on account of any payments under any contracts between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906.

(2) The special tax or assessment shall be levied and collected as and in the manner as the special tax assessment against the lands of the original district or subdistrict on account of the payments under any contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906, and on account of which the bonds and the interest on the bonds is provided for, levied, and collected. Upon the extending of any district or subdistrict, the total of the bond indebtedness or indebtedness due to the United States shall be reapportioned, spread, and equalized upon and over the entire area, as provided in 85-7-2021.

History: En. Sec. 47, Ch. 146, L. 1909; amd. Sec. 15, Ch. 145, L. 1915; amd. Sec. 9, Ch. 153, L. 1917; amd. Sec. 7, Ch. 116, L. 1919; re-en. Sec. 7233, R.C.M. 1921; re-en. Sec. 7233, R.C.M. 1935; R.C.M. 1947, 89-1802; amd. Sec. 22, Ch. 439, L. 1989.

85-7-2103. All irrigable lands chargeable alike. (1) (a) All irrigable lands in each irrigation district and all lands in each subdistrict of the district, except those lands that are included within the district because of the exchange or substitution of water under the provisions of 85-7-1912, must pay at the same rate for all purposes for which the lands are charged, except as otherwise provided by law. There may be an administrative charge of $5 to $75 against each separately owned tract of land regardless of its size, as provided in 85-7-2104. The administrative charge is in addition to the annual tax levied under 85-7-2104.

(b) The administrative charge allowed pursuant to subsection (1)(a) may exceed $75, but if the charge exceeds $75, the charge must be determined based on the actual costs for administration of the district or subdistrict and the actual costs of distribution of water.

(2) Whenever water used for the irrigation of any lands within an irrigation district or subdistrict is obtained by pumping to different elevations, the cost of maintenance, operation, and pumping to each separate elevation must be apportioned and levied upon the lands lying under the ditch or ditches running from that particular elevation, in a manner determined fair and equitable by the board of commissioners after considering the facts in each case. This apportionment must be made by the board of commissioners and included each year in the assessment provided for by 85-7-2104. The amount of the assessment for maintenance, operation, and pumping of water to each separate elevation, whenever there are different elevations, must be determined by the board in a manner and upon notice to the persons interested in the district or subdistrict as the board in its rules may provide.

(3) Whenever a contract has been made with the United States, the lands within the district or of a subdistrict if the contract substantially benefits the subdistrict, whether originally included or later annexed to the district or subdistrict, must pay in accordance with the federal reclamation laws and the public notices, orders, and regulations issued under the reclamation laws and in compliance with any contracts made by the United States with the owners of the lands and in compliance with the contract between the districts and the United States.

(4) Whenever a contract has been made with the state of Montana, the lands within the district or of a subdistrict if the contract substantially benefits the subdistrict, whether originally included or later annexed to the district or subdistrict, must pay in accordance with state laws and public notices and rules issued under the laws and in compliance with any contract made by the state with the owners of the lands and in compliance with the contract between the district and the state.

(5) Whenever the works necessary for the completed project are constructed progressively over a period of years and whenever a portion of the lands within the district are or can be irrigated 1 year or more before the completion of the entire project, those lands irrigated or that can be irrigated through the built portion of the project must pay for the cost of operating that portion of the project serving them with irrigation water and must also pay the portion of the interest charges as its irrigable area bears to the irrigable area of the entire project.

(6) Whenever lands have appurtenant to the land a partial water right or partial rights in a system of irrigation other than that of the district or subdistrict, the amounts payable must be equitably apportioned.

(7) Whenever the owners of a portion of the lands within an irrigation district choose to install a gravity system to irrigate those lands, the cost of constructing the gravity system must be apportioned among and levied upon the lands irrigated by the gravity system in a manner determined to be equitable by the board. The levy must be included each year in the assessment charged under 85-7-2104.

History: En. Sec. 48, Ch. 146, L. 1909; amd. Sec. 10, Ch. 153, L. 1917; amd. Sec. 1, Ch. 158, L. 1921; re-en. Sec. 7234, R.C.M. 1921; amd. Sec. 18, Ch. 157, L. 1923; amd. Sec. 1, Ch. 136, L. 1925; re-en. Sec. 7234, R.C.M. 1935; amd. Sec. 1, Ch. 135, L. 1961; amd. Sec. 31, Ch. 460, L. 1977; R.C.M. 1947, 89-1803; amd. Sec. 1, Ch. 586, L. 1979; amd. Sec. 1, Ch. 330, L. 1983; amd. Sec. 23, Ch. 439, L. 1989; amd. Sec. 1, Ch. 257, L. 1993; amd. Sec. 1, Ch. 392, L. 2001.

85-7-2104. Annual tax levy — apportionment when tracts divided. (1) (a) On or before the first Monday in August each year, the board of commissioners of each irrigation district organized under parts 1 and 15 shall ascertain:

(i) the total amount required to be raised in that year for the general administrative expenses of the district, including the cost of maintenance and repairs; and

(ii) the total amount to be raised that year for interest on and principal of the outstanding bonded or other indebtedness of the district for which bonds of the district have not been deposited with the United States as provided in 85-7-1906.

(b) The board shall levy against each 40-acre tract or fractional lot, as designated by United States government survey, or platted lot if land is subdivided in lots and blocks (or where land is owned in less than 40-acre tracts or in less than the platted lot, against each tract) in the district, that portion of the respective total amounts to be raised that the total irrigable area of any tract or lot bears to the total irrigable area of the lands in the district, so that each acre of irrigable land in the district is assessed and required to pay the same amount as every other acre of irrigable land in the district, unless otherwise specifically provided by the board. The board may also charge the administrative charge authorized in 85-7-2103(1).

(c) Indebtedness under subsection (1) includes debt incurred under any contract between the district and the United States but excludes any indebtedness incurred by the district on behalf of a subdistrict.

(2) (a) On or before the first Monday in August each year, the board of commissioners of each irrigation district organized under parts 1 and 15 for which a subdistrict has been created pursuant to 85-7-404 shall determine the total amount to be raised that year for interest and principal payments on the outstanding bonded or other indebtedness of the district incurred on behalf of the subdistrict.

(b) The board shall levy against each 40-acre tract or fractional lot, as designated by United States government survey, or platted lot if land is subdivided in lots and blocks (or where land is owned in less than 40-acre tracts or in less than the platted lot, against each tract) in the subdistrict, the portion of the total amount to be raised apportioned according to the ratio of the total irrigable area of the tract or lot to the total irrigable area of the lands in the subdistrict, so that each acre of irrigable land in the subdistrict is assessed and required to pay the same amount as every other acre of irrigable land in the subdistrict, unless otherwise specifically provided by the board. The board may also charge the administrative charge authorized in 85-7-2103(1).

(3) If the ownership of any 40-acre tract or other subdivision of land in the district or subdistrict is divided after a special tax or assessment against the land has been levied, each of the owners of a tract or subdivision is entitled to have the special tax or assessment equitably apportioned to and against the divisions of the tract or subdivision, so that each owner is enabled to pay a special tax or assessment against the owner's portion of the tract or subdivision and have the land discharged from the lien. The charge against any separately owned tract of land may not be less than $5.

(4) The board of commissioners of an irrigation district or the board of county commissioners on behalf of a district may not levy property taxes as provided in Title 15, chapter 6, for district administration, operations, debt service, or any other district purpose.

History: En. Sec. 49, Ch. 146, L. 1909; amd. Sec. 16, Ch. 145, L. 1915; amd. Sec. 1, Ch. 148, L. 1921; re-en. Sec. 7235, R.C.M. 1921; amd. Sec. 19, Ch. 157, L. 1923; re-en. Sec. 7235, R.C.M. 1935; amd. Sec. 2, Ch. 135, L. 1961; amd. Sec. 1, Ch. 51, L. 1973; R.C.M. 1947, 89-1804(1), (2); amd. Sec. 2, Ch. 586, L. 1979; amd. Sec. 2, Ch. 330, L. 1983; amd. Sec. 24, Ch. 439, L. 1989; amd. Sec. 2, Ch. 257, L. 1993; amd. Sec. 156, Ch. 584, L. 1999; amd. Sec. 6, Ch. 34, L. 2003; amd. Sec. 11, Ch. 93, L. 2007.

Cross-References

United States contracts — cancellation of assessment on amended contracts, 85-7-2118.

85-7-2105. Cancellation of tax levy under certain conditions. Whenever the board of commissioners has provided for the payment of any indebtedness of the district by levy of a special tax or assessment and thereafter makes provision for the payment of said indebtedness by the issuance of bonds, said board may cancel any portion or all of said levy theretofore made to raise funds to pay said indebtedness. Whenever said board has provided for the payment of any indebtedness of the district by the authorization of bonds and the levy of a special tax or assessment to pay the principal of and interest on said bonds and thereafter cancels said issue of bonds as provided for in 85-7-2025, said board may cancel any portion or all of said levy theretofore made to raise funds to pay the principal of or interest on said bonds so canceled and refund to the respective persons paying the same the funds, if any, in the custody of the county treasurer collected for the purpose of meeting the principal of and interest on such bonds so canceled.

History: En. Sec. 49, Ch. 146, L. 1909; amd. Sec. 16, Ch. 145, L. 1915; amd. Sec. 1, Ch. 148, L. 1921; re-en. Sec. 7235, R.C.M. 1921; amd. Sec. 19, Ch. 157, L. 1923; re-en. Sec. 7235, R.C.M. 1935; amd. Sec. 2, Ch. 135, L. 1961; amd. Sec. 1, Ch. 51, L. 1973; R.C.M. 1947, 89-1804(3).

85-7-2106. Back assessments. Any land or lands which may for any reason have escaped assessment in any previous year or years may be assessed or listed for the omitted years and omitted charges in any subsequent year at the time of the making of the assessment in and for such subsequent year, but no such assessment shall be made later than 3 years after the occurrence of such omission.

History: En. Sec. 49, Ch. 146, L. 1909; amd. Sec. 16, Ch. 145, L. 1915; amd. Sec. 1, Ch. 148, L. 1921; re-en. Sec. 7235, R.C.M. 1921; amd. Sec. 19, Ch. 157, L. 1923; re-en. Sec. 7235, R.C.M. 1935; amd. Sec. 2, Ch. 135, L. 1961; amd. Sec. 1, Ch. 51, L. 1973; R.C.M. 1947, 89-1804(4).

Cross-References

United States contracts — cancellation of assessment on amended contracts, 85-7-2118.

85-7-2107. Procedure for the determination of irrigable area. (1) For the purpose of determining the number of acres of irrigable lands in each 40-acre tract or fractional lot as designated by United States government survey or platted lot, if land is subdivided in lots and blocks (or whenever land is owned in less than 40-acre tracts or in less than the platted lot, in each tract) of land in the district or subdistrict, the board of commissioners of any irrigation district established under part 1, whenever considered advisable and at any time except as otherwise provided, may cause a careful topographical survey and map of the lands to be made, as well as a specific examination of the character of the soil of each tract. Upon completion of the survey and maps and examination, the board shall give notice that at a meeting of the board, to be held at the office of the board on a day to be fixed in the notice, the board will determine the irrigable area of each tract of land in the district or subdistrict and that it will hear and consider any objection on the part of any landowner in the district, or in a subdistrict if only the irrigable area of the subdistrict is being determined, to the determination and to adjustment of the irrigable area of the district or subdistrict or of any lands within any tract or subdivision of the district or subdistrict. It is not necessary to describe the tracts in the notice. The notice must be given by publication once a week for 2 successive calendar weeks in a newspaper of general circulation in the county where the office of the board is located, and whenever lands of any irrigation district or subdistrict lie in more than one county, the notice must also be published in a newspaper or newspapers of general circulation in each county. The last publication of the notice must be at least 5 days prior to the date fixed for the meeting.

(2) At the meeting, the board shall determine and fix the number of acres in each tract or subdivision irrigable from the works or proposed works of the district or subdistrict and shall hear all persons interested who may appear and shall continue in session from day to day (exclusive of Sundays and legal holidays) as long as may be necessary and until the determination of irrigable area is completed. The board shall hear and receive all evidence offered, including maps and surveys caused to be prepared by it as well as maps and surveys prepared by any owner of lands. Upon determination, the irrigable area fixed is the acreage upon which any special tax or assessment must be levied, and each irrigable acre shall pay at the same rate as every other acre of irrigable land in the district or subdistrict, except as otherwise provided by law.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.1, R.C.M. 1935; amd. Sec. 22, Ch. 388, L. 1975; amd. Sec. 32, Ch. 460, L. 1977; R.C.M. 1947, 89-1805(part); amd. Sec. 25, Ch. 439, L. 1989.

Cross-References

Legal holidays and business days, 1-1-216.

85-7-2108. Taxes to be lien upon land. Any special tax or assessment levied for any purpose is a lien upon the entire 40-acre tract or fractional lot as designated by United States government survey or platted lot, if land is subdivided in lots and blocks (or whenever land is owned in less than 40-acre tracts or in less than the platted lot, against each such tract) of land in the district or subdistrict of which the irrigable area forms a part, and the lien shall attach to the entire tract as of January 1 in the year in which the special tax or assessment is levied.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.1, R.C.M. 1935; amd. Sec. 22, Ch. 388, L. 1975; amd. Sec. 32, Ch. 460, L. 1977; R.C.M. 1947, 89-1805(part); amd. Sec. 26, Ch. 439, L. 1989.

Cross-References

State tax liens, Title 15, ch. 16, part 4.

Liens, Title 71, ch. 3.

85-7-2109. List of all lands in district or subdistrict to be prepared. Upon completing the determination, the board shall fix, by appropriate resolution or order, the total acreage and the irrigable acreage of each tract or subdivision and shall prepare a list of all lands in the district or subdistrict. The list must contain an accurate description of each 40-acre tract or fractional lot as designated by United States government survey or platted lot, if land is subdivided in lots and blocks (or whenever land is owned in less than 40-acre tracts or in less than the platted lot, then of each such tract) of land in the district or subdistrict, the total acreage and the number of irrigable acres as fixed and determined, and the name of the owner or holder of title or evidence of title, ascertained as provided in 85-7-101 and 85-7-102. This list, when completed and adopted, must be filed in the office of the board and shall remain there for public inspection. A certified copy of the resolution and list must be filed with the county clerk and recorder of each county in which any portion of the lands in the district is situated. The lands not situated in the county in which the copy is filed must be omitted from the copy.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.1, R.C.M. 1935; amd. Sec. 22, Ch. 388, L. 1975; amd. Sec. 32, Ch. 460, L. 1977; R.C.M. 1947, 89-1805(3); amd. Sec. 27, Ch. 439, L. 1989.

85-7-2110. Nonirrigable lands not to be taxed. A special tax or assessment may not be levied against any 40-acre tract or fractional lot as designated by United States public survey or platted lot, if land is subdivided in lots and blocks (or whenever lands are owned in less than 40-acre tracts or in less than the platted lot, against each such tract) found by the board of commissioners to contain no irrigable land. A lien created after the order of determination may not attach to any nonirrigable tract, nor may the owner or owners of any nonirrigable tract or tracts have any vote or votes in any proceeding or election under the provisions of Chapter 146 of the Laws of 1909 or any amendment thereof or act supplementary thereto, after the making of the order, unless their land or a portion of their land is found by the board to contain an area irrigable from the works or proposed works of the district or subdistrict.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.1, R.C.M. 1935; amd. Sec. 22, Ch. 388, L. 1975; amd. Sec. 32, Ch. 460, L. 1977; R.C.M. 1947, 89-1805(4); amd. Sec. 28, Ch. 439, L. 1989.

85-7-2111. Refunds and cancellation of excess taxes. Upon the determination provided for in 85-7-2107 through 85-7-2113, the board of commissioners may refund any taxes paid or cancel any unpaid taxes or assessments levied upon an acreage in excess of that so fixed by the order of determination and whenever necessary may issue warrants therefor.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.1, R.C.M. 1935; amd. Sec. 22, Ch. 388, L. 1975; amd. Sec. 32, Ch. 460, L. 1977; R.C.M. 1947, 89-1805(5).

85-7-2112. Confirmation of board actions by district court. (1) Within 60 days after the resolution adopting the list, the board of commissioners may petition the district court for confirmation of its acts in determining the irrigable area and in refunding or canceling any taxes or assessments. The majority in number and acreage of the holders of title or evidence of title to lands in the district or the majority in number and acreage of the holders of title or evidence of title in the subdistrict if only the irrigable area of the subdistrict is to be reviewed, determined as provided in 85-7-101 and 85-7-102, may likewise within the 60-day period petition the district court for review of the actions of the board. However, one of these proceedings, if prosecuted to determination, is exclusive of the other. The court may order any assessment of taxes upon any land or lands to be reduced or raised according to the irrigable area as found by the court or taxes previously levied upon any area shown to be excessive to be refunded or canceled.

(2) The provisions of 85-7-1808 through 85-7-1810 regarding the procedure as well as the right and time to appeal apply to any proceeding instituted pursuant to this section, provided nothing in this section affects or impairs the lien of any bonds issued by the district. If confirmation proceedings are held and a certified copy of the order of confirmation is filed with the county clerk and recorder of the county in which any portion of the lands is situated, it is not necessary to file in the office the certified copy of the resolution and order of the board or of the list provided for in this section.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.1, R.C.M. 1935; amd. Sec. 22, Ch. 388, L. 1975; amd. Sec. 32, Ch. 460, L. 1977; R.C.M. 1947, 89-1805(6), (7); amd. Sec. 29, Ch. 439, L. 1989.

85-7-2113. Effect of federal involvement. Whenever districts have been established in order to cooperate with the United States under the federal reclamation laws or under any act of congress which permits the performance by the United States of work in this state, for the purposes of construction of irrigation works, including drainage works, or for purchase, extension, operation, or maintenance of construction works or for the assumption as principal or guarantor of indebtedness to the United States on account of district lands, the determination of the irrigable area of the lands in the district may be made by the board of commissioners in the manner provided in 85-7-2107 through 85-7-2112 or by the United States at the option of the latter, and, if the United States determines the irrigable area, the proceeding for the apportionment and distribution of the costs of the proposed works or improvements provided for in 85-7-2114 through 85-7-2116 may not be had.

History: **En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.1, R.C.M. 1935; amd. Sec. 22, Ch. 388, L. 1975; amd. Sec. 32, Ch. 460, L. 1977; R.C.M. 1947, 89-1805(8).**

85-7-2114. Apportionment of costs when bonds issued. (1) Whenever a petition for the issuance of bonds of any irrigation district established under the provisions of Title 85, chapter 7, part 1, has been filed as provided in 85-7-2012 through 85-7-2015, the board of commissioners of the district shall examine or cause to be examined each 40-acre tract or fractional lot as designated by United States public survey or platted lot, if land is subdivided in lots and blocks, or whenever land is owned in less than 40-acre tracts or in less than the platted lot, each tract of land in the district or of land in a subdistrict if the bonds are to be issued on behalf of the subdistrict and cause a careful topographical survey and map to be made in the manner provided for in 85-7-2107. Upon the examination, the board shall determine the number of irrigable acres in each tract and shall apportion and distribute the cost of the works or improvements for which the bonds are to be issued over the tracts within the district or subdistrict according to the irrigable area in each of the tracts or subdivisions so that each irrigable acre is required to bear the same burden of the costs as each other irrigable acre in the district or subdistrict, except as otherwise provided by law. The special tax or assessment levied to meet the principal of and interest on the bonds is a lien upon the entire tract of which the irrigable area forms a part or portion as of January 1 of the year in which the special tax or assessment is levied, and the number of irrigable acres in each tract so determined may not be diminished but may be increased during the term for which the bonds are issued or until the bonds are liquidated in full.

(2) Whenever a proceeding for the determination, in whole or in part, of the irrigable area of the lands in the district or subdistrict has already been had or a topographical survey or maps of the lands prepared or a court confirmation of prior proceedings, in part or in full, the board may, in its discretion, adopt all or portions of the prior proceedings and need not cause an additional survey or maps or examination of any of the tracts to be made or redetermine the irrigable area of any tract.

(3) The board shall make the determination after the hearing and shall fix the total acreage and the irrigable acreage and prepare a list of the irrigable area for filing, and the proceedings of the board in connection with the determination, including the hearing and notice of the hearing and order or resolution fixing the irrigable area and the preparation and filing of the list, must conform to the requirements set forth in 85-7-2107 through 85-7-2113. At the hearing, the board shall also determine the amount and rate per acre necessary to be levied against each irrigable acre in the district to meet the interest on and principal of the authorized bond issue. The tax levied is a lien upon the entire tract of which the irrigable area forms a part. If a landowner in the district or subdistrict appears before the board at that time and pays in cash the amount fixed against the landowner's land as its proportion of the amount found necessary for the purposes for which the bonds were authorized and are to be issued, that land must be excluded from the lien of the bond issue and the amount of bonds intended to be issued must be reduced by the amount of the payment. A person interested who fails to appear before the board at the meeting may not contest the proceedings of the board or any part of the proceedings except upon special application to the court in the proceedings for the confirmation of the bonds and a showing of reasonable excuse for failure to appear before the board.

History: **En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.2, R.C.M. 1935; amd. Sec. 23, Ch. 388, L. 1975; amd. Sec. 33, Ch. 460, L. 1977; R.C.M. 1947, 89-1806(1) thru (3); amd. Sec. 30, Ch. 439, L. 1989; amd. Sec. 2796, Ch. 56, L. 2009.**

85-7-2115. Objection by landowner. If a landowner objects to the proceedings of the board in determining the irrigable area in the landowner's own or any other tract of land or the amount or rate per acre of the special tax and assessment to be levied against each irrigable acre in the district or subdistrict for the purposes of the proposed bond issue and the objection is overruled by the board, the objection without further proceedings must be regarded as appealed to the district court. When confirmed, the order overruling the objection and confirming the order of the board determining the irrigable area of each tract of land and apportioning the cost of the improvement to each tract becomes final, binding, and conclusive upon the landowner and upon the district unless appealed.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.2, R.C.M. 1935; amd. Sec. 23, Ch. 388, L. 1975; amd. Sec. 33, Ch. 460, L. 1977; R.C.M. 1947, 89-1806(4); amd. Sec. 31, Ch. 439, L. 1989; amd. Sec. 2797, Ch. 56, L. 2009; amd. Sec. 16, Ch. 495, L. 2021.

85-7-2116. Restrictions on reduction of taxable acreage. Whenever the irrigable area of the lands in an irrigation district or subdistrict has been determined and confirmed, the owner or holder of title or evidence of title to lands in the district or subdistrict, during the period when any bonds are issued and outstanding, may not have the taxable acreage of the owner's or titleholder's lands fixed or adjudicated in the manner provided by 85-7-1841 through 85-7-1845 in a manner or to an extent as to reduce the acreage subject to the payment of the bonds or interest or in a manner as to affect the security of the bonds or interest on the bonds.

History: En. Sec. 20, Ch. 157, L. 1923; re-en. Sec. 7235.2, R.C.M. 1935; amd. Sec. 23, Ch. 388, L. 1975; amd. Sec. 33, Ch. 460, L. 1977; R.C.M. 1947, 89-1806(5); amd. Sec. 32, Ch. 439, L. 1989; amd. Sec. 2798, Ch. 56, L. 2009.

85-7-2117. Conclusiveness of tax or assessment. In determining the proper and just tax or assessment to be levied against any land for district purposes, the finding of the board of commissioners of the district, in the absence of fraud or mistake, are conclusive and final, except as otherwise provided in this part.

History: En. Sec. 50, Ch. 146, L. 1909; re-en. Sec. 7237, R.C.M. 1921; re-en. Sec. 7237, R.C.M. 1935; R.C.M. 1947, 89-1809; amd. Sec. 157, Ch. 584, L. 1999; amd. Sec. 12, Ch. 93, L. 2007.

85-7-2118. United States contracts — cancellation of assessment on amended contracts. In any case where the board of commissioners of any irrigation district has made a levy or assessment under the provisions of 85-7-2104 through 85-7-2106 and included therein any amount due the United States under any contract or agreement for the purchase of any irrigation works or for the operation and maintenance of any irrigation works, while acting as fiscal agent for the United States, or under any authorization of the district by the United States to make collections of moneys for or on behalf of the United States in connection with any federal reclamation project, as provided in 85-7-1906, and the United States shall thereafter modify or supplement such contract or agreement so as to eliminate certain charges under said contract or agreement or so as to make such charges due at a later date or dates than originally provided in said contract or agreement, said board of commissioners are empowered to direct the cancellation of said levy or assessment theretofore made to raise funds to pay the United States that are under such modification or supplemental contract or agreement made due and payable at a later date or dates.

History: En. Sec. 1, Ch. 103, L. 1923; re-en. Sec. 7235.3, R.C.M. 1935; R.C.M. 1947, 89-1807.

85-7-2119. United States contracts — assessments where district partly outside state. Where a contract has been entered into or may be hereafter entered into between an irrigation district and the United States, the board of commissioners shall have the power to levy assessments against all of the land within the district for any and all of the purposes hereinbefore enumerated and, in addition thereto, the power to levy assessments against any or all of the lands in said district in compliance with such contract. Where irrigation works lie partly in the state of Montana and partly in an adjacent state, the board of commissioners may contract with the district or districts in the adjacent state for the mutual construction of works, operation and maintenance of works, drainage, and other matters and things pertaining to said works and shall have the power to levy assessments against any or all lands within the district necessary to carry out the provisions of such contract.

History: En. Sec. 1, Ch. 4, Ex. L. 1921; re-en. Sec. 7236, R.C.M. 1921; amd. Sec. 2, Ch. 103, L. 1923; re-en. Sec. 7236, R.C.M. 1935; R.C.M. 1947, 89-1808.

85-7-2120 through 85-7-2124 reserved.

85-7-2125. Terminated. Sec. 5, Ch. 347, L. 2003.

History: En. Sec. 1, Ch. 347, L. 2003.

85-7-2126 through 85-7-2130 reserved.

85-7-2131. Funds for payment of each series of bonds to be kept distinct. When more than one series of bonds shall have been issued by a district, the funds for the payment of each series shall be kept separate and distinct. When contract is made between the district and the United States, accompanying which bonds of the district have not been deposited with the United States, as provided in 85-7-1906, the funds for the payment to be made under any such contract shall be kept separate and distinct.

History: En. Sec. 52, Ch. 146, L. 1909; amd. Sec. 17, Ch. 145, L. 1915; re-en. Sec. 7238, R.C.M. 1921; re-en. Sec. 7238, R.C.M. 1935; R.C.M. 1947, 89-1810.

85-7-2132. Sinking fund for straight maturity bonds. When straight maturity bonds are issued, the board of commissioners of the district shall create and maintain a sinking fund sufficient to pay and discharge the bonds at maturity. If the bonds are issued for 20 years or less, there shall be annually levied for the sinking fund a special tax or assessment sufficient to produce a net amount represented by the quotient found by dividing the aggregate amount of the principal of the bonds by the number of years the bonds have to run; but if the bonds are issued for more than 20 years, it is not necessary to levy a special tax or assessment for sinking fund until the 20th year prior to the maturity of the bonds, at which time and each year thereafter there shall be levied and collected a special tax or assessment sufficient to produce a net sum equal to one-twentieth part of the aggregate amount of the principal of the bonds.

History: En. Sec. 46, Ch. 146, L. 1909; amd. Sec. 14, Ch. 145, L. 1915; re-en. Sec. 7232, R.C.M. 1921; re-en. Sec. 7232, R.C.M. 1935; amd. Sec. 34, Ch. 234, L. 1971; amd. Sec. 30, Ch. 460, L. 1977; R.C.M. 1947, 89-1801(part).

Cross-References

Relations with United States, 85-7-1906.

85-7-2133. Role of county officers in collection of tax or assessment. (1) A certified copy of the resolution authorizing the issuance of bonds under this chapter must be filed with the clerk of the board of county commissioners of each county in which the lands of the irrigation district lie, and the special tax or assessment provided for in the resolution must be levied and collected as prescribed and when collected must, by the county treasurer having custody of the funds of the district, be placed in a special fund and used solely for the payment of all bonds issued under the provisions of this chapter and interest on the bonds as long as any of the bonds or interest coupons remain outstanding and unpaid. Whenever the payments are made for amounts due or to become due to the United States under a contract between the district and the United States for which bonds of the district have not been deposited with the United States as provided in 85-7-1906, the special fund must be known as the United States contract fund.

(2) The county treasurer of the county where the office of an irrigation district is located is the custodian of all funds belonging to the district, and the treasurer shall pay out the funds upon the order of the board of commissioners, except payments on bonds and interest for which an order is not necessary. If any portion of the funds belonging to a district has been collected for the purpose of establishing a reserve fund, the county treasurer shall pay that portion to the district on order of the district's board of commissioners who may invest the funds in legal investments backed, insured, or guaranteed by the United States or the state of Montana, including federal and state agency obligations. If money of a district in the United States contract fund established pursuant to subsection (1) is in excess of the amount needed to pay a district's next annual contract obligation or obligations to the United States, the excess or any part of the excess may, upon order of the district's board of commissioners and with the consent of the United States officer administering the contract for which the contract fund has been established, be paid to the district for use in meeting other obligations of the district. The orders of the board of commissioners must be signed by the president and secretary of the board and must bear the official seal of the district.

History: (1)En. Sec. 46, Ch. 146, L. 1909; amd. Sec. 14, Ch. 145, L. 1915; re-en. Sec. 7232, R.C.M. 1921; re-en. Sec. 7232, R.C.M. 1935; amd. Sec. 34, Ch. 234, L. 1971; amd. Sec. 30, Ch. 460, L. 1977; Sec. 89-1801, R.C.M. 1947; (2)En. Sec. 53, Ch. 146, L. 1909; amd. Sec. 18, Ch. 145, L. 1915; re-en. Sec. 7239, R.C.M. 1921; re-en. Sec. 7239, R.C.M. 1935; amd. Sec. 1, Ch. 137, L. 1971; amd. Sec. 34, Ch. 460, L. 1977; Sec. 89-1811, R.C.M. 1947; R.C.M. 1947, 89-1801(3), 89-1811; amd. Sec. 3, Ch. 166, L. 1987; amd. Sec. 2799, Ch. 56, L. 2009.

85-7-2134. Levy of taxes and assessments by county commissioners. If for any reason a levy of taxes or assessments under 85-7-2104 is not made for any irrigation district in any year by the board of commissioners of the district within the time provided by 85-7-2104, the board of county commissioners of the county in which the district is situated shall, not later than the second Monday in August, ascertain the total amount to be raised for all purposes of the district. The board of county commissioners shall make the levy pursuant to 85-7-2104 that should have been made by the board of commissioners of the district and shall furnish the county clerk with a list of the lands and the amount of taxes or assessments as provided in 85-7-2136. The levy has the same force and effect as though made by the board of commissioners of the district. This section applies only to irrigation districts having a bonded indebtedness and actually in possession of a dependable water supply system and furnishing substantial amounts of water to bona fide users.

History: En. Sec. 1, Ch. 89, L. 1931; re-en. Sec. 7240.1, R.C.M. 1935; R.C.M. 1947, 89-1813; amd. Sec. 158, Ch. 584, L. 1999; amd. Sec. 13, Ch. 93, L. 2007.

Cross-References

County taxation, Title 7, ch. 6, part 25.

85-7-2135. Transmission of funds from other counties. Where the lands of any district lie in more than one county, the district taxes or assessments collected in counties in which the principal office is not located shall be transmitted, on or before the 10th day of each month except June and December, by the county treasurer of such county to the county treasurer of the county wherein the office of the district is located.

History: En. Sec. 55, Ch. 146, L. 1909; re-en. Sec. 7241, R.C.M. 1921; re-en. Sec. 7241, R.C.M. 1935; amd. Sec. 2, Ch. 78, L. 1961; R.C.M. 1947, 89-1814; amd. Sec. 1, Ch. 252, L. 1987.

85-7-2136. Collection of taxes or assessment. (1) On or before the third Monday in August of each year, the board of commissioners shall furnish to the department of revenue a correct list of all the district lands in the county, together with the amount of the total taxes or assessments against the lands for district purposes. The department of revenue shall immediately upon receipt of the list enter the assessment roll in the property tax record of the county subject to taxation or assessment under 85-7-2104 for each year.

(2) The county treasurer of each county in which any irrigation district is located, in whole or in part, shall collect and receipt for all taxes and assessments levied by the district, in the same manner and at the same time as is required in the collection of taxes upon real estate for county purposes as provided in 15-16-102. The treasurer must receive from any taxpayer, at any time, the amount due on account of any district assessments of any kind, whether other taxes on the same real estate are paid or not.

(3) During the water delivery season, as determined by the irrigation district commissioners, the county treasurer shall make available to the board of commissioners of an irrigation district notice of the receipt of payments of district assessments by 9 a.m. on the day following receipt of those payments.

(4) If requested in writing by a board of commissioners of an irrigation district, the county treasurer may receive assistance from an employee of the irrigation district or a commissioner of the district for the purpose of collecting district assessments as provided in 15-16-102, investing district funds as directed by the board of commissioners of the district, and preparing district assessment notices.

(5) When any real estate on account of which the district taxes and assessments have been levied has been sold to the county and a tax lien certificate is held by the county, the taxpayer may pay to the treasurer at any time any semiannual installment of the district tax or assessment, together with the penalty and interest to date of payment on the installment. However, the payment may not be considered a redemption of the property from the tax lien but must be credited on account of any redemption that may be made. In case of any payment pursuant to this subsection, a separate tax receipt must be issued showing exactly what assessments have been paid and showing that no other tax on the real estate has been received by the treasurer. The county treasurer may not collect, receive, or receipt for any taxes levied for county purposes upon real estate situated wholly or in part within any irrigation district upon which an assessment for the purposes of the irrigation district has been levied unless the assessment levied for irrigation district purposes is either paid as permitted in this section and the receipt for the payment is presented to the county treasurer at the time the taxes are paid or paid at the time the irrigation district taxes are paid.

History: (1)En. Sec. 54, Ch. 146, L. 1909; amd. Sec. 2, Ch. 96, L. 1919; re-en. Sec. 7240, R.C.M. 1921; re-en. Sec. 7240, R.C.M. 1935; amd. Sec. 1, Ch. 14, L. 1945; amd. Sec. 65, Ch. 391, L. 1973; Sec. 89-1812, R.C.M. 1947 (2)En. Sec. 1, Ch. 71, L. 1923; amd. Sec. 1, Ch. 73, L. 1935; re-en. Sec. 2172.1, R.C.M. 1935; amd. Sec. 1, Ch. 188, L. 1943; Sec. 84-4108, R.C.M. 1947; R.C.M. 1947, 84-4108(part), 89-1812; amd. Sec. 4, Ch. 584, L. 1989; amd. Sec. 1, Ch. 485, L. 1993; amd. Sec. 154, Ch. 27, Sp. L. November 1993; amd. Sec. 159, Ch. 584, L. 1999; amd. Sec. 14, Ch. 93, L. 2007; amd. Sec. 29, Ch. 110, L. 2007; amd. Sec. 33, Ch. 67, L. 2017.

85-7-2137. Failure to levy or collect tax or assessment. In the event that for any reason a special tax or assessment provided for cannot or may not be levied and collected in time to meet any interest falling due on any bonds issued, the board of commissioners shall provide for and pay such interest when due, either out of any of the funds in hand in the treasury of the district not otherwise appropriated or by warrants drawn against the next district tax or assessment levied or to be levied. These warrants shall be in addition to those mentioned in 85-7-2001.

History: En. Sec. 46, Ch. 146, L. 1909; amd. Sec. 14, Ch. 145, L. 1915; re-en. Sec. 7232, R.C.M. 1921; re-en. Sec. 7232, R.C.M. 1935; amd. Sec. 34, Ch. 234, L. 1971; amd. Sec. 30, Ch. 460, L. 1977; R.C.M. 1947, 89-1801(4).

85-7-2138. Surplus in construction fund. In the event of any money remaining in the construction fund after the completion of any district project, the same may be transferred to an appropriate fund for the redemption of the outstanding bonds of the district.

History: En. Sec. 62, Ch. 146, L. 1909; re-en. Sec. 7257, R.C.M. 1921; re-en. Sec. 7257, R.C.M. 1935; R.C.M. 1947, 89-2104.

85-7-2139. Transfer of funds. The board of commissioners shall have power to transfer money from any one fund to any other fund, except that no money shall be drawn from the sinking fund or construction fund, except as specifically provided in this chapter; provided, that no money in the United States contract fund shall ever be diverted to any other fund.

History: En. Sec. 63, Ch. 146, L. 1909; amd. Sec. 20, Ch. 145, L. 1915; re-en. Sec. 7258, R.C.M. 1921; re-en. Sec. 7258, R.C.M. 1935; R.C.M. 1947, 89-2105.

85-7-2140. Investment of funds. The board of commissioners shall direct the investment of the funds in any bond sinking fund in legal investments backed, insured, or guaranteed by the United States or the state of Montana, including federal and state agency obligations, whenever in their judgment the investment may be to the best interest of the district. All such investments shall be converted into cash in time to meet the principal on the bonds payable from such sinking fund promptly at their maturity.

History: En. Sec. 46, Ch. 146, L. 1909; amd. Sec. 14, Ch. 145, L. 1915; re-en. Sec. 7232, R.C.M. 1921; re-en. Sec. 7232, R.C.M. 1935; amd. Sec. 34, Ch. 234, L. 1971; amd. Sec. 30, Ch. 460, L. 1977; R.C.M. 1947, 89-1801(5); amd. Sec. 4, Ch. 166, L. 1987.

85-7-2141. Repealed. Sec. 80, Ch. 130, L. 2005.

History: En. Sec. 6, Ch. 252, L. 1921; re-en. Sec. 7231, R.C.M. 1921; re-en. Sec. 7231, R.C.M. 1935; R.C.M. 1947, 89-1714.

85-7-2142. Misconduct in relation to bond funds. (1) (a) Except as provided in subsection (1)(b), when any officer or officers or board or body of officers of any irrigation district of the state are or shall be required by law to provide by a levy of taxes or by certifying the amount of money required or otherwise a sinking fund or fund required to pay at maturity any bonds hereafter issued or created, such officer or officers and the members of such board or body of officers shall be jointly and severally liable to the irrigation district which they represent if they shall fail to perform any such duties so required by law, as in this section hereby specified, in an amount equal to the sum which would have been added to such fund had they performed such duty.

(b) When any such board shall fail or neglect to perform any such duty, no minority member of said board who shall have moved said board or voted in favor of a performance of such duty shall be held liable.

(2) Any person or persons who shall take, use, appropriate, or permit to be taken, used, or appropriated any portion of any such fund, as herein specified, for any purpose other than that permitted by law shall be jointly and severally liable to the irrigation district to which said fund shall belong for the portion of such fund so unlawfully taken, used, or appropriated.

History: En. Secs. 1, 2, Ch. 5, L. 1923; re-en. Secs. 463.1, 463.2, R.C.M. 1935; R.C.M. 1947, 59-534(part), 59-535(part).

County Attorney to be legal advisor of county and other subdivisions, 7-4-2711.

85-7-2144 through 85-7-2150 reserved.

85-7-2151. Delinquent sale and redemption. Delinquent sales of land for unpaid taxes or assessments shall be made in the same manner as for state and county taxes in the respective counties where such lands are situated. The right of redemption shall in all cases be made the same as in cases where lands are sold for state or county taxes.

History: En. Sec. 56, Ch. 146, L. 1909; amd. Sec. 2, Ch. 127, L. 1913; re-en. Sec. 7242, R.C.M. 1921; re-en. Sec. 7242, R.C.M. 1935; R.C.M. 1947, 89-1815.

Cross-References

Tax liens, Title 15, ch. 17.

85-7-2152. Proceeds of sale. (1) Whenever any lot, tract, piece, or parcel of land included within and forming a part of any irrigation district created under the provisions of this chapter or included within any extension of the district is sold by the treasurer of the county where the land is situated in the manner provided by law for the sale of lands for delinquent taxes for state and county purposes and taxes or assessments of the irrigation district form all or a part of the taxes for which the lands are sold, the county treasurer making the sale or sales shall place to the credit of the proper funds of the irrigation district, out of the proceeds of the sale or sales, the total tax or assessment of the irrigation district, inclusive of the interest and penalty on the proceeds as provided for by the general laws relating to delinquent taxes for state and county purposes.

(2) When the county assigns a tax lien as provided in 15-17-323, the county treasurer of the county shall, upon the issuance of the assignment certificate to the assignee, issue to the irrigation district, in its corporate name, a debenture certificate for the amount of taxes and assessments due to the irrigation district from the lands and premises for which a tax lien was assigned, inclusive of the interest and penalty. The certificate is evidence of and conclusive of the interest and claim of the irrigation district in, to, against, and upon the lands and premises for which the county assigned the tax lien. After the issuance of the certificate, the sum named in the certificate and the taxes and assessments of the district evidenced by the certificate bear interest at the rate of 1% a month from the date of the certificate until redeemed in the manner provided for by law for the redemption of the lands sold for delinquent state and county taxes or until paid from the proceeds of the sale of the lands and premises described in the certificate in the manner provided for by law. Duplicates of certificates issued to the irrigation district must be filed in the office of the county clerk and county treasurer of the county with the tax lien certificate of the lands and premises.

History: En. Sec. 2, Ch. 127, L. 1913; re-en. Sec. 7243, R.C.M. 1921; re-en. Sec. 7243, R.C.M. 1935; amd. Sec. 35, Ch. 460, L. 1977; R.C.M. 1947, 89-1816; amd. Sec. 53, Ch. 587, L. 1987; amd. Sec. 30, Ch. 110, L. 2007; amd. Sec. 34, Ch. 67, L. 2017.

85-7-2153. Assignment of debenture certificates. The certificates provided for by 85-2-2152 are assignable and may be sold or negotiated by the board of commissioners of the irrigation district and the proceeds of the sale delivered to and deposited with the county treasurer of the county for proper credit to the respective funds of the irrigation district. Upon the sale, negotiation, or transfer of a certificate, the lien of the irrigation district vests in the purchaser of the certificate and is only divested by the payment to the purchaser or the county treasurer of the county, for the purchaser's use, of the sum for which the certificate is issued and 1% additional for each month that passes from the date of the certificate until redeemed as provided for in 85-7-2154.

History: En. Sec. 2, Ch. 127, L. 1913; re-en. Sec. 7244, R.C.M. 1921; re-en. Sec. 7244, R.C.M. 1935; R.C.M. 1947, 89-1817; amd. Sec. 2800, Ch. 56, L. 2009.

85-7-2154. Redemption of lands sold. Upon the redemption of any lands so sold for taxes in the manner provided for by Title 15, chapter 18, the county treasurer of said county, out of the redemption money, shall pay to the holder or holders of such certificate or certificates the sums for which the same were issued, with interest as therein provided to the date of the redemption of said lands.

History: En. Sec. 2, Ch. 127, L. 1913; re-en. Sec. 7245, R.C.M. 1921; re-en. Sec. 7245, R.C.M. 1935; R.C.M. 1947, 89-1818; amd. Sec. 54, Ch. 587, L. 1987.

85-7-2155. Sale by county commissioners when land not redeemed. When lands and premises with attached tax liens and upon and against which the certificates have been issued for the taxes and assessments of the irrigation district are not redeemed within the time provided for by 15-18-111, the board of county commissioners of the county, within 3 months thereafter, shall cause these lands and premises to be sold as provided for by law, and out of the proceeds of the sale, the county treasurer of the county shall pay to the holder or holders of the certificates the sum for which the same were issued, with interest as provided for to the date of the sale of the lands by the board of county commissioners, and no lands and premises so held by any county and against which the certificates provided for by this chapter have been issued may, upon such sale, be struck off or sold for a less sum than the amount of taxes and assessments of the irrigation district represented by the certificate, inclusive of the interest thereon, in addition to the state and county taxes, if any, against the same.

History: En. Sec. 2, Ch. 127, L. 1913; re-en. Sec. 7246, R.C.M. 1921; re-en. Sec. 7246, R.C.M. 1935; amd. Sec. 36, Ch. 460, L. 1977; R.C.M. 1947, 89-1819; amd. Sec. 55, Ch. 587, L. 1987; amd. Sec. 35, Ch. 67, L. 2017.

85-7-2156. Proceedings in which county is possessor of tax lien and lien is not redeemed. If the county is the possessor of a tax lien on property assessed for irrigation district purposes and debenture certificates have been issued for the taxes and assessments of the irrigation district, as provided for in 85-7-2152, and the tax lien has not been redeemed before the next annual assessment for irrigation purposes becomes delinquent, debenture certificates for each year's irrigation district taxes and assessments must be issued against the property and must be included in and satisfied by any redemption thereof, with interest as provided for in 85-7-2152, and must be paid from the proceeds of sale of the lands by the board of county commissioners, if not redeemed as provided for by law.

History: En. Sec. 2, Ch. 127, L. 1913; re-en. Sec. 7247, R.C.M. 1921; re-en. Sec. 7247, R.C.M. 1935; R.C.M. 1947, 89-1820; amd. Sec. 56, Ch. 587, L. 1987; amd. Sec. 36, Ch. 67, L. 2017.

85-7-2157. Purchase of lands by district — revolving fund, credits, and expenditures. (1) When a tax lien is attached to property for which a portion of the delinquent taxes are taxes and assessments levied and assessed by an irrigation district, the commissioners of the irrigation district may take an assignment of the tax lien for the total amount of all delinquent taxes and assessments, penalty, and interest against the land. The county treasurer shall assign the tax lien to the irrigation district and issue an assignment certificate to the irrigation district the same as assignment certificates are issued to other assignees. For the purpose of paying the taxes, assessments, interest, and penalties, the commissioners of the irrigation district may create by resolution a revolving fund for the purchase of tax liens. The commissioners may provide funds for the revolving fund by levy, bond issue, or otherwise. The district may pay the taxes, assessments, interest, and penalties by issuing a warrant to the county treasurer against the revolving fund if there is sufficient money in the fund.

(2) When taxes are paid by the district as provided in this part, the county treasurer shall distribute that portion of the tax belonging to the irrigation district to the several funds as designated in the tax levy and assessment. However, if the board of commissioners of the irrigation district file with the county treasurer a certified copy of the resolution passed by the commissioners requesting nondistribution by the county treasurer of the portion of the tax belonging to the district, the county treasurer may not distribute that portion of the tax belonging to the irrigation district to the several funds as designated in the tax levy and assessment, but the total amount due the irrigation district must be credited by the treasurer to the revolving fund. If money is credited to the revolving fund, at the time of the assignment by the district of the tax lien or of the sale of property obtained through the certificate, the funds that are realized from the sale must be deposited with the county treasurer, together with the rentals received

from the property, and the treasurer shall credit the proceeds of the redemption sale or rental pro rata to the several funds of the district in accordance with the original levy or assessment.

(3) At the time of redemption or of the assignment by the district of the tax lien certificate or sale of the property obtained through the certificate, the funds that are realized must be deposited with the county treasurer, together with rentals received from the property. The county treasurer shall credit the proceeds of the redemption, sale, or rentals to the revolving fund to the extent required to reimburse the revolving fund in full. If the sum realized permits, any excess must be credited to the several funds of the district in accordance with the original levy and assessment. Expenditures may not be made from the revolving fund except as provided in this section. The board of irrigation district commissioners may, by resolution, when the fund becomes inactive, transfer the balance to a sinking fund to pay any indebtedness that had been incurred by the district by reason of the creation of the revolving fund.

History: En. Sec. 1, Ch. 89, L. 1925; amd. Sec. 1, Ch. 57, L. 1929; re-en. Sec. 7248.1, R.C.M. 1935; R.C.M. 1947, 89-1822; amd. Sec. 31, Ch. 110, L. 2007; amd. Sec. 37, Ch. 67, L. 2017.

Cross-References

Powers of District Commissioners to acquire and manage tax sale lands, 85-7-2162.
Application of 85-7-2157, 85-7-2164.

85-7-2158. Purchase of lands by district — tax lien assignments and payment. (1) Any irrigation district may:

(a) take an assignment of a tax lien; or

(b) if a deed has issued to the county, purchase the lands from the county by paying all state, county, city, school district, and other delinquent taxes, together with penalty, interest, and costs of publication and sale to the county treasurer of the county making the sale.

(2) The payment must be made by the commissioners of the district by issuing and delivering to the county treasurer a warrant drawn against the revolving fund of the district if there is sufficient money in the fund to pay the warrant in full upon demand. The county treasurer shall then assign the tax lien to the irrigation district, or the commissioners of the county shall convey the lands to the district if the tax deed was issued to the county.

History: En. Sec. 2, Ch. 89, L. 1925; re-en. Sec. 7248.2, R.C.M. 1935; R.C.M. 1947, 89-1823; amd. Sec. 32, Ch. 110, L. 2007; amd. Sec. 38, Ch. 67, L. 2017.

Cross-References

School district inclusive of community college district, 20-15-403.

85-7-2159. Issuance of tax deed. If there has been no redemption of tax liens assigned to an irrigation district or any other person as provided by law and notice has been given as required in 15-18-212, the county treasurer of the county within which the lands are situated shall issue a tax deed for the lands to the irrigation district or any other holder of an assignment certificate.

History: En. Sec. 3, Ch. 89, L. 1925; re-en. Sec. 7248.3, R.C.M. 1935; R.C.M. 1947, 89-1824; amd. Sec. 305, Ch. 42, L. 1997; amd. Sec. 33, Ch. 110, L. 2007; amd. Sec. 39, Ch. 67, L. 2017.

Cross-References

Issuing tax deed, Title 15, ch. 18, part 2.

85-7-2160. Sale by district of purchased tax-deed lands. After the issuance of any such tax deeds to an irrigation district, the commissioners of such district shall have power to sell and convey the lands so purchased, or any part thereof, at either public or private sale whether or not the price received therefor equals the amount of delinquent taxes, assessments, penalties, interest, and costs against said lands. If such lands be offered for sale at public sale, such commissioners may reject any and all bids thereon. No such lands shall be sold by said commissioners at private sale until the same shall have been offered for sale at public sale, and no such lands shall be sold at private sale at a price less than the highest price bid therefor at the public sale at which such lands are offered. If no bid is received for such lands when the same are offered for sale at public sale, the commissioners may then sell the same in such manner and for such price as in their judgment they shall deem to be for the best interests of said district.

History: En. Sec. 4, Ch. 89, L. 1925; re-en. Sec. 7248.4, R.C.M. 1935; R.C.M. 1947, 89-1825.

85-7-2161. Action to quiet title in district. If any such lands are conveyed to any irrigation district, it may maintain an action to quiet title to said lands in said district in the manner provided by the laws of Montana for quieting title to real property.

History: En. Sec. 5, Ch. 89, L. 1925; re-en. Sec. 7248.5, R.C.M. 1935; R.C.M. 1947, 89-1826.

Cross-References

Quiet title — tax deed property, Title 15, ch. 18, part 4.

85-7-2162. Powers of district commissioners to acquire and manage tax lien lands. (1) In addition to the powers of irrigation districts, the commissioners of every irrigation district established and organized under and by virtue of the laws of the state may:

(a) purchase lands within their respective districts that had been sold and conveyed to the county for nonpayment of taxes and assessments, take assignments of tax liens, and take title to the land for their district;

(b) own, manage, operate, lease, sell, and dispose of the land for the use and benefit of their respective districts;

(c) sue and be sued in reference to the lands in the name of their respective irrigation districts and commence, maintain, and prosecute suits to quiet title to the lands and any other suits in equity or actions at law with reference to the lands, the same as any other individual or corporate owners of the lands; and

(d) do any other acts or things necessary or beneficial for their respective districts in connection with the lands.

(2) The lands must be offered for sale at public sale, and the commissioners may reject any bids on the land if, in their judgment, the bids are insufficient. The lands may not be sold at private sale at a price less than the highest bid made at the public sale at which the lands were offered for sale. If a bid is not received for the land when the land is offered at public sale, the commissioners may then sell the land in the manner, at the price, and upon the terms that they choose.

(3) The board of commissioners of any irrigation district may do what is necessary to carry out the provisions and intentions of 85-7-2157 through 85-7-2164.

History: En. Sec. 6, Ch. 89, L. 1925; amd. Sec. 1, Ch. 36, L. 1933; re-en. Sec. 7248.6, R.C.M. 1935; R.C.M. 1947, 89-1827; amd. Sec. 34, Ch. 110, L. 2007; amd. Sec. 40, Ch. 67, L. 2017.

85-7-2163. Granting of tax deed. The holder of the assignment certificate must be granted a tax deed by the county treasurer in the manner and form provided by Title 15, chapter 18.

History: En. Sec. 7, Ch. 89, L. 1925; re-en. Sec. 7248.7, R.C.M. 1935; R.C.M. 1947, 89-1828; amd. Sec. 57, Ch. 587, L. 1987; amd. Sec. 35, Ch. 110, L. 2007; amd. Sec. 41, Ch. 67, L. 2017.

85-7-2164. Application of certain sections. Sections 85-7-2157 through 85-7-2163 shall apply only when or after said irrigation district shall have commenced delivery of water to any lands included in such irrigation district.

History: En. Sec. 8, Ch. 89, L. 1925; re-en. Sec. 7248.8, R.C.M. 1935; R.C.M. 1947, 89-1829.

85-7-2165. Partitioning interest in tax-deed lands in certain districts. (1) In any case where an irrigation district established under the law of this state has incurred a bonded indebtedness or other indebtedness but has not constructed or purchased any irrigation plant or system for the irrigation of land in the district and more than 10 years have expired since the date of the creation of the irrigation district, the board of commissioners of such irrigation district and also the board of county commissioners of the county in which the lands of the district or any part thereof are situated shall have power to enter into an agreement, on behalf of such irrigation district and such county, for the partitioning of the respective interests of the irrigation district and the county in lands to which the county has taken tax deed and to make all necessary conveyances and assignments to carry out such agreement in such manner that the respective interests of the county and the irrigation district shall be fully segregated and thereafter separately owned and controlled.

(2) The board of commissioners of such irrigation district shall have power to sell and convey such lands and interests so acquired by the irrigation district or any part thereof and any other property or assets which such irrigation district may hold, at either public or private sale, or transfer such lands or interests in lands or other assets to creditors of the district

in payment of the indebtedness of such irrigation district, upon such terms as shall, in the judgment of the board of irrigation district commissioners, be deemed most advantageous to the irrigation district. The board of commissioners of such irrigation district and the board of county commissioners of the county in which the lands of such irrigation district or any part thereof are situated shall be and they are hereby authorized and empowered to do any and all things necessary to carry out the provisions and intentions of this section, the purpose of which is to enable such irrigation district to dispose of its assets in settlement of its liabilities and to be dissolved.

History: **En. Sec. 1, Ch. 207, L. 1943; R.C.M. 1947, 89-1830.**

85-7-2166. Liability of county treasurers. (1) The county treasurer to whom district funds or securities are entrusted is liable on the treasurer's bond for the safekeeping of the funds and securities. The funds must be properly divided into the respective funds for which district taxes or assessments were levied, including a United States contract fund, bond principal and interest fund, sinking fund to redeem bonds, maintenance fund, construction fund, and general fund. The construction fund must be available for the payment of the purchase price of all works, water rights, or other property purchased by or for the district and all expenses incident to those purchases, as well as for the payment of the cost of construction of works, including cost of engineering, superintendence, and other expenses incident to construction. All warrants issued for preliminary and organization expenses and all administrative expenses must be paid from the general fund.

(2) The county treasurer is authorized to receive, in lieu of cash, matured bonds, matured coupons, or interest coupons maturing within the year in payment of any tax or assessment levied for the payment of bonds or interest on bonds. The county treasurer at any time, upon the order of the board of commissioners of the district, shall turn over to the board any bonds or securities held by the treasurer and required to be delivered to the board in accordance with the provisions of this chapter. All bonds and interest coupons received or otherwise paid and all bonds of the district upon the payment must be immediately canceled and retained by the county treasurer as vouchers.

History: **En. Sec. 57, Ch. 146, L. 1909; amd. Sec. 19, Ch. 145, L. 1915; re-en. Sec. 7249, R.C.M. 1921; amd. Sec. 1, Ch. 114, L. 1933; re-en. Sec. 7249, R.C.M. 1935; R.C.M. 1947, 89-1831; amd. Sec. 2801, Ch. 56, L. 2009.**

Office of County Treasurer, Title 7, ch. 6, part 21.

85-7-2167. Sale or transfer of lands. Where any lands in any district are sold or transferred, either by deed, mortgage, foreclosure sale, or otherwise, such sale or transfer shall include the water belonging to and appurtenant to the land, whether or not the same is expressly stated in the deed, instrument of transfer, or decree, and such land shall be liable to special tax or assessment the same as if such sale or transfer had not been made.

History: **En. Sec. 58, Ch. 146, L. 1909; re-en. Sec. 7250, R.C.M. 1921; re-en. Sec. 7250, R.C.M. 1935; R.C.M. 1947, 89-1832.**

Part 22
Miscellaneous Provisions

85-7-2201. Limitation on actions attacking decrees. No suit, action, or proceeding shall be brought in any court in this state attacking the validity or regularity of any order or decree of the court purporting to establish a district hereunder or correcting or amending any order or decree creating a district after the expiration of 6 months from the date of the recording of the order establishing the district or the order correcting or amending the same. Nothing contained in this section shall be deemed or construed to confirm, approve, or validate any warrant issued, disbursement made, or contract entered into for the expenditure of money by the board of commissioners on behalf of any district.

History: **En. Sec. 2, Ch. 54, L. 1923; re-en. Sec. 7231.1, R.C.M. 1935; R.C.M. 1947, 89-1715(part).**

85-7-2202. Consolidation of appeals. If more than one appeal shall be pending at the same time concerning similar contests provided for in this chapter, such appeals shall be consolidated and tried together.

History: **En. Sec. 59, Ch. 146, L. 1909; re-en. Sec. 7254, R.C.M. 1921; re-en. Sec. 7254, R.C.M. 1935; R.C.M. 1947, 89-2101.**

85-7-2203. Nonsubstantial errors disregarded — rules of practice — costs. The court hearing any of the contests or proceedings herein provided for shall disregard any error, irregularity, or omission which does not affect the substantial rights of the parties to said action or proceeding. The rules of pleading and practice provided by Title 25 which are not inconsistent with the provisions of this chapter are applicable to all actions or proceedings herein provided for. The costs of any such hearing or contest may be allowed and apportioned between the parties or taxed to the losing parties, in the discretion of the court.

History: En. Sec. 60, Ch. 146, L. 1909; re-en. Sec. 7255, R.C.M. 1921; re-en. Sec. 7255, R.C.M. 1935; R.C.M. 1947, 89-2102.

85-7-2204. Written consent of owners — acknowledgment and recording requirements. Whenever any written consent is required to be given by or obtained from the owner or owners of any lands by any of the provisions of any of the sections of this chapter, such written consent must be acknowledged before some officer authorized to take acknowledgments and shall be filed and recorded in the office of the clerk and recorder of the county in which such lands are situated, and a certified copy thereof must be filed in the office of the clerk of the court in the county in which the proceedings for the organization of such district were instituted. The provisions of this section shall not apply to any petition provided for by this chapter, and all such petitions may be signed in any number of original parts with the same effect as though all signatures had been affixed to one instrument.

History: En. Sec. 64, Ch. 146, L. 1909; re-en. Sec. 7259, R.C.M. 1921; re-en. Sec. 7259, R.C.M. 1935; R.C.M. 1947, 89-2106; amd. Sec. 6, Ch. 326, L. 1979.

85-7-2205. Definition of irrigable land. As used in this chapter, "irrigable land" means:

(1) land that can receive irrigation water and is classified as irrigable by the district or the United States government; or

(2) land decreed as taxable acreage under 85-7-1841 through 85-7-1845.

History: En. Sec. 5, Ch. 584, L. 1989.

85-7-2206 through 85-7-2210 reserved.

85-7-2211. Irrigation ditches — duties relating to safety. An irrigation district or private person or entity owning or operating irrigation diversions, aqueducts, canals, ditches, drains, flumes, headgates, siphons, or other water conveyance structures or infrastructure shall keep these structures and infrastructure in good general repair and condition. For the purpose of protecting persons and property from injury or damage, the irrigation district, private person, or entity has no duty to:

(1) erect fences or other security measures;

(2) install grates or other protective devices where conveyed water goes underground or under a bridge or other object; or

(3) prevent access to water conveyance structures or facilities by persons or animals.

History: En. Sec. 1, Ch. 570, L. 1987; amd. Sec. 1, Ch. 305, L. 2021.

85-7-2212. Irrigation ditches — limits of liability. An irrigation district or private person or entity owning or operating irrigation diversions, aqueducts, canals, ditches, drains, flumes, headgates, siphons, or other water conveyance structures or infrastructure is not liable for:

(1) personal injury or property damage resulting from floodwaters caused by rainfall or other weather conditions or acts of nature;

(2) personal injury or property damage occurring on another's land and caused by water seepage that existed or began before the injured person first arrived on or obtained an interest in the land or before the damaged property was first placed on the land, if the seepage does not carry toxic chemicals onto the land;

(3) injury to a person or property while, without authorization of the district or private person or entity, the person or property is on land or water controlled by the district or private person or entity, unless the irrigation district or private person or entity engaged in willful or wanton misconduct; or

(4) death of a person or animal from drowning or other causes, unless the irrigation district or private person or entity was grossly negligent or engaged in willful or wanton misconduct.

History: En. Sec. 2, Ch. 570, L. 1987; amd. Sec. 2, Ch. 305, L. 2021.

85-8-309 and 85-8-310 reserved.
85-8-311. Record and vouchers.
85-8-312. Custody of funds.
85-8-313. Annual report of commissioners.
85-8-314. Court control and compensation of commissioners.
85-8-315. Presumption of regularity of commissioners' acts.
85-8-316 through 85-8-320 reserved.
85-8-321. Organization, appointments, and preliminary report.
85-8-322. Adoption of feasible plan.
85-8-323. Hearing and notice on preliminary report.
85-8-324. Adjournment of hearing or trial of issues.
85-8-325. Remonstrance by interested parties.
85-8-326. Service of owners of added lands.
85-8-327. Procedure at court hearing and order.
85-8-328. Corporate nature of drainage district.
85-8-329. Necessity of preliminary proceedings.
85-8-330 through 85-8-340 reserved.
85-8-341. Preparation of report — contents.
85-8-342. Apportionment of costs.
85-8-343. Commissioners to use most feasible plan.
85-8-344. Alteration of boundaries.
85-8-345. Notice of hearing of report.
85-8-346. Modification of report.
85-8-347. Confirmation of report — appeals.
85-8-348. Modification of court order.
85-8-349. Supplemental report.
85-8-350. Judgment on dismissal of proceedings — assessment of costs.
85-8-351. Statement of costs before entry of judgment.
85-8-352. Contribution among petitioners.
85-8-353 through 85-8-360 reserved.
85-8-361. Contracts.
85-8-362. Interest of commissioners in contracts forbidden.
85-8-363. Commissioners' right of entry.
85-8-364. Payment or tender of damages.
85-8-365. Location of drains.
85-8-366. Drains on railroad lands.
85-8-367. Commissioners' powers during emergency.
85-8-368. Annual report — objections.

Part 4 — Alteration of District

85-8-401. Alterations or additions to district — petition required.
85-8-402. Hearing — notice and service.
85-8-403. Court order — dismissal of petition.
85-8-404. Appeals and assessments.
85-8-405. Exclusion of lands from district.
85-8-406. Court action — parties.
85-8-407. Complaint required — contents.
85-8-408. Summons.
85-8-409. Rules of practice applicable.
85-8-410. Court order excluding lands.
85-8-411. Appeals.
85-8-412 through 85-8-420 reserved.
85-8-421. Procedure to bring other drained lands into district.
85-8-422. Court order for annexation — appeal.
85-8-423. Assessments against annexed lands.
85-8-424. Confirmation of commissioners' report of assessments.

Part 5 — Bonds and Revenue

85-8-501. Authority to borrow money and issue notes or bonds.
85-8-502. Resolution for issuance of notes or bonds.
85-8-503. Sale of notes or bonds.
85-8-504. Disposition of excess money.
85-8-505. Refunding indebtedness of district.

Part 6 — Taxes and Assessments

85-8-601. Certification and collection of district taxes.
85-8-602. Tax collection if lands in several counties.
85-8-603. Rules of law applicable to tax collection.
85-8-604 through 85-8-610 reserved.
85-8-611. Construction assessments — annual installment.
85-8-612. Lien of assessments — payment of assessments against state lands.
85-8-613. Assessments against certain corporations.
85-8-614. Procedure on failure to certify assessments.
85-8-615. Procedure to levy additional assessments.
85-8-616. Correction of omissions.
85-8-617. Illegal assessments.
85-8-618. Assessment of unassessed, benefited lands.
85-8-619. Assessments to have effect of judgment.
85-8-620. Bonds not to be affected by assessment change.
85-8-621. Renumbered 85-8-803.
85-8-622. Agreement of landowners to omitted assessments.
85-8-623. Assessments not to be obstructed by preliminary defects.
85-8-624. Assessments on improvements — taxpayers' approval, limitations, and election procedures.

Part 7 — Flood Control and Planning

85-8-701. Purpose of part.
85-8-702. Additional powers.
85-8-703. Petition for additional powers.
85-8-704. Organization of areas not within existing districts.

Part 8 — Miscellaneous Provisions

85-8-801. Continuation of existing districts.
85-8-802. Dividing older districts into three divisions.
85-8-803. Waiver of defective service.

Part 1
Creation of Districts

85-8-101. Petition for creation of district. (1) Whenever a majority of the owners of lands within any district of land who shall represent one-third in area of the land within said district to be reclaimed or benefited or whenever the owners of more than one-half of the lands within such district desire to construct one or more drains, ditches, levees, waste ditches, or other works across the lands of others or to straighten, widen, deepen, or otherwise alter any natural stream or watercourse not navigable, for the promotion of the public health or welfare and the drainage of the lands and removal of surface waters therefrom; or desire to maintain and keep in repair any such drain, ditch, or levee heretofore constructed under any law of this state, such owners may file, in the district court of any county in which the lands or any part of them shall lie, a petition setting forth:

(a) the proposed name of the drainage district;

(b) the necessity of the proposed work;

(c) a general description of the proposed starting points, routes, and termini of the proposed drain, ditches, and levees;

(d) a general description of the lands proposed to be included in the district;

(e) the names of the owners of all lands in the district, when known.

(2) If the purpose of the petitioners is the enlargement, repair, and maintenance of a ditch, levee, or other work heretofore constructed under any law of this state, the petition shall give a general description of the same, with such particulars as are considered important. The petition shall pray for the organization of a drainage district by the name and with the boundaries proposed and for the appointment of commissioners for the execution of such proposed work, according to the provisions of this and the following sections.

(3) (a) Any lands, the title to which is in the state and which are within the boundaries of any drainage district heretofore created or which may be hereafter created, may be included in any such drainage district in the same manner as is by law provided for adding other lands to drainage districts whenever it is found necessary to include lands in drainage districts as provided by the preceding subsections.

(b) All copies of petitions or notices required by law to be served on account of such lands being included in such drainage districts shall be served on the president of the board having control of such lands in the same manner as is hereinafter provided for the service of petitions and notices on other owners of lands in the district in which said lands are situated.

History: En. Sec. 1, Ch. 129, L. 1921; re-en. Sec. 7265, R.C.M. 1921; re-en. Sec. 7265, R.C.M. 1935; R.C.M. 1947, 89-2201; amd. Sec. 7, Ch. 326, L. 1979.

Cross-References

Receiving affidavits on question of petition sufficiency, 85-8-119.

85-8-102. Amendment and circulation of petition — court consideration. No petition having as many signers as are required by 85-8-101 may be declared void, but the court may at any time permit the petition to be amended in form and substance to conform to the facts, if the facts justify the organization of a drainage district. Several similar petitions for the organization of the same district may be circulated and, when filed, together shall be regarded as one petition having as many signers as there are separate signers on the several filed petitions who own lands within the proposed drainage district. All petitions for the organization of the district filed prior to the hearing on the petition shall be considered by the court the same as if filed with the first petitions placed on file, and the signatures thereon shall be counted in determining whether sufficient landowners have signed the petition.

History: En. Sec. 2, Ch. 129, L. 1921; re-en. Sec. 7266, R.C.M. 1921; re-en. Sec. 7266, R.C.M. 1935; amd. Sec. 40, Ch. 460, L. 1977; R.C.M. 1947, 89-2203; amd. Sec. 8, Ch. 326, L. 1979.

85-8-103. Territory to be included. Said territory need not be contiguous, provided that it be so situated that the public health or welfare will be promoted by such drainage of each part thereof, the benefits of the proposed work in each part will exceed the damages from the costs of said proposed work in each part, and the court shall be satisfied that said proposed work can be more cheaply done if in a single district than otherwise.

History: En. Sec. 3, Ch. 129, L. 1921; re-en. Sec. 7267, R.C.M. 1921; re-en. Sec. 7267, R.C.M. 1935; R.C.M. 1947, 89-2204.

85-8-104 through 85-8-110 reserved.

85-8-111. Notice of hearing. (1) On the filing of a petition under 85-8-101, the court or judge shall make an order fixing a time and place of hearing on the petition and ordering notice. The clerk of court for the county in which the proceedings are instituted shall cause 20 days' notice of the filing of the petition to be given:

(a) by posting notice in at least five of the most public places in the proposed district in which the work is to be done;

(b) by serving or causing to be served a copy of the notice on each owner of land within the proposed district residing in any county in which any lands in the proposed district are situated, either personally or by leaving a copy of the notice at the owner's last usual place of residence with a person of suitable age and discretion, to whom its contents must be explained; and

(c) by publishing a copy at least once a week for 3 successive weeks in some newspaper published in each county from which any part of the district is proposed to be taken. If there is no newspaper in any county, the notice may be published in a newspaper published in an adjoining county.

(2) The notice must:

(a) state in what court the petition is filed;

(b) state briefly the starting points, routes, and termini of drains, ditches, and levees;

(c) give a general description of the proposed work;

(d) give the proposed boundaries of the district or a general description of all the lands in the proposed district;

(e) give the name proposed for the drainage district; and

(f) state the time and place fixed by the court when and where the petitioners will request a hearing on the petition.

History: En. Sec. 4, Ch. 129, L. 1921; re-en. Sec. 7268, R.C.M. 1921; re-en. Sec. 7268, R.C.M. 1935; R.C.M. 1947, 89-2205; amd. Sec. 2802, Ch. 56, L. 2009.

85-8-112. Affidavit in case of nonresident petitioners. If any of the owners of land in said district are nonresidents of the county or counties in which the proposed district lies, the petition shall be accompanied by an affidavit giving the names and post-office addresses of such nonresidents, if such are known, and if unknown, shall state that upon diligent inquiry their names or post-office addresses (whichever may be the fact) cannot be ascertained. The clerk of the court shall mail a copy of the notice aforesaid to each of said nonresident owners whose post-office address is known, within 6 days after the first publication of the same.

History: En. Sec. 5, Ch. 129, L. 1921; re-en. Sec. 7269, R.C.M. 1921; re-en. Sec. 7269, R.C.M. 1935; R.C.M. 1947, 89-2206.

85-8-113. Proof of service and publication. The certificate of the clerk of the court or other public officer or the affidavit of any other person who knows the facts, affixed to a copy of said notice, shall be sufficient evidence of the posting, serving, mailing, or publication thereof.

History: En. Sec. 6, Ch. 129, L. 1921; re-en. Sec. 7270, R.C.M. 1921; re-en. Sec. 7270, R.C.M. 1935; R.C.M. 1947, 89-2207.

85-8-114. Personal service of notice to confer jurisdiction. Personal service of such notice on (or service by leaving at the last usual place of abode of) all owners of lands or easements or interest in lands within said district shall give the court complete jurisdiction, without posting, publication, or mailing of said notice.

History: En. Sec. 7, Ch. 129, L. 1921; re-en. Sec. 7271, R.C.M. 1921; re-en. Sec. 7271, R.C.M. 1935; R.C.M. 1947, 89-2208.

85-8-115. Insufficient service. (1) If it is found, before the hearing on a petition for the organization of a drainage district, that one or more owners of land in the proposed district have not been served with notice of hearing on the petition, the court or presiding judge does not lose jurisdiction. The court or presiding judge in that case shall adjourn the hearing, make an order directing the serving of the notice upon the landowner or landowners, and fix the time and manner of service of the notice, which must notify the landowner or landowners to appear at the adjourned time and place and be heard on the petition.

(2) The notice must be served personally or by leaving the notice at the last usual place of residence of the unserved owners as provided in 85-8-111, not less than 8 days before the adjourned hearing, or must be published, not less than 14 days before the adjourned hearing, in some newspaper published in the county in which the owners' lands lie or, if a newspaper is not published in that county, then in some newspaper published in an adjoining county.

History: En. Secs. 8, 9, Ch. 129, L. 1921; re-en. Secs. 7272, 7273, R.C.M. 1921; re-en. Secs. 7272, 7273, R.C.M. 1935; R.C.M. 1947, 89-2209, 89-2210; amd. Sec. 2803, Ch. 56, L. 2009.

85-8-116. Procedure on adjourned day. Upon the adjourned day the same proceedings, adjournments, trial findings, and orders may be had as in case of complete service of notice in the first instance. In case of failure to mail said notice as herein required, the court or judge may order the same mailed later and shall adjourn said hearing so that said notice shall be mailed at least 14 days before said adjourned hearing. In case of failure to publish or post notice as required in this part, the court or judge may adjourn said hearing for sufficient time to permit the due posting and publication of said notice and order said notice posted or published as directed in 85-8-111. In case of adjournment to permit notice to be given, the notice shall state the fact of such adjournment and the time and place of hearing pursuant to said adjournment.

History: En. Sec. 10, Ch. 129, L. 1921; re-en. Sec. 7274, R.C.M. 1921; re-en. Sec. 7274, R.C.M. 1935; R.C.M. 1947, 89-2211.

85-8-117. Contest by landowners. (1) On the day fixed for hearing on such petition, all parties owning lands or any interest or easement in land within said proposed district or who would be affected thereby may appear and contest:

(a) the sufficiency of the petition;
(b) the sufficiency of the signers of the petition;
(c) the sufficiency of the notice;
(d) the constitutionality of the law; and
(e) the jurisdiction of the court, specifying their objections to such jurisdiction.

(2) The petitioners and contestants may, on the trial, offer any competent evidence in regard thereto. All notices of contest shall be in writing and shall clearly specify the grounds of contest.

History: En. Sec. 11, Ch. 129, L. 1921; re-en. Sec. 7275, R.C.M. 1921; re-en. Sec. 7275, R.C.M. 1935; R.C.M. 1947, 89-2212.

85-8-118. Determination of sufficiency of petition. The court shall hear and determine whether or not the petition contains the signatures of a majority of the owners of lands within the proposed district who are of lawful age and who represent one-third in area of the lands proposed to be affected by said work or the signatures of the owners of more than one-half of such lands and shall determine all questions of law arising on said contest. The district court in which such petition shall be filed or the judge thereof may adjourn the hearing on the petition from time to time for want of sufficient notice, to give time to prepare for trial, or for other good cause.

History: En. Sec. 12, Ch. 129, L. 1921; re-en. Sec. 7276, R.C.M. 1921; re-en. Sec. 7276, R.C.M. 1935; R.C.M. 1947, 89-2213; amd. Sec. 9, Ch. 326, L. 1979.

85-8-119. Receiving affidavits on question of petition sufficiency. The affidavits of any 10 or more of the signers of the petition, stating that they have examined the petition and are acquainted with the locality of the district and that the petition is signed by a sufficient number of owners of lands in the district to satisfy 85-8-101, may be taken by the court or judge as prima facie evidence of the facts stated in the petition. The affidavit of any petitioner or other landowner before the court or represented before the court asserting the petitioner's or landowner's ownership of lands in the district, properly described, is sufficient evidence to the court of those facts.

History: En. Sec. 13, Ch. 129, L. 1921; re-en. Sec. 7277, R.C.M. 1921; re-en. Sec. 7277, R.C.M. 1935; R.C.M. 1947, 89-2214; amd. Sec. 10, Ch. 326, L. 1979; amd. Sec. 2804, Ch. 56, L. 2009.

85-8-120. Fraudulent deeds. All deeds made for the purpose of establishing or defeating the prayer of said petition and not made in good faith and for a valuable consideration shall be taken and held to be a fraud, and the holders thereof shall not be considered as the owners of the lands described therein.

History: En. Sec. 14, Ch. 129, L. 1921; re-en. Sec. 7278, R.C.M. 1921; re-en. Sec. 7278, R.C.M. 1935; R.C.M. 1947, 89-2215.

Cross-References

Fraud, 28-2-404 through 28-2-406.

85-8-121. Court determination. (1) If the court or presiding judge, after hearing any and all competent evidence that may be offered for and against the petition for the creation of the district, finds that the petition has not been signed as required in this part, the petition must be dismissed at the cost of the petitioners and judgment must be entered against the petitioners for the amount of the costs.

(2) If it appears that the petition has been signed as required in this part, the court or judge shall so find and order any necessary amendments to the petition, shall divide the district into three divisions, as nearly equal in area as possible, and shall appoint three suitable and competent persons as commissioners and fix their temporary bonds. One commissioner must be appointed from each division, and each person appointed must be an actual landowner and resident of the county or counties in the division for which the person is appointed. If the district is situated in two or more counties, not more than two of the commissioners may reside in one of the counties. Ownership of land within the district may not disqualify a person from acting as a commissioner.

History: (1)En. Sec. 15, Ch. 129, L. 1921; re-en. Sec. 7279, R.C.M. 1921; re-en. Sec. 7279, R.C.M. 1935; Sec. 89-2216, R.C.M. 1947; (2)En. Sec. 16, Ch. 129, L. 1921; re-en. Sec. 7280, R.C.M. 1921; amd. Sec. 1, Ch. 50, L. 1925; re-en. Sec. 7280, R.C.M. 1935; Sec. 89-2217, R.C.M. 1947; R.C.M. 1947, 89-2216, 89-2217(part); amd. Sec. 2805, Ch. 56, L. 2009.

Part 2
Dissolution of Districts

85-8-201. Dissolution of districts. Whenever the owners of more than one-half of the lands within any drainage district organized under the provisions of this chapter shall present to the district court having jurisdiction of the drainage district a petition signed by them, praying that such drainage district be dissolved, the judge of the court shall cause notice of such petition, together with a copy of the petition, to be served upon the commissioners of the district, directing them to show cause on a day certain, not less than 15 or more than 30 days from the date of the filing of the petition, why the petition should not be granted. The judge, at the time of receiving the petition, shall make an order forbidding the commissioners from incurring any further expense or proceeding with the work of constructing a drain. On the day of hearing the court shall hear the same, and if it appears that the owners of more than one-half of the lands in the drainage district have signed the petition, it shall be granted. Thereupon, the court shall make an order directing the commissioners to file a written report, under oath, setting forth the amount of the debts and obligations of the drainage district. Within 30 days after such report is filed, the court shall cause an assessment to be levied against all lands in the district on the basis of the final report of the commissioners, as confirmed by the court, and if no final report has been made, then on an area basis. The court shall also enter judgment dissolving the district and authorize the commissioners to settle the business of the district on the basis of the final report of the commissioners or on the area basis as confirmed by this court, the commissioners to render their services for same without pay.

History: En. Sec. 7265-A by Sec. 1, Ch. 46, L. 1925; re-en. Sec. 7265.1, R.C.M. 1935; R.C.M. 1947, 89-2202; amd. Sec. 11, Ch. 326, L. 1979.

Part 3
Organization and Operation

85-8-301. Term of commissioners at creation of district. On the creation of a district the commissioners appointed by the judge or court shall hold office until the first Tuesday in May following their appointment and until their successors are elected. When a district is in existence on March 1, 1921, and thereafter an order is made dividing such district into divisions, the terms of office of such commissioners shall cease with the Monday immediately preceding the first Tuesday in May next following.

History: En. Sec. 18, Ch. 129, L. 1921; re-en. Sec. 7282, R.C.M. 1921; amd. Sec. 2, Ch. 50, L. 1925; re-en. Sec. 7282, R.C.M. 1935; R.C.M. 1947, 89-2301.

85-8-302. Election of commissioners — regular term of office. (1) Except as provided in 13-1-502(4), the election of commissioners must be held annually and conducted in accordance with Title 13, chapter 1, part 5. The term of office of commissioners shall commence on the day of their election.

(2) (a) At the first primary or general election following the organization of a district and in districts organized and in existence on March 1, 1921, and that, on petition, have been divided into divisions, three commissioners must be elected, with one commissioner being elected from each division.

(b) A commissioner must be an actual landowner in the division in which the commissioner is elected.

(c) One of the commissioners, to be determined by lot, shall hold office for 1 year; another of the commissioners, to be determined by lot, shall hold office for 2 years; and the third commissioner shall hold office for 3 years.

(3) After the election of the initial commissioners, one commissioner must be elected each year. Commissioners elected after the initial election shall hold office for a term of 3 years. The person elected as a commissioner in each year to succeed the commissioner whose term is then expiring must be elected as a commissioner from the same division as the commissioner whose term expires.

(4) Each commissioner must be a resident of a county where a portion of the district lands is situated.

History: En. Sec. 19, Ch. 129, L. 1921; re-en. Sec. 7283, R.C.M. 1921; amd. Sec. 3, Ch. 50, L. 1925; re-en. Sec. 7283, R.C.M. 1935; amd. Sec. 41, Ch. 460, L. 1977; R.C.M. 1947, 89-2302; amd. Sec. 400, Ch. 571, L. 1979; amd. Sec. 11, Ch. 27, L. 1981; amd. Sec. 1, Ch. 349, L. 2003; amd. Sec. 251, Ch. 49, L. 2015.

Cross-References

85-8-303. Repealed. Sec. 15, Ch. 27, L. 1981.

History: En. Sec. 7283A by Sec. 4, Ch. 50, L. 1925; re-en. Sec. 7283.1, R.C.M. 1935; R.C.M. 1947, 89-2303; amd. Sec. 401, Ch. 571, L. 1979.

85-8-304. Results of election. The secretary of the board of commissioners shall enter the result of the election in the minutes of the board and file with the clerk of the district court creating the district a statement showing the names of the persons elected as commissioners, the names of the commissioners whose term will expire on the first Tuesday in May following, and the names of all of the persons who will compose the board of commissioners for the year next following the first Tuesday in May.

History: En. Sec. 7283B by Sec. 4, Ch. 50, L. 1925; re-en. Sec. 7283.2, R.C.M. 1935; R.C.M. 1947, 89-2304; amd. Sec. 1, Ch. 171, L. 1979; amd. Sec. 402, Ch. 571, L. 1979; amd. Sec. 12, Ch. 27, L. 1981.

Cross-References

Assessments on improvements — taxpayers' approval, limitations, and election procedures, 85-8-624.

85-8-305. Qualifications of electors. (1) At all such elections, except as herein otherwise expressly provided, the following persons holding title or evidence of title to lands within the district shall be entitled to vote:

(a) all of the persons having the qualifications of electors under the constitution and general laws of the state;

(b) guardians, administrators, executors, and trustees residing in the state;

(c) domestic corporations by their duly authorized agents.

(2) In all elections each elector shall be permitted to cast one vote for each 40 acres of land or major fraction thereof in the district owned by such elector, but any elector owning 20 acres or less shall be entitled to one vote.

History: En. Sec. 7283C by Sec. 4, Ch. 50, L. 1925; re-en. Sec. 7283.3, R.C.M. 1935; R.C.M. 1947, 89-2305.

85-8-306. Commissioner candidate filing. A person eligible to vote in the district may file a declaration of candidacy for the office of commissioner within the time period specified in 13-1-502. If a write-in candidate has filed pursuant to 13-1-502, the elector may write on the ballots the name or names of the persons for whom they desire to vote.

History: En. Sec. 7283D by Sec. 4, Ch. 50, L. 1925; re-en. Sec. 7283.4, R.C.M. 1935; R.C.M. 1947, 89-2306; amd. Sec. 403, Ch. 571, L. 1979; amd. Sec. 13, Ch. 27, L. 1981; amd. Sec. 41, Ch. 250, L. 1985; amd. Sec. 252, Ch. 49, L. 2015.

85-8-307. Vacancies. If a vacancy occurs on the board of commissioners, the remaining members of the board shall elect some qualified elector to fill the vacancy, and the person elected holds office for the unexpired term and until a successor is elected and qualified. The person appointed must be appointed as a commissioner for the division in which the vacancy exists. If there is a vacancy or vacancies on the board of commissioners by reason of no appointment being made, due to the failure of the remaining members of the board to act or on account of no election being held, the judge of the court having jurisdiction over the drainage district shall, upon the receipt of a petition signed by 10% of the resident owners of land in the district, appoint to the vacancy or vacancies the person that the petition may designate.

History: En. Sec. 20, Ch. 129, L. 1921; re-en. Sec. 7284, R.C.M. 1921; amd. Sec. 5, Ch. 50, L. 1925; amd. Sec. 1, Ch. 169, L. 1929; re-en. Sec. 7284, R.C.M. 1935; R.C.M. 1947, 89-2307; amd. Sec. 2806, Ch. 56, L. 2009.

85-8-308. Oath and bond of commissioners — quorum. (1) Before entering upon their duties, the commissioners shall:

(a) take and subscribe an oath to support The Constitution of the United States and The Constitution of the State of Montana, to faithfully and impartially discharge their duties as commissioners, and to render a true account of their doings to the court by which they are appointed whenever required by law or the order of the court; and

(b) execute a bond running to the clerk of court and the clerk's successors in office as obligees, to be filed with the clerk for the benefit of the parties interested, in an amount to be fixed by the court or presiding judge and with sureties to be approved by the court or presiding judge, conditioned for the faithful discharge of their duties as commissioners and the faithful accounting for and application of all money that comes into their hands as commissioners.

(2) A majority shall constitute a quorum, and a concurrence of a majority in any matter within their duties is sufficient to its determination.

History: En. Sec. 17, Ch. 129, L. 1921; re-en. Sec. 7281, R.C.M. 1921; re-en. Sec. 7281, R.C.M. 1935; R.C.M. 1947, 89-2218; amd. Sec. 2807, Ch. 56, L. 2009.

Cross-References

Oaths, Title 1, ch. 6.

Bonds of county officers and employees, Title 2, ch. 9, part 7.

85-8-309 and 85-8-310 reserved.

85-8-311. Record and vouchers. The commissioners shall keep an accurate record of all moneys collected on account of the work under their charge and of all payments made by them; shall take vouchers for such payments; and shall keep full, accurate, and true minutes of all their proceedings.

History: En. Sec. 21, Ch. 129, L. 1921; re-en. Sec. 7285, R.C.M. 1921; re-en. Sec. 7285, R.C.M. 1935; R.C.M. 1947, 89-2308.

85-8-312. Custody of funds. The county treasurer of the county in which the court having jurisdiction of the district is located is the custodian of all funds belonging to the district, and the treasurer shall pay out the funds upon warrants drawn by the board of commissioners of the district, except that the bonds of the district and the interest coupons on the bonds are payable as they mature on presentation to the treasurer.

History: En. Sec. 22, Ch. 129, L. 1921; re-en. Sec. 7286, R.C.M. 1921; re-en. Sec. 7286, R.C.M. 1935; R.C.M. 1947, 89-2309; amd. Sec. 2808, Ch. 56, L. 2009.

Cross-References

Office of County Treasurer, Title 7, ch. 6, part 21.

85-8-313. Annual report of commissioners. On the first Tuesday of July of each year the commissioners shall file in the office of the clerk of the court having jurisdiction in the matter an itemized statement of all their receipts and disbursements and leave said report in such office for examination by parties interested at all times.

History: En. Sec. 23, Ch. 129, L. 1921; re-en. Sec. 7287, R.C.M. 1921; re-en. Sec. 7287, R.C.M. 1935; R.C.M. 1947, 89-2310.

85-8-314. Court control and compensation of commissioners. (1) The commissioners must receive for their services compensation that the court or presiding judge may determine. They must also receive their actual reasonable expenses. They are at all times under the control or direction of the court or presiding judge and shall obey the court's or judge's directions, and for failure to do so, they shall forfeit their compensation and be dealt with summarily as for contempt. Suit may also be brought upon their bonds, in the name of the clerk of the court, and the amount recovered must be applied to the construction of the work or to the party injured as justice may require.

(2) The court may at any time require the commissioners to make a report on any matter or matters connected with their duties as commissioners and after hearing may remove from office any or all of the commissioners for neglect of duty, for malfeasance in office, or for other good cause. The court may at any time require the commissioners to give new bonds to the clerk

of court and may fix the amount of the bonds. The bonds must be submitted to the court or the presiding judge for approval.

History: (1)En. Secs. 24, 25, 26, Ch. 129, L. 1921; re-en. Secs. 7288, 7289, 7290, R.C.M. 1921; re-en. Secs. 7288, 7289, 7290, R.C.M. 1935; Secs. 89-2311, 89-2312, 89-2313, R.C.M. 1947; (2)En. Sec. 92, Ch. 129, L. 1921; re-en. Sec. 7356, R.C.M. 1921; re-en. Sec. 7356, R.C.M. 1935; Sec. 89-2812, R.C.M. 1947; R.C.M. 1947, 89-2311, 89-2312, 89-2313, 89-2812; amd. Sec. 2809, Ch. 56, L. 2009.

85-8-315. Presumption of regularity of commissioners' acts. Commissioners of drainage districts are hereby declared to be public officers. The presumption shall be in favor of the regularity and validity of all their official acts. Whenever any report of the commissioners of any drainage district or any part of any such report is contested, remonstrated against, or called in question, the burden of proof shall rest upon the contestant, remonstrant, or questioner.

History: En. Sec. 95, Ch. 129, L. 1921; re-en. Sec. 7359, R.C.M. 1921; re-en. Sec. 7359, R.C.M. 1935; R.C.M. 1947, 89-2815.

85-8-316 through 85-8-320 reserved.

85-8-321. Organization, appointments, and preliminary report. (1) Within 10 days after the commissioners are appointed and qualified, they shall meet and organize by electing one member as president and by electing a secretary, who may or may not be a member of the board.

(2) The commissioners shall appoint one or more attorneys to assist in the establishment of the district, advise with its officers, agents, and employees, and prepare reports and other necessary documents. The court shall allow the attorney or attorneys just compensation to be taxed in the case.

(3) The commissioners shall appoint a competent civil and drainage engineer, who may be an individual, a partnership, or a corporation, who may employ assistants and make surveys, and who, with the approval of the court, may employ a consulting engineer or secure expert advice. The expense of the engineer, the engineer's assistants, and the consulting engineer must be taxed as expenses under the petition. The commissioners shall personally examine the lands in the district and make a preliminary report to the court that states:

(a) whether the proposed work is necessary or would be of use in carrying out the purposes of the petition;

(b) whether the proposed work would promote the public health;

(c) whether the proposed work would promote the public welfare;

(d) whether the total benefits from the proposed work will exceed the cost of the work, together with the damages resulting from the work, and in arriving at this, they shall include all benefits and all damages resulting from the work both within and outside of the district.

(4) The commissioners shall in the report fix, as near as may be, and report to the court the boundaries of the proposed drainage district. The boundaries may not be changed from those in the petition described so as to deprive the court of jurisdiction by reason of not having on the petition the required number of signers owning land within the changed boundaries.

History: En. Sec. 27, Ch. 129, L. 1921; re-en. Sec. 7291, R.C.M. 1921; re-en. Sec. 7291, R.C.M. 1935; R.C.M. 1947, 89-2314; amd. Sec. 2810, Ch. 56, L. 2009.

85-8-322. Adoption of feasible plan. If said proposed work, as described in the petition, is not best suited to carry out the purposes of the petition, the commissioners shall consider and base their report upon the one best suited to carry out those purposes and propose to the court the one considered by them.

History: En. Sec. 28, Ch. 129, L. 1921; re-en. Sec. 7292, R.C.M. 1921; re-en. Sec. 7292, R.C.M. 1935; R.C.M. 1947, 89-2315.

85-8-323. Hearing and notice on preliminary report. Upon the filing of the preliminary report the court or the presiding judge thereof shall by order fix a time and place when and where the same shall be heard at some general or special term of said court, not less than 30 days from the filing of said report. Notice of the time and place of hearing upon said preliminary report shall be given to all interested persons by publishing a brief notice of the filing of said report, including a brief statement of the substance of said report, in one or more newspapers published in each county in which any land in said proposed drainage district shall be situated (or, if no newspaper is published in said county, in one or more newspapers in an adjoining county) once in each week for 3 successive weeks prior to the day appointed for hearing thereon. Said notice shall:

(1) describe all lands included by said report in said district which were not included therein by the petition and state that such lands are to be included in said district; and

(2) describe all lands excluded from said district which were by the petition included therein and shall state that such lands are to be excluded from said district.

History: En. Sec. 29, Ch. 129, L. 1921; re-en. Sec. 7293, R.C.M. 1921; re-en. Sec. 7293, R.C.M. 1935; R.C.M. 1947, 89-2316.

85-8-324. Adjournment of hearing or trial of issues. Upon the day fixed for hearing upon said report, said court may adjourn said hearing for good cause or may proceed to hear, try, and determine all issues arising upon said report.

History: En. Sec. 30, Ch. 129, L. 1921; re-en. Sec. 7294, R.C.M. 1921; re-en. Sec. 7294, R.C.M. 1935; R.C.M. 1947, 89-2317.

85-8-325. Remonstrance by interested parties. Any interested party may appear and remonstrate against said report or any material part thereof. All remonstrances shall be in writing, be verified on oath, be filed at least 5 days before the day fixed for hearing, and shall set forth the facts upon which they are based.

History: En. Sec. 31, Ch. 129, L. 1921; re-en. Sec. 7295, R.C.M. 1921; re-en. Sec. 7295, R.C.M. 1935; R.C.M. 1947, 89-2318.

85-8-326. Service of owners of added lands. When lands are added to the district, the owners thereof shall be served with said notice as provided for serving of notice of hearing on the petition.

History: En. Sec. 32, Ch. 129, L. 1921; re-en. Sec. 7296, R.C.M. 1921; re-en. Sec. 7296, R.C.M. 1935; R.C.M. 1947, 89-2319.

85-8-327. Procedure at court hearing and order. (1) All issues arising upon said preliminary report shall be tried by the court without a jury.

(2) If the court shall find in favor of the remonstrance or if said report be that the proposed work will not promote the public health and will not promote the public welfare or that the benefits from said proposed work will not exceed the damages and cost of construction and no remonstrance against said report is filed, the petition shall be dismissed, the costs taxed against the petitioners, and judgment entered therefor, as provided in 85-8-350.

(3) If the preliminary report be that the benefits of said proposed work (or work proposed by the commissioners) will exceed the damages and the cost of construction and that the public health will be promoted thereby or that the public welfare will be promoted thereby and no remonstrance thereto is filed or if on the trial of the issues made on said report the court finds that the benefits will exceed the damages and cost of construction and that the public health or the public welfare will be promoted by said proposed work, the court shall make and file such findings in writing and make an order confirming said report or directing amendment of the report to conform to the findings of said court, and when so amended the court shall by order confirm the same and direct said commissioners to proceed with said work with all convenient speed.

(4) Such findings and order shall be final and conclusive unless appealed from to the supreme court within 30 days after filing thereof.

History: En. Secs. 33, 34, 35, Ch. 129, L. 1921; re-en. Secs. 7297, 7298, 7299, R.C.M. 1921; re-en. Secs. 7297, 7298, 7299, R.C.M. 1935; R.C.M. 1947, 89-2320, 89-2321, 89-2322.

Cross-References

Judgment on dismissal of proceedings — assessment of costs, 85-8-350.

85-8-328. Corporate nature of drainage district. (1) Upon entering of such order of confirmation of said preliminary report of record, such drainage district shall be and is thereby declared to be organized as a drainage district, by the name mentioned in said petition or such other name as the court shall fix, with the boundaries fixed by the order confirming the report of said commissioners, to be a body corporate, by said name fixed in said order, with the right to sue and be sued, to adopt and use a seal, and to have perpetual succession.

(2) The commissioners appointed as aforesaid and their successors in office shall, from the entry of such order of confirmation, constitute the corporate authority of said drainage district, exercise the functions conferred on them by law, and do all things and perform all acts necessary to the construction and preservation of the proposed work.

History: **En. Secs. 36, 37, Ch. 129, L. 1921; re-en. Secs. 7300, 7301, R.C.M. 1921; re-en. Secs. 7300, 7301, R.C.M. 1935; R.C.M. 1947, 89-2323, 89-2324.**

85-8-329. Necessity of preliminary proceedings. All proceedings herein required, prior to the entry of such order of confirmation of record, shall be deemed to be and are hereby declared to be necessary to the formation of said body corporate.

History: **En. Sec. 38, Ch. 129, L. 1921; re-en. Sec. 7302, R.C.M. 1921; re-en. Sec. 7302, R.C.M. 1935; R.C.M. 1947, 89-2325.**

85-8-330 through 85-8-340 reserved.

85-8-341. Preparation of report — contents. (1) As soon as may be after the confirmation of the preliminary report or within such time as the court may direct, said commissioners shall proceed to have all necessary levels taken and surveys made and shall lay out said proposed work; make a map thereof and plans, profiles, and other specifications thereof; and report in writing to the court:

(a) whether the starting points, routes, and termini of the proposed work and the proposed location thereof as contained in the petition are in all respects proper and feasible and, if not, shall report such as are most proper and feasible;

(b) if it be found necessary to change the boundaries of said proposed district, as fixed by them previously, they shall report said proposed change and, if possible, shall report the names, residence, and post-office addresses of the owner or owners of all lands affected by said change in boundaries, but no such change in boundaries shall be made as to deprive the court of jurisdiction; provided, however, that if the owners of lands adjacent to the district petition to have their lands brought into the district such may be considered the same as original petitioners in making changes of boundaries;

(c) what lands within the district, as reported by them, will be injured by the proposed work, if any, and they shall therein award to each tract, lot, easement, or interest, by whomsoever held, the amount of damages which they shall determine will be caused to the same by the proposed work;

(d) what lands (including improvements when improvements receive benefits), easements, irrigation ditches, cities, towns, counties, individuals, and other corporations and persons should be assessed for the payment of any part of the cost of constructing the proposed drains, levees, or other facilities, repairs thereto, maintenance thereof, and the incidental expenses attached to the establishment of such drainage district;

(e) the total amount, as near as they can determine, that said proposed work will cost, which cost shall include all incidental expenses, the reasonable cost of organizing said district, the costs of proceeding and all probable damage to lands, both within and without the district, together with a reasonable attorney fee for the petitioners, which cost will hereinafter be referred to as cost of construction.

(2) If the cost of construction of any particular part of the work so proposed to be done should be assessed upon any particular tract or tracts, lot or lots of land, including improvements where the same are benefited or upon any corporation or corporations, the commissioners shall so specify, and in their report they shall fix and determine the sums which should be assessed against said tracts, lots, and corporations and assess such sum against said tracts, lots, and corporations.

(3) If any individual, association of individuals, or corporation would, in the judgment of said commissioners, derive special benefits from the whole or any part of such proposed work, the commissioners shall so report and assess those benefits and assess against the recipient thereof its proportionate share of the costs of said proposed work. The word "corporation", whenever contained in this chapter, shall be construed to include:

(a) railroad companies;
(b) other private and quasi-public corporations of all kinds;
(c) towns;
(d) cities;
(e) villages;
(f) other drainage districts; and
(g) counties.

(4) They shall apportion and assess the part of this cost of construction, not assessed as above, against the several benefited tracts, lots (including improvements when the same are benefited), and easements in said drainage district, in proportion to the benefits which they have assessed against the same, by setting down opposite each tract, lot, or easement the sum which they assess against the same for construction. The assessments which together make up the cost of construction, as above defined, are herein referred to as assessments for construction.

(5) The commissioners shall further report to the court the probable cost of keeping said proposed work in repair after it is completed.

(6) They shall include in their report said map, plans, and other specifications and file the same with their report.

Sec. 7313, R.C.M. 1935; Sec. 89-2336, R.C.M. 1947; R.C.M. 1947, 89-2326, 89-2327, 89-2328, 89-2329, 89-2330(part), 89-2331, 89-2332, 89-2333, 89-2334, 89-2335, 89-2336.

85-8-342. Apportionment of costs. (1) In apportioning the costs and expenses mentioned in 85-8-341(1)(d), the following classes of property, persons, corporations, and municipalities shall be assessed:

(a) all lands which are swampy, bogged, or waterlogged and will be relieved and improved by virtue of the construction of the proposed drainage system;

(b) all lands which are becoming or are liable to become swampy, bogged, or waterlogged and which the construction of the proposed drainage system will prevent from being thus affected;

(c) all lands from which surface or seepage waters will enter or can be conducted into the proposed drainage system;

(d) all lands and improvements thereto upon which or through which surface or seepage water will be prevented from flowing or can be prevented from flowing by virtue of the construction of the proposed drainage system;

(e) all lands or improvements which will sustain any direct benefit of any kind or character whatsoever;

(f) all railways, whether operated by steam, electricity, or otherwise, whose right-of-way or roadbed will be benefited or can be benefited by reason of the construction of the proposed drainage system or levee project;

(g) all public utilities whose easements or other facilities within the district will receive benefit from the proposed work;

(h) all owners of irrigation ditches or canals included within said district or from which water seeps, drains, or wastes to, upon, or through lands included within the district;

(i) the county or counties which the proposed drainage system traverses or which will be benefited as to public health, convenience, welfare, or improvement of any public highway;

(j) all incorporated cities or towns and lands included within townsites and subdivisions, in whole or in part, directly benefited by reason of the construction of the proposed drainage system.

(2) In apportioning the costs and expenses mentioned in 85-8-341(1)(d), the following principles shall be regarded:

(a) All of the above classes of lands, improvements, railways, public utilities, irrigation ditches, counties, cities, towns, townsites, and subdivisions shall be liable to assessment for the construction of the proposed drainage system in such proportions as may seem just and equitable.

(b) The benefits to accrue from the construction of the proposed drainage system to a railway, county, incorporated city or town, and lands included within a platted townsite or subdivision being of a different character than those to accrue to agricultural lands shall be considered in apportioning the assessment, and also the damages and inconvenience caused by seepage and waste waters from irrigation ditches and from the higher lands shall be considered in apportioning the assessment to them.

(c) In the case of the construction of levees or other flood control facilities, lands and improvements which are located or constructed at an elevation which is greater than the elevation of the design flood level which said levees or other flood control facilities are designed to protect against shall not be assessed for the payment of any part of the cost of constructing the levees or other flood control facilities, nor shall such lands or improvements be assessed for the payment of any part of the cost for repairs thereto, maintenance thereof, or the incidental expenses attached to the establishment of such drainage district.

(d) The assessment against each tract, lot, easement, town, city, county, irrigation ditch, railroad, public utility, individual, or corporation owner thereof which will be benefited by the proposed work or which, in any manner, contributes to the swamped, seeped, bogged, or waterlogged condition of any land within said district and the proportionate share of cost of construction of the proposed drainage system which each of them should bear shall be shown in tabular form, the columns of which shall be headed as follows: Column 1—Owners of property assessed; 2—Description of property assessed; 3—Number of acres assessed; 4—Amount of benefits assessed; 5—Number of acres taken for right-of-way; 6—Value of property taken; 7—Damages; 8—Assessment for costs; which shall be known as the assessment roll. Where property, persons, or corporations, public or private, contribute to the damaged condition of the lands to be reclaimed, it shall not be necessary to assess in such assessment roll the benefits to be derived by or accruing to them.

History: En. Sec. 43, Ch. 129, L. 1921; re-en. Sec. 7307, R.C.M. 1921; amd. Sec. 2, Ch. 169, L. 1929; re-en. Sec. 7307, R.C.M. 1935; amd. Sec. 1, Ch. 409, L. 1973; R.C.M. 1947, 89-2330(part).

Cross-References

Procedure to levy additional assessments, 85-8-615.

85-8-343. Commissioners to use most feasible plan. The commissioners shall not be confined to the points of commencement, routes, or termini of the drains or ditches or the number, extent, or size of the same or the location, plan, or extent of any levee, ditch, or other work as proposed by the petitioners but shall locate, design, lay out, and plan the same in such manner as to them shall seem best to promote the public health or welfare and to drain or to protect the lands, including improvements, of the parties interested with the least damage and the greatest benefit to all lands affected thereby. Any plan proposed by the commissioners may, on the application of any interested person, on the hearing provided for hereinafter, or on the application of the commissioners, be altered by the court, by written order, in such manner as shall appear to the court to be just.

History: En. Sec. 50, Ch. 129, L. 1921; re-en. Sec. 7314, R.C.M. 1921; re-en. Sec. 7314, R.C.M. 1935; amd. Sec. 5, Ch. 409, L. 1973; R.C.M. 1947, 89-2337.

85-8-344. Alteration of boundaries. If the commissioners find that the proposed district, as described in the filed petition, will not embrace all of the lands, including improvements, that will be benefited by the proposed work or that it will include lands that will not be benefited and are not necessary to be included in said district for any purpose, they shall extend or contract the boundaries of the proposed district so as to include or exclude all such lands or improvements, as the case may be, and the boundaries adopted and reported by them, upon the hearing of their report, as hereinafter provided, upon their application or that of any person interested, may be altered by the court in such manner as shall appear to be just; provided, that the alteration of boundaries as aforesaid shall not have the effect of so far enlarging or contracting the proposed district as to render such petition void or dismissable. Said report shall be filed with the clerk of the court.

History: En. Sec. 51, Ch. 129, L. 1921; re-en. Sec. 7315, R.C.M. 1921; re-en. Sec. 7315, R.C.M. 1935; amd. Sec. 6, Ch. 409, L. 1973; R.C.M. 1947, 89-2338.

85-8-345. Notice of hearing of report. (1) Upon the filing of the report under 85-8-341, the court shall make an order fixing the time and place when and where all interested persons may appear and protest against the confirmation of the petition. The clerk of court shall give notice to all interested parties by publication of the order for at least 3 successive weeks before the date of the hearing in at least one newspaper in each county in which lands located in the district are situated. The notice must contain a statement of the time and place of the hearing of the report and a brief statement of the substance of the report.

(2) Upon a date not later than the date of the first publication of the notice referred to in subsection (1), the clerk of court shall also cause to be mailed to each of the persons or corporations recommended by the report to be assessed or whose lands are recommended by the report to be included in the district, at the person's or corporation's last-known post-office address, a notice containing a brief description of the land or easement belonging to the person or corporation benefited or damaged, the net damage awarded to the tract, parcel, easement, or corporation, and the sum assessed against the benefited parcel, tract, easement, or corporation.

History: En. Secs. 52, 53, Ch. 129, L. 1921; re-en. Secs. 7316, 7317, R.C.M. 1921; re-en. Secs. 7316, 7317, R.C.M. 1935; R.C.M. 1947, 89-2339, 89-2340; amd. Sec. 2811, Ch. 56, L. 2009.

85-8-346. Modification of report. If the court finds that the report requires modification, the same may, by order of the court, be referred back to the commissioners, who may be required to modify it in any respect.

History: En. Sec. 54, Ch. 129, L. 1921; re-en. Sec. 7318, R.C.M. 1921; re-en. Sec. 7318, R.C.M. 1935; R.C.M. 1947, 89-2341.

85-8-347. Confirmation of report — appeals. If there be no remonstrance or if the finding be in favor of the validity of the proceedings or after the report shall have been modified to conform to the findings, the court shall confirm the report. The order of confirmation shall be final and conclusive, the proposed work shall be established and authorized, and the proposed assessments approved and confirmed unless within 30 days an appeal be taken to the supreme court. The said order of confirmation shall also fix the commissioners' bond.

History: En. Sec. 55, Ch. 129, L. 1921; re-en. Sec. 7319, R.C.M. 1921; re-en. Sec. 7319, R.C.M. 1935; R.C.M. 1947, 89-2342.

Cross-References

Construction assessments — annual installment, 85-8-611.

85-8-348. Modification of court order. Said order of confirmation may, at the same or at any subsequent term of said court, be revised, modified, or changed, in whole or in part, on petition of the commissioners, after such notice to parties adversely interested as the court may require.

History: En. Sec. 56, Ch. 129, L. 1921; re-en. Sec. 7320, R.C.M. 1921; re-en. Sec. 7320, R.C.M. 1935; R.C.M. 1947, 89-2343.

85-8-349. Supplemental report. At any time prior to making the order confirming said report or thereafter, the court may permit the commissioners to present and file a supplemental report or amend their report as to any matter which, pursuant to the provisions hereof, was or might have been included in the original report presented by them, and after reasonable notice given to all parties interested, in such manner as the court shall direct, the court may, upon the hearing in said matter, make such order as the case may require.

History: En. Sec. 57, Ch. 129, L. 1921; re-en. Sec. 7321, R.C.M. 1921; re-en. Sec. 7321, R.C.M. 1935; R.C.M. 1947, 89-2344.

85-8-350. Judgment on dismissal of proceedings — assessment of costs. (1) In case the petition or proceedings are dismissed as provided in 85-8-327, a judgment shall be entered for the costs, expenses, and liabilities incurred in said proceedings against the petitioners and in favor of the commissioners, but for the benefit of those who have rendered services or advanced money in the prosecution of said proceedings or have recovered costs on successful contests therein.

(2) In case the proceedings are dismissed at any time or the district is discontinued for any cause subsequent to the time provided in 85-8-327, a judgment shall be entered directing the commissioners of the district to assess the costs, expenses, and liabilities incurred in said proceedings, up to and including the time of such dismissal and discontinuation, on an acreage basis against the lands in said district, which assessment shall be a lien upon said lands from the date of said judgment superior to the lien of any other judgment, mortgage, or construction lien against said lands. Said assessment shall be verified by the commissioners of the district the same as assessments to pay costs of construction. Such assessments shall be spread upon the tax rolls of the counties in which said district is situated and shall be collected by the county treasurers of such counties the same as assessments to pay costs of construction are collected.

Such assessments shall be payable on or before November 30 following the date upon which they are so spread upon the assessment roll of such counties. The money so collected shall be paid out upon warrants issued by the commissioners of the district to those who have rendered service or advanced money in connection with said district or have recovered costs on successful contests therein. Should such assessment, for any cause, be not sufficient for all such costs, expenses, and liabilities, then additional assessments shall be made and collected in like manner until sufficient funds have been raised to pay all such costs, expenses, and liabilities.

History: **En. Sec. 58, Ch. 129, L. 1921; re-en. Sec. 7322, R.C.M. 1921; amd. Sec. 3, Ch. 169, L. 1929; re-en. Sec. 7322, R.C.M. 1935; R.C.M. 1947, 89-2345; amd. Sec. 149, Ch. 370, L. 1987.**

Cross-References

Procedure at court hearing and order, 85-8-327.

85-8-351. Statement of costs before entry of judgment. Before any such judgment is entered, said commissioners shall file with the clerk of the district court in which said proceedings were instituted an itemized statement of such costs and expenses, duly verified, upon which an order shall issue requiring said petitioners or landowners to show cause before said court, at a time and place named, why judgment should not be entered against said petitioners or landowners for the amount of said costs and expenses. Notice of the hearing of said order to show cause shall be given to said petitioners or landowners by mailing to each a copy thereof, to their last-known post-office address, at least 20 days prior to the time set for hearing and by publication of the same in one or more newspapers published in the county where the proceedings are pending at least 3 successive weeks prior to the day set for such hearing. Said notice need not contain an itemized statement of said account.

History: **En. Sec. 59, Ch. 129, L. 1921; re-en. Sec. 7323, R.C.M. 1921; amd. Sec. 4, Ch. 169, L. 1929; re-en. Sec. 7323, R.C.M. 1935; R.C.M. 1947, 89-2346.**

85-8-352. Contribution among petitioners. All petitioners shall, among themselves, contribute to the payment of said judgment in proportion to the number of acres of land they have within the boundaries of the proposed district at the time of filing of said petition.

History: **En. Sec. 60, Ch. 129, L. 1921; re-en. Sec. 7324, R.C.M. 1921; re-en. Sec. 7324, R.C.M. 1935; R.C.M. 1947, 89-2347.**

85-8-353 through 85-8-360 reserved.

85-8-361. Contracts. In all cases when the work to be done at any one time under the direction of the commissioners will, in their opinion, cost more than $15,000, the work must be awarded to the lowest responsible bidder. The commissioners shall advertise for sealed bids, by notice published in a newspaper published in the county in which the petition is filed, and may advertise in one or more newspapers published elsewhere. If there is no newspaper published in the county in which the petition is filed, the commissioners shall advertise in a newspaper published in an adjoining county. The notice must specify the time and place when and where the bids advertised will be opened, the kind of work to be contracted for, and the terms of payment. The commissioners may award contracts if in their judgment the contracts are necessary and shall reserve the right to reject any and all bids.

History: **En. Sec. 81, Ch. 129, L. 1921; re-en. Sec. 7345, R.C.M. 1921; re-en. Sec. 7345, R.C.M. 1935; R.C.M. 1947, 89-2801; amd. Sec. 1, Ch. 96, L. 1999; amd. Sec. 1, Ch. 79, L. 2013.**

Cross-References

Public contracts, Title 18, ch. 1.

85-8-362. Interest of commissioners in contracts forbidden. The commissioners may not, during their term of office, be interested, directly or indirectly, in any contract for the construction of any drain, ditch, levee, or other work in the drainage district, in the sale of materials for the drainage district, or in the wages of or supplies for personnel or teams employed on any construction work in the district.

History: **En. Sec. 82, Ch. 129, L. 1921; re-en. Sec. 7346, R.C.M. 1921; re-en. Sec. 7346, R.C.M. 1935; R.C.M. 1947, 89-2802; amd. Sec. 2812, Ch. 56, L. 2009.**

Cross-References

Proscribed acts related to contracts and claims, Title 2, ch. 2, part 2.

85-8-363. Commissioners' right of entry. The commissioners, their agents, servants, and employees shall have the right to go upon all lands along any drain, ditch, levee, or embankment in their district to inspect, deepen, widen, and repair the same, whenever necessary, doing no unnecessary damage, and shall not be liable for trespass therefor.

History: **En. Sec. 70, Ch. 129, L. 1921; re-en. Sec. 7334, R.C.M. 1921; re-en. Sec. 7334, R.C.M. 1935; R.C.M. 1947, 89-2406.**

Cross-References

Surface water and ground water — entry on land, 85-2-115.

85-8-364. Payment or tender of damages. (1) The damages allowed to the owners of lands must be paid or tendered before the commissioners are authorized to enter upon the lands (for damage to which the award is made) for the construction of any proposed drains, ditches, or levees. If the owner is unknown, if there is a contest in regard to the ownership of the land, if the owner will not receive payment, if there exists a mortgage or other lien against the land, or if the commissioners cannot for any other reason pay the owner, they may deposit the damages with the clerk of court for the benefit of the owner or parties interested, to be paid or distributed as the court shall direct. The deposit has the same effect as the tender to and acceptance of the damages awarded by the owner of the land.

(2) This section does not prevent the commissioners or their agents, servants, and employees from going upon the lands to do any and all work found necessary prior to making their assessment of benefits and award of damages and the trial on their report of the benefits and damages.

History: **En. Sec. 83, Ch. 129, L. 1921; re-en. Sec. 7347, R.C.M. 1921; re-en. Sec. 7347, R.C.M. 1935; R.C.M. 1947, 89-2803; amd. Sec. 2813, Ch. 56, L. 2009.**

85-8-365. Location of drains. When practicable, said drains provided for herein shall be laid out and constructed on the side of public highways or along natural watercourses.

History: **En. Sec. 84, Ch. 129, L. 1921; re-en. Sec. 7348, R.C.M. 1921; re-en. Sec. 7348, R.C.M. 1935; R.C.M. 1947, 89-2804.**

85-8-366. Drains on railroad lands. (1) Said commissioners shall have the right to lay out and construct all necessary drains, ditches, and levees across any railway right-of-way or yards in their district. Any railway company whose right-of-way or yards cross the line of any proposed drain, ditch, or levee shall open its right-of-way or yards and permit such drain, ditch, or levee to cross the same as soon as said drain, ditch, or levee is constructed to such right-of-way.

(2) Every drainage district shall be liable to the railway company whose right-of-way or yard any of its drains, ditches, or levees cross for the reasonable cost of the culverts and bridges made necessary by said drain, ditch, or levee crossing said right-of-way or yards but not of more expensive character than the average other culverts and bridges on said division of railway crossing streams or ditches of approximately the same width and depth and within 100 miles of said district ditches.

(3) Upon receiving 15 days' notice in writing, any railway company in whose right-of-way or yard any such drain, ditch, or levee is laid out shall open its right-of-way or yards and permit said commissioners and their contractors, agents, and employees to construct said drain, ditch, or levee or to repair, maintain, or clean out same across said right-of-way or yards. For every day after the end of said 15 days that said railroad company fails to open its said right-of-way or yard, as hereinbefore required, it shall forfeit $25 to said drainage district, to be collected in an action, as other forfeitures are collected, or set off against any damages that have been awarded to such company. If said railway company fails to open its right-of-way or yard along the line of said drainage district, drain, ditch, or levee, the commissioners may, at any time after the expiration of said 15 days, open such right-of-way and yard along the line of said drains, ditches, and levees and construct the same.

History: **En. Secs. 71, 72, 73, Ch. 129, L. 1921; re-en. Secs. 7335, 7336, 7337, R.C.M. 1921; re-en. Secs. 7335, 7336, 7337, R.C.M. 1935; R.C.M. 1947, 89-2407, 89-2408, 89-2409.**

85-8-367. Commissioners' powers during emergency. Commissioners having charge of any completed drain, ditch, levee, or other work constructed under any drainage law of the state of Montana, whether now in force or repealed, shall be authorized, in the case of an emergency, to make such repairs as may be necessary for the preservation and protection of the work under their control.

History: En. Sec. 63, Ch. 129, L. 1921; re-en. Sec. 7327, R.C.M. 1921; amd. Sec. 5, Ch. 169, L. 1929; amd. Sec. 1, Ch. 97, L. 1931; re-en. Sec. 7327, R.C.M. 1935; R.C.M. 1947, 89-2350(part).

Cross-References

Authority to borrow money and issue notes or bonds, 85-8-501.

85-8-368. Annual report — objections. (1) The commissioners shall, on or before the first Tuesday of March of each year, file with the clerk of court having jurisdiction a report in which they shall specify in detail:

(a) the emergency repairs which they have made during the preceding year;

(b) the labor and repairs then necessary to the preservation and protection of the work under their control;

(c) the places where such labor and repairs are especially needed;

(d) the amount of the outstanding indebtedness of the district; and

(e) the sum to be assessed against each tract, lot, easement, or corporation to pay all emergency repairs theretofore done, necessary labor and repairs to be done during the ensuing year, maintenance, incidental expenses, and interest on and principal of all outstanding indebtedness.

(2) No notice of the filing of such report shall be necessary. All such assessments shall be apportioned on the last assessment roll of drain districts or on the last assessments in drainage districts confirmed by the court having jurisdiction thereof.

(3) Within 30 days after filing such annual report, at a time and place to be fixed by the court or presiding judge, the court or presiding judge shall examine said report, hear all objections to the same, fix and determine the amount of such assessments, and cause such adjudication to be entered of record in said court and a certified copy of the same to be delivered to said commissioners.

History: (1), (2)En. Sec. 63, Ch. 129, L. 1921; re-en. Sec. 7327, R.C.M. 1921; amd. Sec. 5, Ch. 169, L. 1929; amd. Sec. 1, Ch. 97, L. 1931; re-en. Sec. 7327, R.C.M. 1935; Sec. 89-2350, R.C.M. 1947; (3)En. Sec. 64, Ch. 129, L. 1921; re-en. Sec. 7328, R.C.M. 1921; re-en. Sec. 7328, R.C.M. 1935; Sec. 89-2351, R.C.M. 1947; R.C.M. 1947, 89-2350(part), 89-2351.

Part 4
Alteration of District

85-8-401. Alterations or additions to district — petition required. (1) Whenever, in the judgment of the commissioners of any drain district or drainage district, it is necessary or will be beneficial to such district to make any alteration and/or any addition to the drainage system of such district, they shall file a petition with the clerk of the court having jurisdiction of such district, in which shall be stated:

(a) the proposed alteration of and/or the proposed addition to the drainage system of said district;

(b) the necessity therefor; and

(c) the probable cost of making such alteration and/or addition.

(2) Whenever such commissioners shall fail or refuse to file such petition or in event any landowners desire to file such petition, such petition may be filed by such landowners, provided the same be signed by the owners of at least 40% in area of the lands in said district.

History: En. Sec. 7364C by Sec. 2, Ch. 97, L. 1931; re-en. Sec. 7364.3, R.C.M. 1935; amd. Sec. 1, Ch. 70, L. 1953; R.C.M. 1947, 89-2702.

85-8-402. Hearing — notice and service. Upon the filing of a petition under 85-8-401, a judge of the district court shall set the petition for hearing and direct the clerk of court to give notice of the hearing. The notice must contain a concise statement of the proposed alteration or addition and the estimated cost of the alteration or addition. The notice must be served and published at least 20 days before the date fixed for the hearing. Service of the notice must be made by certified mail, addressed to each landowner and corporation that may be liable for the payment of any portion of the cost of making the alteration or addition, at the landowner's or corporation's post-office address, if the address can be ascertained by the exercise of due diligence. The notice must be published once a week for 20 days prior to the date of the hearing in a newspaper, to be designated in the order fixing the date for the hearing, published in the county where the court is held. However, if all interested landowners and corporations are served, the notice need not be published.

History: **En. Sec. 7364D by Sec. 2, Ch. 97, L. 1931; re-en. Sec. 7364.4, R.C.M. 1935; R.C.M. 1947, 89-2703; amd. Sec. 2814, Ch. 56, L. 2009.**

85-8-403. Court order — dismissal of petition. (1) A landowner or corporation may, at any time prior to 5 days before the date fixed for the hearing under 85-8-402, file objections to the petition. A copy of the objections must be delivered to the attorney for the commissioners, if they have an attorney of record, or to the presiding officer of the board of commissioners of the district, if there is no attorney of record, prior to filing the original objections with the clerk of court.

(2) If objections are made and filed by the owners of at least 75% in area of the lands in the district, the petition must be dismissed and further proceedings may not be taken. If the owners of less than 75% in area of the lands in the district object to the petition, then, on the date fixed for hearing or upon any day to which the hearing may be adjourned, the court having jurisdiction will hear testimony in support of and in opposition to the petition.

(3) After the hearing, the court shall determine whether the proposed alteration or addition is necessary and whether it will be beneficial to the district and improve the drainage system of the district and shall either approve or deny the petition or modify and change the proposed alteration or addition. If the court approves the petition or modifies and changes the alteration or addition proposed, the court shall by order direct the commissioners to proceed with the work with all convenient speed.

(4) As far as possible, the hearing must be conducted as other hearings and trials in the district courts of the state of Montana, and the laws of the state of Montana with reference to hearings and trials, as far as applicable, govern in the conduct of the hearings.

History: **En. Sec. 7364E by Sec. 2, Ch. 97, L. 1931; re-en. Sec. 7364.5, R.C.M. 1935; amd. Sec. 2, Ch. 70, L. 1953; R.C.M. 1947, 89-2704; amd. Sec. 2815, Ch. 56, L. 2009.**

85-8-404. Appeals and assessments. A party interested in the hearing under 85-8-402 who is aggrieved by the order of the court may appeal from the order to the supreme court of Montana within 30 days after the entry of the order. If an appeal is not taken within the time limit, the order of the court made upon the hearing is final and conclusive. If alterations or additions are authorized by the order, the alterations or additions must be made by the commissioners of the district and the cost apportioned in accordance with the last assessment roll of the drain district or in accordance with the last assessments of the drainage district confirmed by the court.

History: **En. Sec. 7364F by Sec. 2, Ch. 97, L. 1931; re-en. Sec. 7364.6, R.C.M. 1935; R.C.M. 1947, 89-2705; amd. Sec. 2816, Ch. 56, L. 2009.**

85-8-405. Exclusion of lands from district. Any lands within a drainage district, which district is not bonded or indebted and which lands have not been and will not in the future be benefited by the drainage system of the district and which lands do not contribute water to seep other lands in the district, may be excluded or eliminated from said district by an order of the district court of the county wherein the said lands are situate upon the proceedings hereinafter set forth being had.

History: **En. Sec. 1, Ch. 155, L. 1941; R.C.M. 1947, 89-2706.**

85-8-406. Court action — parties. An action for the exclusion of lands from any such drainage district may be brought in the district court of the county wherein said lands are situated by the owner or owners in fee of said lands, who shall be designated as the plaintiff or plaintiffs, and in said action the members of the board of drainage commissioners of said drainage district shall be made defendants.

History: **En. Sec. 2, Ch. 155, L. 1941; amd. Sec. 1, Ch. 196, L. 1943; R.C.M. 1947, 89-2707.**

85-8-407. Complaint required — contents. (1) Said action shall be commenced by filing in the office of the clerk of the district court a complaint which must contain:

(a) the title of the action, the name of the court and the county in which the action is brought, and the names of the parties to the action;

(b) a statement of the facts constituting the cause of the action, in ordinary and concise language;

(c) a demand for the relief which the plaintiff claims.

(2) The complaint shall be verified in the same manner as complaints in other civil actions.

History: **En. Sec. 3, Ch. 155, L. 1941; R.C.M. 1947, 89-2708.**

85-8-408. Summons. (1) Upon the filing of the complaint the clerk of the court shall issue a summons which shall contain, in addition to the matters specified in Rules 4 and 12(a), Montana Rules of Civil Procedure, a brief statement of the relief demanded and a description of the lands sought to be excluded from the drainage district.

(2) The summons shall be served upon the president and secretary of the board of drainage commissioners, and such service shall be deemed as service upon the drainage district.

History: **(1)En. Sec. 4, Ch. 155, L. 1941; Sec. 89-2709, R.C.M. 1947; (2)En. Sec. 5, Ch. 155, L. 1941; amd. Sec. 2, Ch. 196, L. 1943; Sec. 89-2710, R.C.M. 1947; R.C.M. 1947, 89-2709, 89-2710.**

85-8-409. Rules of practice applicable. The same rules relative to the filing of answers and replies relative to other causes of action affecting the title to real property shall apply in actions to exclude lands from a drainage district, and all issues arising may be tried by the court without a jury.

History: **En. Sec. 6, Ch. 155, L. 1941; amd. Sec. 45, Ch. 460, L. 1977; R.C.M. 1947, 89-2711.**

85-8-410. Court order excluding lands. If the issue shall be found in favor of the plaintiff, the court may make its order describing the lands to be excluded from the district, and a certified copy of the same shall be filed in the office of the county recorder of the county wherein the lands are situate. From and after the date of such order the lands shall no longer be liable for any assessment levied by the district against the lands excluded.

History: **En. Sec. 7, Ch. 155, L. 1941; R.C.M. 1947, 89-2712.**

85-8-411. Appeals. Appeals may be taken from the orders and judgments of the district court to the supreme court of the state of Montana in the same manner as appeals in other causes of action affecting the title to real property.

History: **En. Sec. 8, Ch. 155, L. 1941; R.C.M. 1947, 89-2713.**

Cross-References

Appeals to Supreme Court, Title 25, ch. 21.

85-8-412 through 85-8-420 reserved.

85-8-421. Procedure to bring other drained lands into district. (1) Whenever any drained lands outside a drainage district are receiving the benefits of the drains of said district, by direct or indirect, natural or artificial connection therewith, the commissioners of said district may report said facts to the court and ask that said lands, describing them, be brought into said district and assessed for the benefits received by them from the drains, ditches, or levees of said district.

(2) Upon the filing of said report, the court shall order the owners of such lands to be notified of the filing of said report and the contents thereof and shall require such owners to show cause at a time and place therein fixed, not less than 20 days thereafter, why their lands should not be brought into said district and assessed for said benefits.

(3) At the time and place fixed for hearing said report, any of said landowners may appear and remonstrate against the confirmation of said report. All remonstrances shall be in writing, verified, and shall set forth the facts on which they are based. All issues arising on said report shall be tried by the court without a jury.

History: **En. Secs. 85, 86, 87, Ch. 129, L. 1921; re-en. Secs. 7349, 7350, 7351, R.C.M. 1921; re-en. Secs. 7349, 7350, 7351, R.C.M. 1935; R.C.M. 1947, 89-2805, 89-2806, 89-2807.**

Cross-References

Assessment of unassessed, benefited lands, 85-8-618.

85-8-422. Court order for annexation — appeal. (1) If the court shall find that said lands or any of them are receiving the benefits of any such drain, ditch, or levee, the court shall so find in writing and shall order said lands to be annexed to and made a part of said district and benefits to be assessed against the same by the commissioners of said district.

(2) Said order shall be final and conclusive unless appealed from to the supreme court within 30 days from the date of entry thereof.

History: **En. Secs. 88, 89, Ch. 129, L. 1921; re-en. Secs. 7352, 7353, R.C.M. 1921; re-en. Secs. 7352, 7353, R.C.M. 1935; R.C.M. 1947, 89-2808, 89-2809.**

85-8-423. Assessments against annexed lands. The commissioners shall, after the time for appeal is past, assess against each parcel, tract, and easement of the annexed lands reasonable and just benefits and shall assess against these lands for construction and repairs such sums as are just. If lands similarly situated and benefited are found in the district, the annexed lands shall be assessed a like sum of benefits and damages as the similar lands in the district to which they are sought to be annexed and a sum for construction of the work, which shall be equal to all sums assessed, for the complete construction of the drainage system in the district to which they are sought to be annexed against lands having the same assessment of benefits in the district.

History: En. Sec. 90, Ch. 129, L. 1921; re-en. Sec. 7354, R.C.M. 1921; re-en. Sec. 7354, R.C.M. 1935; amd. Sec. 46, Ch. 460, L. 1977; R.C.M. 1947, 89-2810.

85-8-424. Confirmation of commissioners' report of assessments. The commissioners shall file their report and assessments in court. The court shall, by order, require said owners to show cause at a time and place therein fixed, not less than 20 days after the service of said order, why said report and assessments should not be confirmed. On the hearing of said order to show cause, if a jury trial is demanded, the court shall frame issues on benefits and damages and impanel a jury or adjourn the hearing thereon until some term of court when a jury is in attendance and take the verdict of a jury on such issues. All other issues arising on said report shall be tried by the court. The court shall order all necessary amendments of said report and make written findings of fact and, when said report is amended, shall by order confirm the same.

History: En. Sec. 91, Ch. 129, L. 1921; re-en. Sec. 7355, R.C.M. 1921; re-en. Sec. 7355, R.C.M. 1935; R.C.M. 1947, 89-2811.

Cross-References

Assessment of unassessed, benefited lands, 85-8-618.

Part 5
Bonds and Revenue

85-8-501. Authority to borrow money and issue notes or bonds. The commissioners may:

(1) borrow money, not exceeding the amount of assessment for the cost of construction and additional assessments, as provided in 85-8-367 and 85-8-368, unpaid at the time of borrowing, for the construction or repair of any work which they shall be authorized to construct or repair or for the payment of any indebtedness which they may have lawfully incurred; and

(2) issue notes or negotiable coupon bonds on the district, bearing interest, payable semiannually and not running beyond 1 year after the payment of the last installment of the assessment, on account of which money is borrowed, shall fall due.

History: En. Sec. 79, Ch. 129, L. 1921; re-en. Sec. 7343, R.C.M. 1921; re-en. Sec. 7343, R.C.M. 1935; amd. Sec. 13, Ch. 260, L. 1959; amd. Sec. 36, Ch. 234, L. 1971; R.C.M. 1947, 89-2501(1).

85-8-502. Resolution for issuance of notes or bonds. Before the issuance of said notes or bonds, the commissioners shall pass a resolution providing for the issuance of such notes or bonds. Said resolution shall fix the rate of interest which said notes or bonds shall bear, the time of payment, and, if redeemable before maturity, the date thereof; shall prescribe the denominations, not exceeding $1,000, and form thereof; and may provide that both the principal and interest of said notes and bonds shall be payable at some convenient banking house or trust company's office, to be named in said notes or bonds. Such notes or bonds and the coupons attached thereto shall bear the signatures of the president and the secretary of the drainage district. The corporate seal of the drainage district shall be affixed to each of the notes or bonds.

History: En. Sec. 79, Ch. 129, L. 1921; re-en. Sec. 7343, R.C.M. 1921; re-en. Sec. 7343, R.C.M. 1935; amd. Sec. 13, Ch. 260, L. 1959; amd. Sec. 36, Ch. 234, L. 1971; R.C.M. 1947, 89-2501(2).

85-8-503. Sale of notes or bonds. Upon execution, the notes or bonds must be deposited with the county treasurer, who shall register the notes or bonds in a book for that purpose that documents the number and amount of each note or bond, its date, the date payable and redeemable, where payable, and the person to whom issued. Upon sale of the notes or bonds, the county treasurer shall deliver the notes or bonds to the person or persons to whom they were sold, upon the person or persons making payment for the notes or bonds. The notes or bonds may be sold by the commissioners at either public or private sale, either with or without advertisement, if it is considered to be in the best interests of the district. The notes or bonds may not be sold at less than 97% of face value. The notes or bonds may not be held to make the commissioners personally liable but constitute a lien upon the assessments for the repayment of the principal and interest of the notes or bonds.

History: En. Sec. 79, Ch. 129, L. 1921; re-en. Sec. 7343, R.C.M. 1921; re-en. Sec. 7343, R.C.M. 1935; amd. Sec. 13, Ch. 260, L. 1959; amd. Sec. 36, Ch. 234, L. 1971; R.C.M. 1947, 89-2501(3); amd. Sec. 30, Ch. 253, L. 2011.

85-8-504. Disposition of excess money. In case any moneys derived from bonds sold to pay for the original construction of said improvement, now or hereafter, remain on hand after the work is completed in original construction and paid for and not raised for damages unpaid for, such residue may be used in the maintenance and repair, as provided in this chapter, before making assessments for such maintenance and repair.

History: En. Sec. 79, Ch. 129, L. 1921; re-en. Sec. 7343, R.C.M. 1921; re-en. Sec. 7343, R.C.M. 1935; amd. Sec. 13, Ch. 260, L. 1959; amd. Sec. 36, Ch. 234, L. 1971; R.C.M. 1947, 89-2501(4).

85-8-505. Refunding indebtedness of district. The court may, on the petition of the commissioners, authorize them to refund any lawful indebtedness of the district by:

(1) taking up and canceling all of its outstanding notes and bonds, as fast as they become due or before, if the holders thereof will surrender the same; and

(2) issuing in lieu thereof new notes or bonds of such district, payable in such longer time as the court shall deem proper, not to exceed in the aggregate the amount of all notes and bonds of the district then outstanding and the unpaid accrued interest thereon.

History: En. Sec. 80, Ch. 129, L. 1921; re-en. Sec. 7344, R.C.M. 1921; re-en. Sec. 7344, R.C.M. 1935; amd. Sec. 42, Ch. 234, L. 1971; R.C.M. 1947, 89-2502.

Part 6
Taxes and Assessments

85-8-601. Certification and collection of district taxes. (1) Subject to 15-10-420 and on or before the third Monday in August of each year, the commissioners shall certify to the department of revenue a correct list of all the district lands in each county and the owners of the lands, together with a statement of the amount of the total tax or assessment against the lands for district purposes for that year. The department of revenue shall immediately enter the assessment roll in the property tax record of the county for each year.

(2) The county treasurer of each county in which a drainage district is located, in whole or in part, shall collect and receipt for all taxes and assessments levied by the district in the same manner and at the same time as is required in the collection of taxes upon real estate for county purposes as provided in 15-16-102. However, the treasurer must receive from any taxpayer, at any time, the amount due on account of any district assessments of any kind, whether other taxes on the same real estate are paid or not. When a county is the possessor of a tax lien for any real estate on account of which the district taxes and assessments have been levied, the taxpayer may pay to the treasurer at any time any semiannual installment of the district tax or assessment, together with the penalty and interest to date of payment on the installment. However, the payment may not be considered a redemption of the property from the tax lien, but must be credited on account of any redemption that may later be made. In case of any payment pursuant to this subsection, a separate tax receipt must be issued showing exactly what assessments have been paid and showing that no other tax on the real estate has been received by the treasurer. However, the county treasurer may not collect, receive, or receipt for any taxes levied for county purposes upon real estate situated wholly or in part within any drainage district upon which an assessment for the purposes of the drainage district has been levied unless the assessment levied for the drainage district purposes is either paid as provided in this section and the receipt is presented to the county treasurer at the time the real estate taxes are paid or paid at the time the drainage district taxes are paid.

History: (1)En. Sec. 65, Ch. 129, L. 1921; re-en. Sec. 7329, R.C.M. 1921; re-en. Sec. 7329, R.C.M. 1935; amd. Sec. 1, Ch. 12, L. 1945; amd. Sec. 66, Ch. 391, L. 1973; Sec. 89-2401, R.C.M. 1947; (2)En. Sec. 1, Ch. 71, L. 1923; amd. Sec. 1, Ch. 73, L. 1935; re-en. Sec. 2172.1, R.C.M. 1935; amd. Sec. 1, Ch. 188, L. 1943; Sec. 84-4108, R.C.M. 1947; R.C.M. 1947, 84-4108(part), 89-2401; amd. Sec. 155, Ch. 27, Sp. L. November 1993; amd. Sec. 160, Ch. 584, L. 1999; amd. Sec. 36, Ch. 110, L. 2007; amd. Sec. 42, Ch. 67, L. 2017.

Cross-References

Method of collection of taxes and assessments, 85-7-2136.

85-8-602. Tax collection if lands in several counties. Where lands of any district lie in more than one county, the district taxes or assessments collected in all other counties shall be remitted to the county treasurer of the county wherein the court having jurisdiction of said district is located, on or before January 1 of each year.

History: En. Sec. 66, Ch. 129, L. 1921; re-en. Sec. 7330, R.C.M. 1921; re-en. Sec. 7330, R.C.M. 1935; R.C.M. 1947, 89-2402.

85-8-603. Rules of law applicable to tax collection. The rules of law applying to the collection of taxes and sale of land for taxes shall, unless in conflict with this chapter, apply to the collection and sale of lands for drainage assessments. Delinquent sales of land for unpaid taxes and assessments shall be made in the same manner as for state and county taxes in the respective counties where such lands are situate, and the right of redemption shall in all cases be made the same as in cases where lands are sold for state or county taxes. Such drainage district shall be entitled to the benefit of all penalties and interest upon delinquent district assessments.

History: En. Sec. 67, Ch. 129, L. 1921; re-en. Sec. 7331, R.C.M. 1921; re-en. Sec. 7331, R.C.M. 1935; R.C.M. 1947, 89-2403.

Cross-References

Tax liens, Title 15, ch. 17.

85-8-604 through 85-8-610 reserved.

85-8-611. Construction assessments — annual installment. At the time of the confirmation of the assessments as provided in 85-8-347, the court may order the assessment for construction of new work to be paid in not more than 15 annual installments of such amounts and at such times as will be convenient for the accomplishment of the proposed work or for the payment of the principal and interest of such notes or bonds of the district as the court grants authority to issue for the construction of new work. The court shall also by such order fix a date on which the first installment of the assessments for construction shall become due, not more than 5 years after the date of the order, and each of the installments shall draw interest at the rate fixed by the court in accordance with law from the date of the order.

History: En. Sec. 61, Ch. 129, L. 1921; re-en. Sec. 7325, R.C.M. 1921; re-en. Sec. 7325, R.C.M. 1935; amd. Sec. 35, Ch. 234, L. 1971; amd. Sec. 42, Ch. 460, L. 1977; R.C.M. 1947, 89-2348.

85-8-612. Lien of assessments — payment of assessments against state lands. (1) From the time of the entry of an order under 85-8-611, assessments for construction of new work and additional assessments and interest on the assessments are a lien upon the lands assessed until paid. An owner of land or a corporation assessed for construction may, at any time within 30 days after the confirmation of the report, pay into court the amount of the assessment against the person's land or any tract of land or against the corporation. Payment relieves the lands from the lien of the assessment and the corporation from all liability on the assessment.

(2) Upon presentation to the state treasurer of an order of the district court having jurisdiction of the drainage district, properly certified, the department of administration shall draw a warrant on the treasury on the appropriate fund in favor of the commissioners of the drainage district for the total amount that may be assessed against any state lands included in the district. Upon payment of the warrant, the lands are relieved from the lien created for the costs of construction.

History: En. Sec. 62, Ch. 129, L. 1921; re-en. Sec. 7326, R.C.M. 1921; re-en. Sec. 7326, R.C.M. 1935; R.C.M. 1947, 89-2349; amd. Sec. 32, Ch. 325, L. 1995; amd. Sec. 2817, Ch. 56, L. 2009.

Cross-References

State tax liens, Title 15, ch. 16, part 4.

85-8-613. Assessments against certain corporations. Assessments against all public corporations or any private corporation not owning land within the district shall be payable to the county treasurer wherein the court having jurisdiction of the district is located, on or before September 1 of each year.

History: En. Sec. 68, Ch. 129, L. 1921; re-en. Sec. 7332, R.C.M. 1921; re-en. Sec. 7332, R.C.M. 1935; R.C.M. 1947, 89-2404.

85-8-614. Procedure on failure to certify assessments. When commissioners shall fail to certify to the county treasurer of the proper county any one or more drainage assessments for construction or repair or additional assessment against any lands (including improvements where benefited) in said district at the proper time, they may certify the same to the county treasurer at any time thereafter, whether in the same or any subsequent year.

History: En. Sec. 69, Ch. 129, L. 1921; re-en. Sec. 7333, R.C.M. 1921; re-en. Sec. 7333, R.C.M. 1935; amd. Sec. 7, Ch. 409, L. 1973; R.C.M. 1947, 89-2405.

85-8-615. Procedure to levy additional assessments. Subject to 15-10-420, if in the first assessment for construction the commissioners reported to the court a smaller sum than is needed to complete the work of construction or if in any year an additional sum is necessary to pay the lawful indebtedness of the drainage district, further or additional assessments on the land (including improvements where benefited) and corporations benefited, proportioned on the last assessment of benefits that has been approved by the court, must be made by the commissioners of the drainage district under the order of the court. However, the total assessments for original construction and any additional assessments, other than for maintenance, incidental expense, and interest on bonds, may not exceed the total assessments of benefits as provided in 85-8-342. Notice of the hearing of the application for the additional assessment must be published at least once each week for 3 consecutive weeks in one newspaper published in each county in which the lands, or any part of the lands, within the district are situated. The further or additional assessment may be made payable in installments as specified in 85-8-611 and must be treated and collected in the same manner as the original assessments for construction confirmed by the court in the drainage district.

History: En. Sec. 74, Ch. 129, L. 1921; re-en. Sec. 7338, R.C.M. 1921; re-en. Sec. 7338, R.C.M. 1935; amd. Sec. 8, Ch. 409, L. 1973; R.C.M. 1947, 89-2410; amd. Sec. 161, Ch. 584, L. 1999.

85-8-616. Correction of omissions. Omission to assess benefits, to assess for construction, to make additional assessments, to make assessment for repairs, to award damages to any one or more tracts of land or easements in a drainage district or to assess benefits, assess for construction, assess for repairs, or make additional assessments against any corporation which should have been assessed does not affect the jurisdiction of the court to confirm the report or to render the benefits assessed, the assessments for construction, additional assessments, or assessments for repairs against other lands or assessments against any corporation voidable; but the commissioners of the drainage district shall thereafter, as soon as they discover the omission or as soon as they have notice thereof, either agree with the omitted parties upon the proper assessments and award the damages or assess such benefits, make such assessments for construction, and make such additional assessments against the omitted lands and corporations and award such damages as are just and report the facts, together with such assessments and awards, to the court.

History: En. Sec. 75, Ch. 129, L. 1921; re-en. Sec. 7339, R.C.M. 1921; re-en. Sec. 7339, R.C.M. 1935; amd. Sec. 43, Ch. 460, L. 1977; R.C.M. 1947, 89-2411.

85-8-617. Illegal assessments. In case the court decides that any land should not have been assessed for drainage purposes or that any assessment is void, the commissioners of the district shall:

(1) levy an additional assessment on all of the assessable lands, irrigation ditches, railroads, corporations, and individual owners, based on the last assessment of the district approved by the court, sufficient to pay the sum lost to the district by reason of such void assessment; or

(2) pay such sum out of the general fund of the district.

History: En. Sec. 78, Ch. 129, L. 1921; re-en. Sec. 7342, R.C.M. 1921; re-en. Sec. 7342, R.C.M. 1935; amd. Sec. 2, Ch. 109, L. 1923; amd. Sec. 6, Ch. 169, L. 1929; R.C.M. 1947, 89-2412.

85-8-618. Assessment of unassessed, benefited lands. Whenever any lands from which surface or seepage water enters any drain or upon which or through which surface or seepage water has been prevented from flowing because of the construction of any drain have not been included within the drainage district that constructed the drains or drain or the owner of any irrigation ditch or canal from which water seeps, drains, or wastes to, upon, or through lands included within a drainage district has not been assessed for the cost of construction of the drainage system of the drainage district, the commissioners of the district may report the facts to the court and ask that the lands be brought into the district and assessed for their proportionate share of the cost of the drainage system. Subject to 15-10-420, the report may ask that the owner of any irrigation ditch or canal be assessed its proportionate share of the costs of construction of the drainage system. The same proceedings as set out in 85-8-421 through 85-8-424 for the determination and levy of assessments against drained lands outside of the drainage district receiving benefits from the drainage of the district must be commenced to determine the proper assessments, if any, to be levied against the lands and the owner of the irrigation ditch or canal to aid in payment of costs of construction.

History: En. Sec. 7364A by Sec. 7, Ch. 169, L. 1929; re-en. Sec. 7364.1, R.C.M. 1935; R.C.M. 1947, 89-2601; amd. Sec. 162, Ch. 584, L. 1999.

85-8-619. Assessments to have effect of judgment. Each and every sum assessed for construction, for additional assessment, or for repairs against any land or against any corporation, as soon as such assessment is confirmed by the court, shall be and is declared to be a judgment of the district court in favor of said drainage district and against said land or corporation. Unless some other method of collection is herein provided, the judgment shall be collected in the same manner as any other money judgment is collected; provided, that whenever said assessment is a lien upon land, it shall only be collected out of said land on which it is a lien.

History: En. Sec. 93, Ch. 129, L. 1921; re-en. Sec. 7357, R.C.M. 1921; re-en. Sec. 7357, R.C.M. 1935; R.C.M. 1947, 89-2813.

85-8-620. Bonds not to be affected by assessment change. No bonds or other money obligations issued by any drainage district shall be adversely affected by any subsequent change in assessments of benefits.

History: En. Sec. 94, Ch. 129, L. 1921; re-en. Sec. 7358, R.C.M. 1921; re-en. Sec. 7358, R.C.M. 1935; R.C.M. 1947, 89-2814.

85-8-621. Renumbered 85-8-803. Code Commissioner, 1983.

85-8-622. Agreement of landowners to omitted assessments. In case of omission to assess any corporation or land that should be assessed for benefits, construction, repairs, or additional assessments or to award damages, said omitted party and the owner of omitted land may in writing agree with the commissioners of said district what the assessment should be against said land or against said corporation or what said damages should be, and such agreement shall be acknowledged and witnessed, as provided above for waivers, and be filed in the court.

History: En. Sec. 97, Ch. 129, L. 1921; re-en. Sec. 7361, R.C.M. 1921; re-en. Sec. 7361, R.C.M. 1935; R.C.M. 1947, 89-2817.

85-8-623. Assessments not to be obstructed by preliminary defects. The collection of any assessments made by the commissioners for construction and confirmed by the court shall not be restrained or obstructed by reason of any omission, imperfection, or defect in the organization of any district or in any proceedings occurring prior to the order confirming the assessments of benefits, but such order shall be conclusive as to the regularity of all proceedings relating to the assessments of benefits unless appealed from within 30 days after the entry of such order.

History: En. Sec. 99, Ch. 129, L. 1921; re-en. Sec. 7363, R.C.M. 1921; re-en. Sec. 7363, R.C.M. 1935; re-en. Sec. 7363, R.C.M. 1935; R.C.M. 1947, 89-2819.

85-8-624. Assessments on improvements — taxpayers' approval, limitations, and election procedures. (1) A vote of the persons on the assessment rolls in any existing district is required to make Chapter 409, Laws of 1973, applicable to a district.

(2) Chapter 409, Laws of 1973, does not confer on districts created for drainage purposes only the authority to levy assessments on benefits to improvements.

(3) The election provided for by subsection (1) must be governed by the following rules:

(a) Notice of the election must be as provided in 13-1-108.

(b) The election must be conducted in accordance with Title 13, chapter 1, part 5, except that voter registration may not be required.

(c) The qualifications of electors must be as provided in 85-8-305, except that, in addition to persons holding title or evidence of title to lands within the district, any person, as provided in 85-8-305, who does not own land within the district but has been assessed or will have the person's improvements assessed under Chapter 409, Laws of 1973, or who will be assessed for benefits received is entitled to one vote. Commissioners shall prepare a list of persons entitled to vote, and the election administrator shall give them notice as provided in 13-1-108.

(d) The commissioners of any district in existence prior to March 21, 1973, who wish to hold an election to determine if the district is governed by Chapter 409, Laws of 1973, shall at any regular or special meeting adopt a resolution calling for an election to determine whether or not the voters of the district wish to be governed by Chapter 409, Laws of 1973. The resolution must contain a short summary of the changes made by Chapter 409, Laws of 1973, and the summary must be included in the notice provided for by 13-1-108. In addition, the commission shall provide copies of Chapter 409, Laws of 1973, to any person interested in obtaining a copy, and the notice to the persons in the district calling the election must describe where and how copies may be obtained. The commissioners may authorize a reasonable charge for providing copies, not to exceed 20 cents a page.

(e) The ballot must include the summary as provided for in subsection (3)(d), and the form of the ballot must conform as closely as possible to that provided for in Title 13, chapter 27.

(f) A simple majority of those who cast valid ballots determines the outcome of the election.

History: (1)En. Sec. 10, Ch. 409, L. 1973; amd. Sec. 1, Ch. 147, L. 1974; Sec. 89-2330.1, R.C.M. 1947; (2)En. Part 7
Flood Control and Planning

Part Cross-References

Flood plain and floodway management, Title 76, ch. 5.

85-8-701. Purpose of part. (1) The purpose of this part is to confer certain additional powers on drainage districts already created or to be created under the laws of the state of Montana for the purposes of cooperating with the government of the United States and landowners in flood prevention and the conservation, development, utilization, and disposal of water for the further development of the economy of this state and for the promotion of the public health and welfare.

(2) The purpose of this part is to enable existing drainage districts or newly created drainage districts as provided herein to enter into cooperative agreements and programs to carry out the purposes of Public Law 566, 83rd congress of the United States, or other laws of the national congress pertaining to flood prevention and the conservation, development, utilization, and disposal of water. This part is to be given a liberal construction to the end that these purposes may be carried out, and to this end all political subdivisions of the state of Montana, all agencies and departments of the state government, and all soil conservation districts are authorized to cooperate with, expend funds for, and enter into agreements with drainage districts and any agencies of the United States government for the purpose of carrying out the provisions of this part and Public Law 566, 83rd congress of the United States, or other laws of the national congress pertaining to flood prevention and the conservation, development, utilization, and disposal of water.

(3) None of the additional powers granted by this part shall be exercised except for the purpose of participating in projects or programs authorized under Public Law 566, 83rd congress of the United States, or other laws of the national congress pertaining to flood prevention and the conservation, development, utilization, and disposal of water.

History: En. Secs. 1, 5, Ch. 3, L. 1957; R.C.M. 1947, 89-2821, 89-2825.

85-8-702. Additional powers. To the end that soil and water conservation measures may be improved, flood prevention and drainage programs strengthened, and the land and water economy of the state stabilized, the following additional powers are conferred upon presently existing drainage districts or new districts as created and established under this chapter and laws amendatory thereof and supplementary thereto:

(1) to carry out necessary measures for the prevention of floodwater and sediment damages and for the conservation, development, utilization, and disposal of water and to adopt necessary regulations, policies, and procedures to accomplish these ends, subject to the approval of the district court and on proper notice to interested parties as is provided for in the general statutes pertaining to drainage districts;

(2) to cooperate and enter into agreements to carry out the purposes of this part with (and to receive financial and other assistance from) state agencies and political subdivisions of the state, other organizations created under state laws, and the government of the United States and agencies thereof and to enter into agreements with (and to accept contributions from) private landowners for the purposes of this part;

(3) to construct, operate, and maintain such works of improvement, including structures and related measures, as are needed to carry out their broadened purposes as set forth herein, subject to the approval of the district court and on proper notice to interested parties as set forth in this chapter;

(4) to acquire lands, easements, and rights-of-way for sites for structures and for the flowage or impoundment of waters, such acquisitions for such purposes to be accomplished in the same manner and through the same powers and procedures as provided for under this chapter;

(5) to enlarge their boundaries to permit the construction of additional needed works of improvement or to construct additional needed works of improvement outside their boundaries, subject to approval of the district court and on proper notice to interested parties in the manner set forth in this chapter;

(6) to make assessments and issue bonds for carrying out the purposes of this part and for constructing, maintaining, and operating any structures or improvements established as provided herein, such assessments and bond issues to be made in the same manner and through the same procedures as under this chapter, including the right to extend annual installments for repayment of construction costs over a period of not more than 50 years and subject to the approval of the district court in the same manner and on the same notice to the interested parties as in the first instance of approving assessments, bond issues, and benefits.

History: En. Sec. 2, Ch. 3, L. 1957; R.C.M. 1947, 89-2822.

85-8-703. Petition for additional powers. Before the additional powers granted by this part shall become applicable to any presently existing drainage district in this state, the commissioners of such district shall file a petition in the district court requesting such additional powers as set forth herein and proper notice shall be given to interested landowners in the same manner as in the first instance of creation of the district. Proceedings shall be conducted, insofar as possible, in accordance with the procedures set forth for determining whether or not the district shall be created in the first instance, and the district court shall render its decree or order accordingly.

History: En. Sec. 3, Ch. 3, L. 1957; R.C.M. 1947, 89-2823.

85-8-704. Organization of areas not within existing districts. In areas not presently within the boundaries of an existing drainage district, the landowners may proceed to organize a drainage district for carrying out the purposes of this part, and such organization of such district may be carried out for said purposes according to the procedure for organization of such districts set forth in this chapter. After organization such districts shall have all the powers vested by law in such districts.

History: En. Sec. 4, Ch. 3, L. 1957; R.C.M. 1947, 89-2824.

Part 8
Miscellaneous Provisions

85-8-801. Continuation of existing districts. All drain districts of the state of Montana organized prior to March 1, 1921, and continued in existence pursuant to section 100, Chapter 129, Laws of 1921, shall continue their existence as drain districts under and pursuant to all of the provisions of drainage district laws, and the commissioners of such drain districts shall have all the power and authority conferred by the drainage district laws upon the commissioners of drainage districts.

History: En. Sec. 7364B by Sec. 2, Ch. 97, L. 1931; re-en. Sec. 7364.2, R.C.M. 1935; amd. Sec. 44, Ch. 460, L. 1977; R.C.M. 1947, 89-2701.

85-8-802. Dividing older districts into three divisions. Ten percent of the adult owners or legally authorized agents or representatives of minor owners of lands within any drainage district heretofore created and organized and in existence on February 27,1925, may file a petition with the proper district court to have such district divided into divisions. Such court must thereupon make an order setting a day for hearing such petition and cause a copy of such order to be served on each of the commissioners of such district at least 5 days before the date set for such hearing. On the day fixed in such order (or on any day to which such hearing may be regularly continued) the court must hear such petition and, after such hearing, must make an order dividing such district into three divisions, as nearly equal in area as possible.

History: En. Sec. 16, Ch. 129, L. 1921; re-en. Sec. 7280, R.C.M. 1921; amd. Sec. 1, Ch. 50, L. 1925; re-en. Sec. 7280, R.C.M. 1935; R.C.M. 1947, 89-2217(part).

85-8-803. Waiver of defective service. In case of failure to serve any notice of any proceeding or hearing provided for in this chapter upon any person or corporation, such person or corporation may appear in open court and waive such defect of service or may waive it by filing in court or delivering to the commissioners of the drainage district, to be filed in court, a written waiver of such defect, in which waiver said defect shall be described, which waiver shall be signed by such party and witnessed and acknowledged before a proper officer having power to take acknowledgments of deeds.

History: En. Sec. 96, Ch. 129, L. 1921; re-en. Sec. 7360, R.C.M. 1921; re-en. Sec. 7360, R.C.M. 1935; R.C.M. 1947, 89-2816; MCA 1981, 85-8-621; redes. 85-8-803 by Code Commissioner, 1983.

CHAPTER 9
CONSERVANCY DISTRICTS

Part 1 — General Provisions

85-9-101. Policy considerations.
85-9-102. Purpose of chapter.
85-9-103. Definitions.
85-9-104. Limitations.

Part 2 — Creation of Districts

85-9-201. Preliminary survey — petition.
85-9-202. Action by department upon receipt of request.
85-9-203. Hearing by department.
85-9-204. Feasibility study and report — adjustment of proposed boundaries.
85-9-205. Procedure for organization of district.
85-9-206. Court hearing on petition — election — limits on court jurisdiction.
85-9-207. Corporate nature of district.
85-9-208. Filing of documents after organization.
85-9-209. Reimbursement of expenses of organizing election.

Part 3 — Dissolution of Districts

85-9-301. Procedure for dissolution of district.
85-9-302. Dissolution election.
85-9-303. Termination plan — court jurisdiction.
85-9-304. Appointment of receiver — assessments.
85-9-305. Entry of dissolution order.
85-9-306. County general funds to receive funds remaining after dissolution.

Part 4 — Organization and Procedure

85-9-401. District directors — appointment, term of office, vacancies, first meeting, and bond.
85-9-402. Officers and meetings.
85-9-403. Directors' powers — conduct of business.
85-9-404. Directors' powers to adopt rules.
85-9-405. Directors' powers over property.
85-9-406. Directors' powers over finance.
85-9-407. Fees and charges.
85-9-408. Contracts and agreements by directors.
85-9-409. Participation in federal programs.
85-9-410. Condemnation authorized.
85-9-411. Annual report of directors' activities.
85-9-412 through 85-9-420 reserved.
85-9-421. Persons entitled to vote.
85-9-422. Repealed.
85-9-423. Repealed.

Part 5 — Alteration of Districts

85-9-501. Merger of districts.
85-9-502. Annexation of property.
85-9-503. Preannexation bonds.
85-9-504. Procedure to exclude lands.

Part 6 — Finance

85-9-601. Assessments.
85-9-602. Notice of public budget hearing.
85-9-603. Directors to provide financial information.
85-9-604. Collection and investment of assessments.
85-9-605 through 85-9-610 reserved.
85-9-611. Repealed.
85-9-612 through 85-9-620 reserved.
85-9-621. Issuance of bonds — term and multipurpose bonds.
85-9-622. Issuance of bonds — determination of amount.
85-9-623. Issuance of bonds — resolution and election.
85-9-624. Issuance of bonds — approval and assessments.
85-9-625. Issuance of bonds — details of sale.
85-9-626. Tax exempt status.
85-9-627. Interim receipts — negotiability.
85-9-628. Bond registration — copy to county.
85-9-629. Disposition and investment of sale proceeds.
85-9-630. Refunding bonds.
85-9-631. Bond retirement fund.
85-9-632. Revolving funds.

Part 1
General Provisions

85-9-101. Policy considerations. To provide for the conservation and development of the water and land resources of the state of Montana, conserve Montana's water for utilization for beneficial purposes within the state, and provide for the greatest beneficial use of water within this state, the organization of conservancy districts and the construction of works as defined by this chapter are a public use and will:

(1) be essentially for the public benefit and advantage of the people of Montana;
(2) benefit all industries of the state;
(3) encourage economic growth;
(4) indirectly benefit the state by increasing property valuations;
(5) directly benefit municipalities by providing adequate supplies of water for domestic uses;
(6) directly benefit lands irrigated or drained by works constructed;
(7) directly benefit lands now irrigated by stabilizing the flow of water in streams and by increasing the flow and return flow of water to those streams;
(8) enhance fish and wildlife habitat;
(9) improve recreational facilities; and
(10) promote the comfort, safety, and welfare of the people of Montana.

History: En. Sec. 1, Ch. 100, L. 1969; R.C.M. 1947, 89-3401.

85-9-102. Purpose of chapter. The purpose of this chapter is to enable the formation of conservancy districts comprised of area in one or more counties to promote the following purposes:

(1) prevent and control floods, erosion, and sedimentation;
(2) provide for regulation of stream flows and lake levels;
(3) improve drainage and to reclaim wet or overflowed lands;
(4) promote recreation;
(5) develop and conserve water resources and related lands, forest, fish, and wildlife resources;
(6) further provide for the conservation, development, and utilization of land and water for beneficial uses, including but not limited to domestic water supply, fish, industrial water supply, irrigation, livestock water supply, municipal water supply, recreation, and wildlife.

History: En. Sec. 2, Ch. 100, L. 1969; R.C.M. 1947, 89-3402.

Cross-References

Policy of state to conserve water, 75-5-101.

85-9-103. Definitions. As used in this chapter, unless the context clearly indicates otherwise, the following definitions apply:

(1) "Applicant" means a person residing within the boundaries of the proposed district and making a request for a study of the feasibility of forming a conservancy district.

(2) "Board of supervisors" means the board of supervisors of the soil and water conservation district in which the largest portion of the taxable valuation of real property of the proposed district is located.

(3) "Cost of works" means the cost of construction, acquisition, improvement, extension, and development of works, including financing charges, interest, and professional services.

(4) "Court" means the district court of the judicial district in which the largest portion of the taxable valuation of real property of the proposed district is located and within the county in which the largest portion of the taxable valuation of real property of the proposed district is located within the judicial district.

(5) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(6) "Directors" means the board of directors of a conservancy district.

(7) "District" means a conservancy district.

(8) "Elector" means a person qualified to vote under 85-9-421.

(9) "Owners" means the person or persons who appear as owners of record of the legal title to real property according to the county records, whether the title is held beneficially or in a fiduciary capacity, except that a person holding a title for purposes of security is not an owner and the owner for security may not affect the previous title for purposes of this chapter.

(10) "Person" means a natural person, firm, partnership, cooperative, association, public or private corporation, including the state of Montana or the United States, foundation, state agency or institution, county, municipality, district or other political subdivision of the state, federal agency or bureau, or any other legal entity.

(11) "Taxable valuation" is the value as defined in 15-8-111 and does not mean assessed valuation.

(12) "Works" means all property, rights, easements, franchises, and other facilities, including but not limited to land, reservoirs, dams, canals, dikes, ditches, pumping units, mains, pipelines, waterworks systems, recreational facilities, facilities for fish and wildlife, and facilities to control and correct pollution.

History: En. Sec. 3, Ch. 100, L. 1969; amd. Sec. 183, Ch. 253, L. 1974; amd. Sec. 71, Ch. 566, L. 1977; R.C.M. 1947, 89-3403(part); amd. Sec. 2818, Ch. 56, L. 2009; amd. Sec. 254, Ch. 49, L. 2015.

Cross-References

Hearing by Department, 85-9-203.

Merger of districts, 85-9-501.

Notice of public budget hearing, 85-9-602.

Issuance of bonds — resolution and election, 85-9-623.

85-9-104. Limitations. (1) This chapter may not be construed to grant to the district the power to generate, distribute, or sell electrical energy.

(2) The provisions of this chapter do not abrogate or limit in any manner the rights, powers, duties, and functions of the department, conservation districts, the department of environmental quality, or the department of fish, wildlife, and parks, but are supplementary to and in aid of those rights, powers, duties, and functions.

History: (1)En. Sec. 48, Ch. 100, L. 1969; Sec. 89-3448, R.C.M. 1947; (2)En. Sec. 49, Ch. 100, L. 1969; amd. Sec. 193, Ch. 253, L. 1974; amd. Sec. 13, Ch. 417, L. 1977; amd. Sec. 50, Ch. 460, L. 1977; Sec. 89-3449, R.C.M. 1947; R.C.M. 1947, 89-3448, 89-3449; amd. Sec. 2, Ch. 218, L. 1979; amd. Sec. 480, Ch. 418, L. 1995; amd. Sec. 77, Ch. 7, L. 2001.

Part 2
Creation of Districts

85-9-201. Preliminary survey — petition. (1) To request a preliminary survey for a proposed conservancy district, the applicants shall present a written petition to the department.

(2) The petition shall:

(a) be signed by at least 10% of the registered voters residing within the boundaries of the proposed conservancy district;

(b) generally describe the proposed boundaries of the district;

(c) specify the purpose or purposes of the district;

(d) list the works contemplated;

(e) request that a preliminary survey be initiated.

(3) The department may initiate a preliminary survey without any prior written petition.

History: En. Sec. 4, Ch. 100, L. 1969; amd. Sec. 1, Ch. 19, L. 1973; R.C.M. 1947, 89-3404.

85-9-202. Action by department upon receipt of request. (1) Within 11 days after the request is received, the department shall acknowledge the request.

(2) The department shall itself, through cooperating agencies, or together with cooperating agencies:

(a) consult with the board of supervisors and all persons who may participate in the proposed project;

(b) conduct a preliminary survey of the proposed district;

(c) estimate costs of works, maintenance, and operation;

(d) determine sources of financing;

(e) reach a tentative decision on the feasibility, desirability, and compatibility with the state water plan of the proposed district;

(f) adjust the boundaries of the proposed district to improve the feasibility, desirability, or consistency with the state water plan;

(g) within 1 year after receipt of the request, send a report of the preliminary survey to the applicants, the board of supervisors, the department of fish, wildlife, and parks, the department of environmental quality, and other affected state and federal resource agencies for their comments.

History: En. Sec. 5, Ch. 100, L. 1969; amd. Sec. 1, Ch. 302, L. 1971; amd. Sec. 184, Ch. 253, L. 1974; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 89-3405; amd. Sec. 2, Ch. 218, L. 1979; amd. Sec. 481, Ch. 418, L. 1995.

85-9-203. Hearing by department. (1) On receipt of the preliminary survey report, the applicants or any one of them may request the department to hold a hearing. The department shall provide notice as required in 7-1-2121 and then hold the hearing no later than than 61 days after receipt of the request.

(2) If the department itself initiated the preliminary survey, it may hold a hearing without being requested to do so.

History: En. Sec. 6, Ch. 100, L. 1969; amd. Sec. 185, Ch. 253, L. 1974; R.C.M. 1947, 89-3406; amd. Sec. 255, Ch. 49, L. 2015.

85-9-204. Feasibility study and report — adjustment of proposed boundaries. After the hearing, the applicants or any one of them may request the department to prepare a detailed feasibility study of the proposed district. If the department concludes that the proposed district is feasible, desirable, and consistent with the state water plan, it shall prepare a feasibility report and, within 1 year after receipt of the request, send copies to the applicants, if any, the department of fish, wildlife, and parks, the department of environmental quality, and other affected state and federal water resource agencies. For good cause shown, based upon the actual technical problems in completing the report, the department may use necessary additional time to complete and distribute the report. The detailed feasibility report must describe the proposed works and contain an estimate of the cost of the works, the means of financing, and the estimated costs of operation and maintenance. The department may adjust the boundaries of the proposed district to improve the feasibility, desirability, and consistency with the state water plan and to exclude land that would receive no direct or indirect benefits from the proposed district.

History: En. Sec. 7, Ch. 100, L. 1969; amd. Sec. 1, Ch. 303, L. 1971; amd. Sec. 186, Ch. 253, L. 1974; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 89-3407; amd. Sec. 2, Ch. 218, L. 1979; amd. Sec. 482, Ch. 418, L. 1995.

85-9-205. Procedure for organization of district. If in the opinion of the department the feasibility study shows that a district is feasible and consistent with the state water plan, the procedure for organization is the following:

(1) The department shall file a petition requesting organization with the court.

(2) The petition shall:

(a) state the name of the proposed district;

(b) give a legal description of the boundaries of the proposed district, excluding therefrom lands which would receive no direct or indirect benefits from the proposed district;

(c) describe the purposes of the district;

(d) describe the works;

(e) indicate the estimated cost of works, means of financing, and estimated costs of operation and maintenance;

(f) list the taxable valuation of real property in the proposed district, which must be $100,000 or more;

(g) describe the means of repaying capital costs;

(h) propose the persons who should be represented and the number of directors.

(3) The petition shall be signed by owners of at least 51% of the land outside the limits of an incorporated municipality and not fewer than 5% or 100, whichever is the lesser, of the persons who would qualify as electors within an incorporated municipality.

History: En. Sec. 8, Ch. 100, L. 1969; amd. Sec. 187, Ch. 253, L. 1974; R.C.M 1947, 89-3408.

85-9-206. Court hearing on petition — election — limits on court jurisdiction. (1) On receipt of a petition for organizing a district, the court shall give notice and hold a hearing on the petition. If the court finds that the petition should be granted, it shall:

(a) make and file findings of fact specifying those lands that will be directly or indirectly benefited by the proposed district and exclude those lands that will not be benefited;

(b) make an order fixing the time and place of an organizing election;

(c) order the election administrator to conduct the election in accordance with Title 13, chapter 1, part 5; and

(d) order and decree the district organized if the requisite number of eligible electors votes in favor of organization.

(2) In order for the district to be organized, 51% or more of the eligible electors must vote in the election, and a majority of those voting must vote in favor of organization.

(3) This chapter does not confer on the court jurisdiction to hear, adjudicate, and settle questions concerning the priority of appropriation of water between districts and other persons. Jurisdiction to hear and determine priority of appropriation and questions of right growing out of or in any way connected with a priority of appropriation is expressly excluded from this chapter and must be determined as otherwise provided by the laws of Montana.

History: En. Sec. 9, Ch. 100, L. 1969; R.C.M. 1947, 89-3409; amd. Sec. 373, Ch. 571, L. 1979; amd. Sec. 69, Ch. 387, L. 1995; amd. Sec. 14, Ch. 234, L. 1997; amd. Sec. 256, Ch. 49, L. 2015.

85-9-207. Corporate nature of district. A district is a public corporation and a political subdivision of the state.

History: En. Sec. 3, Ch. 100, L. 1969; amd. Sec. 183, Ch. 253, L. 1974; amd. Sec. 71, Ch. 566, L. 1977; R.C.M. 1947, 89-3403(part).

85-9-208. Filing of documents after organization. Sooner than 31 days after the district has been decreed organized, the clerk of the court shall transmit to the secretary of state, the department, and to the county clerk and recorder in each of the counties having lands in the district copies of the election results, the decree of the court incorporating the district, and a description of the boundaries of the district. Copies of the same documents shall be filed in the office of the secretary of state in the same manner as articles of incorporation are required to be filed under the laws governing corporations. Copies shall also be filed in the office of the county clerk and recorder of each county in which a part of the district may be. The clerk and recorder of each county where the articles are filed and the secretary of state shall collect filing fees as provided by law.

History: En. Sec. 10, Ch. 100, L. 1969; amd. Sec. 188, Ch. 253, L. 1974; R.C.M. 1947, 89-3410.

85-9-209. Reimbursement of expenses of organizing election. If organized, the district shall reimburse the county or counties for the expenses incurred in the organizing election. The costs of conducting the preliminary and feasibility studies shall be considered costs of construction of an approved project and shall be included in determination of the repayment schedules by the directors of the district.

History: En. Sec. 11, Ch. 100, L. 1969; amd. Sec. 1, Ch. 18, L. 1973; R.C.M. 1947, 89-3411.

Part 3
Dissolution of Districts

85-9-301. Procedure for dissolution of district. (1) The procedure for dissolution of a district is:

(a) a resolution shall be passed by the directors requesting dissolution;

(b) a petition signed by 20% of the electors representing 10% of the taxable valuation of real property in the district shall be presented to the directors; or

(c) if the district or its directors have been inactive for 1 year or more, any elector may present a petition.

(2) The resolution or petition shall be presented to the court by the directors or by the petitioners if the directors remain inactive.

(3) Not more than one resolution or petition may be presented to the court in any 24-month period, and no such petition may be presented during the first 24 months after a district's initial organization.

History: En. Sec. 42, Ch. 100, L. 1969; R.C.M. 1947, 89-3442.

85-9-302. Dissolution election. (1) After receipt of petition or resolution for dissolution, the court shall order an election to be conducted in accordance with Title 13, chapter 1, part 5.

(2) For dissolution to be approved, a majority of the electors voting must favor dissolution.

History: En. Sec. 43, Ch. 100, L. 1969; R.C.M. 1947, 89-3443; amd. Sec. 257, Ch. 49, L. 2015.

85-9-303. Termination plan — court jurisdiction. (1) In the event the vote is for dissolution, any qualified elector or the board of directors of the district may, within the time fixed by the court, present a written plan for terminating the affairs of the district which shall include assignment of any water rights and works owned by the district.

(2) The plan may specify that the affairs of the district shall be terminated by the directors or by a receiver appointed by the court.

(3) On a day fixed by the court, the court shall consider the plan or plans and shall enter an order establishing a plan for the termination of the affairs.

(4) The court shall retain jurisdiction to modify the plan and shall supervise the termination.

History: En. Sec. 44, Ch. 100, L. 1969; R.C.M. 1947, 89-3444.

85-9-304. Appointment of receiver — assessments. (1) If a plan is not presented on or before the date set by the court, the court shall appoint a receiver to terminate the affairs of the district under the supervision of the court.

(2) Upon the appointment of a receiver, all authority of the directors ceases. However, until dissolution, the receiver has authority to levy assessments for:

(a) the payment of obligations of the district; and

(b) the costs of termination.

(3) The directors or, if there is a receiver, the receiver, with the approval of the court, shall make assessments each year in an amount large enough to retire the obligations of the district.

(4) If a receiver has been appointed, the receiver shall direct, under court supervision, the disposition of all assessments collected.

History: En. Sec. 45, Ch. 100, L. 1969; R.C.M. 1947, 89-3445; amd. Sec. 2819, Ch. 56, L. 2009.

85-9-305. Entry of dissolution order. (1) The court shall enter an order dissolving the district when it appears to the satisfaction of the court that:

(a) all obligations of the district have been discharged;

(b) all the costs of termination have been paid.

(2) A certified copy of the order shall be recorded by the clerk of the court in all counties in which the district was situated and filed with the secretary of state.

History: En. Sec. 46, Ch. 100, L. 1969; R.C.M. 1947, 89-3446.

85-9-306. County general funds to receive funds remaining after dissolution. All funds remaining after dissolution of a district shall be deposited in the general fund of the counties in which the district is located in proportion to the taxable value of property within the district in each county.

History: En. Sec. 47, Ch. 100, L. 1969; R.C.M. 1947, 89-3447.

Part 4
Organization and Procedure

85-9-401. District directors — appointment, term of office, vacancies, first meeting, and bond. If a district is organized, the court shall:

(1) establish by court order the number of persons who shall comprise the directors and appoint persons who are electors within the district to membership on the board of directors and fix their compensation. The number may not be less than 3 or more than 11 persons. In fixing the number and making the appointments, the court shall consider the interests and purposes to be served by the district. Upon a verified petition filed by a majority of the directors and for good cause shown, the court may enlarge or reduce the membership of the directors but not to be less than 3 or more than 11.

(2) fix the terms of office so that approximately one-third of the directors first appointed serve for 1 year, approximately one-third serve 2 years, and the remainder serve 3 years. All succeeding terms must be 3 years. Unless excused for good cause, a director who misses three consecutive regular meetings has vacated the position.

(3) fill all vacancies on the board by appointment or reappointment;

(4) specify a date for the first annual meeting of the directors;

(5) specify the amount and form of a corporate surety bond that each member of the directors shall furnish at the expense of the district, conditioned upon the faithful performance of duties as a director.

History: En. Sec. 12, Ch. 100, L. 1969; R.C.M. 1947, 89-3412; amd. Sec. 2820, Ch. 56, L. 2009.

85-9-402. Officers and meetings. (1) The directors shall select from among themselves a presiding officer, vice presiding officer, secretary, and other necessary officers. The directors shall adopt bylaws and rules for the conduct of meetings. All official acts of the directors must be entered in a book of minutes to be kept by the secretary.

(2) The directors shall establish times for regular meetings and may hold special meetings upon the call of the presiding officer or any two members and, except in case of emergency, upon at least 3 days' notice of the time, place, and purpose of the meeting.

History: En. Sec. 13, Ch. 100, L. 1969; R.C.M. 1947, 89-3413; amd. Sec. 2821, Ch. 56, L. 2009.

85-9-403. Directors' powers — conduct of business. On behalf of the district, the directors may:

(1) adopt an official seal;

(2) sue and be sued;

(3) provide for reimbursing of their members for actual expenses;

(4) merge with other special districts as hereinafter provided;

(5) call upon the county attorney or attorney general for such legal services as the district may require or, in the discretion of the directors, employ private legal counsel.

History: En. Sec. 14, Ch. 100, L. 1969; R.C.M. 1947, 89-3414(1), (2), (5), (9), (11).

85-9-404. Directors' powers to adopt rules. On behalf of the district, the directors may adopt rules to promote and encourage water recreation, including requirements concerning public access areas and facilities, and rules respecting the use of reservoirs and waters, picnic sites, and other recreational areas operated by the district. Rules adopted shall be filed with the secretary of directors and shall be available to any interested party upon reasonable request.

History: En. Sec. 14, Ch. 100, L. 1969; R.C.M. 1947, 89-3414(3).

85-9-405. Directors' powers over property. On behalf of the district, the directors may:

(1) enter private property for the purposes of making surveys, provided that just compensation for actual damages is made;

(2) appropriate water and initiate or participate in the adjudication of streams;

(3) acquire, undertake, construct, develop, improve, maintain, and operate works and all incidental facilities;

(4) acquire by purchase, exchange, gift, lease, grant, devise, or otherwise lands, water, water rights, or rights-of-way as necessary for the execution of any authorized function of the district. Title to all property (including water rights) shall be in the name of the district.

(5) hold and dispose of property as necessary or convenient in the performance of the functions of the district;

(6) allocate or reallocate unused waters of the district.

History: **En. Sec. 14, Ch. 100, L. 1969; R.C.M. 1947, 89-3414(4), (6) thru (8), (10), (18).**

85-9-406. Directors' powers over finance. On behalf of the district, the directors may:

(1) borrow money and incur indebtedness and issue bonds to finance works as provided by this chapter;

(2) in addition to all voted indebtedness, borrow money as necessary, but the amount may not at any one time exceed 0.23% of the total assessed value of taxable real property, determined as provided in 15-8-111, within the district, as ascertained by the last assessment for state and county taxes prior to the issuance of the bonds;

(3) mortgage property owned by the district if the terms of the mortgage are not inconsistent with the provisions of a resolution authorizing the sale of bonds;

(4) use any surplus funds to purchase outstanding bonds;

(5) refund bonded indebtedness incurred by the district as provided by this chapter;

(6) after a hearing held in accordance with 85-9-602, make assessments sufficient to meet the budgetary requirements for the coming year.

History: **En. Sec. 14, Ch. 100, L. 1969; R.C.M. 1947, 89-3414(13) thru (15), (22) thru (24); amd. Sec. 32, Ch. 29, L. 2001.**

85-9-407. Fees and charges. On behalf of the district, the directors may:

(1) fix and revise, from time to time, and collect rates, fees, and other charges for the services, facilities, or water furnished by the district to any person;

(2) withhold the delivery of water upon which there are any defaults or delinquencies of payment and otherwise dispose of that water while the default or delinquency continues.

History: **En. Sec. 14, Ch. 100, L. 1969; R.C.M. 1947, 89-3414(12), (17).**

Cross-References

Assessments, 85-9-601.

85-9-408. Contracts and agreements by directors. On behalf of the district, the directors may:

(1) contract for service, for water furnished, or for the sale of water with any person;

(2) cooperate with; accept grants, loans, and other assistance from; act as agent for; and enter into agreements with any and all state or federal agencies and exercise all necessary or convenient powers in connection therewith;

(3) enter into any obligation or contract with an agency of the federal government for the construction, operation, and maintenance of works or for the assumption as principal or guarantor of indebtedness to the United States on account of district lands under the provisions of the federal reclamation act and rules established under that act or contract with an agency of the federal government for a water supply under any federal act providing for or permitting such a contract. However, the action must be approved by a majority of the electors voting at an election conducted in accordance with Title 13, chapter 1, part 5. If a contract is made with an agency of the federal government, the directors may deposit bonds of the district with the United States at 90% of their par value to secure the amount to be paid by the district to the United States under any contract. The interest on the bonds of the district to be applied as specified by the contract. If bonds of the district are deposited with the United States, it is the duty of the directors to make an assessment sufficient to meet all payments accruing under the terms of any contract with the United States.

(4) accept appointment of the district as fiscal agent for the United States or authorization of the district to make collections of moneys for or on behalf of the United States in connection with any federal reclamation projects, and the district is authorized to act and to assume the duties and liabilities incident to this action. However, the action must be approved by a majority of the electors voting at an election conducted in accordance with Title 13, chapter 1, part 5. The directors may do all things required by federal statutes and rules and require prompt payment of all charges as a prerequisite to water service.

(5) make contracts incidental to the performance of the district's functions and employ and fix the compensation of employees, agents, or consultants as are deemed necessary, including

but not limited to a manager, attorneys, accountants, engineers, construction and financial experts; or

(6) cooperate with soil and water conservation districts to obtain agreements to carry out soil conservation measures and proper farm plans from owners of lands situated in the drainage area above each retention reservoir to be installed with federal assistance.

History: En. Sec. 14, Ch. 100, L. 1969; R.C.M. 1947, 89-3414(16), (19) thru (21), (25), (26); amd. Sec. 258, Ch. 49, L. 2015.

85-9-409. Participation in federal programs. A district organized under this chapter, by itself or in conjunction with others as a sponsoring organization, may participate in all federal programs, including but not limited to the Watershed Protection and Flood Prevention Act of 1954 (68 Stat. 666), the federal Water Project Recreation Act of 1965 (79 Stat. 213), the federal Reclamation Act of 1902 (32 Stat. 388), and amendments to those acts.

History: En. Sec. 15, Ch. 100, L. 1969; amd. Sec. 189, Ch. 253, L. 1974; R.C.M. 1947, 89-3415.

85-9-410. Condemnation authorized. The district may exercise the right of eminent domain, as provided in Title 70, chapter 30, when the taking is necessary for the purposes of the district. Water rights are not subject to taking but may be taken as an incident to the condemnation of land to which the water rights are appurtenant when the taking of the land is the principal purpose of the condemnation.

History: En. Sec. 20, Ch. 100, L. 1969; R.C.M. 1947, 89-3420; amd. Sec. 108, Ch. 125, L. 2001.

Cross-References

Eminent domain, Art. II, sec. 29, Mont. Const.; Title 70, ch. 30.

85-9-411. Annual report of directors' activities. Before August 1 of each year, the directors shall send a written report of their activities during the previous fiscal year to the court and to the department. Reports shall be in the form and contain the information prescribed by the department.

History: En. Sec. 21, Ch. 100, L. 1969; amd. Sec. 190, Ch. 253, L. 1974; R.C.M. 1947, 89-3421.

85-9-412 through 85-9-420 reserved.

85-9-421. Persons entitled to vote. (1) Only persons who are taxpayers upon and owners of real property located within the district and whose names appear upon the last-completed assessment roll of some county within the district for state, county, and school district taxes are electors and are entitled to vote in elections, provided that:

(a) an elector need not reside within the district in order to vote;

(b) when a corporation owns taxable real property within the boundaries of the conservancy district, the authorized agent of the corporation is entitled to cast a vote on behalf of the corporation;

(c) when land is under contract of sale to a purchaser and the contract is recorded, only the purchaser has the right to vote;

(d) guardians, executors, administrators, and trustees of real property within the district are entitled to cast the vote for the owner of the land.

(2) When voting, an agent of a corporation or of co-owners or a guardian, executor, administrator, trustee, or purchaser under contract of sale may be required to show the person's authority by the judges of the election.

History: En. Sec. 23, Ch. 100, L. 1969; R.C.M. 1947, 89-3423; amd. Sec. 2822, Ch. 56, L. 2009.

History: En. Sec. 24, Ch. 100, L. 1969; R.C.M. 1947, 89-3424; amd. Sec. 374, Ch. 571, L. 1979.

85-9-423. Repealed. Sec. 407, Ch. 571, L. 1979.

History: En. Sec. 25, Ch. 100, L. 1969; amd. Sec. 49, Ch. 460, L. 1977; R.C.M. 1947, 89-3425.

Part 5
Alteration of Districts

85-9-501. Merger of districts. (1) In case two or more districts have been organized in a territory that, in the opinion of the directors of each of the districts, should constitute but one district, the directors of the districts may petition the court for an order merging the districts into a single district. The petition must be filed in the office of the clerk of the district court in and for that county which has the largest portion of taxable valuation of property within the districts sought to be included, as shown by the tax rolls of the respective counties. The petition shall set forth facts showing that the purposes of this chapter would be served by the merging of the districts and that the merger would promote the economical execution of the purposes for which the districts were organized. A copy of the petition must be filed with the department.

(2) Upon the filing of the petition, the court shall by order fix a time and place of hearing, and the clerk shall give notice as provided in 7-1-2121 and also notify by mail the directors of the districts that would be merged. The notice must contain the purpose, time, and the place of the hearing.

(3) Upon the hearing, if the court finds that the averments of the petition are true and that the districts or any of them could feasibly and profitably be merged, it shall order that the merger must take place and the districts must be merged into one district and proceed as such. The court shall designate the corporate name of the district, and further proceedings must be taken as provided for in this chapter. The court shall by order appoint the directors of the district, who shall thereafter have powers and be subject to rules as are provided for directors in districts created in the first instance.

(4) Instead of organizing a new district from the constituent districts, the court may, in its discretion, direct that one or more of the districts described in the petition be included in another of the districts, which other shall continue under its original corporate name and organization, or the court may direct that the district or districts so absorbed must be represented on the directors of the original districts, designating what members of the directors of the original district shall retire from the new board and what members representing the included district or districts shall take their places.

(5) If the court receives a petition opposing the merger, signed by a majority of the electors of any of the concerned districts, the court shall not grant the order and shall dismiss the petition.

(6) Upon merger or inclusion, existing obligations shall remain exclusively with those who bore them prior to the merger or inclusion, except with the written consent, given prior to the merger or inclusion, of those who did not bear the obligations.

History: En. Sec. 38, Ch. 100, L. 1969; amd. Sec. 192, Ch. 253, L. 1974; R.C.M. 1947, 89-3438; amd. Sec. 259, Ch. 49, L. 2015.

85-9-502. Annexation of property. (1) To annex real property to the district, the procedure is as follows:

(a) The directors shall petition the court.

(b) The petition must:

(i) give a general description of the real property to be annexed sufficient to enable a person to determine if the person's property is in the proposed annexation; and

(ii) describe the benefits to accrue to the real property as a result of the annexation.

(2) The court shall:

(a) give notice and hold a hearing on the petition; and

(b) upon good cause shown, order or deny the annexation.

History: En. Sec. 39, Ch. 100, L. 1969; R.C.M. 1947, 89-3439; amd. Sec. 2823, Ch. 56, L. 2009.

85-9-503. Preannexation bonds. Real property annexed to a district shall not incur any liens by reason of bonds issued before annexation unless agreed to by the owners of the annexed property, in writing, prior to annexation.

History: En. Sec. 40, Ch. 100, L. 1969; R.C.M. 1947, 89-3440.

85-9-504. Procedure to exclude lands. Any territory included within a district formed under the provisions of this chapter and not benefited in any manner by the district or its inclusion in the district may be excluded from the district. The procedure for exclusion consists of the following:

(1) A petition for exclusion must be initiated by either the directors or the owner or owners of the land sought to be excluded.

(2) The petition must:

(a) give a description of the territory sought to be excluded sufficient to enable a person to determine if the person's property is in the proposed exclusion;

(b) set forth that the territory is not benefited in any manner by the district or its continued inclusion in the district; and

(c) request that the territory be excluded from the district.

(3) When owners of property initiate the petition for exclusion, the petition must be filed with the secretary of the district and must be accompanied by a deposit of $100 to meet the costs incident to the process of exclusion. The unexpended balance of the deposit must be returned to the petitioner.

(4) Upon the filing of the petition with the secretary of the district, the secretary shall call a meeting of the directors to consider the petition. The directors shall approve or disapprove of the merits of the petition. The secretary shall then file the petition, together with a copy of the action of the directors, with the court.

(5) The court shall give notice, hold a hearing, and issue an order either granting or denying the petition.

History: En. Sec. 41, Ch. 100, L. 1969; R.C.M. 1947, 89-3441; amd. Sec. 2824, Ch. 56, L. 2009.

Part 6
Finance

85-9-601. Assessments. (1) To the extent that anticipated revenues from rates, fees, and other charges fixed pursuant to 85-9-407(1) will not be sufficient to meet the district's anticipated obligations for annual operation, maintenance, and replacement or depreciation of works or for payment of the interest and principal on bonded indebtedness, the directors may make an assessment of not more than 2 mills on all taxable real property in the district for the purpose of fully meeting such obligations.

(2) In addition to the assessment authorized by subsection (1), the directors may annually make an assessment of up to 3 mills on the taxable real property in the district to pay interest and principal on bonded indebtedness.

(3) The assessments are a lien upon each lot or parcel of land within the district to the extent of the assessment on each.

(4) All assessments have the same force and effect as other liens for taxes, and their collection shall be enforced in the way provided for enforcement of liens for county taxes. Assessments, if not paid, become delinquent at the same time as county taxes.

(5) Except as provided in 85-9-624, approval of the electors is not required for the making of these assessments.

History: En. Sec. 16, Ch. 100, L. 1969; R.C.M. 1947, 89-3416.

85-9-602. Notice of public budget hearing. (1) The directors shall, prior to the first Monday in May of each year, give notice in accordance with 7-1-2121 of the intention to hold a public budget hearing. The notice shall include the date, time, place, and general agenda.

(2) At the hearing, the directors shall:

(a) review the present budget;

(b) present the budget for the next year;

(c) hear and consider protests from any elector;

(d) adopt the budget for the next year; and

(e) set the assessment for the next year.

History: En. Sec. 17, Ch. 100, L. 1969; R.C.M. 1947, 89-3417; amd. Sec. 260, Ch. 49, L. 2015.

Cross-References

Directors' powers over finance, 85-9-406.

85-9-603. Directors to provide financial information. (1) Before the first Monday in August of each year, the directors shall provide the department of revenue and the county treasurer with:

(a) the budget for the current fiscal year;

(b) a statement of the amount of special assessments to be collected for the districts; and

(c) a listing of all real property within the district.

(2) If the district is located in more than one county, the directors shall provide this information to the department of revenue and each of the affected county treasurers.

History: En. Sec. 18, Ch. 100, L. 1969; R.C.M. 1947, 89-3418; amd. Sec. 156, Ch. 27, Sp. L. November 1993; amd. Sec. 7, Ch. 34, L. 2003.

85-9-604. Collection and investment of assessments. (1) The treasurer of each county in which the district is located shall collect special assessments at the same time and in the same way as county taxes.

(2) If the district is located in more than one county, all assessments collected must be deposited with the treasurer of the county in which the assessments were collected.

(3) The directors shall direct the county treasurer to invest any surplus district funds in saving or time deposits in a state or national bank, savings and loan association, or credit union insured by the federal deposit insurance corporation or the national credit union administration or to invest in direct obligations of the United States government payable within 180 days from the time of investment. All interest collected on the deposits or investments must be credited to the fund from which the money was withdrawn. However, 5% of the interest must be deposited in the general fund of the county.

History: En. Sec. 19, Ch. 100, L. 1969; R.C.M. 1947, 89-3419; amd. Sec. 17, Ch. 421, L. 1985; amd. Sec. 81, Ch. 10, L. 1993.

85-9-605 through 85-9-610 reserved.

85-9-611. Repealed. Sec. 13, Ch. 179, L. 1995.

History: En. Sec. 22, Ch. 100, L. 1969; amd. Sec. 191, Ch. 253, L. 1974; amd. Sec. 53, Ch. 213, L. 1975; R.C.M. 1947, 89-3422; amd. Sec. 7, Ch. 274, L. 1981; amd. Sec. 1, Ch. 287, L. 1983.

85-9-612 through 85-9-620 reserved.

85-9-621. Issuance of bonds — term and multipurpose bonds. A district may issue bonds payable from revenues, assessments, or both, or the district may use other financing as provided by this chapter for the cost of works. Bonds issued shall be for a maximum term of not to exceed 40 years. Bonds for more than one purpose may be sold as a single issue.

History: En. Sec. 26, Ch. 100, L. 1969; amd. Sec. 43, Ch. 234, L. 1971; R.C.M. 1947, 89-3426.

85-9-622. Issuance of bonds — determination of amount. In determining the amount of bonds to be issued, the directors may include:

(1) all costs of works;

(2) all costs and estimated costs of issuance of the bonds;

(3) interest which they estimate will accrue on money borrowed during the construction period and for 6 months after the period.

History: En. Sec. 27, Ch. 100, L. 1969; R.C.M. 1947, 89-3427.

85-9-623. Issuance of bonds — resolution and election. When the directors find it necessary to issue bonds, the directors shall:

(1) pass a resolution that includes:

(a) the purpose or purposes for which the bonds will be issued;

(b) the maximum amount and term of the bonds;

(c) the maximum interest rate that the bonds will bear; and

(d) whether the bonds will be repaid from revenue, assessments, or both;

(2) give notice in accordance with 7-1-2121 that must include the resolution adopted by the directors and the location of polling places unless the election is conducted by mail ballot, as provided in Title 13, chapter 19; and

(3) hold an election conducted in accordance with Title 13, chapter 1, part 5.

History: En. Sec. 28, Ch. 100, L. 1969; R.C.M. 1947, 89-3428; amd. Sec. 70, Ch. 387, L. 1995; amd. Sec. 15, Ch. 234, L. 1997; amd. Sec. 261, Ch. 49, L. 2015.

85-9-624. Issuance of bonds — approval and assessments. (1) For a bond issue to be approved, 40% of the qualified electors must vote thereon and 60% of those voting must approve the issue.

(2) Approval of the bond issue shall authorize the directors to make assessments necessary to pay the principal and interest on bonds issued, as provided in 85-9-601.

(3) The directors shall enter the results of the election in their records.

(4) If otherwise fairly conducted, no irregularities or informalities shall invalidate the election.

(5) Bonds for more than one purpose may be submitted to the electors as a single proposition.

History: En. Sec. 29, Ch. 100, L. 1969; R.C.M. 1947, 89-3429.

85-9-625. Issuance of bonds — details of sale. (1) If a bond issue is approved, the directors shall by resolution provide for the form and execution of the bonds and for issuance of all or any part of the bonds. The bonds may be sold at public or private sale as determined by the directors pursuant to 17-5-107. If the directors conduct a public sale, after adequate notice that sealed proposals will be received, the directors may award the purchase of all or a part of the issue to the best bidder or bidders and may sell at private sale any or all bonds not sold on bids.

(2) The bonds must be sold for a price that is not less than 97% of par or face value with accrued interest to date of delivery, and all bidders shall state the lowest rate of interest at which they will purchase the bonds. The board shall reserve the right to reject any and all bids and to sell the bonds at private sale.

History: En. Sec. 30, Ch. 100, L. 1969; R.C.M. 1947, 89-3430; amd. Sec. 31, Ch. 253, L. 2011.

85-9-626. Tax exempt status. Bonds issued under this chapter have the same force, value, and use as bonds issued by a municipality and are exempt from taxation as property within the state of Montana.

History: En. Sec. 31, Ch. 100, L. 1969; R.C.M. 1947, 89-3431.

85-9-627. Interim receipts — negotiability. Pending preparation of the bonds sold under this chapter, receipts or certificates may be issued to purchasers in the form and with provisions as determined by the directors. Bonds and interim receipts or certificates are fully negotiable as provided by the Uniform Commercial Code—Investment Securities.

History: En. Sec. 32, Ch. 100, L. 1969; R.C.M. 1947, 89-3432.

Cross-References

U.C.C. — investment securities, Title 30, ch. 8.

85-9-628. Bond registration — copy to county. (1) When duly executed, all bonds issued under this chapter must be registered by the county treasurer of the county in which the largest portion of the taxable valuation of real property of the district is located. The bonds must be registered in a book provided for that purpose before being delivered to the purchaser.

(2) The registration must show:

(a) the number and amount of each bond;

(b) the date of issue and date redeemable;

(c) the name of the purchaser;

(d) the amount and due date of all payments required on the bonds.

(3) The directors shall provide the county treasurer with an unsigned and canceled printed copy of each issue of bonds of the district. The copy must be preserved in the treasurer's office.

History: En. Sec. 33, Ch. 100, L. 1969; R.C.M. 1947, 89-3433; amd. Sec. 2825, Ch. 56, L. 2009.

85-9-629. Disposition and investment of sale proceeds. (1) Proceeds from the sales of bonds must be deposited with the county in which the largest portion of the taxable valuation of real property of the district is located.

(2) The county treasurer shall place the proceeds of the bond sale to the credit of the district. The proceeds must be paid by the county treasurer on written order of the directors. Proceeds may only be spent for the purposes for which the bonds were issued.

(3) The directors shall instruct the county treasurer to deposit any part of the proceeds that is not immediately needed for the purpose for which the bonds were issued in a saving or time deposit in a state or national bank, savings and loan association, or credit union insured by the federal deposit insurance corporation or the national credit union administration or to invest in direct obligations of the United States government. The obligations must be payable within not to exceed 180 days from the time of deposit or investment.

History: En. Sec. 34, Ch. 100, L. 1969; R.C.M. 1947, 89-3434; amd. Sec. 18, Ch. 421, L. 1985; amd. Sec. 82, Ch. 10, L. 1993.

85-9-630. Refunding bonds. (1) Refunding bonds may be issued in the same way as any other bonds authorized by this chapter.

(2) All bonds, original issue or refunding issue, shall be redeemable when one-half of the term or 10 years of the term for which they were issued, whichever may be the less, has expired. Redemption may be made on any interest due date of any bond prior to its maturity after the bond shall be subject to redemption as herein provided. The right of redemption, as herein provided, must be stated on the face of each bond.

History: En. Sec. 35, Ch. 100, L. 1969; R.C.M. 1947, 89-3435.

85-9-631. Bond retirement fund. Revenue, assessment, and other funds on hand, including reserves pledged for the payment and security of outstanding bonds, may be deposited in a fund created for the retirement of bonds and may be invested and disbursed as provided by this chapter, to the extent consistent with the resolution authorizing the outstanding bonds.

History: En. Sec. 36, Ch. 100, L. 1969; R.C.M. 1947, 89-3436.

85-9-632. Revolving funds. (1) The directors by resolution may establish revolving funds to finance, on a reimbursable basis:

(a) construction, purchase, lease, and operation of revenue-producing works;

(b) contracts to provide services or facilities.

(2) Money in the revolving fund shall not be spent for any purposes other than those specified in the resolution. However, excess money may be transferred to any sinking and interest fund of the district.

(3) The county treasurer of the county having the largest portion of the taxable valuation of real property of the district shall maintain a separate account for each revolving fund of the district, and all money collected under the resolution shall be deposited with the county treasurer.

History: En. Sec. 37, Ch. 100, L. 1969; R.C.M. 1947, 89-3437.
